1. Remove the packing tape. Lift the top cover, and then remove and recycle the orange plastic handle with the attached black sheet.

2. Install the input tray, load paper, and then slide the cover into place over the tray. Pull out the output bin extension.
Plug in the printer. The printer turns on when it is plugged in and can take up to 1 minute to warm up. You will hear a series of noises, which is normal. When the Ready light stops blinking, the printer is ready.

Note: Do not press the Power button as this will turn off the printer and stop the warm-up process.

To complete setup, get HP software at 123.hp.com.

Note: To set up and print from a mobile device, you must have a wireless-capable printer.
