Optimize efficiency with HP StoreOnce Catalyst

HP StoreOnce Catalyst Solution Service

HP StoreOnce with StoreOnce Catalyst software is the most comprehensive disk based data protection solution in the industry.

Today's new, unpredictable virtual and cloud workloads, together with the explosive growth of human information, requires enterprise data centers to deploy innovative technology to meet this growing trend head on.

For your enterprise to be able to sustain this growth rate—and store it properly—a new generation of data protection and deduplication technology is required.

You can address this growing problem with HP StoreOnce with StoreOnce Catalyst software, the most comprehensive data protection solution in the industry.

And with the help of the HP StoreOnce Catalyst Solution Service, you can configure the best possible performance for your HP StoreOnce Catalyst environments.

Service overview

Choose from three levels of service based on the complexity of your environment and the level of service desired:

Level 1—Your HP service professional sets up HP StoreOnce Catalyst software for one device, including the integration of the current supported production backup applications and shows you how to set up the Catalyst software. HP service professionals provide an overview of the HP StoreOnce Catalyst features and prepare you to architect, design, and deploy into the production environment.

Level 2—Level 2 service includes all Level 1 services plus takes you through the HP StoreOnce Catalyst Architecture Workshop. We work together with you to deploy a limited or partial part of the design into your production environment for up to four devices and with up to three remote locations.

Level 3—Level 3 includes all Level 2 services and the workshop, plus a custom statement of work (SOW) based on the HP StoreOnce Catalyst Architecture Workshop where we work with you to deploy the custom design or redesign of your production backup environment.

Customize your IT lifecycle management, from acquisition of new IT, management of existing assets, and removal of unneeded equipment.

The HP Storage Services portfolio is designed to speed service delivery, build for growth, and keep technology running.

Service benefits

Count on the HP StoreOnce Catalyst Service to:

• Deliver the right level of optimal performance for your HP StoreOnce Catalyst environments

• Speed up configuration to reduce project execution time and risk to the storage environment

• Rely on HP service professionals for an expert configuration, while your IT staff stays focused on core tasks and priorities

The path to converged storage simplified
Converged storage eliminates the boundaries that exist within outdated, siloed data center environments by combining management orchestration across servers, networks, and storage with scale-out, federated software and standardized hardware platforms that leverage proven HP technology.

That's the HP Converged Storage definition. But it's really all about what converged storage can do for your business—helping you successfully transition from traditional IT environments to new models that allow you to focus less on current system operation and maintenance and more on forward-thinking business innovation.

Keep moving ahead

We can help you transform traditional infrastructure, protect and optimize data, and accelerate the benefits of service-centric IT with a portfolio designed and delivered by the world's experts in converged storage architecture.

Trust our HP Storage Services professionals to use our strategic and technical know-how to make technology work for you. We collaborate with your team to transform storage and data management. From strategy and alignment, to design through implementation and support, we understand the needs of your data center.

Our knowledge—coupled with our approach, people, expertise, and processes—can help you deliver business value from IT. As technology continues to expand your business with new opportunities, we respond to capitalize on it for you so your business can solve your most pressing challenges—and always be ready for what's next.
