MODEL NUMBER: U444-06N-H3U-C

4K USB-C adapter with PD Charging connects a 4K HDMI monitor and 3 USB peripherals to a USB-C or Thunderbolt 3 device.

### Features

#### Mini Docking Station Connects an HDMI Monitor to Your USB-C or Thunderbolt 3 Device

This USB-C to HDMI cable helps you transmit digital audio and 4K video from your tablet, laptop, Chromebook, MacBook, smartphone or PC to an HDMI-enabled television, monitor or projector. It's an ideal tool for giving video presentations in conference rooms and classrooms, editing multiple documents on a larger screen, or streaming video for digital signage in crystal-clear 4K.

#### Supports USB-C DisplayPort Alternate Mode for Transmitting Audio/Video Signals

By connecting the built-in USB-C cable to a source device that supports USB DisplayPort Alt Mode, you can output 4K video and digital audio to a compatible monitor, television or projector without installing special software drivers.

#### Transmits Crystal-Clear 4K HDMI Video and Digital Audio

To send digital audio and Ultra High Definition video to a 4K-ready HDMI television, projector or monitor, connect the HDMI port to the display using an HDMI cable (such as Tripp Lite's P568-Series high-speed HDMI cables, sold separately). The USB to HDMI 4K adapter supports video resolutions up to 3840 x 2160 (4K x 2K) at 30 Hz, as well as HDCP 1.4 and HDMI 1.4 compatibility. It's backward compatible with 1080p displays, allowing you to use it with older equipment.

#### BC 1.2-Compliant USB Port Transfers Data at Fast USB 3.1 Gen 1 Speeds

Three USB-A ports accept USB peripherals, such as a flash drive, keyboard and printer, and transfers data at speeds up to 5 Gbps, which is 10 times faster than USB 2.0. One port complies with BC 1.2 standards, providing up to 1.5 amps (7.5 watts) for charging and powering mobile devices. The USB Type-C adapter is backward compatible with previous USB generations, so you can continue using older peripherals while getting high-speed performance from new devices.

#### PD Charging Port Charges Connected Device via AC Wall Charger

The USB-C Power Delivery 3.0 port provides power output up to 5 amps (100 watts), which is more than sufficient for charging and powering the connected source device, such as a MacBook or Chromebook.

#### Built-In USB-C Cable Connects in Either Direction

Connect the reversible USB-C plug to your source device's USB-C or Thunderbolt 3 port. The fumble-free
