

AE-66

Full Size Sound in Half the Space

The AE-66 features an innovative hinge design that allows both ear cups to fold away into the headband. The AE-66 stows away easily in classrooms and storage lockers that don't have space to spare. However, the AE-66 does not compromise on sound quality; vinyl ear pads and full-size speakers combine to produce a high-fidelity sound that enables students to listen to audio instruction with unmatched clarity.

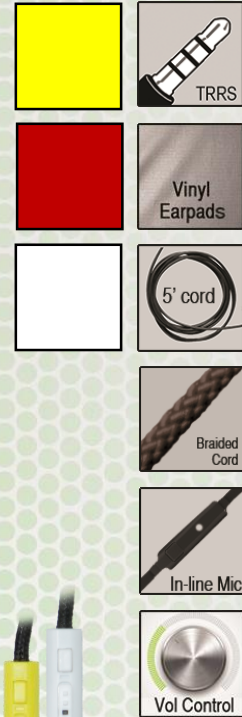

High Comfort Padding

AVID found some of the most comfortable ear pads available in the industry and put them in one of the most highly adjustable headsets available. Additional headband padding also holds the AE-66 securely in place without compromising comfort or fit. By conforming to the ear extremely well, the AE-66 also offers superior passive noise reduction properties.

Classroom Packs

For your convenience, AVID has made the AE-66 available in classroom packs of 24. The headphones are protected during transportation and storage in a durable hard case.

This product complies with CPSIA and TPCH regulations.
