HP's first Mini Workstation

Meet unique financial services needs with HP Z Workstations

From the trading floor to the corporate office, financial services companies have distinct computing needs. HP helps you meet these needs with a portfolio of workstations that is available and supported globally. HP Z Workstations are designed for extreme performance, reliability and easy servicing—characteristics that help you avoid downtime and keep your staff productive on both desktop and mobile systems. With HP Z Workstations you have a choice of single- and dual-processor designs, small and regular form factors, ECC memory options, and support for up to eight monitors.[1] And you can deploy HP Z Workstations with the confidence that comes from knowing that HP maintains dedicated workstation design and engineering teams.

Introducing the HP Z2 Mini Workstation. The new standard for the trading floor

Finally a revolutionary mini PC for the trading desk that delivers breakthrough power and versatility in a small, elegant design. Made with direct input from our global financial customers, the Z2 Mini G3 Workstation gives you both performance and reliability for the best trading desk experience.

Why HP Z Workstations

When it comes to personal computing systems, workstations are in a class of their own. Despite entry price points that can rival those of desktop PCs, workstations provide features and benefits that go far beyond those of today's business and consumer systems. Learn more about HP Z Workstation benefits.

HP Z Workstations and other innovative solutions for financial services

The HP Z Workstation family meets the full range of your needs—from performance-driven computing and design work in space-constrained environments to extreme visualization and analysis with complex datasets. There is an HP Z Workstation for every finance requirement.

HP Z2 Mini

The new standard for the trading floor >>

Finally a revolutionary mini PC for the trading desk that delivers breakthrough power and versatility in a small, elegant design.

HP Z240

Power, price, and size >>

The world's number one ranked entry level workstation features a choice of Tower or SFF configurations. It just got better with the HP Z240 which packs the performance, features, and reliability of a workstation into the price point of a desktop PC.

HP Z640

Flexible, powerful, ready to work >>

Concentrate on your work, not your workstation, as you experience powerful performance, whisper-quiet computing, and tool-less access in a conveniently compact design.

HP ZBook Mobile Workstations

Mobility for financial services >>

Capture your inspiration wherever you go and create anywhere using HP's thinnest and lightest ZBook Workstation Ultrabook™.[2]

HP Z Displays

Take it to the edge >>

Create a seamless multi-display setup with HP Narrow Bezel Displays now available in sizes ranging from 22" to 27" diagonal. These displays have a virtually borderless screen for maximum impact imagery, factory color calibration to ensure optimal color accuracy, and flexible connectivity for all of your devices.

HP Thin Client Family

Meet the HP Thin Client family >>

Client virtualization and cloud computing are the future. It's easier than ever to adapt your technology to your quickly changing business needs with thin computing.

Comprehensive Solutions Portfolio

1. Support for external displays as a standard feature through integrated processor-based graphics is dependent upon the particular workstation configuration; the actual number of displays supported will vary. An optional graphics solution will be required for the support of additional displays. Additional cables required. HD (high-definition) content required to view HD images.
2. Not all configurations will qualify as Ultrabooks™.
