The VisionTek VT70 USB 3.0 to DisplayPort adapter allows you to easily add additional displays to your USB 3.0 enabled system. With this plug and play adapter, you can easily increase your desktop workspace to increase productivity with one small adapter. Support for individual or cloned screens, takes your desktop to the next level in visual real estate. Ideal for professionals needing to expand their workspace, or laptop users who just need that extra screen. The USB 3.0 to DisplayPort adapter is powered by the USB 3.0 port on your system and requires no additional power. For those users who already have a Dock, this adapter can be plugged into the USB 3.0 port of the Dock to provide additional displays.
