

Product Highlights

Comprehensive Security

Advanced security features with support for multiple authentication methods protect your network from malicious attacks.

Reliable Access Network

Minimise disruptions to your network with Ethernet Ring Protection Switching whilst D-Link Loopback Detection automatically disables a port when a loop is detected.

Future Ready

Virtual IPv6 ready certified ensures seamless integration with next generation networks and guarantees interoperability for IPv6 environments.

DGS-3000-10TC

10-Port Gigabit L2 Managed Switch

Features

Designed for Gigabit Enterprise/Metro Access

- 8 10/100/1000BASE-T ports and 2 combo 10/100/1000BASE-T/SFP uplink ports
- Virtual stacking, up to 32 units per virtual stack managed through a single IP address

Reliable Hardware and Software Features

- 6 kV surge protection for Ethernet ports
- 50 ms Ethernet recovery mechanism for various network topologies
- Protocol-less loop detection protect network from uncontrolled grey area

Outstanding Triple Play Support

- Multiple Set-Top Box (STB) per leased line
- Easy channel and service package management
- Strict STB authentication

Data Leakage Prevention

- Several user/device authentication methods
- Clientless user/device authentication, easy to deploy
- Strict address binding to prevent malicious attack

D-Link Green

- Supports 802.3az EEE
- Power saving functions

The DGS-3000-10TC is part of the Layer 2 family of D-Link's managed switch product line that provides wired Gigabit speed access for metro and campus networks. The DGS-3000-10TC is designed as a 1U rackmount case suitable for enterprise access or service provider telecom cabinets, maximising network performance without compromising on reliability and security. Green technology decreases energy costs by reducing power consumption, without compromising on performance.

Reliable Networking

All of the Ethernet ports of the DGS-3000-10TC support 6kV surge/lightning protection. This feature protects the switch from power surges due to lightning or improper electrical wiring when the Ethernet cables are exposed in open spaces, such as in old buildings. For Ethernet link fail-over, the DGS-3000-10TC supports 802.1D Spanning Tree Protocol (STP), 802.1w Rapid Spanning Tree Protocol (RSTP), and 802.1s Multiple Spanning Tree Protocol (MSTP), to allow automatic backup of bridge paths. Using these features, the transmission and reception of frames can be guaranteed even during a network failure. For mission critical environments, the switches also support ITU-I G.8032 Ethernet Ring Protection Switching (ERPS); traffic can be rerouted around the ring within 50 milliseconds, minimising disruption to service. D-Link Loopback Detection (LBD) is a protocol-less loop detection function that prevent loop events from causing congestion in uncontrolled network segments such as unmanaged switches or customer networks. The DGS-3000-10TC also support 802.1AX and 802.3ad Link Aggregation, which allows grouping of multiple ports in parallel to increase bandwidth and redundancy for high availability and load sharing in a multi-client environment.

Virtual Stacking reduces the number of IP addresses needed on a network by configuring up to 32 devices to appear as a single unit with one IP address. This simplifies network management for small workgroups and allows for switches to be added without special cabling.

Solid Security with High Availability

The DGS-3000-10TC offers various user/device authentication features including 802.1X, Web-based Access Control (WAC)¹ and MAC-based Access Control (MAC). The clientless WAC¹ and MAC functions provide convenience for IT managers implementing user/device authentication into a network. It permits administrators to control security without installing client software on each network device; this is especially important for devices on which the software cannot be installed. For a greater security level, the DGS-3000-10TC also supports Compound Authentication¹, letting IT managers choose between multiple authentication methods for any single device. Selectable host-based authentication and authorisation provides the option to finely control access by each device in the network. For advanced applications, the switches also provide RADIUS and TACACS accounting information for integration of backend services such as a billing system or advanced user/device control. In mission critical networks, the DGS-3000-10TC supports strict address and interface binding function via IP-MAC-Port Binding and ARP Spoofing Prevention to protect the networks from Man-In-The-Middle or ARP Spoofing attacks.

To maintain a high availability network, the DGS-3000-10TC uses D-Link Safeguard Engine to manage the CPU and ensure that your network stays up even if it is overloaded by malicious traffic caused by worms and viruses. The switches also support DHCP Screening to filter out unauthorised DHCP offerings from rogue DHCP servers or routers. Other security features such as BPDU Attack Protection, DoS Attack Prevention, and L3 Control Packet Filtering help to block leaks caused by protocol or behavioral security intrusions.

Deliver Triple Play Services

The DGS-3000-10TC features full L2 multicast functions, including IGMP/MLD snooping, fast leave, and filtering. With L2 multicast support, the switches can handle the increasingly popular IPTV service. Host-based IGMP/MLD Snooping provide service to multiple IPTV subscribers per physical interface and ISM VLAN registers multicast streams in a multicast VLAN to save bandwidth on the network backbone. The ISM VLAN profiles allow users to bind or replace the channel profiles of subscription ports quickly and easily. The DGS-3000-10TC also supports IGMP authentication, which can prevent rogue IPTV subscriptions by authenticating Set Top Boxes as well as channel switching to secure Internet Service Provider (ISP) revenues.

The DGS-3000-10TC also supports advanced Quality of Service (QoS) functions to help ISPs reliably deliver high-quality triple play services. Flexible packet classification can be based on various header fields or user-defined packet content to help administrators prioritise network traffic. Two-rate and single-rate Three Color Marker (trTCM/srTCM) help classify traffic streams into conforming and nonconforming groups to guarantee the minimum bandwidth for prioritised packets. The Bandwidth Control feature allows ISPs to define the upstream/downstream throughput levels for each port with granularity down to 64 kbps.

Easy Maintenance and Troubleshooting

The DGS-3000-10TC features rich Operations, Administration, and Management (OAM) features to help ISPs reduce the burden of maintenance and troubleshooting. Cable diagnostics display the status of Ethernet cables and locate the position of cable errors remotely, helping providers cut on-site support costs. 802.1ag Connectivity Fault Management (CFM) provides administrators with a convenient tool to monitor and troubleshoot end-to-end service networks. This allows service providers to check connectivity, isolate network issues, and identify the affected customers. D-Link Unidirectional Link Detection (DULD) helps detect a broken one-way fiber connection, improving the stability of the fiber infrastructure in a Metropolitan Area Network.

IPv6 Ready

The DGS-3000-10TC is IPv6 ready and supports various IPv6 functions such as MLD Snooping, WAC¹, IPv6 ACL/QoS, and IMPBv6 to ensure seamless integration of next generation networks. The DGS-3000-10TC also supports a IPv4/v6 dual stack function that allows the switch to act as a bridge between IPv4 and IPv6 networks. Finally, all DGS-3000-10TC are certified to be IPv6 ready, which guarantees interoperability for IPv6 environments.

D-Link Assist Rapid Response Support

If the worst should happen to your network you need the very best support and fast. Downtime costs your business money. D-Link Assist maximises your uptime by solving technical problems quickly and effectively. Our highly trained technicians are on standby around the clock, ensuring that award-winning support is only a phone call away.

With a choice of three affordable service offerings covering all D-Link business products, you can select the package that suits you best:

D-Link Assist Gold - for comprehensive 24-hour support

D-Link Assist Gold is perfect for mission-critical environments where maximum uptime is a high priority. It guarantees four hour around-the-clock response. Cover applies 24/7 for every day of the year including holidays.

D-Link Assist Silver - for prompt same-day assistance

D-Link Assist Silver is designed for 'high availability' businesses that require rapid response within regular working hours. It provides a four hour response service Monday to Friday from 8am to 5pm, excluding holidays.

D-Link Assist Bronze - for guaranteed response on the next business day

D-Link Assist Bronze is a highly cost-effective support solution for less critical environments. Response is guaranteed within eight business hours Monday to Friday from 8am to 5pm, excluding holidays.

D-Link Assist can be purchased together with any D-Link business product. So whether you're buying switching, wireless, storage, security or IP Surveillance equipment from D-Link, your peace of mind is guaranteed. D-Link Assist also offers installation and configuration services to get your new hardware working quickly and correctly.

Technical Specifications		DGS-3000-10TC
Interface		
Ports	<ul style="list-style-type: none"> • 8-Port 10/100/1000BASE-T • 2-Port Combo 10/100/1000BASE-T/SFP 	
Console Port	RJ-45	
Performance		
Switching Capacity	20 Gbps	
64 Byte Packet Forwarding Rate	14.88 Mpps	
MAC Address Table	16K Entries	
DRAM for CPU	128 MB	
Packet Buffer Memory	1.5 MB	
Flash Memory	32 MB	
Jumbo Frame	12,288 Bytes	
Physical		
MTBF	711565.6 hours	
Acoustic	33.8 dB	
Heat Dissipation	56.26 Btu/hour	
Power Input	AC Input 100 to 240 V AC, 50 to 60 Hz Internal Universal Power Supply	
Max Power Consumption	16.5 W	
Dimensions (W x D x H)	228.5 x 195 x 44 mm	
Weight	1.11 kg	
Ventilation	Smart Fan (Turns on at > 26 °C; Turns off at < 20 °C)	
Power Surge Protection	All Ethernet ports support IEC61000-4-5 10/700us 6 kV surge protection	
Operation Temperature	0 to 50°C (32 to 122°F)	
Storage Temperature	-40 to 70°C (-40 to 158°F)	
Operation Humidity	10% to 90% RH	
Storage Humidity	5% to 90% RH	
Emission (EMI)	CE, FCC, IC, C-Tick, VCCI, BSMI	
Safety	CB, UL/cUL, BSMI	
Certifications	IPv6 Ready Logo Phase 2	

Software Features		
Virtual Stacking	<ul style="list-style-type: none"> • D-Link Single IP Management • Up to 32 units per Virtual Stack 	
L2 Features	<ul style="list-style-type: none"> • 16K MAC Address Table • Flow Control: <ul style="list-style-type: none"> • 802.3x Flow Control • HOL Blocking Prevention • Jumbo Frames up to 12K bytes • Spanning Tree Protocols: <ul style="list-style-type: none"> • 802.1D STP • 802.1w RSTP • 802.1s MSTP • BPDU Filtering • Root Restriction 	<ul style="list-style-type: none"> • Loopback Detection • Link Aggregation: <ul style="list-style-type: none"> • Compliant with 802.1AX and 802.3ad • Max. 5 groups, 8 ports per group • Port Mirroring: <ul style="list-style-type: none"> • Supports 1 Mirroring group • Supports One-to-One, Many-to-One, Flow-based (ACL) Mirroring • Ethernet Ring Protection Switching (ERPS) • L2 Protocol Tunneling (L2PT)
L2 Multicasting	<ul style="list-style-type: none"> • IGMP Snooping: <ul style="list-style-type: none"> • IGMP v1/v2 Snooping, v3 awareness • Supports 1024 groups • Port/Host-based IGMP Snooping Fast Leave • Report Suppression • IGMP Authentication • IGMP/MLD Proxy Reporting • Limited IP Multicast (IGMP Filtering) 	<ul style="list-style-type: none"> • MLD Snooping: <ul style="list-style-type: none"> • MLD v1, MLD v2 awareness • Supports 1024 groups • Host-based MLD snooping Fast Leave
VLAN	<ul style="list-style-type: none"> • VLAN Group: <ul style="list-style-type: none"> • Max. 4094 VLAN • Port-based VLAN • MAC-based VLAN • GVRP: <ul style="list-style-type: none"> • Max. 255 dynamic VLANs • 802.1v Protocol VLAN • 802.1Q Tagged VLAN 	<ul style="list-style-type: none"> • Double VLAN (Q-in-Q): <ul style="list-style-type: none"> • Port-based Q-in-Q • Selective Q-in-Q • ISM VLAN • VLAN Translation • Voice VLAN • VLAN Trunking
