

RapidDoc™ Kiosk System

for the iPad

The ArmorActive RapidDoc product line is a highly modular business solution that solves many of the challenges associated with tablet mobility, creating a lower total cost of ownership.

Designed With Tablet Modularity In Mind

An affordable investment that supports your business strategy and future upgrades.

Modular Design with Lowest Total Cost of Ownership

Universal base offering support and connectivity for multiple OEM tablets and operating systems. Supports any ArmorActive Enclosure with the ease of use and future upgrades as new tablets are introduced into the marketplace.

Flexible and Secure User Authentication

Multiple Tablet release options:

- RFID (included)
- Supports:
 - Software unlock (Pin code)
 - User name and password
 - Biometric (Fingerprint)
 - Near-frequency communication (NFC)

Two Enclosure Options with Integrated Hand Straps

- Echo Enclosure - Stylish and rugged rubber
- Elite Enclosure - Sleek and professional polycarbonate ABS

RapidDoc Lite™ Version

Perfect solution for iOS deployments not needing the USB / Ethernet integration capabilities.

Engineered for Tablet Mobility

RapidDoc System solves many of the challenges associated with how tablets are used in business.

Quick and Easy Dock and Un-Dock

A fluid and seamless latch technology securing the tablet into place with RFID release technology.

Full Power & Security Technology

Once tablet is docked, charging begins and tablet is secured.

Payment Peripheral Integration Options

Accessories are provided with power, and connect data via MiFi or Bluetooth.

User Friendly Hand Strap or Shoulder Strap

Increases tablet interaction and protection for mobility applications.

Flexible Integration & Installation

The RapidDoc System makes it easy to deploy your tablet mobility initiatives.

Multiple Mounting Options

VHB or metal plate for the counter, standard gang box for the wall, or standard 75mm VESA for wall or counter.

Hidden Cable Management

Clean display, power cords are protected & routed within the base (optional accessory required).

Multiple Orientations

Easily adjust to Portrait or Landscape mode based on software application/responsive design.

Easy-to-Implement Point of Sale System

Perfect mPOS solution for increased revenue and mobility, without adding a lot of complexity to your business systems.
