HDMI® to DisplayPort® Converter 4K30

Connect a device with an HDMI output to a display with a DisplayPort input

OVERVIEW

The HDMI to DisplayPort Converter 4K30 is a perfect solution for connecting devices with an HDMI output to a display with a DisplayPort input. This converter is ideal for audio/video presentations in schools, meeting rooms and huddle spaces.

This simple, plug and play converter does not require software or drivers for install, and the device is powered through USB—so no additional power adapters are needed. The compact, light weight design makes it easy to carry for travel or on the go.

This converter carries a digital audio/video signal, supporting up to a 3840 x 2160P 4K30 resolution—meeting the requirements for high performance presentations. The dongle style converter provides strain relief that protects the port from damage as cords are moved.

FEATURES

- Converts an HDMI output to DisplayPort
- Dongle style adapter reduces strain on ports
- USB bus powered
- Plug and play, with no software or drivers required
- Supports resolutions up to 3840x2160p at 30Hz

ITEM DESCRIPTION

22323 HDMI to DisplayPort Converter 4K30

DATA SHEET
