Wireless Blood Pressure Monitor

BP monitoring made easy

BP monitoring made easy

The Wireless Blood Pressure Monitor measures the systolic, diastolic blood pressure and heart rate. Results are automatically compared to National Health Institute standards for a better understanding.

Health Mate application

The free Health Mate application makes tracking easy by reminding you to take measurement and by providing useful content on blood pressure and hypertension.

Accurate tracking

FDA and medical EC approved, the Wireless Blood Pressure Monitor ensures an accurate monitor of your blood pressure over time.

iOS and Android compatible

Thanks to its enhanced connectivity, the Wireless Blood Pressure Monitor is compatible with a wide range of iOS and Android smartphones and tablets.

Dual connectivity

The Wireless Blood Pressure Monitor can take measurements using its Bluetooth 4.0 connectivity or by plugging it to your tablet or smartphone using a USB cable.

Unique design

The Wireless Blood Pressure Monitor integrates all the elements of a blood pressure monitor in a single, beautiful and convenient object.

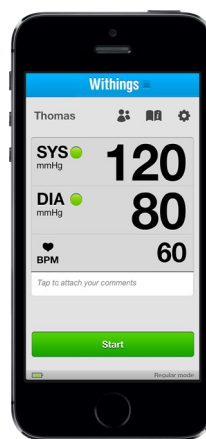

Application

Free Health Mate application

The Wireless Blood Pressure Monitor works in conjunction with the free Withings Health Mate Application for iOS and Android.

The application enables you to measure your blood pressure in a single gesture, synchronizes it with your online account and compares your results to the National Health Institute standards for an easy understanding of their meaning.

The application automatically graphs your results in order to detect blood pressure trends. The app even reminds you to take your blood pressure. Once you've collected some results, you can send them to your physician in an Excel or CSV file using the Health Mate application.

Specifications

Wireless Blood Pressure Monitor

- Cuff oscillometric method
- Cuff circumference: 9" - 17" (22 - 42 cm)
- Accuracy: ± 3 mmHg or 2% reading (pressure)

Storage and memory
