Symbols Used in This Document

⚠️ Warning
Instructions that, if ignored, could result in death or serious personal injury caused by incorrect operation of the equipment. These must be observed for safe operation.

⚠️ Caution
Instructions that, if ignored, could result in personal injury or material damage caused by incorrect operation of the equipment. These must be observed for safe operation.

⚠️ Important
Instructions including important information. To avoid damage and injury or improper use of the product, be sure to read these indications.

⚠️ Note
Instructions including notes for operation and additional explanations.

 Basics
Instructions explaining basic operations of your product.

⚠️ Note
• Icons may vary depending on your product.

Touch-enabled Device Users (Windows)

For touch actions, you need to replace "right-click" in this document with the action set on the operating system. For example, if the action is set to "press and hold" on your operating system, replace "right-click" with "press and hold."
Trademarks and Licenses

• Microsoft is a registered trademark of Microsoft Corporation.
• Windows is a trademark or registered trademark of Microsoft Corporation in the U.S. and/or other countries.
• Windows Vista is a trademark or registered trademark of Microsoft Corporation in the U.S. and/or other countries.
• Internet Explorer is a trademark or registered trademark of Microsoft Corporation in the U.S. and/or other countries.
• Mac, Mac OS, AirPort, Safari, Bonjour, iPad, iPhone and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. App Store, AirPrint and the AirPrint logo are trademarks of Apple Inc.
• IOS is a trademark or registered trademark of Cisco in the U.S. and other countries and is used under license.

Apache License

Version 2.0, January 2004

http://www.apache.org/licenses/
TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION
1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent
litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
2. You must cause any modified files to carry prominent notices stating that You changed the files; and
3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Enter keywords in the search window and click (Search).
You can search for target pages in this guide.
Entry example: "(your product's model name) load paper"

Search Tips

You can search for target pages by entering keywords in the search window.

Important
• This function may not be available in some countries/regions.

Note
• The displayed screen may vary.
• When searching from this page without entering your product's model name or your application's name, all products supported by this guide will be considered for the search.
   If you want to narrow down the search results, add your product's model name or your application's name to the keywords.

• Searching for Functions
   Enter your product's model name and a keyword for the function you want to learn about
   Example: When you want to learn how to load paper
   Enter "(your product's model name) load paper" in the search window and perform a search

• Troubleshooting Errors
   Enter your product's model name and a support code
   Example: When the following error screen appears
   Enter "(your product's model name) 1003" in the search window and perform a search
**Note**

- The displayed screen varies depending on your product.

**Searching for Application Functions**

Enter your application's name and a keyword for the function you want to learn about

Example: When you want to learn how to print collages with My Image Garden
Enter "My Image Garden collage" in the search window and perform a search

**Searching for Reference Pages**

Enter your model name and a reference page title*

* You can find reference pages more easily by entering the function name as well.

Example: When you want to browse the page referred to by the following sentence on a scanning procedure page
Refer to "Color Settings Tab" for your model from Home of the *Online Manual* for details.
Enter "(your product's model name) scan Color Settings Tab" in the search window and perform a search
Using the Printer

➤ Printing Photos from a Computer
**Printing Photos from a Computer**

This section describes how to print photos with My Image Garden.

This section uses windows displayed when the Windows 8.1 operating system (hereinafter referred to as Windows 8.1) is used.

1. Open the paper support (A).

2. Pull out the paper output tray (B), then open the output tray extension (C).

3. Load paper vertically WITH THE PRINT SIDE FACING YOU.

4. Align the paper guides (D) with the paper width.

5. Click the My Image Garden icon (E) in Quick Menu.

   The **Guide Menu** screen is displayed.
Note

• The number and types of icons displayed vary depending on your region, the registered printer/scanner and the installed applications.

6. Click the **Photo Print** icon (F).

7. Click the folder (G) with photos you want to print.

8. Click the photos (H) you want to print.

   **For Windows:**
   To select two or more photos at a time, click photos while pressing the Ctrl key.

   **For Mac OS:**
   To select two or more photos at a time, click photos while pressing the command key.

9. Click **Print** (I).
10. Specify the number of copies, your printer name, media type, etc. (J).

11. Click **Print** (K).

   **For Mac OS:**
   
   Click **OK** when the confirmation message appears, then click **Print**.

   **Note**
   
   - My Image Garden lets you use images on your computer, such as photos taken with a digital camera, in a number of ways.

Printer Functions

- Print Photos Easily Using My Image Garden
Print Photos Easily Using My Image Garden

Organize Images Easily
In My Image Garden, you can register the names of people and events to photos. You can organize photos easily as you can display them not only by folder but also by calendar, event, and person. This also allows you to find the target photos easily when you search for them later on.

<Calendar View>

<People View>

Display Recommended Items in Slide Shows
Based on the information registered to photos, Quick Menu automatically selects the photos on your computer and creates recommended items such as collages and cards. The created items appear in slide shows.

If there is an item you like, you can easily print it in just two steps.
1. In Image Display of Quick Menu, select the item you want to print.
2. Print the item with My Image Garden.
Place Photos Automatically

Delightful items are created easily as the selected photos are placed automatically according to the theme.

Other Various Functions

My Image Garden has many other useful functions.

Refer to the following for details.

- What You Can Do with My Image Garden (Windows)
- What You Can Do with My Image Garden (Mac OS)
Handling Paper, Ink Tanks, etc.

➤ **Loading Paper**
  - Loading Plain Paper / Photo Paper
  - Loading Envelopes

➤ **Refilling Ink Tanks**
  - Refilling Ink Tanks
  - Checking Ink Status
Loading Paper

- Loading Plain Paper / Photo Paper
- Loading Envelopes
Loading Plain Paper / Photo Paper

You can load plain paper or photo paper.

Important

• If you cut plain paper into small size such as 4" x 6" (10 x 15 cm) or 5" x 7" (13 x 18 cm) to perform trial print, it can cause paper jams.

Note

• We recommend Canon genuine photo paper for printing photos. For details on the Canon genuine paper, see Media Types You Can Use.

• You can use general copy paper or Canon Red Label Superior WOP111/Canon Océ Office Colour Paper SAT213.

For the page size and paper weight you can use for this printer, see Media Types You Can Use.

1. Prepare paper.

Align the edges of paper. If paper is curled, flatten it.

Note

• Align the edges of paper neatly before loading. Loading paper without aligning the edges may cause paper jams.
• If paper is curled, hold the curled corners and gently bend them in the opposite direction until the paper becomes completely flat.

For details on how to flatten curled paper, see "Load the paper after correcting its curl." in Paper Is Smudged / Printed Surface Is Scratched.

• When using Photo Paper Plus Semi-gloss SG-201, even if the sheet is curled, load one sheet at a time as it is. If you roll up this paper to flatten, this may cause cracks on the surface of the paper and reduce the print quality.

2. Open the paper support (A).

3. Pull out the paper output tray (B) and open the output tray extension (C).
4. Slide the paper guides (D) to open them, and load the paper in the center of the rear tray WITH THE PRINT SIDE FACING YOU.

5. Slide the paper guides (D) to align them with both sides of the paper stack.
   Do not slide the paper guides too hard against the paper. The paper may not be fed properly.

---

**Important**

- Always load paper in the portrait orientation (E). Loading paper in the landscape orientation (F) can cause paper jams.

---

**Note**

- Do not load sheets of paper higher than the load limit mark (G).
Note

- When printing, select the size and type of the loaded paper on the print settings screen of the printer driver.
Loading Envelopes

You can load Envelope DL and Envelope Com 10.

The address is automatically rotated and printed according to the envelope's direction by specifying with the printer driver properly.

Important

• Do not use the following envelopes. They could jam in the printer or cause the printer to malfunction.
  • Envelopes with an embossed or treated surface
  • Envelopes with a double flap
  • Envelopes whose gummed flaps are already moistened and adhesive

1. Prepare envelopes.
   • Press down on all four corners and edges of the envelopes to flatten them.

   ![Image of envelopes being pressed down]

   • If the envelopes are curled, hold the opposite corners and gently twist them in the opposite direction.

   ![Image of envelopes being twisted]

   • If the corner of the envelope flap is folded, flatten it.
   • Use a pen to press the leading edge in the inserting direction flat and sharpen the crease.

   ![Image of leading edge being flattened]

   The figures above show a side view of the leading edge of the envelope.

Important

• The envelopes may jam in the printer if they are not flat or the edges are not aligned. Make sure that no curl or puff exceeds 0.1 inch (3 mm).

2. Open the paper support (A).

3. Pull out the paper output tray (B) and open the output tray extension (C).
4. Slide the paper guides (D) to open them, and load the envelopes in the center of the rear tray WITH THE ADDRESS SIDE FACING YOU.

The folded flap of the envelope will be faced down on the left side.

Up to 10 envelopes can be loaded at a time.

5. Slide the paper guides (D) to align them with both sides of envelopes.

Do not slide the paper guides too hard against the envelopes. The envelopes may not be fed properly.

E: Rear side
F: Address side

>>> Note

- Do not load envelopes higher than the load limit mark (G).
Note

• When printing, select the size and type of the loaded envelopes on the print settings screen of the printer driver.
Refilling Ink Tanks

- Refilling Ink Tanks
- Checking Ink Status
Refilling Ink Tanks

Check the remaining ink level with the ink tank indicator on the front of the printer. If the ink level is near the lower limit line (A), refill the ink tank.

![Image of the front of a printer with ink tank indicators]

**Note**

- If the function for notifying the remaining ink level (remaining ink level notification function) is enabled, the Alarm lamp inform you of the error when a remaining ink error occurs. Count the number of flashes and take appropriate action.

  ➤ An Error Occurs

  For details on the remaining ink level notification function, see below.

  ➤ Changing the remaining ink level notification setting (Windows)
  ➤ Changing the remaining ink level notification setting (Mac OS)

- If print results become faint or white streaks appear despite sufficient ink levels, see Maintenance Procedure.
- For precautionary notes on handling ink bottles, see Notes on ink bottles.

Refilling Procedure

When you need to refill an ink tank, follow the steps below.

**Important**

- Please ensure the printer remains flat after initial setup and is NOT turned upside down or on its side, as ink in the printer may leak.
- If the remaining ink level notification function is enabled, refill all four ink tanks until full. If the remaining ink level counter is reset when the ink tanks are not full, the printer cannot detect the ink level correctly.

1. Make sure the printer is on.

2. Open the top cover (B).
Important

- Do not place any object on the top cover. It will fall into the rear tray when the top cover is opened and cause the printer to malfunction.
- Do not touch tubes or other parts inside the printer.

3. Open ink tank cover.

   To refill the black ink tank, open the left ink tank cover (C).
   To refill color ink tanks, open the right ink tank cover (D).

   4. Grab and remove the tank cap (E) of the ink tank to be refilled.

   Place the removed tank cap on the upper tank cap holder (F).
Important

- Carefully remove the tank cap of the ink tank. Ink on the inside of the tank cap may spatter when removing it.

5. Take a new ink bottle out of its package.

6. Hold the ink bottle upright and twist the bottle cap (G) to remove.
7. Refill the ink tank.

Aligning the nozzle of the ink bottle with the bottle guide (H) on the printer, insert the nozzle into the inlet (I).

Next stand the ink bottle upside down and squeeze the sides of the ink bottle to refill the ink tank.

---

**Important**

- When removing the bottle cap, avoid squeezing the sides of the ink bottle. Hold the ink bottle as shown in the figure above. If you push the sides of the ink bottle, ink will spatter.
- Do not shake the ink bottle. Ink may spatter when opening the cap.
- Even if the ink bottle is dented, the ink contained in the bottle can still be used without problem.

---

8. Recap the inlet with the tank cap (E) of the ink tank.

Make sure the tank cap is completely inserted.

---

**Important**

- Make sure that each color of ink tanks is filled with corresponding color of ink bottles.
- When refilling ink tanks, do not squeeze the bottle sides too hard. Ink may spatter.
- Do not fill the ink tank above the ink tank's upper limit line (J). Ink above this line may spill over, causing malfunction or damage to the printer, and preventing the printing operation.

- Discard empty ink bottles in compliance with local laws and regulations regarding disposal of consumables.
9. Close the ink tank cover.

**Important**
- If you cannot properly close the ink tank cover, check if you forgot to insert any tank caps of the ink tanks. If the tank cap is left on the tank cap holder, the ink tank cover cannot be closed.

10. Lift the top cover once, and then close it gently.

**Note**
- If the remaining ink level notification function is enabled, the Alarm lamp is lit when ink runs out. This setting is enabled by default.
- If the lamp is lit, perform the following.
  - To continue enabling the remaining ink level notification function
    Hold down the RESUME/CANCEL button for at least 5 seconds. The Alarm lamp goes off and the remaining ink level counter is reset.
  - To disable the remaining ink level notification function
Press down and immediately release the RESUME/CANCEL button. The Alarm lamp goes off and the remaining ink level notification function is disabled.

- You can also set the remaining ink level notification function or reset the remaining ink level counter from your computer.
  - Changing the remaining ink level notification setting (Windows)
  - Changing the remaining ink level notification setting (Mac OS)

---

**Important**

- If the remaining ink level notification function is disabled, check remaining ink levels and refill the ink tanks as necessary. Continuing printing with ink below the lower limit line of an ink tank may prevent satisfactory print quality or may cause malfunction or damage to the printer.

---

**Note**

- If the Alarm lamp flashes, take appropriate action.
  - An Error Occurs
- The printer may make noise during operation.

---

**Notes on ink bottles**

**Important**

- Keep out of reach of children.
- Do not drink ink.
- Be careful not to get any ink in your eyes or in your mouth. (In case of eye contact or swallowing, rinse with water and contact a doctor immediately.)
- When you store ink bottles, close bottle caps completely and place bottles in standing position. If the ink bottles are laid down, ink may leak.
- When refilling ink tanks, take sufficient care to prevent ink from spattering onto surroundings.
- Ink may stain clothes or other belongings permanently. Washing may not remove ink stains.
- Do not use ink bottles and ink contained therein except to refill tanks of printers specified by Canon.
- Do not leave ink bottles in areas exposed to high temperature, such as near fire or a heater or in a car. Bottles may warp and cause ink leakage or ink may become poor quality.
- Do not subject ink bottles to impacts. Ink bottles may be damaged or bottle caps may come off by such impact, and ink may leak.
- Do not transfer ink to other containers. This may result in accidental ingestion, inappropriate use, or poor ink quality.
- Do not mix ink with water or other ink. This may damage the printer.
- Refill ink tanks quickly. Do not leave ink tanks with cap off.
- Once an ink bottle has been opened, do not leave it with bottle cap off. Ink will dry out, possibly preventing proper operation of the printer when an ink tank is refilled using this bottle. To maintain optimal printing quality, use up an ink bottle within six months of first use.

---

**Note**

- Color ink may be consumed even when printing a black-and-white document or when black-and-white printing is specified. Every ink is also consumed in the standard cleaning and deep cleaning of the print head, which may be necessary to maintain the performance of the printer.

When an ink tank is out of ink, promptly refill it.
Checking Ink Status

Check ink status with the ink tank indicator on the front of the printer.

When ink reaches the upper limit line (A), ink is full.
When ink is near the lower limit line (B), ink is running low. Refill the ink tank.

Note

• To check the remaining ink level, visually inspect the remaining ink in the ink tank.

![Image of ink tanks with level indicators A and B]

Important

• If printing is continued when the remaining ink level is below the lower limit line, the printer may consume a certain amount of ink to return to printable status and may also become damaged.

Note

• This printer has a function for notifying the remaining ink level, called the remaining ink level notification function. When the remaining ink level notification function is enabled, refill all ink tanks until ink reaches the upper limit line (A). If ink does not reach the upper limit line, the remaining ink level is not detected correctly.

For details on the remaining ink level notification function, see below.

⇒ Changing the remaining ink level notification setting (Windows)
⇒ Changing the remaining ink level notification setting (Mac OS)

• If a remaining ink error occurs, the Alarm lamp will flash to inform you of the error. Count the number of flashes and take appropriate action.

⇒ An Error Occurs

• The remaining ink level notification function works from initial printing to the time when one of the inks reaches the lower limit line shown on the ink tank. For the remaining ink level notification function to work appropriately, each ink tank must be filled with entire contents of the corresponding color ink bottle bundled with the printer before printing. After the initial filling, if either of the ink tanks is refilled before the remaining ink level reaches the lower limit line, a significant error may occur in the accuracy of the remaining ink level notification function. If you want to refill an ink tank before the remaining ink level reaches the lower limit line, be sure to follow the procedure in the manual.

• To ensure you receive premium print quality and to help protect your print head, a certain amount of ink remains in the ink tank when the printer indicates to refill the ink tank. The estimated page yields of the ink bottle do not include this amount.
Maintenance

- If Printing Is Faint or Uneven

- Cleaning the Print Head
Maintenance Procedure

If print results are blurred, colors are not printed correctly, or print results are unsatisfactory (e.g. misaligned printed ruled lines), perform the maintenance procedure below.

**Important**

- Do not rinse or wipe the print head. This can cause cartridge problems.

**Note**

- Check the remaining ink level.
  
  If the ink level is low, take appropriate action.
  
  - Checking Ink Status

- If the **Alarm** lamp is on or flashing, see An Error Occurs.

- Increasing the print quality in the printer driver settings may improve the print result.
  
  - Changing the Print Quality and Correcting Image Data (Windows)
  
  - Changing the Print Quality and Correcting Image Data (Mac OS)

When the Print Results Are Blurred or Uneven:

**Step1** Print the nozzle check pattern.

From the printer

- Printing the Nozzle Check Pattern

From the computer

- Printing a Nozzle Check Pattern (Windows)
  
  - Printing a Nozzle Check Pattern (Mac OS)

**Step2** Examine the nozzle check pattern.

If there are missing lines or horizontal white streaks in the pattern:

**Step3** Clean the print head.

From the printer

- Cleaning the Print Head

From the computer

- Cleaning the Print Heads (Windows)
  
  - Cleaning the Print Heads (Mac OS)

After cleaning the print head, print and examine the nozzle check pattern: **Step1**

If the problem is not resolved after performing from step 1 to step 3 twice:

**Step4** Clean the print head deeply.
From the computer

- Cleaning the Print Heads (Windows)
- Cleaning the Print Heads (Mac OS)

**Note**

- If problem is not resolved after performing print head deep cleaning, perform system cleaning from a computer.
  - Cleaning the Print Heads (Windows)
  - Cleaning the Print Heads (Mac OS)

If the problem is still not resolved, the print head may be damaged. Contact the service center.

---

When the Print Results Are Not Even such as the Ruled Lines Are Misaligned:

**Step** Align the print head.

From the computer

- Aligning the Print Head Position (Windows)
- Aligning the Print Head Position (Mac OS)
Printing the Nozzle Check Pattern

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzle.

Note

- If the remaining ink level is low, the nozzle check pattern will not be printed correctly. Refill any ink tanks that are low.

You need to prepare: a single sheet of A4 or Letter-sized plain paper

1. Make sure that the power is turned on.

2. Load a single sheet of A4 or Letter-sized plain paper in the rear tray.

3. Pull out the paper output tray, then open the output tray extension.

4. Hold down the RESUME/CANCEL button until the POWER lamp flashes twice, then release it immediately.
   The nozzle check pattern will be printed.
   Do not perform any other operations until the printer completes the printing of the nozzle check pattern.

5. Examine the nozzle check pattern.
Examining the Nozzle Check Pattern

Examine the nozzle check pattern, and clean the print head if necessary.

1. Check if there are missing lines in pattern A or horizontal white streaks in pattern B.

   If there are missing lines in pattern A:
   
   *Cleaning the print head* is required.

   C: Good
   
   D: Bad (lines are missing)

   If there are horizontal white streaks in pattern B:

   *Cleaning the print head* is required.

   E: Good
   
   F: Bad (horizontal white streaks are present)
Cleaning the Print Head

Clean the print head if lines are missing or if horizontal white streaks are present in the printed nozzle check pattern. Cleaning unclogs the nozzles and restores the print head condition. Cleaning the print head consumes ink, so clean the print head only when necessary.

1. Make sure that the power is turned on.

2. Hold down the RESUME/CANCEL button until the POWER lamp flashes once, then release it immediately.
   The printer starts cleaning the print head.
   The cleaning will be complete when the POWER lamp lights after flashing.
   Do not perform any other operations until the printer completes the cleaning of the print head. This takes about 1 minute.

3. Check the print head condition.
   To check the print head condition, print the nozzle check pattern.

Note

- If the problem is not resolved after cleaning the print head twice, clean the print head deeply.
  - Cleaning the Print Heads (Windows)
  - Cleaning the Print Heads (Mac OS)
Performing Maintenance Functions from Your Computer (Windows)

- Cleaning the Print Heads
- Cleaning the Paper Feed Rollers
- Aligning the Print Head Position
- Printing a Nozzle Check Pattern
- Cleaning Inside the Printer
Cleaning the Print Heads

The print head cleaning and deep cleaning functions allow you to clear up clogged print head nozzle. Perform print head cleaning if printing is faint or a specific color fails to print, even though there is enough ink. If you perform deep cleaning and the condition still does not improve, perform system cleaning.

The procedure for cleaning is as follows:

1. Open the printer driver setup window
2. Click **Cleaning** on the **Maintenance** tab
   - When the **Print Head Cleaning** dialog box opens, select the ink group for which cleaning is to be performed.
   - Click **Initial Check Items** to display the items you need to check before performing cleaning.
3. Execute cleaning
   - Make sure that the printer is on and then click **Execute**.
   - Print head cleaning starts.
4. Complete cleaning
   - The **Nozzle Check** dialog box opens after the confirmation message.
5. Check the results
   - To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.
   - If cleaning the head once does not resolve the print head problem, clean it once more.

**Important**

- **Cleaning** consumes a small amount of ink.
  Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

**Deep Cleaning**

**Deep Cleaning** is more thorough than cleaning. Perform deep cleaning when two **Cleaning** attempts do not resolve the print head problem.

1. Open the printer driver setup window
2. Click **Deep Cleaning** on the **Maintenance** tab
When the **Deep Cleaning** dialog box opens, select the ink group for which deep cleaning is to be performed.

Click **Initial Check Items** to display the items you need to check before performing deep cleaning.

3. **Execute deep cleaning**

Make sure that the printer is on and then click **Execute**.

Click **OK** when the confirmation message appears.

Print head deep cleaning starts.

4. **Complete deep cleaning**

The **Nozzle Check** dialog box opens after the confirmation message.

5. **Check the results**

To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

---

**Important**

- **Deep Cleaning** consumes a larger amount of ink than **Cleaning**.

  Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

---

**System Cleaning**

Execute **System Cleaning** if the status does not improve even after **Deep Cleaning** is performed.

1. **Open the printer driver setup window**

2. **Click System Cleaning on the Maintenance tab**

   When the **System Cleaning** dialog box opens, select the ink group for which system cleaning is to be performed.

   Click **Initial Check Items** to display the items you need to check before performing system cleaning.

   Be sure to check the remaining ink level before running **System Cleaning**.

3. **Execute system cleaning**

   Make sure that the printer is on and then click **Execute**.

   Click **OK** when the confirmation message appears.

   System cleaning starts.

4. **Complete system cleaning**

   The **Nozzle Check** dialog box opens after the confirmation message.

5. **Check the results**
To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

### Important

- **System Cleaning** consumes an extremely large amount of ink. Executing system cleaning frequently will rapidly deplete your printer’s ink supply. Therefore, execute system cleaning only when necessary.
- If **System Cleaning** is run when the remaining ink level is insufficient, it may cause a failure.

### Note

- If there is no sign of improvement after **System Cleaning**, turn off the printer, wait 24 hours, and then perform **Deep Cleaning** again. If there is still no sign of improvement, the ink may have run out or the print head may be worn. For details on the remedial action to be taken, see “No Ink Comes Out.”

### Related Topic

- [Printing a Nozzle Check Pattern](#)
Cleaning the Paper Feed Rollers

Cleans the paper feed rollers. Perform feed roller cleaning when there are paper particles sticking to the paper feed rollers and paper is not fed properly.

The procedure for performing the feed roller cleaning is as follows:

1. Prepare the printer
   Remove all sheets of paper from the rear tray.

2. Open the printer driver setup window

3. Click Roller Cleaning on the Maintenance tab
   The confirmation message appears.

4. Execute paper feed roller cleaning
   Make sure that the printer is on and then click OK.
   Paper feed roller cleaning starts.

5. Complete paper feed roller cleaning
   After the rollers have stopped, follow the instruction in the message, load three sheets of plain paper into the rear tray, and click OK.
   Paper will be ejected and feed roller cleaning will be completed.
Aligning the Print Head Position

Print head alignment corrects the installation positions of the print head and improves deviated colors and lines.

The procedure for performing print head alignment is as follows:

### Note

- If you are adjusting the head position while the software is being installed from the Setup CD-ROM, start from Step 3.

---

**Print Head Alignment**

1. **Open the printer driver setup window**

2. **Click** Print Head Alignment **on the Maintenance tab**
   
   The Start Print Head Alignment dialog box opens.

3. **Load paper in the printer**
   
   Load two sheets of A4 size or Letter size plain paper into the rear tray.

4. **Execute head alignment**
   
   Make sure that the printer is on and click Align Print Head.
   Follow the instruction in the message.

   **Important**
   
   - Do not open the top cover while printing is in progress.

5. **Check the printed pattern**
   
   Enter the numbers of the patterns with the least noticeable streaks in the associated boxes.
   Even if the patterns with the least noticeable streaks are clicked in the preview window, their numbers are automatically entered in the associated boxes.
When you have entered all the necessary values, click **OK**.

**Note**

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical streaks.

(A) Least noticeable vertical streaks  
(B) Most noticeable vertical streaks

6. Confirm the displayed message and click **OK**

The second pattern is printed.

**Important**

- Do not open the top cover while printing is in progress.

7. Check the printed pattern

Enter the numbers of the patterns with the least noticeable stripes in the associated boxes. Even if the patterns with the least noticeable stripes are clicked in the preview window, their numbers are automatically entered in the associated boxes.
When you have entered all the necessary values, click **OK**.

**Note**

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable horizontal stripes.

![Pattern A](image1) ![Pattern B](image2)

(A) Least noticeable horizontal stripes  
(B) Most noticeable horizontal stripes

**Note**

- To print and check the current setting, open the **Start Print Head Alignment** dialog box, and click **Print Alignment Value**.
Printing a Nozzle Check Pattern

The nozzle check function allows you to check whether the print head is working properly by printing a nozzle check pattern. Print the pattern if printing becomes faint, or if a specific color fails to print.

The procedure for printing a nozzle check pattern is as follows:

1. Open the printer driver setup window

2. Click **Nozzle Check** on the **Maintenance** tab
   - The **Nozzle Check** dialog box opens.
   - Click **Initial Check Items** to display the items that you need to check before printing the nozzle check pattern.

3. Load paper in the printer
   - Load one sheet of A4 size or Letter size plain paper into the rear tray.

4. Print a nozzle check pattern
   - Make sure that the printer is on and click **Print Check Pattern**.
   - Printing of the nozzle check pattern begins.
   - Click **OK** when the confirmation message appears.
   - The **Pattern Check** dialog box opens.

5. Check the print result
   - Check the print result. If the print result is normal, click **Exit**.
   - If the print result is smudged or if there are any unprinted sections, click **Cleaning** to clean the print head.

Related Topic

- [Cleaning the Print Heads](#)
Cleaning Inside the Printer

Perform bottom plate cleaning before you execute duplex printing to prevent smudges on the back side of the paper. Also perform bottom plate cleaning if ink smudges caused by something other than print data appear on the printed page.

The procedure for performing bottom plate cleaning is as follows:

1. Open the printer driver setup window

2. Click **Bottom Plate Cleaning** on the **Maintenance** tab

   The **Bottom Plate Cleaning** dialog box opens.

3. **Load paper** in the printer

   As instructed in the dialog box, fold the A4 size or Letter size plain paper in half horizontally, and then unfold the sheet.
   Load the paper into the rear tray in the portrait orientation with the crest of the crease facing down.

4. Perform the bottom plate cleaning

   Make sure that the printer is on and then click **Execute**.
   Bottom plate cleaning starts.
Cleaning

➤ Cleaning the Exterior of the Printer

➤ Cleaning the Inside of the Printer (Bottom Plate Cleaning)

You can clean the paper feed roller from your computer.

➤ Cleaning the Paper Feed Rollers (Windows)

➤ Cleaning the Paper Feed Rollers (Mac OS)
Cleaning the Exterior of the Printer

Be sure to use a soft and dry cloth such as eyeglasses cleaning cloth and wipe off dirt on the surface gently. Smooth out wrinkles on the cloth if necessary before cleaning.

<table>
<thead>
<tr>
<th></th>
<th>Important</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Be sure to turn off the power and unplug the power cord before cleaning the printer.</td>
<td></td>
</tr>
<tr>
<td>• Do not use tissue paper, paper towels, rough-textured cloth, or similar materials for cleaning so as not to scratch the surface. Paper tissue powder or fine threads may remain inside the printer and cause problems such as print head blockage and poor printing results.</td>
<td></td>
</tr>
<tr>
<td>• Never use volatile liquids such as thinners, benzene, acetone, or any other chemical cleaner to clean the printer, as this may cause a malfunction or damage the surface of the printer.</td>
<td></td>
</tr>
</tbody>
</table>
Cleaning the Inside of the Printer (Bottom Plate Cleaning)

Remove stains from the inside of the printer. If the inside of the printer becomes dirty, printed paper may get dirty, so we recommend performing cleaning regularly.

You need to prepare: a single sheet of A4 or Letter-sized plain paper*

* Be sure to use a new piece of paper.

1. Make sure that the power is turned on and remove any paper from the rear tray.

2. Fold a single sheet of A4 or Letter-sized plain paper in half widthwise, then unfold the paper.

3. Load only this sheet of paper in the rear tray with the open side facing you.

4. Pull out the paper output tray, then open the output tray extension.

5. Hold down the RESUME/CANCEL button until the POWER lamp flashes five times, then release it immediately.

The paper cleans the inside of the printer as it feeds through the printer.

Check the folded parts of the ejected paper. If they are smudged with ink, perform Bottom Plate Cleaning again.

>>> Note

• When performing Bottom Plate Cleaning again, be sure to use a new piece of paper.

If the problem is not resolved after performing cleaning again, the protrusions inside the printer may be stained. Wipe off any ink from the protrusions using a cotton swab or the like.

>>> Important

• Be sure to turn off the power and unplug the power cord before cleaning the printer.

Safety Precautions

Choosing a location

• Do not install the printer in a location that is unstable or subject to excessive vibration.
• Do not install the printer in locations that are very humid or dusty, in direct sunlight, outdoors, or close to a heating source.

To avoid the risk of fire or electric shocks, use the printer under the operating environment specified in the Specification.
• Do not place the printer on a thick rug or carpet.
• Do not place the printer with its back attached to the wall.

Power supply

• Ensure that the area around the power outlet is kept clear at all times so you can easily unplug the power cord if necessary.
• Never remove the plug by pulling on the cord.
  Pulling the cord may damage the power cord, leading to possible fire or electrical shock.
• Do not use an extension lead/cord.

Working around the printer

• Never put your hands or fingers in the printer while it is printing.
• When moving the printer, carry the printer at both ends. In case the printer weighs more than 14kg, it is recommended to have two people lifting the printer. Accidental dropping of the printer may cause injury. For the printer's weight, refer to the Specification.
• Do not place any object on the printer. Especially do not place metal objects (paper clips, staples, etc.) or containers of flammable solvents (alcohol, thinners, etc.) on top of the printer.
• Do not transport or use the printer on a slant, vertically or upside-down, as the ink may leak and damage the printer.

Print Heads/ink tanks and FINE Cartridges

• Keep ink tanks out of the reach of children. In case ink is accidentally licked or swallowed, rinse out mouth or give one or two glasses of water to drink. If irritation or discomfort occurs, obtain medical advice immediately.
• In case ink gets in contact with eyes, rinse with water immediately. In case ink gets in contact with skin, wash with soap and water immediately. If irritation to eyes or skin persists, obtain medical advice immediately.
• Never touch the electrical contacts on a Print Head or FINE Cartridges after printing.
  The metal parts may be very hot and could cause burns.
• Do not throw ink tanks and FINE Cartridges into fire.
• Do not attempt to disassemble or modify the Print Head, ink tanks, and FINE Cartridges.
Regulatory Information

Only for European Union and EEA (Norway, Iceland and Liechtenstein)

This symbol indicates that this product is not to be disposed of with your household waste, according to the WEEE Directive (2012/19/EU) and national legislation. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. For more information regarding return and recycling of WEEE products, please visit www.canon-europe.com/weee.

Nur für Europäische Union und EWR (Norwegen, Island und Liechtenstein)

Union Européenne, Norvège, Islande et Liechtenstein uniquement.

Ce symbole indique que ce produit ne doit pas être jeté avec les ordures ménagères, conformément à la directive DEEE (2012/19/UE) et à la réglementation de votre pays. Ce produit doit être confié au distributeur à chaque fois que vous achetez un produit neuf similaire, ou à un point de collecte mis en place par les collectivités locales pour le recyclage des Déchets des Équipements Électriques et Électroniques (DEEE). Le traitement inapproprié de ce type de déchet risque d’avoir des répercussions
sur l'environnement et la santé humaine, du fait de la présence de substances potentiellement dangereuses généralement associées aux équipements électriques et électroniques. Parallèlement, votre entière coopération dans le cadre de la mise au rebut correcte de ce produit favorisera une meilleure utilisation des ressources naturelles. Pour plus d'informations sur les points de collecte des équipements à recycler, contactez vos services municipaux, les autorités locales compétentes, le plan DEEE approuvé ou le service d'enlèvement des ordures ménagères. Pour plus d'informations sur le retour et le recyclage des produits DEEE, consultez le site: www.canon-europe.com/weee.

Uitsluitend bestemd voor de Europese Unie en EER (Noorwegen, IJsland en Liechtenstein)

Dit symbool geeft aan dat dit product in overeenstemming met de AEEA-richtlijn (2012/19/EU) en de nationale wetgeving niet mag worden afgevoerd met het huishoudelijk afval. Dit product moet worden ingeleverd bij een aangewezen, geautoriseerd inzamelpunt, bijvoorbeeld wanneer u een nieuw gelijkssoortig product aanschaft, of bij een geautoriseerd inzamelpunt voor hergebruik van elektrische en elektronische apparatuur (EEA). Een onjuiste afvoer van dit type afval kan leiden tot negatieve effecten op het milieu en de volksgezondheid als gevolg van potentieel gevaarlijke stoffen die veel voorkomen in elektrische en elektronische apparatuur (EEA). Bovendien werkt u door een juiste afvoer van dit product mee aan het effectieve gebruik van natuurlijke hulpbronnen. Voor meer informatie over waar u uw afgedankte apparatuur kunt inleveren voor recycling kunt u contact opnemen met het gemeentehuis in uw woonplaats, de reinigingsdienst, of het afvalverwerkingsbedrijf. U kunt ook het schema voor de afvoer van afgedankte elektrische en elektronische apparatuur (EEA) raadplegen. Ga voor meer informatie over het inzamelen en recyclen van afgedankte elektrische en elektronische apparatuur naar www.canon-europe.com/weee.

Sólo para la Unión Europea y el Área Económica Europea (Noruega, Islandia y Liechtenstein)

Este símbolo indica que este producto no debe desecharse con los desperdicios domésticos, de acuerdo con la directiva RAEE (2012/19/UE) y con la legislación nacional. Este producto debe entregarse en uno de los puntos de recogida designados, como por ejemplo, entregándolo en el lugar de venta al comprar un producto similar o depositándolo en un lugar de recogida autorizado para el reciclado de residuos de aparatos eléctricos y electrónicos (RAEE). La manipulación inapropiada de este tipo de desechos podría tener un impacto negativo en el entorno y la salud humana, debido a las sustancias potencialmente peligrosas que normalmente están asociadas con los RAEE. Al mismo tiempo, su cooperación a la hora de desechar correctamente este producto contribuirá a la utilización eficaz de los recursos naturales. Para más información sobre cómo puede eliminar el equipo para su reciclado, póngase en contacto con las autoridades locales, con las autoridades encargadas de los desechos, con un sistema de gestión RAEE autorizado o con el servicio de recogida de basuras doméstico. Si desea más información acerca de la devolución y reciclado de RAEE, visite la web www.canon-europe.com/weee.
Només per a la Unió Europea i a l'Espai Econòmic Europeu (Noruega, Islàndia i Liechtenstein)

Aquest símbol indica que aquest producte no s'ha de llençar a les escombraries de la llar, d'acord amb la Directiva RAEE (2012/19/UE) i la legislació nacional. Aquest producte s'hauria de lliurar en un dels punts de recollida designats, com per exemple, intercanviant-lo un per un en comprar un producte similar o lliurant-lo en un lloc de recollida autoritzat per al reciclatge de residus d'aparells elèctrics i electrònics (AEE). La manipulació inadequada d’aquest tipus de residus podria tenir un impacte negatiu en l’entorn i en la salut humana, a causa de les substàncies potencialment perilloses que normalment estan associades als AEE. Així mateix, la vostra cooperació a l'hora de llençar correctament aquest producte contribuirà a la utilització efectiva dels recursos naturals. Per a més informació sobre els punts on podeu lliurar aquest producte per procedir al seu reciclatge, adreçeu-vos a la vostra oficina municipal, a les autoritats encarregades dels residus, al pla de residus homologat per la RAEE o al servei de recollida de deixalles domèstiques de la vostra localitat. Per a més informació sobre la devolució i el reciclatge de productes RAEE, visiteu www.canon-europe.com/weee.

Solo per Unione Europea e SEE (Norvegia, Islanda e Liechtenstein)

Questo simbolo indica che il prodotto deve essere oggetto di raccolta separata in conformità alla Direttiva RAEE (2012/19/UE) e alla normativa locale vigente. Il prodotto deve essere smaltito presso un centro di raccolta differenziata, un distributore autorizzato che applichi il principio dell"uno contro uno", ovvero del ritiro della vecchia apparecchiatura elettrica al momento dell'acquisto di una nuova, o un impianto autorizzato al riciclaggio dei rifiuti di apparecchiature elettriche ed elettroniche. La gestione impropria di questo tipo di rifiuti può avere un impatto negativo sull'ambiente e sulla salute umana causato dalle sostanze potenzialmente pericolose che potrebbero essere contenute nelle apparecchiature elettriche ed elettroniche. Un corretto smaltimento di tali prodotti contribuirà inoltre a un uso efficace delle risorse naturali ed eviterà di incorrere nelle sanzioni amministrative di cui all'art. 255 e successivi del Decreto Legislativo n. 152/06. Per ulteriori informazioni sullo smaltimento e il recupero dei Rifiuti di Apparecchiature Elettriche ed Elettroniche, consultare la Direttiva RAEE, rivolgersi alle autorità competenti, oppure visitare il sito www.canon-europe.com/weee.

Apenas para a União Europeia e AEE (Noruega, Islândia e Liechtenstein)

Este símbolo indica que o produto não deve ser colocado no lixo doméstico, de acordo com a Directiva REEE (2012/19/UE) e a legislação nacional. Este produto deverá ser colocado num ponto de recolha designado, por exemplo, num local próprio autorizado quando adquirir um produto semelhante novo ou num local de recolha autorizado para reciclar resíduos de equipamentos elétricos e electrónicos (EEE). O tratamento inadequado deste tipo de resíduo poderá causar um impacto negativo no ambiente e na saúde humana devido às substâncias potencialmente perigosas normalmente associadas aos equipamentos elétricos e electrónicos. Simultaneamente, a sua cooperação no tratamento correcto
deste produto contribuirá para a utilização eficaz dos recursos naturais. Para mais informações sobre os locais onde o equipamento poderá ser reciclado, contacte os serviços locais, a autoridade responsável pelos resíduos, o esquema REEE aprovado ou o serviço de tratamento de lixo doméstico. Para mais informações sobre a devolução e reciclagem de produtos REEE, vá a www.canon-europe.com/weee.

Gælder kun i Europæiske Union og EØS (Norge, Island og Liechtenstein)

Μόνο για την Ευρωπαϊκή Ένωση και τον ΕΟΧ (Νορβηγία, Ισλανδία και Λιχτενστάιν)

Αυτό το σύμβολο υποδηλώνει ότι αυτό το προϊόν δεν πρέπει να απορρίπτεται μαζί με τα οικιακά απορρίμματα, σύμφωνα με την Οδηγία σχετικά με τα Απόβλητα Ηλεκτρικού και Ηλεκτρονικού Εξοπλισμού (ΑΗΗΕ) (2012/19/ΕΕ) και την εθνική σας νομοθεσία. Αυτό το προϊόν πρέπει να παραδίδεται σε καθορισμένο σημείο συλλογής, π.χ. σε μια εξουσιοδοτημένη βάση ανταλλαγής όταν αγοράζετε ένα νέο παρόμοιο προϊόν ή σε μια εξουσιοδοτημένη θέση συλλογής για την ανακύκλωση των αποβλήτων Ηλεκτρικού και Ηλεκτρονικού Εξοπλισμού (ΗΗΕ). Ο ακατάλληλος χειρισμός αυτού του τύπου αποβλήτων μπορεί να έχει αρνητικό αντίκτυπο στο περιβάλλον και την υγεία του ανθρώπου, λόγω δυνητικώς επικίνδυνων υσίων που γενικά συνδέονται με τον ΗΗΕ. Ταυτόχρονα, η συνεργασία σας όσον αφορά τη σωστή απόρριψη αυτού του προϊόντος θα συμβάλει στην αποτελεσματική χρήση των φυσικών πόρων. Για περισσότερες πληροφορίες σχετικά με τα σημεία όπου μπορείτε να απορρίμετε τον ηξεπληρωμό σας για ανακύκλωση, επικοινωνήστε με το τοπικό γραφείο της πόλης σας, την υπηρεσία απορριμμάτων, το εγκεκριμένο σχήμα ΑΗΗΕ ή την υπηρεσία απόρριψης οικιακών αποβλήτων. Για περισσότερες πληροφορίες σχετικά με την επιστροφή και την ανακύκλωση των προϊόντων ΑΗΗΕ, επισκεφθείτε την τοποθεσία www.canon-europe.com/weee.

Tento symbol znamená, že podle směrnice o OEEZ (2012/19/EU) a podle vnitrostátních právních předpisů nemá být tento výrobek likvidován s odpadem z domácností. Tento výrobek má být vrácen do sběrného místa, např. v rámci autorizovaného systému odběru jednoho výrobku za jeden nově prodaný podobný výrobek nebo v autorizovaném sběrném místě pro recyklaci odpadních elektrických a elektronických zařízení (OEEZ). Nevhodné nakládání s tímto druhem odpadu by mohlo mít negativní dopad na životní prostředí a lidské zdraví, protože elektrická a elektronická zařízení zpravidla obsahují potenciálně nebezpečné látky. Vaše spolupráce na správné likvidaci tohoto výrobku současně napomůže efektivněmu využívání přírodních zdrojů. Další informace o místech sběru vašeho odpadního zařízení k recyklaci vám sdělí místní úřad vaší obce, správní orgán vykonávající dozor nad likvidací odpadu, sběrny OEEZ nebo služba pro odvoz komunálního odpadu. Další informace týkající se vrácení a recyklace OEEZ naleznete na adrese www.canon-europe.com/weee.

Csak az Európai Unió és az EGT (Norvégia, Izland és Liechtenstein) országaiban

Tylko dla krajów Unii Europejskiej oraz EOG (Norwegia, Islandia i Liechtenstein)

Ten symbol oznacza, że zgodnie z dyrektywą WEEE dotyczącą zużytego sprzętu elektrycznego i elektronicznego (2012/19/UE) oraz przepisami lokalnymi nie należy wyrzucać tego produktu razem z odpadami gospodarstwa domowego. Produkt należy przekazać do wyznaczonego punktu gromadzenia odpadów, np. firmy, od której kupowany jest nowy, podobny produkt lub do autoryzowanego punktu gromadzenia zużytego sprzętu elektrycznego i elektronicznego w celu poddania go recyklingowi. Usuwanie tego typu odpadów w nieodpowiedni sposób może mieć negatywny wpływ na otoczenie i zdrowie innych osób ze względu na niebezpieczne substancje stosowane w takim sprzęcie. Jednocześnie pozbycie się zużytego sprzętu w zalecany sposób przyczynia się do właściwego wykorzystania zasobów naturalnych. Aby uzyskać więcej informacji na temat punktów, do których można dostarczyć sprzęt do recyklingu, prosimy skontaktować się z lokalnym urzędem miasta, zakładem utylizacji odpadów, skorzystać z instrukcji zatwierdzonej dyrektywą WEEE lub skontaktować się z przedsiębiorstwem zajmującym się wywozem odpadów domowych. Więcej informacji o zwracaniu i recyklingu zużytego sprzętu elektrycznego i elektronicznego znajduje się w witrynie www.canon-europe.com/weee.
Tento symbol znamená, že podľa Smernice 2012/19/EÚ o odpade z elektrických a elektronických zariadení (OEEZ) a podľa platnej legislatívy Slovenskej republiky sa tento produkt nesmie likvidovať spolu s komunálnym odpadom. Produkt je potrebné odovzdať do určenej zberne, napr. prostredníctvom výmeny za kúpu nového podobného produktu, alebo na autorizované zberné miesto, ktoré spracúva odpad z elektrických a elektronických zariadení (EEZ). Nespárovaná manipulácia s takýmto typom odpadu môže mať negatívny vplyv na životné prostredie a ľudské zdravie, pretože elektrické a elektronické zariadenia obsahujú potenciálne nebezpečné látky. Spoluprácou na správnej likvidácii produktu prispejete k účinnému využívaniu prírodných zdrojov. Ďalšie informácie o mieste recyklácie opotrebovaných zariadení získate od miestneho úradu, úradu životného prostredia, zo schváleného plánu OEEZ alebo od spoločnosti, ktorá zaistí lišovanie komunálneho odpadu. Viac informácií nájdete aj na webovej stránke: www.canon-europe.com/weee.
Doar pentru Uniunea Europeană și EEA (Norvegia, Islanda și Liechtenstein)

Acest simbol indică faptul că acest produs nu trebuie aruncat o dată cu reziduurile menajere, în conformitate cu Directiva DEEE (Directiva privind deșeurile de echipamente electrice și electronice) (2012/19/UE) și legile naționale. Acest produs trebuie transportat la un punct de colectare special, de exemplu un centru care preia produsele vechi atunci când achiziționați un produs nou similar, sau la un punct de colectare autorizat pentru reciclarea deșeurilor provenite de la echipamentele electrice și electronice (EEE). Mânuirea necorespunzătoare a acestor tipuri de deșeuri poate avea un impact negativ asupra mediului înconjurător și sănătății indivizilor, din cauza substanțelor potențial nocive care sunt în general asociate cu EEE. În același timp, cooperarea dvs. la reciclarea corectă a acestui produs va contribui la utilizarea efectivă a resurselor naturale. Pentru mai multe informații privind locurile de reciclare a deșeurilor provenite de la echipamente, contactați biroul primăriei locale, autoritatea responsabilă cu colectarea deșeurilor, schema DEEE aprobată sau serviciul de colectare a deșeurilor menajere. Pentru mai multe informații privind returnarea și reciclarea produselor DEEE, vizitați www.canon-europe.com/weee.

Samo za Europsku uniju i EEZ (Norveška, Island i Lihtenštajn)

Ovaj simbol pokazuje da se ovaj proizvod ne smije odlagati s kućnim otpadom sukladno WEEE Direktivi (2012/19/EC) i vašem nacionalnom zakonu. Ovaj proizvod je potrebno predati na posebno mjesto za sakupljanje otpada, npr. na ovlašteno mjesto gdje možete zamijeniti staro za novo ukoliko kupujete novi sličan proizvod ili na ovlašteno mjesto za sakupljanje rabljene električne i elektroničke opreme (EEE) za recikliranje. Nepropisno rukovanje ovom vrstom otpada može imati negativan učinak na okolinu i zdravlje ljudi zbog supstanci koje su potencijalno opasne za zdravlje, a općenito se povezuju s EEE. Istovremeno, vaša će suradnja kroz propisno odlaganje ovog proizvoda doprinijeti efektivnoj uporabi prirodnih resursa. Za više informacija o tome gdje možete odložiti svoj otpad za recikliranje obratite se vašem lokalnom gradskom uredu, komunalnoj službi, odobrenom WEEE programu ili službi za odlaganje kućnog otpada. Ostale informacije o vraćanju i recikliranju WEEE proizvoda potražite na www.canon-europe.com/weee.

Korisnici u Srbiji

Ovaj simbol označava da ovaj proizvod ne sme da se odlaže sa ostalim kućnim otpadom, u skladu sa WEEE Direktivom (2012/19/EU) i nacionalnim zakonima. Ovaj proizvod treba predati određenom centru za prikupljanje, npr. na osnovi “jedan-za-jedan” kada kupujete sličan novi proizvod, ili ovlašćenom centru za prikupljanje za reciklažu istrošene električne i elektronske opreme (EEE). Nepravilno rukovanje ovom vrstom otpada može da ima moguće negativne posledice po životnu sredinu i ljudsko zdravlje usled
Environmental Information
Reducing your environmental impact

Power Consumption and Operational Modes

The amount of electricity a device consumes depends on the way the device is used. This product is designed and set in a way to allow you to reduce the power consumption. After the last print it switches to Ready Mode. In this mode it can print again immediately if required. If the product is not used for a time, the device switches to its Sleep Mode. The devices consume less power (Watt) in these modes.

Energy Star®

The Energy Star® programme is a voluntary scheme to promote the development and purchase of energy efficient models, which help to minimise environmental impact. Products which meet the stringent requirements of the Energy Star® programme for both environmental benefits and the amount of energy consumption will carry the Energy Star® logo accordingly.

Paper types

This product can be used to print on both recycled and virgin paper (certified to an environmental stewardship scheme), which complies with EN12281 or a similar quality standard. In addition it can support printing on media down to a weight of 64g/m², lighter paper means less resources used and a lower environmental footprint for your printing needs.
Main Components and Their Use

- Main Components
- Power Supply
Main Components

- Front View
- Rear View
- Inside View
Front View

(1) top cover
Open to refill ink tanks or to remove jammed paper inside the printer.

(2) paper support
Open to load paper in the rear tray.

(3) paper guides
Align with both sides of the paper stack.

(4) rear tray
Load paper here. Two or more sheets of the same size and type of paper can be loaded at the same time, and fed automatically one sheet at a time.

→ Loading Plain Paper / Photo Paper
→ Loading Envelopes

(5) paper output tray
Printed paper is ejected. Open before printing.

(6) output tray extension
Open to support ejected paper.

* All lamps are shown lit in the figure above for explanatory purposes.

(7) POWER lamp
Lights after flashing when the power is turned on.
Note

- You can check the status of the printer by the POWER and Alarm lamps.
  - POWER lamp is off: The power is off.
  - POWER lamp lights: The printer is ready to print.
  - POWER lamp flashes: The printer is getting ready to print, or printing is in progress.
  - Alarm lamp flashes: An error has occurred and the printer is not ready to print.
  - POWER lamp flashes and Alarm lamp flashes alternately: An error that requires contacting the service center may have occurred.

⇒ An Error Occurs

(8) Alarm lamp
Lights or flashes when an error occurs.

(9) RESUME/CANCEL button
Cancels a print job in progress. You can press this button to release from printer error status and resume printing, after the printer problem is resolved.

(10) ON button
Turns the power on or off.

⇒ Turning the Printer On and Off
Rear View

(1) USB port
Plug in the USB cable to connect the printer with a computer.

**Important**
- Do not touch the metal casing.
- Do not plug in or unplug the USB cable while printing.

(2) power cord connector
Plug in the supplied power cord.
Inside View

(1) ink tank covers
   Open to refill ink tanks.

(2) ink tanks
   The black ink tank is on the right, and the color ink tanks (cyan, magenta, and yellow) are on the left.
   If any ink levels are low, refill the low tanks.

(3) cartridge holder
   Install the cartridge here.

**Note**

- For details on refilling ink tanks, see [Refilling Ink Tanks](Refilling Ink Tanks).
Power Supply

- Confirming that the Power Is On
- Turning the Printer On and Off
- Notice for the Power Plug/Power Cord
- Notice for Unplugging the Power Cord
Confirming that the Power Is On

The **POWER** lamp is lit when the printer is turned on.

### Note

- It may take a while for the printer to start printing immediately after you turn on the printer.
Turning the Printer On and Off

Turning on the printer

1. Press the ON button to turn on the printer.

   The POWER lamp flashes and then remains lit.
   
   ➤ Confirming that the Power Is On

   ➤ Note

   • It may take a while for the printer to start printing immediately after you turn on the printer.
   • If the Alarm lamp lights up or flashes, see An Error Occurs.
   • You can set the printer to automatically turn on when a print operation is performed from a computer. This feature is set to off by default.

   ➤ Managing the Printer Power (Windows)
   ➤ Managing the Printer Power (Mac OS)

Turning off the printer

1. Press the ON button to turn off the printer.

   When the POWER lamp stops flashing, the printer is turned off.

   ➤ Important

   • When you unplug the power cord after turning off the printer, be sure to confirm that the POWER lamp is off.

   ➤ Note

   • You can set the printer to automatically turn off when no print jobs are sent to the printer for a certain interval. This feature is set to on by default.

   ➤ Managing the Printer Power (Windows)
Notice for the Power Plug/Power Cord

Unplug the power cord once a month to confirm that the power plug/power cord does not have anything unusual described below.

- The power plug/power cord is hot.
- The power plug/power cord is rusty.
- The power plug/power cord is bent.
- The power plug/power cord is worn.
- The power plug/power cord is split.

⚠️ Caution

- If you find anything unusual with the power plug/power cord described above, unplug the power cord and call for service. Using the printer with one of the unusual conditions above may cause a fire or an electric shock.
Notice for Unplugging the Power Cord

To unplug the power cord, follow the procedure below.

**Important**

- When you unplug the power cord, press the **ON** button, then confirm that the **POWER** lamp is off. Unplugging the power cord while the **POWER** lamp is lit or flashing may cause drying or clogging of the print head and print quality may be reduced.

1. Press the **ON** button to turn the printer off.

2. Confirm that the **POWER** lamp is off.

3. Unplug the power cord.

The specification of the power cord differs depending on the country or region of use.
Changing Settings

- Changing Printer Settings from Your Computer (Windows)
- Changing Printer Settings from Your Computer (Mac OS)
- Initializing the Printer Settings
Changing Printer Settings from Your Computer (Windows)

- Changing the Print Options
- Registering a Frequently Used Printing Profile
- Changing the remaining ink level notification setting
- Managing the Printer Power
- Reducing the Printer Noise
- Changing the Printer Operation Mode
Changing the Print Options

You can change the detailed printer driver settings for print data that is sent from an application software.

Specify this option if you encounter print failures such as part of an image data being cut off.

The procedure for changing the print options is as follows:

1. Open the **printer driver setup window**

2. Click **Print Options...** on the **Page Setup** tab

   ![Print Options dialog box](image)

   The **Print Options** dialog box opens.

   ![Print Options dialog box](image)

   **Note**

   - When you use the XPS printer driver, the functions available to you are different.

3. Change the individual settings

   If necessary, change the setting of each item, and then click **OK**.

   The **Page Setup** tab is displayed again.
Registering a Frequently Used Printing Profile

You can register the frequently used printing profile to Commonly Used Settings on the Quick Setup tab. Unnecessary printing profiles can be deleted at any time.

The procedure for registering a printing profile is as follows:

Registering a Printing Profile

1. Open the printer driver setup window

2. Set the necessary items

   From Commonly Used Settings on the Quick Setup tab, select the printing profile to be used and if necessary, change the settings after Additional Features.
   You can also register necessary items on the Main and Page Setup tabs.

3. Click Save...

   ![Printer Driver Setup Window]
   
   The Save Commonly Used Settings dialog box opens.

4. Save the settings

   Enter a name in the Name field. If necessary, click Options..., set the items, and then click OK.
   In the Save Commonly Used Settings dialog box, click OK to save the print settings and return to the Quick Setup tab.
   The name and icon are displayed in Commonly Used Settings.
Important

- To save the page size, orientation, and number of copies that was set in each sheet, click Options..., and check each item.

Note

- When you re-install the printer driver or upgrade the printer driver version, the print settings that are already registered will be deleted from Commonly Used Settings. Registered print settings cannot be saved and preserved. If a profile is deleted, register the print settings again.

Deleting Unnecessary Printing Profile

1. Select the printing profile to be deleted

   Select the printing profile you want to delete from the Commonly Used Settings list on the Quick Setup tab.

2. Delete the printing profile

   Click Delete. When the confirmation message appears, click OK.
   The selected printing profile is deleted from the Commonly Used Settings list.

Note

- Printing profiles that are registered in the initial settings cannot be deleted.
Changing the remaining ink level notification setting

From the printer driver, you can switch the remaining ink level notification setting and reset the remaining ink level count.

This section describes the procedure for changing the remaining ink level notification setting.

### Remaining Ink Notification Settings

1. Open the [printer driver setup window](#).

2. Check that the printer is on, and on the **Maintenance** tab, click **Remaining Ink Notification Settings**.
   
   The **Remaining Ink Notification Settings** dialog box appears.

3. If necessary, set the following item:

   **Function for Notifying the Remaining Ink Level**
   
   Select the setting for the remaining ink level notification function.
   
   Select **Enable** to display an error message when the remaining ink level runs low.
   
   Select **Disable** to prevent the error message from being displayed.
   
   Then click **Set** to apply the selected setting.

   **Important**
   
   - Before enabling **Function for Notifying the Remaining Ink Level**, [replenish](#) all inks to the upper limit line and reset the remaining ink level count by running **Resets the Remaining Ink Level Count**. However, if you reset the count by operating the operation panel of the printer, the setting in the printer driver is unnecessary.
   
   - If you disable **Function for Notifying the Remaining Ink Level**, you must visually check the remaining ink level. Replenish the ink before the ink level falls below the lower limit line.

   **Resets the Remaining Ink Level Count**
   
   Click **Reset** to reset the remaining ink level count.

   **Important**
   
   - When you reset the remaining ink level count, you must replenish all inks to the upper limit line.

4. Apply the settings

   When the confirmation message appears click **OK**. When you select **Close**, the screen returns to the **Maintenance** tab.

   From this point on, the setting is applied.
Managing the Printer Power

This function allows you to manage the printer power from the printer driver.

The procedure for managing the printer power is as follows:

**Power Off**

The **Power Off** function turns off the printer. When you use this function, you will not be able to turn the printer on from the printer driver.

1. Open the [printer driver setup window](#).
2. Execute power off
   
   Click **Power Off** on the **Maintenance** tab. When the confirmation message appears, click **OK**.
   
   The printer power switches off, and the **Maintenance** tab is displayed again.

**Auto Power**

**Auto Power** allows you to set **Auto Power On** and **Auto Power Off**.

The **Auto Power On** function automatically turns on the printer when data is received.

The **Auto Power Off** function automatically turns off the printer when there are no operations from the printer driver or the printer for a specified period of time.

1. Open the [printer driver setup window](#).
2. Make sure that the printer is on and then click **Auto Power** on the **Maintenance** tab.
   
   The **Auto Power Settings** dialog box opens.

**Note**

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.
  
  If this happens, click **OK** to display the most recent settings specified on your computer.

3. If necessary, complete the following settings:

   **Auto Power On**
   
   Specifying **Enable** from the list will turn the printer on upon receipt of print data.

   **Auto Power Off**
   
   Specify the time from the list. When this time lapses without any operations from the printer driver or the printer, the printer is turned off automatically.

4. Apply the settings
   
   Click **OK**. When the confirmation message appears, click **OK**.
   
   The **Maintenance** tab is displayed again.
The setting is enabled after this. When you want to disable this function, select *disable* from the list according to the same procedure.

**Note**

- When the printer is turned off, the Canon IJ Status Monitor message varies depending on the *Auto Power On* setting.
  When the setting is *Enable*, "Printer is standing by" is displayed. When the setting is *Disable*, "Printer is offline" is displayed.
Reducing the Printer Noise

The silent function allows you to reduce the operating noise of this printer. Select when you wish to reduce the operating noise of the printer at night, etc. Using this function may lower the print speed.

The procedure for using the quiet mode is as follows:

1. Open the printer driver setup window

2. Click Quiet Settings on the Maintenance tab

   The Quiet Settings dialog box opens.

   **Note**
   
   • If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.

3. Set the quiet mode

   If necessary, specify one of the following items:

   **Do not use quiet mode**
   
   Select this option when you wish to use the printer with volume of normal operating noise.

   **Always use quiet mode**
   
   Select this option when you wish to reduce the operating noise of the printer.

   **Use quiet mode during specified hours**
   
   Select this option when you wish to reduce the operating noise of the printer during a specified period of time.
   
   Set the **Start time** and the **End time** of the quiet mode you wish to be activated. If both are set to the same time, the quiet mode will not function.

   **Important**
   
   • You can set the quiet mode from the printer or the printer driver.
   
   No matter how you use to set the quiet mode, the mode is applied when you perform operations from the printer or printing from the computer.

   • If you specify a time for **Use quiet mode during specified hours**, quiet mode is not applied to operations (direct print, etc.) performed directly from the printer.

4. Apply the settings

   Make sure that the printer is on and click **OK**.
   
   Click **OK** when the confirmation message appears.
   
   The settings are enabled hereafter.
Note

- The effects of the quiet mode may be less depending on the print quality settings.
Changing the Printer Operation Mode

If necessary, switch between various modes of printer operation.

The procedure for configuring Custom Settings is as follows:

1. Open the printer driver setup window

2. Make sure that the printer is on, and then click Custom Settings on the Maintenance tab

   The Custom Settings dialog box opens.

   >>> Note

   • If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status. If this happens, click OK to display the most recent settings specified on your computer.

3. If necessary, complete the following settings:

   Prevent paper abrasion

   The printer can increase the gap between the print head and the paper during high-density printing to prevent paper abrasion.

   Check this check box to prevent paper abrasion.

   ** Rotate 90 degrees left when orientation is [Landscape] **

   On the Page Setup tab, you can change the rotation direction of the Landscape in the Orientation.

   To rotate the print data 90 degrees to the left during printing, select this item. To rotate the print data 90 degrees to the right during printing, clear this item.

   >>> Important

   • Do not change this setting while the print job is displayed in the print wait list. Otherwise, characters may be omitted or the layout may become corrupt.

   Ink Drying Wait Time

   You can set the length of the printer rest time until printing of the next page begins. Moving the slider to the right increases the pause time, and moving the slider to the left decreases the time.

   If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.

   Reducing the ink drying wait time speeds up printing.

4. Apply the settings

   Click OK and when the confirmation message appears, click OK.

   The printer operates with the modified settings hereafter.
Initializing Printer Settings

You can initialize the printer settings.

To initialize the printer settings, press and hold the RESUME/CANCEL button and release it when the POWER lamp flashes 15 times.

All the printer settings are initialized.

After initializing the printer, perform setup again as necessary.

Note

- You cannot set the following setting items back to the default:
  - Current position of the print head
  - Setting to enable/disable remaining ink level notification
  - Remaining ink level count status

**Ink Tips**

How is ink used for various purposes other than printing?

Ink may be used for purposes other than printing.

During initial setup, some of the ink from the bundled ink bottles is used to fill the print head’s nozzles to ensure the printer is print-ready.

Therefore, the page yield of the initial bundled set of ink bottles is lower than that of the subsequent sets of bottles.

To keep printer’s performance, Canon printer performs cleaning automatically according to its condition. When the printer performs cleaning, a small amount of ink is consumed. In this case, all colors of ink may be consumed.

[Cleaning function]

The cleaning function helps the printer to suck air bubbles or ink itself from the nozzle and thus prevents print quality degradation or nozzle clogging.

Does black-and-white printing use color ink?

Black-and-white printing may use ink other than black ink depending on the type of printing paper or the settings of the printer driver. So, color ink is consumed even when printing in black-and-white.

Similarly, color inks are also consumed along with black ink during print head cleaning when Black is specified for cleaning.
Printing Tips

Check the printer status before printing!

- Is the print head OK?
  If a print head nozzle is clogged, print will be faint and papers will be wasted. Print the nozzle check pattern to check the print head.
  ➤ Maintenance Procedure

- Is the inside of the printer smeared with ink?
  After printing large quantities of paper or performing borderless printing, the area where papers go through may get smeared with ink. Clean the inside of your printer with Bottom Plate Cleaning.

Check how to load the paper correctly!

- Is the paper loaded in the correct orientation?
  To load paper in the rear tray, load paper WITH THE PRINTING SIDE FACING YOU.
  ➤ Loading Paper

- Is the paper curled?
  The curled paper causes paper jam. Flatten the curled paper, then reload it.
  ➤ ”Load the paper after correcting its curl.” in Paper Is Smudged / Printed Surface Is Scratched
Be Sure to Make Paper Settings after Loading Paper

If the media type setting is not the one for the loaded paper, printing results may not be satisfactory. After loading paper, be sure to select the appropriate media type setting for the loaded paper.

⇒ Print Results Are Unsatisfactory

There are various types of paper: paper with special coating on the surface for printing photos with optimal quality and paper suitable for documents.

Each media type has specific preset settings, such as how ink is used and sprayed, distance from nozzles, etc., so that you can print on that type with optimal image quality.

This allows you to print with the settings best suited for the loaded media type just by selecting that media type.
Canceling a Print Job

Never press the ON button!
If you press the ON button while printing is in progress, the print data sent from the computer queues in the printer and you may not be able to continue to print.
Press the RESUME/CANCEL button to cancel printing.
Printer Handling Precautions

Do not place any object on the top cover!

Do not place any object on the top cover. It will fall into the rear tray when the top cover is opened and cause the printer to malfunction. Also, place the printer where objects will not fall on it.
Keeping Print Quality High

The key to printing with the optimal printing quality is to prevent the print head from drying or clogging. Always observe the following rules for optimal printing quality.

**Note**

- Depending on the type of paper, ink may blur if you trace the printed area with a highlight pen or paintstick, or bleed if water or sweat comes in contact with the printed area.

**Never unplug the power cord until the power is turned off!**

If you press the **ON** button to turn off the power, the printer caps the print head (nozzles) automatically to prevent from drying. If you unplug the power cord from the wall outlet before the **POWER** lamp is turned off, the print head will not be capped properly and this will cause drying or clogging.

When **unplugging the power cord**, make sure that the **POWER** lamp is not lit.

**Print periodically!**

Just as the tip of a felt pen becomes dry and unusable if it has not been used for a long time, even if it is capped, the print head too, may become dried or clogged if the printer has not been used for a long time. We recommend you to use the printer at least once a month.
Transporting Your Printer

When relocating the printer for changing your living place or repairing it, make sure of the following.

**Important**

- You cannot take ink out of ink tanks.
- Check if the tank cap is completely inserted. If the ink tank cover is not completely closed, insert the tank cap properly.
- Do not tilt the printer. Ink may leak.
- Please handle with care and ensure the box remains flat and NOT turned upside down or on its side, as the printer may be damaged and ink in the printer may leak.
- Pack the printer in a sturdy box so that it is placed with its bottom facing down, using sufficient protective material to ensure safe transport.
- With the cartridge left installed in the printer, press the ON button to turn off the power. This allows the printer to automatically cap the print head, thus preventing it from drying.
- Do not remove the cartridge. Ink may leak.
- When transporting the printer, we recommend packing the printer in a plastic bag so that ink does not leak.
- When a shipping agent is handling transport of the printer, have its box marked "THIS SIDE UP" to keep the printer with its bottom facing down. Mark also with "FRAGILE" or "HANDLE WITH CARE".

1. Make sure the printer is on.

2. Hold down the RESUME/CANCEL button until the Alarm lamp flashes eight times, then release it immediately.

   The preparation to transport is executed and the printer is turned off after the preparation is complete.

   Do not perform any other operations until the printer completes the preparation.

3. Confirm that the POWER lamp is off and **unplug the power cord**.

   **Important**

   - Do not unplug the printer while the POWER lamp is lit or flashing, as it may cause malfunction or damage to the printer, making the printer unable to print.

4. Retract the paper output tray and the output tray extension, then close the paper support.

5. Unplug the printer cable from the computer and from the printer, then unplug the power cord from the printer.
6. Use adhesive tape to secure all the covers on the printer to keep them from opening during transportation. Then pack the printer in the plastic bag.

7. Attach the protective material to the printer when packing the printer in the box.
Legal Restrictions on Printing

It may be unlawful to print the following documents.

The list provided is non-exhaustive. When in doubt, check with a legal representative in your jurisdiction.

- Paper money
- Money orders
- Certificates of deposit
- Postage stamps (canceled or uncanceled)
- Identifying badges or insignias
- Selective service or draft papers
- Checks or drafts issued by governmental agencies
- Motor vehicle licenses and certificates of title
- Traveler's checks
- Food stamps
- Passports
- Immigration papers
- Internal revenue stamps (canceled or uncanceled)
- Bonds or other certificates of indebtedness
- Stock certificates
- Copyrighted works/works of art without permission of copyright owner

Other Supported OS

This product cannot be used with the iOS, Android and Windows RT.

- An internet connection is required to use Easy-WebPrint EX and all the Online Manual.
- Windows: Operation can only be guaranteed on a computer with Windows 10, Windows 8.1, Windows 8, Windows 7 or Windows Vista pre-installed.
- Windows: A CD-ROM Drive or internet connection is required during software installation.
- Windows: Internet Explorer 8, 9, 10 or 11 is required to install Easy-WebPrint EX.
- Windows: Some functions may not be available with Windows Media Center.
- Windows: .NET Framework 4 or 4.5 must be installed to use the Windows software.
- Windows: XPS Essentials Pack is required to print on Windows XP.
- Mac OS: For Mac OS, an internet connection is required during software installation.

  • Envelopes
Media Types You Can Use

To get the best printing result, choose paper suitable for printing. Canon provides various types of paper suitable for documents as well as paper suitable for photos or illustrations. We recommend the use of Canon genuine paper for printing your important photos.

Media Types

Commercially available papers

• Plain Paper (including recycled paper)
• Envelopes

Canon genuine papers

The Model Number of Canon genuine paper is shown in brackets. Refer to the instruction manual supplied with the paper for detailed information on the printable side and notes on handling paper. For information on the page sizes available for each Canon genuine paper, access our website.

Note

• You may not be able to purchase some Canon genuine papers depending on the country or region of purchase. Paper is not sold in the US by Model Number. Purchase paper by name.

Paper for printing documents:

• Canon Red Label Superior <WOP111>
• Canon Océ Office Colour Paper <SAT213>

Paper for printing photos:

• Glossy Photo Paper "Everyday Use" <GP-501/GP-601>
• Photo Paper Glossy <GP-601>
• Photo Paper Plus Glossy II <PP-201>
• Photo Paper Pro Luster <LU-101>
• Photo Paper Plus Semi-gloss <SG-201>
• Matte Photo Paper <MP-101>

Paper for printing business documents:

• High Resolution Paper <HR-101N>

⇒ Paper Load Limit
⇒ Paper Settings on the Printer Driver (Windows)
⇒ Paper Settings on the Printer Driver (Mac OS)

Page Sizes

You can use the following page sizes.

Standard sizes:

• A5, A4
• B5
• Letter, Legal
• 4" x 6" (10 x 15 cm), 5" x 7" (13 x 18 cm), 8" x 10" (20 x 25 cm)
• Envelope DL, Envelope Com 10
Non-standard sizes:
You can print on non-standard size paper within the following ranges.

• Minimum size: 4.00 x 6.00 inches (101.6 x 152.4 mm)
• Maximum size: 8.50 x 26.61 inches (215.9 x 676.0 mm)

Paper Weight
You can use paper in the following weight range.

• 17 to 28 lb (64 to 105 g/m²) (plain paper except for Canon genuine paper)

Do not use heavier or lighter paper (except for Canon genuine paper), as it could jam in the printer.

Notes on Storing Paper

• Take out only the necessary number of paper from the package, just before printing.
• To avoid curling, when you do not print, put unused paper back into the package and keep it on a level surface. And also, store it avoiding heat, humidity, and direct sunlight.
### Paper Load Limit

#### Commercially Available Papers

</table>
*1 Proper feeding of paper may not be possible at the maximum capacity depending on the type of paper or environmental conditions (either very high or low temperature or humidity). In such cases, reduce the number of paper you load at a time to less than half.

*2 We recommend that you remove the previously printed paper or envelope from the paper output tray before continuously printing to avoid blurs and discoloration.

*3 When loading paper in stacks, the print side may become marked as it is fed or paper may not feed properly. In this case, load one sheet at a time.
Media Types You Cannot Use

Do not use the following types of paper. Using such paper will cause not only unsatisfactory results, but also the printer to jam or malfunction.

• Folded, curled, or wrinkled paper
• Damp paper
• Paper that is too thin (weighing less than 17 lb (64 g /m²))
• Paper that is too thick (plain paper weighing more than 28 lb (105 g /m²), except for Canon genuine paper)
• Plain paper or notepad paper cut to a small size (when printing on paper smaller than A5)
• Picture postcards
• Postcards affixed with photos or stickers
• Envelopes with a double flap
• Envelopes with an embossed or treated surface
• Envelopes whose gummed flaps are already moistened and adhesive
• Any type of paper with holes
• Paper that is not rectangular
• Paper bound with staples or glue
• Paper with adhesives
• Paper decorated with glitter, etc.
Printing Area

- Printing Area
- Other Sizes than Letter, Legal, Envelopes
- Letter, Legal
- Envelopes
Printing Area

To ensure the best print quality, the printer allows a margin along each edge of media. The actual printable area will be the area inside these margins.

Recommended printing area: Canon recommends that you print within this area.

Printable area: The area where it is possible to print. However, printing in this area can affect the print quality or the paper feed precision.

Note

- By selecting Borderless Printing option, you can make prints with no margins.
- When performing Borderless Printing, slight cropping may occur at the edges since the printed image is enlarged to fill the whole page.
- For Borderless Printing, use the following paper:
  - Glossy Photo Paper "Everyday Use" <GP-501/GP-601>
  - Photo Paper Glossy <GP-601>
  - Photo Paper Plus Glossy II <PP-201>
  - Photo Paper Pro Luster <LU-101>
  - Photo Paper Plus Semi-gloss <SG-201>
  - Matte Photo Paper <MP-101>

Performing Borderless Printing on any other type of paper may substantially reduce printing quality and/or result in printouts with altered color hues.

Borderless Printing on plain paper may result in printouts with reduced quality. Use them only for test printing.

- Borderless Printing is not available for A5, B5, or Legal size paper, or envelopes.
- Depending on the type of paper, Borderless Printing may reduce the print quality at the top and bottom edges of the paper or cause these parts to become smudged.

![Diagram of Envelope DL](image)

- **Recommended printing area**
  - C: 0.31 inch (8.0 mm)
  - D: 1.14 inches (29.0 mm)
  - E: 0.13 inch (3.4 mm)
  - F: 0.13 inch (3.4 mm)
Administrator Password

Depending on the printer you are using, an administrator password is specified at the time of purchase. The password is either "canon" or the printer serial number if it is specified.

Model whose administrator password is specified as "canon":

- The administrator password is specified as "canon" for the models below.
  - MG7500 series, MG6700 series, MG6600 series, MG5600 series
  - MG2900 series, MX490 series, MB5300 series, MB5000 series
  - MB2300 series, MB2000 series, E480 series, E460 series
  - iP110 series, iB4000 series, PRO-100S series, PRO-10S series
- At the time of purchase, the user name "ADMIN" is also specified for the models above.
- The following character restrictions apply to the password that you change:
  - Set the password by using 0 to 32 characters.
  - The allowed characters are single-byte alphanumeric characters.
  - For security reasons, we recommend you use 6 and more alphanumeric characters.

Model whose serial number is used as the administrator password:

- For the models other than the above, the printer serial number is used as the administrator password.
  - Where Serial Number Is Located
  - The following character restrictions apply to the password that you change:
    - Set the password by using 4 to 32 characters.
    - The allowed characters are single-byte alphanumeric characters.
    - For security reasons, we recommend you use 6 and more alphanumeric characters.

Important

- You can change the password using one of the tools below. (Some tools may not be available depending on the printer you are using.)
  - operation panel of the printer
  - IJ Network Tool
  - printer information screen displayed on some Canon application software
- If the password has been changed while you are sharing the printer and you do not know the password, ask the administrator of the printer you are using.
- Set the password back to the default setting by initializing the printer settings.
  - For more on initializing the printer, search for "UG067" or "UG505" on your printer's Online Manual and see the instructions shown.
Authentication

Enter the password when the authentication screen is displayed.

⇒ Administrator Password

You need to enter the user name as well as the password depending on the printer you are using. For more on the user name, see the link above.

⇒⇒ Important

• A message to warn you that the identification information is not verified may be displayed depending on the printer you are using.
• For security reasons, we recommend you change the password.

⇒⇒ Note

• Use an OS or web browser below to use Remote UI.
  • iOS devices:
    OS: iOS 6.1 or later
    Browser: Default browser of iOS device (Mobile Safari)
  • Android devices:
    OS: Android 2.3.3 or later
    Browser: Default browser of Android device (browser or Chrome)
  • Mac OS devices:
    OS: Mac OS X v.10.6 or later
    Browser: Safari 5.1 or later
  • Windows devices:
    OS: Windows XP or later
    Browser: Internet Explorer 8 or later / Google Chrome 38.0.2125.104m or later / Mozilla Firefox 33.0 or later
Where Serial Number Is Located

The printer serial number is printed on the sticker attached on the printer. It consists of 9 alphanumeric characters (four alphabets followed by five numbers).

Example:

![Printer with Serial Number]

**Note**

- The printer serial number is written on the warranty.
- Depending on the printer you are using, you can check the serial number by printing out the network setting information of the printer. For more on printing, search for "NR044" on your printer's Online Manual and see the instructions shown.
List of Function for Each Model

See below to check the models you can/cannot use the card slot via a network.

Printing with Easy Setup

This section describes the simple procedure for setting the Quick Setup tab so that you can carry out appropriate printing on this printer.

1. Check that the printer is turned on

2. Load paper on the printer

3. Open the printer driver setup window

4. Select a frequently used profile

   In Commonly Used Settings on the Quick Setup tab, select a printing profile suited for the purpose. When you select a printing profile, the Additional Features, Media Type, and Printer Paper Size settings are automatically switched to the values that were preset.

   ![Quick Setup tab](image)

5. Select the print quality

   For Print Quality, select High, Standard, or Draft according to your purpose.
The print quality settings that can be selected may differ depending on a printing profile.

Complete the setup

Click OK.
When you execute print, the document is printed with settings that match your purpose.

When you select the Always Print with Current Settings check box, all settings specified on the Quick Setup, Main, and Page Setup tabs are saved, and you can print with the same settings from the next time as well.

In the Commonly Used Settings window, click Save... to register the specified settings.
Paper Settings on the Printer Driver

When you use this printer, selecting a media type that matches the print purpose will help you achieve the best print results.
You can use the following media types on this printer.

### Canon genuine papers (Document Printing)

<table>
<thead>

Various Printing Methods

- Setting a Page Size and Orientation
- Setting the Number of Copies and Printing Order
- Setting the Stapling Margin
- Execute Borderless Printing
- Fit-to-Page Printing
- Scaled Printing
- Page Layout Printing
- Tiling/Poster Printing
- Booklet Printing
- Duplex Printing
- Stamp/Background Printing
- Registering a Stamp
- Registering Image Data to be Used as a Background
- Setting Up Envelope Printing
- Displaying the Print Results before Printing
- Setting Paper Dimensions (Custom Size)
- Editing the Print Document or Reprinting from the Print History
Setting a Page Size and Orientation

The paper size and orientation are essentially determined by the application software. When the page size and orientation set for Page Size and Orientation on the Page Setup tab are same as those set with the application software, you do not need to select them on the Page Setup tab.

When you are not able to specify them with the application software, the procedure for selecting a page size and orientation is as follows:

You can also set page size and orientation on the Quick Setup tab.

1. Open the printer driver setup window

2. Select the paper size

Select a page size from the Page Size list on the Page Setup tab.

3. Set Orientation

Select Portrait or Landscape for Orientation. Check Rotate 180 degrees check box when you want to perform printing with the original being rotated 180 degrees.

4. Complete the setup

Click OK.

When you execute print, the document will be printed with the selected page size and the orientation.

**Note**

*If Normal-size is selected for Page Layout, then Automatically reduce large document that the printer cannot output is displayed.*

Normally, you can leave the check box checked. During printing, if you do not want to reduce large documents that cannot be printed on the printer, uncheck the check box.
Setting the Number of Copies and Printing Order

The procedure for specifying the number of copies and printing order is as follows:
You can also set the number of copies on the Quick Setup tab.

1. Open the printer driver setup window

2. Specify the number of copies to be printed

   For Copies on the Page Setup tab, specify the number of copies to be printed.

3. Specify the print order

   Check the Print from Last Page check box when you want to print from the last page in order, and uncheck the check box when you want to print from the first page.
   Check the Collate check box when you are printing multiple copies of a document and want to print out all pages in each copy together. Uncheck this check box when you want to print all pages with the same page number together.
   
   • Print from Last Page: ✔ / Collate: ✔

   • Print from Last Page: ☐ / Collate: ✔

   • Print from Last Page: ✔ / Collate: ☐
4. Complete the setup

Click OK.
When you execute print, the specified number of copies will be printed with the specified printing order.

**Important**

- When the application software that you used to create the document has the same function, specify the settings on the printer driver. However, if the print results are not acceptable, specify the function settings on the application software. When you specify the number of copies and the printing order with both the application software and this printer driver, the number of copies may be multiplied numbers of the two settings or the specified printing order may not be enabled.
- **Print from Last Page** appears grayed out and is unavailable when **Tiling/Poster** is selected for **Page Layout**.
- When **Booklet** is selected for **Page Layout**, **Print from Last Page** and **Collate** appear grayed out and cannot be set.
- When **Duplex Printing (Manual)** is selected, **Print from Last Page** appears grayed out and cannot be set.

**Note**

- By setting both **Print from Last Page** and **Collate**, you can perform printing so that papers are collated one by one starting from the last page.
These settings can be used in combination with **Normal-size**, **Borderless**, **Fit-to-Page**, **Scaled**, and **Page Layout**.
Setting the Stapling Margin

The procedure for setting the staple side and the margin width is as follows:

1. Open the printer driver setup window

2. Specify the side to be stapled

   Check the position of the stapling margin from **Stapling Side** on the **Page Setup** tab.

   The printer analyzes the **Orientation** and **Page Layout** settings, and automatically selects the best staple position. When you want to change the setting, select from the list.

3. Set the margin width

   If necessary, click **Specify Margin...** and set the margin width, and then click **OK**.
4. Complete the setup

Click OK on the Page Setup tab.
When you execute print, the data is printed with the specified staple side and margin width.

**Important**

- Stapling Side and Specify Margin... appear grayed out and are unavailable when:
  - Borderless, Tiling/Poster, or Booklet is selected for Page Layout
  - Scaled is selected for Page Layout (When Duplex Printing (Manual) is also selected, only Stapling Side can be specified.)
Execute Borderless Printing

The borderless printing function allows you to print data without any margin by enlarging the data so that it extends slightly off the paper. In standard printing, margins are created around the document area. However, in borderless printing function, these margins are not created. When you want to print data such as a photo without providing any margin around it, set borderless printing.

The procedure for performing borderless printing is as follows:

You can also set borderless printing in Additional Features on the Quick Setup tab.

Setting Borderless Printing

1. Open the printer driver setup window
2. Set borderless printing
   Select Borderless from the Page Layout list on the Page Setup tab.

   ![Borderless Printing Setting](image)

   Click OK when the confirmation message appears.
   When a message prompting you to change the media type appears, select a media type from the list and click OK.
3. Check the paper size
Check the **Page Size** list. When you want to change it, select another page size from the list. The list displays only sizes that can be used for borderless printing.

4. **Adjust the amount of extension from the paper**

   If necessary, adjust the amount of extension using the **Amount of Extension** slider.
   Moving the slider to the right increases the amount extending off the paper, and moving the slider to the left decreases the amount.
   It is recommended to set the slider at the second position from the right for most cases.

   ![Amount of Extension slider]

   **Important**

   • When the **Amount of Extension** slider is set to the rightmost position, the back side of the paper may become smudged.

5. **Complete the setup**

   Click **OK**.
   When you execute print, the data is printed without any margins on the paper.

   **Important**

   • When a page size that cannot be used for borderless printing is selected, the size is automatically changed to the valid page sizes for borderless printing.
   • When **Borderless** is selected, the **Printer Paper Size**, **Duplex Printing (Manual)**, **Stapling Side** settings, and the **Stamp/Background... (Stamp...)** button on the **Page Setup** tab appear grayed out and are unavailable.
   • When **Envelope**, or **High Resolution Paper** is selected from the **Media Type** list on the **Main** tab, you cannot perform borderless printing.
   • Depending on the type of the media used during borderless printing, the print quality may deteriorate at the top and bottom of the sheet or stains may form.
   • When the ratio of the height to the width differs from the image data, a portion of the image may not be printed depending on the size of the media used.
     In this case, crop the image data with an application software according to the paper size.

   **Note**

   • When **Plain Paper** is selected for **Media Type** on the **Main** tab, borderless printing is not recommended. Therefore, the message for media selection appears.
     When you are using plain paper for test printing, select **Plain Paper**, and click **OK**.

---

**Expanding the Range of the Document to Print**

Setting a large amount of extension allows you to perform borderless printing with no problems. However, the portion of the document extending off the paper range will not be printed and for this reason, the subjects around the perimeter of a photo may not be printed.

When you are not satisfied with the result of borderless printing, reduce the amount of extension. The extension amount decreases as the **Amount of Extension** slider is moved to the left.
**Important**

- When the amount of extension is decreased, an unexpected margin may be produced on the print, depending on the size of the paper.

**Note**

- When the **Amount of Extension** slider is set to the leftmost position, image data will be printed in the full size.
- When **Preview before printing** is checked on the **Main** tab, you can confirm whether there will be no margin before printing.
Fit-to-Page Printing

The procedure for printing a document that is automatically enlarged or reduced to fit the page size to be used is as follows:

1. Open the printer driver setup window

2. Set fit-to-page printing

Select **Fit-to-Page** from the **Page Layout** list on the **Page Setup** tab.

3. Select the paper size of the document

Using **Page Size**, select the page size that is set with your application software.

4. Select the print paper size

Select the size of the paper loaded in the printer from the **Printer Paper Size** list.

When the **Printer Paper Size** is smaller than the **Page Size**, the page image will be reduced. When the **Printer Paper Size** is larger than the **Page Size**, the page image will be enlarged.

The current settings are displayed in the settings preview on the left side of the printer driver.
5. Complete the setup

Click **OK**.

When you execute print, the document will be enlarged or reduced to fit to the page size.
Scaled Printing

The procedure for printing a document with pages enlarged or reduced is as follows:

1. Open the **printer driver setup window**

2. Set scaled printing

   Select **Scaled** from the **Page Layout** list on the **Page Setup** tab.

3. Select the paper size of the document

   Using **Page Size**, select the page size that is set with your application software.

4. Set the scaling rate by using one of the following methods:
   
   - Select a **Printer Paper Size**
     
     When the printer paper size is smaller than the **Page Size**, the page image will be reduced. When the printer paper size is larger than the **Page Size**, the page image will be enlarged.
• Specify a scaling factor

Directly type in a value into the **Scaling** box.

The current settings are displayed in the settings preview on the left side of the printer driver.

5. Complete the setup

Click **OK**.

When you execute print, the document will be printed with the specified scale.

**Important**

• When the application software which you used to create the original has the scaled printing function, configure the settings on your application software. You do not need to configure the same setting in the printer driver.
• Selecting *Scaled* changes the printable area of the document.
Page Layout Printing

The page layout printing function allows you to print more than one page image on a single sheet of paper.

The procedure for performing page layout printing is as follows:

1. Open the printer driver setup window

2. Set page layout printing

   Select Page Layout from the Page Layout list on the Page Setup tab. The current settings are displayed in the settings preview on the left side of the printer driver.

3. Select the print paper size

   Select the size of the paper loaded in the printer from the Printer Paper Size list.

4. Set the number of pages to be printed on one sheet and the page order

   If necessary, click Specify..., specify the following settings in the Page Layout Printing dialog box, and click OK.
Pages
To change the number of pages to be printed on a single sheet of paper, select the number of pages from the list.

Page Order
To change the page arrangement order, select a placement method from the list.

Page Border
To print a page border around each document page, check this check box.

5. Complete the setup
Click OK on the Page Setup tab.
When you execute print, the specified number of pages will be arranged on each sheet of paper in the specified order.
Tiling/Poster Printing

The tiling/poster printing function allows you to enlarge image data, divide it into several pages, and print these pages on separate sheets of paper. You can also paste the pages together to create a large print like a poster.

The procedure for performing tiling/poster printing is as follows:

**Setting Tiling/Poster Printing**

1. Open the printer driver setup window

2. Set tiling/poster printing

   Select Tiling/Poster from the Page Layout list on the Page Setup tab. The current settings are displayed in the settings preview on the left side of the printer driver.

3. Select the print paper size

   Select the size of the paper loaded in the printer from the Printer Paper Size list.

4. Set the number of image divisions and the pages to be printed
If necessary, click Specify..., specify the following settings in the Tiling/Poster Printing dialog box, and then click OK.

![Tiling/Poster Printing dialog box]

**Image Divisions**
Select the number of divisions (vertical x horizontal).
As the number of divisions increases, the number of sheets used for printing increases. If you are pasting pages together to create a poster, increasing the number of divisions allows you to create a larger poster.

**Print "Cut/Paste" in margins**
To leave out words "Cut" and "Paste", uncheck this check box.

### Note
- This feature may be unavailable when certain printer drivers or operating environments are used.

**Print "Cut/Paste" lines in margins**
To leave out cut lines, uncheck this check box.

**Print page range**
Specifies the printing range. Select All under normal circumstances.
To reprint only a specific page, select Pages and enter the page number you want to print. To specify multiple pages, enter the page numbers by separating them with commas or by entering a hyphen between the page numbers.

### Note
- You can also specify the print range by clicking the pages in the settings preview.

5. Complete the setup

Click OK on the Page Setup tab.
When you execute print, the document will be divided into several pages during printing.

**Printing Only Specific Pages**
If ink becomes faint or runs out during printing, you can reprint only the specific pages by following the procedure below:

1. Set the print range
In the settings preview on the left of the Page Setup tab, click the pages that do not need to be printed.
The pages that were clicked are deleted, and only the pages to be printed are displayed.
Note

- Click the deleted pages to display them again.
- Right-click the settings preview to select **Print all pages** or **Delete all pages**.

2. Complete the setup

   After completing the page selection, click **OK**.
   When you execute print, only specified pages will be printed.

Important

- Since tiling/poster printing enlarges the document when printing it, the print results may become coarse.
Booklet Printing

The booklet printing function allows you to print data for a booklet. Data is printed on both sides of the paper. This type of printing ensures that pages can be collated properly, in page number order, when the printed sheets are folded and stapled at the center.

The procedure for performing booklet printing is as follows:

1. Open the printer driver setup window

2. Set booklet printing

   Select Booklet from the Page Layout list on the Page Setup tab.

   The current settings are displayed in the settings preview on the left side of the window.

3. Select the print paper size

   Select the size of the paper loaded in the printer from the Printer Paper Size list.

4. Set the margin for stapling and the margin width

   Click Specify... and specify the following settings in the Booklet Printing dialog box, and then click OK.
Margin for stapling
Select which side should the stapling margin be on when the booklet is completed.

Insert blank page
To leave one side of a sheet blank, check the check box, and select the page to be left blank.

Margin
Enter the margin width. The specified width from the center of the sheet becomes the margin width for one page.

Page Border
To print a page border around each document page, check the check box.

5. Complete the setup
Click OK on the Page Setup tab.
When you execute print, the document will be printed on one side of a sheet of paper. When the printing of one side is complete, set the paper correctly by following the message and click OK.
When the printing of the other side is complete, fold the paper at the center of the margin and make a booklet.

 Important
• Booklet cannot be selected when a media type other than Plain Paper is selected for Media Type on the Main tab.

 Note
• The stamp and background are not printed on the inserted blank sheets with the Insert blank page function of booklet printing.
Duplex Printing

The procedure for printing data on both sides of one sheet of paper is as follows:
You can also set duplex printing in Additional Features on the Quick Setup tab.

1. Open the printer driver setup window

2. Set duplex printing

   Check the Duplex Printing (Manual) check box on the Page Setup tab.

3. Select the layout

   Select Normal-size, Fit-to-Page, Scaled, or Page Layout from the Page Layout list.

4. Specify the side to be stapled

   The best Stapling Side is selected automatically from the Orientation and Page Layout settings. To change the setting, select another stapling side from the list.

5. Set the margin width

   If necessary, click Specify Margin... and set the margin width, and then click OK.

6. Complete the setup
Click **OK** on the **Page Setup** tab. When you execute print, the document is first printed on one side of a sheet of paper. After one side is printed, reload the paper correctly according to the message. Then click **Start Printing** to print the opposite side.

**Important**
- When a media type other than **Plain Paper** is selected from **Media Type** on the **Main** tab, **Duplex Printing (Manual)** appears grayed out and is unavailable.
- When **Borderless**, **Tiling/Poster** or **Booklet** is selected from the **Page Layout** list, **Duplex Printing (Manual)** and **Stapling Side** appear grayed out and are unavailable.

**Note**
- If the back side of the paper becomes smudged during duplex printing, perform **Bottom Plate Cleaning** in the **Maintenance** tab.

**Related Topics**
- [Cleaning Inside the Printer](#)
- [Changing the Printer Operation Mode](#)
Stamp/Background Printing

Stamp or Background may be unavailable when certain printer drivers or operating environments are used.

The Stamp function allows you to print a stamp text or a bitmap over or behind document data. It also allows you to print date, time and user name. The Background function allows you to print a light illustration behind the document data.

The procedure for performing stamp/background printing is as follows:

**Printing a Stamp**

"CONFIDENTIAL," "IMPORTANT," and other stamps that are used often in companies are pre-registered.

1. Open the printer driver setup window

2. Click Stamp/Background... (Stamp...) on the Page Setup tab

   ![Stamp/Background dialog box](image)

   The Stamp/Background (Stamp) dialog box opens.

   ![Stamp dialog box](image)

   **Note**

   - With the XPS printer driver, the Stamp/Background... button has become the Stamp... button and only the stamp function can be used.
3. Select a stamp

Check the **Stamp** check box, and select the stamp to be used from the list. The current settings are displayed in the settings preview on the left side of the **Page Setup** tab.

4. Set the stamp details

If necessary, specify the following settings, and then click **OK**.

**Define Stamp... button**
To change the stamp text, bitmap, or position, click this.

**Place stamp over text**
To print the stamp on the front of the document, check this check box.

**Note**
- The stamp is given priority because the stamp is printed over the document data in the sections where the stamp and the document data overlap. When this check box is unchecked, the stamp is printed behind the document data and may be hidden in the overlapping sections depending on the application software used.
- **Place stamp over text** cannot be used when the XPS printer driver is used. When the XPS printer driver is used, the stamp is normally printed in the foreground of the document.

**Print semitransparent stamp**
Check this check box to print a semi-transparent stamp on the document. This function is available only when the XPS printer driver is used.

**Stamp first page only**
To print the stamp only on the first page, check this check box.

5. Complete the setup

Click **OK** on the **Page Setup** tab. When you execute print, the data is printed with the specified stamp.

**Printing a Background**

Two bitmap files are pre-registered as samples.

1. Open the **printer driver setup window**

2. Click **Stamp/Background...** on the **Page Setup** tab

   The **Stamp/Background** dialog box opens.

3. Select the background

   Check the **Background** check box, and select the background to be used from the list. The current settings are displayed in the settings preview on the left side of the **Page Setup** tab.

4. Set the background details

   If necessary, complete the following settings, and then click **OK**.
Select Background... button
To use another background or change the layout or density of a background, click this.

Background first page only
To print the background only on the first page, check this check box.

5. Complete the setup
Click OK on the Page Setup tab.
When you execute print, the data is printed with the specified background.

Important
• When Borderless is selected, the Stamp/Background... (Stamp...) button appears grayed out and is unavailable.

Note
• The stamp and background are not printed on blank sheets inserted with the Insert blank page function of booklet printing.

Registering a Stamp

This feature may be unavailable when certain printer drivers or operating environments are used.

You can create and register a new stamp. You can also change and re-register some of the settings of an existing stamp. Unnecessary stamps can be deleted at any time.

The procedure for registering a new stamp is as follows:

**Registering a New Stamp**

1. Open the [printer driver setup window](#).

2. Click **Stamp/Background...** (Stamp...) on the **Page Setup** tab.

   ![Stamp/Background dialog box](image)

   The **Stamp/Background (Stamp)** dialog box opens.

3. Click **Define Stamp...**

   The **Stamp Settings** dialog box opens.

   ![Stamp Settings dialog box](image)

   **Note**

   - With the XPS printer driver, the **Stamp/Background...** button has become the **Stamp...** button and only the stamp function can be used.
4. Configure the stamp while viewing the preview window

- **Stamp** tab

  Select **Text**, **Bitmap**, or **Date/Time/User Name** that matches your purpose for **Stamp Type**.
  
  - For **Text** registration, the characters must already be entered in **Stamp Text**. If necessary, change the **TrueType Font**, **Style**, **Size**, and **Outline** settings. You can select the color of the stamp by clicking **Select Color**.
  
  - For **Bitmap**, click **Select File** and select the bitmap file (.bmp) to be used. If necessary, change the settings of the **Size** and **Transparent white area**.
  
  - For **Date/Time/User Name**, the creation date/time and user name of the printed object are displayed in **Stamp Text**. If necessary, change the settings of **TrueType Font**, **Style**, **Size**, and **Outline**. You can select the color of the stamp by clicking **Select Color**.

- **Important**

  - **Stamp Text** appears grayed out and is unavailable when **Date/Time/User Name** is selected.

- **Placement** tab

  Select the stamp position from the **Position** list. You can also select **Custom** from the **Position** list and specify coordinates for **X-Position** and **Y-Position**.
  
  You can also change the stamp position by dragging the stamp in the preview window.
  
  To change the stamp position angle, type a value in the **Orientation** box directly.

- **Important**

  - **Orientation** cannot be changed when **Bitmap** is selected for **Stamp Type** on the **Stamp** tab.

5. Save the stamp

Click the **Save settings** tab and enter a title in the **Title** box, and then click **Save**.
Click **OK** when the confirmation message appears.

- **Note**

  - Spaces, tabs, and returns cannot be entered at the beginning or end of a title.
6. Complete the setup

   Click OK. The Stamp/Background (Stamp) dialog box opens again.
   The registered title appears in the Stamp list.

Changing and Registering Some of Stamp Settings

1. Select the stamp for which the settings are to be changed

   Select the Stamp check box in the Stamp/Background (Stamp) dialog box. Then from the list, select
   the title of the stamp to be changed.

2. Click Define Stamp...

   The Stamp Settings dialog box opens.

3. Configure the stamp while viewing the preview window

4. Overwrite save the stamp

   Click Save overwrite on the Save settings tab.
   When you want to save the stamp with a different title, type a new title in the Title box and click Save.
   Click OK when the confirmation message appears.

5. Complete the setup

   Click OK. The Stamp/Background (Stamp) dialog box opens again.
   The registered title appears in the Stamp list.

Deleting an Unnecessary Stamp

1. Click Define Stamp... in the Stamp/Background (Stamp) dialog box

   The Stamp Settings dialog box opens.

2. Select the stamp to be deleted

   Select the title of the stamp you want to delete from the Stamps list on the Save settings tab. Then
   click Delete.
   Click OK when the confirmation message appears.

3. Complete the setup

   Click OK. The Stamp/Background (Stamp) dialog box opens again.
Registering Image Data to be Used as a Background

This feature may be unavailable when certain printer drivers or operating environments are used.

You can select a bitmap file (.bmp) and register it as a new background. You can also change and register some of the settings of an existing background. An unnecessary background can be deleted.

The procedure for registering image data to be used as a background is as follows:

Registering New Background

1. Open the printer driver setup window

2. Click Stamp/Background... on the Page Setup tab

The Stamp/Background dialog box opens.

3. Click Select Background...

The Background Settings dialog box opens.

Note

- With the XPS printer driver, the Stamp/Background... button has become the Stamp... button and Background cannot be used.
4. Select the image data to be registered to the background
   
   Click **Select File...**. Select the target bitmap file (.bmp), and then click **Open**.

5. Specify the following settings while viewing the preview window
   
   **Layout Method**
   
   Select how the background image data is to be placed.
   
   When **Custom** is selected, you can set coordinates for **X-Position** and **Y-Position**.
   
   You can also change the background position by dragging the image in the preview window.

   **Intensity**
   
   Set the intensity of the background image data with the **Intensity** slider. Moving the slider to the right darkens the background, and moving the slider to the left lightens the background. To print the background at the original bitmap intensity, move the slider to the rightmost position.

6. Save the background
   
   Click the **Save settings** tab and enter a title in the **Title** box, and then click **Save**.
   
   Click **OK** when the confirmation message appears.

   **Note**

   - Spaces, tabs, and returns cannot be entered at the beginning or end of a title.

7. Complete the setup
   
   Click **OK**, then it returns to **Stamp/Background** dialog box.
   
   The registered title appears in the **Background** list.

**Changing and Registering Some Background Settings**

1. Select the background for which the settings are to be changed
   
   Select the **Background** check box in the **Stamp/Background** dialog box. Then from the list, select the title of the background you want to change.

2. Click **Select Background...**

   The **Background Settings** dialog box opens.
3. Specify each item on the **Background** tab while viewing the preview window.

4. Save the background

   - Click **Save overwrite** on the **Save settings** tab. When you want to save the background with a different title, enter a new title in the **Title** box and click **Save**.
   - Click **OK** when the confirmation message appears.

5. Complete the setup

   - Click **OK**, then it returns to **Stamp/Background** dialog box.
   - The registered title appears in the **Background** list.

**Deleting an Unnecessary Background**

1. Click **Select Background...** in the **Stamp/Background** dialog box

   - The **Background Settings** dialog box opens.

2. Select the background to be deleted

   - Select the title of the background you want to delete from the **Backgrounds** list on the **Save settings** tab, and then click **Delete**.
   - Click **OK** when the confirmation message appears.

3. Complete the setup

   - Click **OK**, then it returns to **Stamp/Background** dialog box.
Setting Up Envelope Printing

The procedure for performing envelope printing is as follows:

1. **Load envelope** on the printer

2. Open the **printer driver setup window**

3. **Select the media type**
   
   Select **Envelope** from **Commonly Used Settings** on the **Quick Setup** tab.

![Printer Driver Setup Window](image)

4. **Select the paper size**
   
   When the **Envelope Size Setting** dialog box is displayed, select **Envelope Com 10** or **Envelope DL**, and then click **OK**.

5. **Set the orientation**
   
   To print the addressee horizontally, select **Landscape** for **Orientation**.

![Envelope Orientation](image)

6. **Select the print quality**
   
   Select **High** or **Standard** that matches your purpose for **Print Quality**.

7. **Complete the setup**
   
   Click **OK**.
   
   When you execute print, the information is printed on the envelope.
Important

• When you execute envelope printing, guide messages are displayed.
  To hide the guide messages, check the Do not show this message again check box.
  To show the guide again, click the View Printer Status button on the Maintenance tab, and start the Canon IJ Status Monitor.
  Then click Envelope Printing from Display Guide Message of the Option menu to enable the setting.
Displaying the Print Results before Printing

If you are using the XPS printer driver, replace "Canon IJ Preview" with "Canon IJ XPS Preview" when reading this information.

You can display and check the print result before printing.

The procedure for displaying the print result before printing is as follows:

You can also set the print results display on the Quick Setup tab.

1. Open the printer driver setup window

2. Set the preview

   Check the Preview before printing check box on the Main tab.

![Printer Driver Setup Window]

3. Complete the setup

   Click OK.

   When you execute print, the Canon IJ Preview opens and displays the print results.

   **Important**

   • In the Manual Color Adjustment dialog box, the Color Adjustment tab contains the Print a pattern for color adjustment check box. When this check box is selected, the Preview before printing appears grayed out and is unavailable.

➤ Canon IJ Preview
Setting Paper Dimensions (Custom Size)

You can specify the height and width of paper when its size cannot be selected from the Page Size. Such a paper size is called "custom size."

The procedure for specifying a custom size is as follows:

You can also set a custom size in Printer Paper Size on the Quick Setup tab.

1. Open the printer driver setup window

2. Select the paper size

   Select Custom... for Page Size on the Page Setup tab.

   ![Custom Paper Size Dialogue Box](image)

   The Custom Paper Size dialog box opens.

3. Set the custom paper size

   Specify Units, and enter the Width and Height of the paper to be used. Then click OK.

4. Complete the setup

   Click OK on the Page Setup tab.

   When you execute print, the data is printed with the specified paper size.
If the application software that created the document has a function for specifying height and width values, use the application software to set the values. If the application software does not have such a function or if the document does not print correctly, perform the above procedure from the printer driver to set the values.

Printing may be disabled depending on the size of the specified user-defined media.

For information about printable sizes for user-defined media, see "Media Types You Can Use."
Editing the Print Document or Reprinting from the Print History

This function is unavailable when the standard IJ printer driver is used.

In the Canon IJ XPS preview window, you can edit the print document or retrieve the document print history to print the document.

The procedure for using the Canon IJ XPS Preview is as follows:

- **Print**
- **Combine Documents**
- **Delete Document**
- **Reset Documents**
- **View Thumbnails**
- **Move Document**
- **Undo**
- **Move Page**
- **Delete Page**

**Note**

- By clicking **View Thumbnails**, you can display or hide thumbnails of the print documents selected in the **Document Name** list.
- Clicking **Undo** reverses the change that just performed.
Editing and Printing a Print Document

When printing multiple documents or pages, you can combine documents, change the print sequence of the documents or pages, or delete documents or pages.

1. Open the printer driver setup window

2. Set the preview
   - Check the **Preview before printing** check box on the **Main** tab.

3. Complete the setup
   - Click **OK**.
   - The Canon IJ XPS Preview will start and the print result will be displayed before printing.

4. Editing print documents and print pages
   - **Combining print documents**
     You can combine multiple print documents to form a single document. By combining print documents, you can prevent blank pages from being inserted when you execute duplex printing or page layout printing.
     From the **Document Name** list, select the documents to be combined. On the **Edit** menu, select **Combine Documents** from **Documents** to combine the documents in the listed sequence.
     To select multiple print documents, hold down the Ctrl key and click the documents to be merged, or hold down the Shift key and press the upper arrow or lower arrow key. You can also click a blank area in the document list and drag the mouse to select multiple documents.
     When you combine documents, the documents selected before the combining are deleted from the list and the combined document is added to the list.
   - **Changing the sequence of print documents or print pages**
     - To change the sequence of the print documents, go to the **Document Name** list, and select the print document to be moved. Next, on the **Edit** menu, select **Move Document** from **Documents**, and select the appropriate item. You can also click and drag a print document to change the print sequence.
     - To change the sequence of the print pages, click **View Thumbnails** from the **Option** menu, and select the print page to be moved. Next, on the **Edit** menu, select **Move Page** from **Pages**, and select the appropriate item. You can also click and drag a print page to change the print sequence.
   - **Deleting print documents and print pages**
     - To delete a print document, select the target document from the **Document Name** list, and on the **Edit** menu, choose **Documents** and then **Delete Document**.
     - To delete a print page, click **View Thumbnails** from the **Option** menu, and select the print page to be deleted. Next, on the **Edit** menu, select **Delete Page** from **Pages**.
   - **Print page recovery**
     You can recover pages that were deleted with **Delete Page**.
     To recover pages, select the **View Deleted Pages** check box from the **Option** menu, and select the pages to be recovered from among the displayed thumbnail pages. Then from the **Edit** menu chose **Pages** and then **Restore Page**.

After editing the print documents or print pages, you can change the print settings on the **Page Information**, **Layout** and **Manual Color Adjustment** tabs as necessary.
Important

• To display the multiple documents in the list, open the preview and execute print again.
• To return the print documents to their original condition before they were edited in the preview, on the Edit menu, select Reset Documents from Documents.
• If the documents to be combined have different print settings, a message may be displayed. Check the contents of the displayed message before combining the documents.
• If the documents to be combined have different output paper sizes and duplex printing or page layout printing is to be performed, the printer may not produce the expected print results for certain print pages. Check the preview before printing.
• Depending on the print settings of the print document, some functions may not be available in the Canon IJ XPS preview.

Note

• You can rename Document Name to any name.

5. Executing print

Click Print.
When you execute print, the printer uses the specified settings to print the data.

Reprinting from the Print History

When you click Save Print History on the File menu to enable the setting, the document printed from the preview is saved, and you can reprint the document with the same settings.

1. Displaying the print history

Open the printer driver setup window. Then on the Maintenance tab, select View Print History. The saved print document is displayed in the preview.

Important

• To limit the number of print history registrations, click History Entry Limit on the File menu.
• If the limit on the number of registration is exceeded, the print history registrations are deleted starting from the oldest one.

2. Selecting a print document

From the Document Name list, select the document to be printed.

3. Executing print

Click Print.

> Adjusting Intensity/Contrast Using Sample Patterns (Printer Driver)
Setting the Print Quality Level (Custom)

The print quality level can be set in the Custom.

The procedure for setting the print quality level is as follows:

1. Open the printer driver setup window

2. Select the print quality

   On the Main tab, select Custom for Print Quality, and click Set....

   ![Custom dialog box]

   The Custom dialog box opens.

3. Setting the print quality level

   Drag the slider bar to select the print quality level and click OK.

4. Complete the setup

   Click OK on the Main tab.
   When you execute print, the image data is printed with the selected print quality level.

   **Important**
   - Certain print quality levels cannot be selected depending on the settings of Media Type.

**Related Topics**

- Specifying Color Correction

Printing a Color Document in Monochrome

The procedure for printing a color document in monochrome is as follows:
You can also set a grayscale printing in Additional Features on the Quick Setup tab.

1. Open the printer driver setup window

2. Set grayscale printing
   Check the Grayscale Printing check box on the Main tab.

3. Complete the setup
   Click OK.
   When you execute print, the document is converted to grayscale data. It allows you to print the color document in monochrome.

**Important**

- When the Grayscale Printing check box is checked, the printer driver processes image data as sRGB data. In this case, actual colors printed may differ from those in the original image data.
- When using the grayscale printing function to print Adobe RGB data, convert the data to sRGB data using an application software.

**Note**

- During Grayscale Printing, inks other than black ink may be used as well.
Specifying Color Correction

You can specify the color correction method suited to the type of document to be printed. Normally, the printer driver adjusts the colors by using Canon Digital Photo Color so that data is printed with color tints that most people prefer. This method is suitable for printing sRGB data.

When you want to print by using the color space (sRGB) of the image data effectively, select **ICM (ICC Profile Matching)**. When you want to use an application software to specify a printing ICC profile, select **None**.

The procedure for specifying color correction is as follows:

You can also set color correction on the **Quick Setup** tab by choosing **Photo Printing** under **Commonly Used Settings**, and then choosing **Color/Intensity Manual Adjustment** under **Additional Features**.

1. **Open the printer driver setup window**

2. **Select the manual color adjustment**

   On the **Main** tab, select **Manual** for **Color/Intensity**, and click **Set...**

   ![Printer Driver Setup Window](image)

   The **Manual Color Adjustment** dialog box opens.

3. **Select color correction**

   Click **Matching** tab, select **Color Correction** setting that matches your purpose from the following, and click **OK**.

   ![Manual Color Adjustment Dialog Box](image)
Driver Matching
With Canon Digital Photo Color, you can print sRGB data with color tints that most people prefer.

ICM (ICC Profile Matching)
Adjusts the colors by using an ICC profile when printing.
Specify the input profile to be used.

None
The printer driver does not perform color correction. Select this value when you are specifying an individually created printing ICC profile in an application software to print data.

4. Complete the setup
Click OK on the Main tab.
When you execute print, the document data is printed with the specified color correction.

Important
• When ICM is disabled in the application software, ICM is unavailable for Color Correction and the printer may not be able to print the image data properly.
• When the Grayscale Printing check box on the Main tab is checked, Color Correction appears grayed out and is unavailable.

⇒ Printing with ICC Profiles
Optimal Photo Printing of Image Data

When people print images taken with digital cameras, they sometimes feel that the printed color tones differ from those of actual image or those displayed on the monitor. To get the print results as close as possible to the desired color tones, you must select a printing method that is best suited to the application software used or to your purpose.

Color Management

Devices such as digital cameras, scanners, monitors, and printers handle color differently. Color management (color matching) is a method that manages device-dependent "colors" as a common color space.

For Windows, a color management system called "ICM" is built into the operating system. sRGB is one of the common color spaces that is frequently used.

ICC profiles convert device-dependent "colors" into a common color space. By using an ICC profile and carrying out color management, you can draw out the color space of the image data within the color reproduction area that the printer can express.

Selecting a Printing Method Suited to the Image Data

The recommended printing method depends on the color space (sRGB) of the image data or the application software to be used.

There are two typical printing methods. Check the color space (sRGB) of the image data and the application software to be used, and then select the printing method suited to your purpose.

Adjusting Colors with the Printer Driver

Describes the procedure for printing sRGB data by using the color correction function of the printer driver.

• To print using Canon Digital Photo Color
  The printer prints data with color tints that most people prefer, reproducing colors of the original image data and producing three-dimensional effects and high, sharp contrasts.

• To print by directly applying editing and touch-up results of an application software
  When printing the data, the printer brings out subtle color difference between dark and light areas, while leaving the darkest and lightest areas intact.

  When printing the data, the printer applies fine adjustment results, such as brightness adjustments made with an application software.

Printing with ICC Profiles

Describes the procedure for printing by using the color space of sRGB effectively.

You can print with a common color space by setting up the application software and the printer driver so that the color management matches the input ICC profile of the image data.

The method for setting up the printer driver differs depending on the application software to be used.
Adjusting Colors with the Printer Driver

You can specify the color correction function of the printer driver to print sRGB data with color tints that most people prefer through the use of Canon Digital Photo Color.

When printing from an application software that can identify ICC profiles and allows you to specify them, use a printing ICC profile in the application software, and select settings for color management.

The procedure for adjusting colors with the printer driver is as follows:

1. Open the printer driver setup window:

2. Select the manual color adjustment:

   - On the Main tab, select Manual for Color/Intensity, and click Set...

3. Select color correction:

   - Click Matching tab, and select Driver Matching for Color Correction.

![Manual Color Adjustment dialog box]

4. Set the other items:

   - If necessary, click Color Adjustment tab, and adjust the color balance (Cyan, Magenta, Yellow) and adjust Brightness, Intensity, and Contrast settings, and then click OK.

5. Complete the setup:

   - Click OK on the Main tab.
   - When you execute print, the printer driver adjusts the colors when printing the data.

- Adjusting Intensity
- Adjusting Contrast
Printing with ICC Profiles

When the image data has a specified input ICC profile, you can print by using the color space (sRGB) of the data effectively.

The printer driver setting procedure varies depending on the application software used to print.

Specify an ICC Profile from the Application Software and Print the Data

When you print the editing and touch-up results of Adobe Photoshop, Canon Digital Photo Professional, or any application software that allows you to specify input and printing ICC profiles, you print by effectively using the color space of the input ICC profile specified in the image data.

To use this printing method, use your application software to select color management items and specify an input ICC profile and a printing ICC profile in the image data.

Even if you print using a printing ICC profile that you created yourself from your application software, be sure to select color management items from your application software.

For instructions, refer to the manual of the application software you are using.

1. Open the printer driver setup window

2. Select the manual color adjustment

   On the Main tab, select Manual for Color/Intensity, and click Set....
   The Manual Color Adjustment dialog box opens.

3. Select color correction

   Click Matching tab, and select None for Color Correction.

4. Set the other items

   If necessary, click Color Adjustment tab, and adjust the color balance (Cyan, Magenta, Yellow) and adjust Brightness, Intensity, and Contrast settings, and then click OK.
5. Complete the setup

Click **OK** on the **Main** tab.
When you execute print, the printer uses the color space of the image data.

**Specify an ICC Profile with the Printer Driver, and then Print**

Print from an application software that cannot identify input ICC profiles or does allow you to specify one by using the color space of the input ICC profile (sRGB) found in the data.

1. Open the **printer driver setup window**

2. Select the manual color adjustment

   On the **Main** tab, select **Manual** for **Color/Intensity**, and click **Set**....
   The **Manual Color Adjustment** dialog box opens.

3. Select color correction

   Click **Matching** tab, and select **ICM** (**ICC Profile Matching**) for **Color Correction**.

4. For **Input Profile**, select **Standard**.

   **Important**

   • When the application software specifies an input profile, the input profile setting of the printer driver becomes invalid.

5. Set the other items

   If necessary, click **Color Adjustment** tab, and adjust **Cyan**, **Magenta**, **Yellow**, **Brightness**, **Intensity**, and **Contrast** settings, and then click **OK**.

6. Complete the setup
Click **OK** on the **Main** tab.
When you execute print, the printer uses the color space of the image data.

Adjusting Color Balance

You can adjust the color tints when printing. Since this function adjusts color balance of the output by changing the ink ratios of each color, it changes the total color balance of the document. Use the application software when you want to change the color balance significantly. Use the printer driver only when you want to adjust the color balance slightly. The following sample shows the case when color balance is used to intensify cyan and to diminish yellow so that the overall colors are more uniform.

The procedure for adjusting color balance is as follows:

1. Open the printer driver setup window
2. Select the manual color adjustment
   On the **Main** tab, select **Manual** for **Color/Intensity**, and click **Set**...

   The **Manual Color Adjustment** dialog box opens.

   ![Manual Color Adjustment dialog box](image)

3. Adjust color balance
There are individual sliders for Cyan, Magenta, and Yellow. Each color becomes stronger when the corresponding slider is moved to the right, and becomes weaker when the corresponding slider is moved to the left. For example, when cyan becomes weaker, the color red becomes stronger.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

After adjusting each color, click OK.

4. Complete the setup

Click OK on the Main tab.

When you execute print, the document is printed with the adjusted color balance.

Important

- When the Grayscale Printing check box on the Main tab is checked, the color balance (Cyan, Magenta, Yellow) appear grayed out and are unavailable.

Related Topics

Adjusting Color Balance Using Sample Patterns (Printer Driver)

You can look at the print results of pattern print and adjust the color balance. When you change the color balance or intensity/contrast of a document, the pattern print function prints the adjustment results in a list, together with the adjustment values.

Described below is the procedure for adjusting the color balance while looking at the pattern.

1. Open the printer driver setup window

2. Select the manual color adjustment

   On the Main tab, select Manual for Color/Intensity, and click Set....

   ![Manual Color Adjustment dialog box]

   The Manual Color Adjustment dialog box opens.

3. Selecting pattern print

   On the Color Adjustment tab, select the Print a pattern for color adjustment check box, and click Pattern Print preferences....
4. Setting pattern print

When the **Pattern Print** dialog box opens, set the following items, and then click **OK**.

**Parameters to Adjust**
- **Select** Cyan/Magenta/Yellow.

  **Important**
  - When the **Grayscale Printing** check box on the **Main** tab is checked, **Cyan/Magenta/Yellow** appear grayed out and are unavailable.

**Printer Paper Size**
- **Select** the paper size to be used for pattern printing.

  **Note**
  - Depending on the paper size selected on the **Page Setup** tab, there may be sizes that cannot be selected.

**Amount of Pattern Instances**
- **Select** Largest, Large, or Small to set the number of patterns to be printed.

  **Note**
  - **Largest** and **Large** cannot be selected when certain paper sizes or output paper sizes are selected.

**Color Variation Between Instances**
- **Set** the amount of color change between neighboring patterns.
5. Checking the print results of pattern print

On the **Color Adjustment** tab, select **OK** to close the **Manual Color Adjustment** dialog box. On the **Main** tab, select **OK**, and then execute printing. The printer then prints a pattern in which the color balance that you set is the center value.

![Pattern Print Results]

6. Adjusting the color balance

Look at the print results and select the image that you like best. Then enter the color balance numbers indicated at the bottom of that image into the **Cyan**, **Magenta**, and **Yellow** fields on the **Color Adjustment** tab.

Clear the **Print a pattern for color adjustment** check box, and click **OK**.
Note

- You can also set color balance on the **Quick Setup** tab by choosing **Photo Printing** under **Commonly Used Settings**, and then choosing **Color/Intensity Manual Adjustment** under **Additional Features**.

7. Complete the setup

Click **OK** on the **Main** tab.
Then when you execute printing, the document is printed with the color balance that was adjusted by the pattern print function.

Important

- When **Print a pattern for color adjustment** is selected on the **Color Adjustment** tab, the following items are grayed out and cannot be set:
  - **Preview before printing** on the **Main** tab
  - **Stapling Side** and **Specify Margin**... on the **Page Setup** tab (When **Duplex Printing (Manual)** is set, only **Stapling Side** can be set.)

- You can print a pattern only if the **Page Layout** setting on the **Page Setup** tab is **Normal-size** or **Borderless**.
- When the **Grayscale Printing** check box on the **Main** tab is checked, **Cyan**, **Magenta**, and **Yellow** appear grayed out and are unavailable.
- Depending on your application software, this function may not be available.

Adjusting Brightness

You can change the brightness of the overall image data during printing. This function does not change pure white or pure black but it changes the brightness of the intermediate colors.

The following sample shows the print result when the brightness setting is changed.

Light is selected  Normal is selected  Dark is selected

The procedure for adjusting brightness is as follows:
You can also set brightness on the Quick Setup tab by choosing Photo Printing under Commonly Used Settings, and then choosing Color/Intensity Manual Adjustment under Additional Features.

1. Open the printer driver setup window
2. Select the manual color adjustment
   On the Main tab, select Manual for Color/Intensity, and click Set....

   The Manual Color Adjustment dialog box opens.

3. Specify the brightness
   Select Light, Normal, or Dark for Brightness, and click OK. The current settings are displayed in the settings preview on the left side of the printer driver.
4. Complete the setup

   Click **OK** on the **Main** tab.
   When you execute print, the data is printed at the specified brightness.

**Related Topics**

- [Adjusting Contrast](#)
**Adjusting Intensity**

You can dilute (brighten) or intensify (darken) the colors of the overall image data during printing. The following sample shows the case when the intensity is increased so that all colors become more intense when the image data is printed.

![No adjustment](image1) ![Higher intensity](image2)

The procedure for adjusting intensity is as follows:

You can also set intensity on the **Quick Setup** tab by choosing **Photo Printing** under **Commonly Used Settings**, and then choosing **Color/Intensity Manual Adjustment** under **Additional Features**.

1. Open the **printer driver setup window**

2. Select the manual color adjustment

   On the **Main** tab, select **Manual** for **Color/Intensity**, and click **Set**...

   ![Printer Driver Setup](image3)

   The **Manual Color Adjustment** dialog box opens.

3. Adjust intensity

   Moving the **Intensity** slider to the right intensifies (darkens) the colors, and moving the slider to the left dilutes (brightens) the colors.

   You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

   After adjusting each color, click **OK**.
4. Complete the setup

Click **OK** on the **Main** tab.
When you execute print, the image data is printed with the adjusted intensity.

- Adjusting Color Balance
- Adjusting Color Balance Using Sample Patterns (Printer Driver)
- Adjusting Brightness
- Adjusting Contrast
- Adjusting Intensity/Contrast Using Sample Patterns (Printer Driver)

**Adjusting Contrast**

You can adjust the image contrast during printing.
To make the differences between the light and dark portions of images greater and more distinct, increase the contrast. On the other hand, to make the differences between the light and dark portions of images smaller and less distinct, reduce the contrast.

![No adjustment vs Adjust the contrast](image)

The procedure for adjusting contrast is as follows:

You can also set contrast on the **Quick Setup** tab by choosing **Photo Printing** under **Commonly Used Settings**, and then choosing **Color/Intensity Manual Adjustment** under **Additional Features**.

1. Open the [printer driver setup window](#).

2. Select the manual color adjustment

   On the **Main** tab, select **Manual** for **Color/Intensity**, and click **Set...**

   ![Printer driver setup window](image)

   The **Manual Color Adjustment** dialog box opens.

3. Adjust the contrast

   Moving the **Contrast** slider to the right increases the contrast, and moving the slider to the left decreases the contrast.

   You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.
After adjusting each color, click OK.

4. Complete the setup

Click OK on the Main tab.
When you execute print, the image is printed with the adjusted contrast.

- Adjusting Color Balance Using Sample Patterns (Printer Driver)
- Adjusting Brightness
- Adjusting Intensity
- Adjusting Intensity/Contrast Using Sample Patterns (Printer Driver)
Adjusting Intensity/Contrast Using Sample Patterns (Printer Driver)

You can look at the print results of pattern print and adjust the intensity/contrast. When you change the color balance or intensity/contrast of a document, the pattern print function prints the adjustment results in a list, together with the adjustment values.

Described below is the procedure for adjusting the intensity/contrast while looking at the pattern.

1. Open the printer driver setup window

2. Select the manual color adjustment
   On the Main tab, select Manual for Color/Intensity, and click Set....

   ![Printer Driver Setup Window](image)

   The Manual Color Adjustment dialog box opens.

3. Selecting pattern print
   On the Color Adjustment tab, select the Print a pattern for color adjustment check box, and click Pattern Print preferences....
4. Setting pattern print

When the Pattern Print dialog box opens, set the following items, and then click OK.

Parameters to Adjust
Select Intensity/Contrast.

Printer Paper Size
Select the paper size to be used for pattern printing.

Note
• Depending on the paper size selected on the Page Setup tab, there may be sizes that cannot be selected.

Amount of Pattern Instances
Select Largest, Large, or Small to set the number of patterns to be printed.

Note
• Largest and Large cannot be selected when certain paper sizes or output paper sizes are selected.

Color Variation Between Instances
Set the amount of color change between neighboring patterns.

Note
• Large is about double the size of Medium, and Small is about half the size of Medium.

5. Checking the print results of pattern print
On the **Color Adjustment** tab, select **OK** to close the **Manual Color Adjustment** dialog box. On the **Main** tab, select **OK**, and then execute printing. The printer then prints a pattern in which the intensity/contrast that you set is the center value.

6. Adjusting the intensity/contrast

Look at the print results and select the image that you like best. Then enter the intensity/contrast numbers indicated at the bottom of that image into the **Intensity** and **Contrast** fields on the **Color Adjustment** tab.

Clear the **Print a pattern for color adjustment** check box, and click **OK**.
7. Complete the setup

Click OK on the Main tab.
Then when you execute printing, the document is printed with the intensity/contrast that was adjusted by the pattern print function.

**Important**

- When Print a pattern for color adjustment is selected on the Color Adjustment tab, the following items are grayed out and cannot be set:
  - Preview before printing on the Main tab
  - Stapling Side and Specify Margin... on the Page Setup tab (When Duplex Printing (Manual) is set, only Stapling Side can be set.)
- You can print a pattern only if the Page Layout setting on the Page Setup tab is Normal-size or Borderless.
- Depending on your application software, this function may not be available.

- Instructions for Use (Printer Driver)
Canon IJ Printer Driver

The Canon IJ printer driver (called printer driver below) is a software that is installed on your computer for printing data with this printer.

The printer driver converts the print data created by your application software into data that your printer can understand, and sends the converted data to the printer.

Because different models support different print data formats, you need a printer driver for the specific model you are using.

Printer Driver Types

On Windows Vista SP1 or later, you can install the XPS printer driver in addition to the regular printer driver.

The XPS printer driver is suited to print from an application software that supports XPS printing.

Important

• To use the XPS printer driver, the standard printer driver must already be installed on your computer.

Installing the Printer Driver

• To install the regular printer driver, load the Setup CD-ROM that comes with the printer, and then install the driver from Start Setup Again.

• To install the XPS printer driver, load the Setup CD-ROM that comes with the printer, and then select XPS Driver from Add Software.

Specifying the Printer Driver

To specify the printer driver, open the Print dialog box of the application software you are using, and select "XXX" (where "XXX" is your model name) to specify the regular printer driver or select "XXX XPS" (where "XXX" is your model name) to specify the XPS printer driver.

Displaying the Manual from the Printer Driver

To display a description of a tab in the printer driver setup window, click the Help button found on the tab.

Related Topic

➤ How to Open the Printer Driver Setup Window
How to Open the Printer Driver Setup Window

You can display the printer driver setup window from the application software in use or from the printer icon.

Open the Printer Driver Setup Window through the Application Software

Follow the procedure below to configure printing profile when printing.

1. Select the command that you perform printing on the application software
   In general, select Print on the File menu to open the Print dialog box.

2. Select your model name and click Preferences (or Properties)
   The printer driver setup window appears.

   **Note**
   • Depending on application software you use, command names or menu names may vary and there may be more steps. For details, refer to the user’s manual of your application software.

Opening the Printer Driver Setup Window from the Printer Icon

Follow the procedure below to perform printer maintenance operations such as print head cleaning, or to configure a printing profile that is common to all application software.

1. Select as described below:
   • If you are using Windows 8.1 or Windows 8, from the Desktop charms, select Settings -> Control Panel -> Hardware and Sound -> Devices and Printers.
   • If you are using Windows 7, select the Start menu -> Devices and Printers.
   • If you are using Windows Vista, select the Start menu -> Control Panel -> Hardware and Sound -> Printers.
   • If you are using Windows XP, select the start menu -> Control Panel -> Printers and Other Hardware -> Printers and Faxes.

2. Right-click your model name icon, and then select Printing preferences from the displayed menu
   The printer driver setup window appears.

   **Important**
   • Opening the printer driver setup window through Printer properties (Windows 8.1, Windows 8, Windows 7) or Properties (Windows Vista, Windows XP) displays such tabs regarding the Windows functions as the Ports (or Advanced) tab. Those tabs do not appear when opening through Printing preferences or application software. For tabs regarding Windows functions, refer to the user's manual for the Windows.
Canon IJ Status Monitor

The Canon IJ Status Monitor is an application software that shows the status of the printer and the progress of printing. You will know the status of the printer with graphics, icons, and messages.

Launching the Canon IJ Status Monitor

The Canon IJ Status Monitor launches automatically when print data is sent to the printer. When launched, the Canon IJ Status Monitor appears as a button on the task bar.

Click the button of the status monitor displayed on the task bar. The Canon IJ Status Monitor appears.

Note

- To open the Canon IJ Status Monitor when the printer is not printing, open the printer driver setup window and click View Printer Status on the Maintenance tab.
- The information displayed on the Canon IJ Status Monitor may differ depending on the country or region where you are using your printer.

When Errors Occur

The Canon IJ Status Monitor is automatically displayed if an error occurs (e.g., if the printer runs out of paper or if the ink is low).

In such cases, take the appropriate action as described.
Canon IJ Preview

The Canon IJ Preview is an application software that displays what the print result will look like before a document is actually printed.

The preview reflects the information that is set within the printer driver and allows you to check the document layout, print order, and number of pages. You can also change the media type settings.

When you want to display a preview before printing, open the printer driver setup window, click the Main tab, and check the Preview before printing check box.

When you do not want to display a preview before printing, uncheck the check box.

Important

• If you are using the XPS printer driver, see "Editing the Print Document or Reprinting from the Print History."

➡ Displaying the Print Results before Printing
Deleting the Undesired Print Job

If you are using the XPS printer driver, replace "Canon IJ Status Monitor" with "Canon IJ XPS Status Monitor" when reading this information.

If the printer does not start printing, canceled or failed print job data may be remaining. Delete the undesired print job by using the Canon IJ Status Monitor.

1. Display the Canon IJ Status Monitor
   - Click the icon of the Canon IJ Status Monitor displayed on the task bar.
   - The Canon IJ Status Monitor appears.

2. Display the print jobs
   - Click **Display Print Queue**.
   - The print queue window opens.

3. Delete the print jobs
   - Select **Cancel All Documents** from the **Printer** menu.
   - When the confirmation message appears, click **Yes**.
   - The deletion of the print job is complete.

**Important**

- Users who have not been granted access permission for printer management cannot delete the print job of another user.

**Note**

- When you perform this operation, all print jobs are deleted. If the print queue list contained a necessary print job, start the printing process over from the beginning.
Instructions for Use (Printer Driver)

This printer driver is subject to the following restrictions. Keep the following points in mind when using the printer driver.

Restrictions on the Printer Driver

• With some applications, the Copies setting in the Page Setup tab of the printer driver may not be enabled. In this case, use the copies setting in the Print dialog box of the application software.

• If the selected Language in the About dialog box of the Maintenance tab does not match the operating system interface language, the printer driver setup window may not be displayed properly.

• Do not change the Advanced tab items of the printer properties. If you change any of the items, you will not be able to use the following functions correctly.
  Also, if Print to file is selected in the Print dialog box of the application software and with applications that prohibit EMF spooling, such as Adobe Photoshop LE and MS Photo Editor, the following functions will not operate.
    ◦ Preview before printing on the Main tab
    ◦ Prevention of Print Data Loss in the Print Options dialog box on the Page Setup tab
    ◦ Page Layout, Tiling/Poster, Booklet, Duplex Printing (Manual), Specify Margin..., Print from Last Page, Collate, and Stamp/Background... (Stamp...) on the Page Setup tab
    ◦ Print a pattern for color adjustment on the Color Adjustment tab in the Manual Color Adjustment dialog box

• Since the resolution in the preview display differs from the printing resolution, text and lines in the preview display may appear different from the actual print result.

• With some applications, the printing is divided into multiple print jobs. To cancel printing, delete all divided print jobs.

• If image data is not printed correctly, display the Print Options dialog box from the Page Setup tab and change the setting of Disable ICM required from the application software. This may solve the problem.

  Note

  • Disable ICM required from the application software cannot be used when the XPS printer driver is used.

  • The card slot of the printer may become inaccessible. In such cases, restart the printer or turn it off and reconnect the USB cable.

Points to Note About Applications with Restrictions

• There are following restrictions in Microsoft Word (Microsoft Corporation).
  ◦ When Microsoft Word has the same printing functions as the printer driver, use Word to specify them.
  ◦ When Fit-to-Page, Scaled, or Page Layout is used for Page Layout on the Page Setup tab of the printer driver, the document may not print normally in certain versions of Word.
  ◦ When Page Size in Word is set to "XXX Enlarge/Reduce", the document may not print normally in certain versions of Word.
    If this happens, follow the procedure below.
      1. Open Word's Print dialog box.
      2. Open the printer driver setup window, and on the Page Setup tab, set Page Size to the same paper size that you specified in Word.
3. Set the **Page Layout** that you want, and then click **OK** to close the window.
4. Without starting printing, close the **Print** dialog box.
5. Open Word's **Print** dialog box again.
6. Open the printer driver setup window and click **OK**.
7. Start printing.

• If bitmap printing is enabled in Adobe Illustrator (Adobe Systems Incorporated), printing may take time or some data may not be printed. Print after unchecking the **Bitmap Printing** check box in the **Print** dialog box.
Printer Driver Description

- Quick Setup tab Description
- Main tab Description
- Page Setup tab Description
- Maintenance tab Description
- Canon IJ Preview Description
- Canon IJ XPS Preview Description
- Canon IJ Status Monitor Description
Quick Setup tab Description

The **Quick Setup** tab is for registering commonly used print settings. When you select a registered setting, the printer automatically switches to the preset items.

**Commonly Used Settings**

The names and icons of frequently used printing profiles are registered. When you select a printing profile according to the purpose of the document, settings that match the purpose are applied. In addition, functions that are thought to be useful for the selected printing profile are displayed in **Additional Features**.

You can also change a printing profile and register it under a new name. You can delete the registered printing profile.

You can rearrange the profiles either by dragging the individual profiles or by holding down the Ctrl key and pressing the up or down arrow keys.

**Standard**

These are the factory settings.

If **Page Size**, **Orientation**, and **Copies** were set from the application software, those settings have priority.

**Photo Printing**

If you select this setting when printing a photo, the photo paper and photo size generally used are set. The **Borderless Printing** check box is checked automatically.

If **Orientation** and **Copies** were set from the application software, those settings have priority.

**Business Document**

Select this setting when printing a general document.

If **Page Size**, **Orientation**, and **Copies** were set from the application software, those settings have priority.

**Paper Saving**

Select this setting to save paper when printing a general document. The **2-on-1 Printing** and **Duplex Printing (Manual)** check boxes are checked automatically.

If **Page Size**, **Orientation**, and **Copies** were set from the application software, those settings have priority.
Envelope

If you select this setting for printing an envelope, Media Type is set automatically to Envelope. In the Envelope Size Setting dialog box, select the size of the envelope to be used.

Note

- The combination of the Additional Features that was displayed for the printing profile that had been selected when the added printing profile was saved is also displayed when that added printing profile is selected.

Save...

Displays the Save Commonly Used Settings dialog box. Click this button when you want to save the information that you set on the Quick Setup, Main, and Page Setup tabs to Commonly Used Settings.

Delete

Deletes a registered printing profile. Select the name of the setting to be deleted from Commonly Used Settings, and click Delete. When a confirmation message is displayed, click OK to delete the specified printing profile.

Note

- Printing profiles that are registered in the initial settings cannot be deleted.

Settings Preview

The paper illustration shows how the original will be laid out on a sheet of paper. You can check an overall image of the layout.

Preview before printing

Shows what the print result will look like before you actually print the data. Check this check box to display a preview before printing. Uncheck this check box if you do not want to display a preview.

Important

- To use the Canon IJ XPS Preview, you must have Microsoft .NET Framework 4 Client Profile installed on your computer.

Additional Features

Displays the frequently used, convenient functions for the printing profile that you selected for Commonly Used Settings on the Quick Setup tab. When you move the mouse pointer near a function that can be changed, a description of that function is displayed. To enable a function, check the corresponding check box. For some functions, you can set detailed settings from the Main and Page Setup tabs.

Important

- Depending on the printing profiles, certain function may be grayed out and you will not be able to change them.

2-on-1 Printing

Prints two pages of the document, side by side, on one sheet of paper. To change the page sequence, click the Page Setup tab, select Page Layout for Page Layout, and click Specify.... Then in the Page Layout Printing dialog box that appears, specify the Page Order.
4-on-1 Printing
Prints four pages of the document, side by side, on one sheet of paper.
To change the page sequence, click the Page Setup tab, select Page Layout for Page Layout, and click Specify.... Then in the Page Layout Printing dialog box that appears, specify the Page Order.

Duplex Printing (Manual)
Select whether to print the document to both sides of the paper manually or to one side of the paper.
To change the staple side or the margins, set the new values from the Page Setup tab.

Borderless Printing
Performs borderless printing without any margins on the paper.
With the borderless printing function, the document to be printed is enlarged, so that it extends slightly off the paper. In other words, the document is printed without any margin.
To adjust the amount that the document extends beyond the paper, click the Page Setup tab, choose Borderless, and enter the value in Amount of Extension.

Grayscale Printing
This function converts the data to monochrome data when printing your document.

Draft
This setting is appropriate for test printing.

Rotate 180 degrees
Prints the document by rotating it 180 degrees against the paper feed direction.
The width of print area and the amount of extension that are configured in other application software will be reversed vertically and horizontally.

Color/Intensity Manual Adjustment
Select when you set the Color Correction method and individual settings such as Cyan, Magenta, Yellow, Brightness, Intensity, and Contrast, etc.

Media Type
Selects a type of printing paper.
Select a media type that matches the paper that is loaded in the printer. This ensures that printing is carried out properly for the specified paper.

Printer Paper Size
Selects the size of paper actually loaded into the printer.
Normally, the paper size is set automatically according to the output paper size setting, and the document is printed with no scaling.
When you set 2-on-1 Printing or 4-on-1 Printing in Additional Features, you can manually set the paper size with Page Size on the Page Setup tab.
If you select a paper size that is smaller than the Page Size, the document size will be reduced. If you select a paper size that is larger, the document size will be enlarged.
Also if you select Custom..., the Custom Paper Size dialog box opens and allows you to specify any vertical and horizontal dimensions for the paper size.

Orientation
Selects the printing orientation.
If the application used to create your document has a similar function, select the same orientation that you selected in that application.

Portrait
Prints the document so that its top and bottom positions are unchanged relative to the paper feed direction. This is the default setting.
Landscape
Prints the document by rotating it 90 degrees relative to the paper feed direction. You can change the rotation direction by going to the Maintenance tab, opening the Custom Settings dialog box, and then using Rotate 90 degrees left when orientation is [Landscape] check box. To rotate the document 90 degrees to the left when printing, select the Rotate 90 degrees left when orientation is [Landscape] check box.

Print Quality
Selects your desired printing quality. Select one of the following to set the print quality level that is appropriate for the purpose. To set the print quality level individually, click the Main tab, and for Print Quality, select Custom. The Set... becomes enabled. Click Set... to open the Custom dialog box, and then specify the desired settings.

High
Gives priority to print quality over printing speed.

Standard
Prints with average speed and quality.

Draft
This setting is appropriate for test printing.

Paper Source
Shows the source from which paper is supplied.

Rear Tray
Paper is always supplied from the rear tray.

Copies
Specifies the number of copies you want to print. You can specify a value from 1 to 999.

Important
• When the application software that you used to create the document has the same function, specify the settings on the printer driver. However, if the print results are not acceptable, specify the function settings on the application software.

Always Print with Current Settings
Prints documents with the current settings starting from the next print execution. When you select this function and then close the printer driver setup window, the information that you set on the Quick Setup, Main, and Page Setup tabs are saved and printing with the same settings is possible starting from the next print execution.

Important
• If you log on with a different user name, the settings that were set when this function was enabled are not reflected in the print settings.
• If a setting was specified on the application software, it has priority.

Defaults
Restores all the settings you have changed to their default values. Click this button to return all settings on the Quick Setup, Main, and Page Setup tabs to their default values (factory settings).
Save Commonly Used Settings dialog box

This dialog box allows you to save the information that you set on the Quick Setup, Main, and Page Setup tabs and add the information to the Commonly Used Settings list on the Quick Setup tab.

Name
Enter the name for the printing profile you wish to save.
Up to 255 characters can be entered.
The name appears, with its associated icon, in the Commonly Used Settings list on the Quick Setup tab.

Options...
Opens the Save Commonly Used Settings dialog box.
Changes the details of printing profile to be saved.

Save Commonly Used Settings dialog box

Select the icons of the printing profiles to be registered to Commonly Used Settings, and change the items to be saved in the printing profiles.

Icon
Select the icon for the printing profile you wish to save.
The selected icon appears, with its name, in the Commonly Used Settings list on the Quick Setup tab.

Save the paper size setting
Saves the paper size to the printing profile in Commonly Used Settings.
To apply the saved paper size when the printing profile is selected, check this check box.
If this check box is unchecked, the paper size is not saved, and consequently the paper size setting is not applied when the printing profile is selected. Instead the printer prints with the paper size specified with the application software.

Save the orientation setting
Saves the Orientation to the printing profile in Commonly Used Settings.
To apply the saved print orientation when the printing profile is selected, check this check box.
If this check box is unchecked, the print orientation is not saved, and consequently the Orientation setting is not applied when the printing profile is selected. Instead the printer prints with the print orientation specified with the application software.

Save the copies setting
Saves the Copies setting to the printing profile in Commonly Used Settings.
To apply the saved copies setting when the printing profile is selected, check this check box.
If this check box is unchecked, the copies setting is not saved, and consequently the Copies setting is not applied when the printing profile is selected. Instead the printer prints with the copies setting specified with the application software.

Custom Paper Size dialog box

This dialog box allows you to specify the size (width and height) of the custom paper.

Units
Select the unit for entering a user-defined paper size.

Paper Size
Specifies the Width and the Height of the custom paper. Measurement is shown according to the units specified in Units.

Main tab Description

The **Main** tab allows you to create a basic print setup in accordance with the media type. Unless special printing is required, normal printing can be performed just by setting the items on this tab.

**Settings Preview**

The paper illustration shows how the original will be laid out on a sheet of paper. You can check an overall image of the layout.

**Media Type**

Selects a type of printing paper. Select a media type that matches the paper that is loaded in the printer. This ensures that printing is carried out properly for the specified paper.

**Paper Source**

Shows the source from which paper is supplied.

**Rear Tray**

Paper is always supplied from the rear tray.

**Print Quality**

Selects your desired printing quality. Select one of the following to set the print quality level that is appropriate for the purpose.

**Important**

- Depending on the **Media Type** settings, the same print results may be produced even if the **Print Quality** is changed.

**High**

Gives priority to print quality over printing speed.

**Standard**

Prints with average speed and quality.

**Draft**

This setting is appropriate for test printing.

**Custom**

Select this when you want to set the printing quality level individually.
Set...
Select **Custom** for **Print Quality** to enable this button.
Open the **Custom dialog box**. You can then individually set the print quality level.

**Color/Intensity**
Selects color adjustment method.

**Auto**
- **Cyan, Magenta, Yellow, Brightness, Intensity**, and **Contrast**, and so on are adjusted automatically.

**Manual**
Select when you set the individual settings such as **Cyan, Magenta, Yellow, Brightness, Intensity**, and **Contrast**, etc. and **Color Correction** method.

Set...
Select **Manual** for **Color/Intensity** to enable this button.
In the **Manual Color Adjustment** dialog box, you can adjust individual color settings such as **Cyan, Magenta, Yellow, Brightness, Intensity**, and **Contrast** on the **Color Adjustment** tab, and select the **Color Correction** method on the **Matching** tab.

**Note**
- If you want to use an ICC profile to adjust colors, use the **Manual Color Adjustment** dialog box to set the profile.

**Grayscale Printing**
This function converts the data to monochrome data when printing your document.
Check this check box to print a color document in monochrome.

**Preview before printing**
Shows what the print result will look like before you actually print the data.
Check this check box to display a preview before printing.

**Important**
- To use the Canon IJ XPS Preview, you must have Microsoft .NET Framework 4 Client Profile installed on your computer.

**Defaults**
Restores all the settings you have changed to their default values.
Clicking this button restores all the settings on the current screen to their default values (factory settings).

**Custom dialog box**
Set the quality level, and select the desired print quality.

**Quality**
You can use the slider bar to adjust the print quality level.

**Important**
- Certain print quality levels cannot be selected depending on the settings of **Media Type**.

**Note**
- The **High, Standard**, or **Draft** print quality modes are linked with the slider bar. Therefore when the slider bar is moved, the corresponding quality and value are displayed on the left. This is the same as when the corresponding radio button is selected for **Print Quality** on the **Main** tab.
Color Adjustment Tab

This tab allows you to adjust the color balance by changing the settings of the Cyan, Magenta, Yellow, Brightness, Intensity, and Contrast options.

Preview

Shows the effect of color adjustment.

The color and brightness change when each item is adjusted. You can check the color adjustment status easily by changing the preview image to one similar to the results to be printed with Sample Type.

Note

- The graphic is in monochrome when the Grayscale Printing check box is checked.

Sample Type

Selects a preview image displayed on the Color Adjustment tab.

If necessary, select a preview image from Standard, Landscape, or Graphics, whichever is most similar to the print results.

View Color Pattern

Displays a pattern for checking color changes produced by color adjustment.

If you want to display the preview image with a color pattern, check this check box.

Cyan / Magenta / Yellow

Adjusts the strengths of Cyan, Magenta, and Yellow.

Moving the slider to the right makes a color stronger, and moving the slider to the left makes a color weaker.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

This adjustment changes the relative amount of ink of each color used, which alters the total color balance of the document. Use your application if you want to change the total color balance significantly. Use the printer driver only if you want to adjust the color balance slightly.

Important

- When Grayscale Printing is checked on the Main tab, Cyan, Magenta, and Yellow appear grayed out and are unavailable.

Brightness

Selects the brightness of your print.

You cannot change the levels of pure white and black. However, the brightness of the colors between white and black can be changed.

Intensity

Adjusts the overall intensity of your print.

Moving the slider to the right increases the intensity, and moving the slider to the left decreases the intensity.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

Contrast

Adjusts the contrast between light and dark in the image to be printed.

Moving the slider to the right increases the contrast, moving the slider to the left decreases the contrast.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.
Print a pattern for color adjustment

When the color balance or intensity/contrast is changed, the pattern printing function prints a list of the adjustment results along with the adjustment values.
Select this function when printing a pattern for color adjustment.

Pattern Print preferences...

Check Print a pattern for color adjustment to enable this button.
The Pattern Print dialog box opens and allows you to set pattern printing settings.

Pattern Print dialog box

Performs the setup for printing of patterns that allow you to check the color balance and intensity/contrast of documents.

Parameters to Adjust

Select the item to be checked by pattern printing.

Cyan/Magenta/Yellow

Prints a pattern that allows you to check the cyan/magenta/yellow balance.

Important

• When Grayscale Printing is checked on the Main tab, Cyan/Magenta/Yellow appear grayed out and are unavailable.

Intensity/Contrast

Prints a pattern that allows you to check the intensity/contrast balance.

Printer Paper Size

Selects the paper size to be used for pattern printing.
This setting is linked to Printer Paper Size on the Page Setup tab.

Note

• Depending on the paper size selected on the Page Setup tab, there may be sizes that cannot be selected.

Amount of Pattern Instances

Sets the number of patterns to be printed.
You can select from Largest, Large, and Small. When you select a pattern size, the number of patterns that can be printed is as follows:

Note

• Largest and Large cannot be selected when certain paper sizes or output paper sizes are selected.
• The setting preview on the Main tab displays an image that allows you to check the overall layout.

Largest

Cyan/Magenta/Yellow 37
Intensity/Contrast 49

Large

Cyan/Magenta/Yellow 19
Intensity/Contrast 25

Small

Cyan/Magenta/Yellow 7
Intensity/Contrast 9
Color Variation Between Instances
Sets the amount of color change between neighboring patterns.
Select from Large, Medium, and Small. Large produces a large amount of change, and Small produces a small amount of change.

Note

• Large is about double the size of Medium, and Small is about half the size of Medium.

Matching Tab
Allows you to select the method for adjusting colors to match the type of document to be printed.

Color Correction
Allows you to select Driver Matching, ICM (ICC Profile Matching), or None to match the purpose of the print operation.

Important

• When Grayscale Printing is checked on the Main tab, Color Correction appears grayed out and is unavailable.

Driver Matching
With Canon Digital Photo Color, you can print sRGB data with color tints that most people prefer.

ICM (ICC Profile Matching)
Adjusts the colors by using an ICC profile when printing. Specify the input profile to be used.

Important

• If the application software is set so that ICM is disabled, ICM (ICC Profile Matching) is unavailable for Color Correction and the printer may not be able to print the image data properly.

None
Disables color adjustment with the printer driver.

Input Profile
Specifies the input profile to be used when you select ICM (ICC Profile Matching) for Color Correction.

Standard
The standard printer profile (sRGB), which supports the color space of ICM, is used. This is the default setting.

Note

• In the XPS printer driver, ICM has become ICC Profile Matching.

### Page Setup tab Description

The **Page Setup** tab allows you to determine how a document is to be arranged on the paper. Also, this tab allows you to set the number of copies and the order of printing. If the application which created the document has a similar function, set them with the application.

![Page Setup tab settings](image_url)

#### Settings Preview

The paper illustration shows how the original will be laid out on a sheet of paper. You can check an overall image of the layout.

#### Page Size

Selects a page size.  
Ensure that you select the same page size as you selected within the application.  
If you select *Custom...*, the **Custom Paper Size** dialog box opens and allows you to specify any vertical and horizontal dimensions for the paper size.

#### Orientation

Selects the printing orientation.  
If the application used to create your document has a similar function, select the same orientation that you selected in that application.

**Portrait**

Prints the document so that its top and bottom positions are unchanged relative to the paper feed direction. This is the default setting.

**Landscape**

Prints the document by rotating it 90 degrees relative to the paper feed direction.  
You can change the rotation direction by going to the **Maintenance** tab, opening the **Custom Settings** dialog box, and then using *Rotate 90 degrees left when orientation is [Landscape]* check box.  
To rotate the document 90 degrees to the left when printing, select the *Rotate 90 degrees left when orientation is [Landscape]* check box.
Rotate 180 degrees
Prints the document by rotating it 180 degrees against the paper feed direction. The width of print area and the amount of extension that are configured in other application software will be reversed vertically and horizontally.

Printer Paper Size
Selects the size of paper actually loaded into the printer. The default setting is Same as Page Size to perform normal-sized printing. You can select a printer paper size when you select Fit-to-Page, Scaled, Page Layout, Tiling/Poster, or Booklet for Page Layout. If you select a paper size that is smaller than the Page Size, the document size will be reduced. If you select a paper size that is larger, the document size will be enlarged. Also if you select Custom..., the Custom Paper Size dialog box opens and allows you to specify any vertical and horizontal dimensions for the paper size.

Page Layout
Selects the size of the document you want to print and the type of printing.
Normal-size
This is the normal printing method. Select this when you do not specify any page layout.
Automatically reduce large document that the printer cannot output
If the printer cannot print the paper size of a document, the printer can automatically reduce the size when it prints the document.
Check this check box to reduce the size when printing the document.

Borderless
Chooses whether you are printing on a full page without any page margins or printing with page margins. In borderless printing, originals are enlarged to extend slightly off the paper. Thus, printing can be performed without any margins (border). Use Amount of Extension to adjust how much of the document extends off the paper during borderless printing.
Amount of Extension
Adjusts how much of the document extends off the paper during borderless printing. Moving the slider to the right increases the amount of extension and allows you to perform borderless printing with no problems. Moving the slider to the left reduces the amount of extension and expands the range of the document to print.

Fit-to-Page
This function enables you to automatically enlarge or reduce documents to fit to the paper size loaded in the printer without changing the paper size you specified in your application software.

Scaled
Documents can be enlarged or reduced to be printed.
Specify the size in Printer Paper Size, or enter the scaling ratio in the Scaling box.

Scaling
Specifies an enlargement or reduction ratio for the document you want to print.

Page Layout
Multiple pages of document can be printed on one sheet of paper.
Specify...
Opens the Page Layout Printing dialog box.
Click this button to set details on page layout printing.
Tiling/Poster
This function enables you to enlarge the image data and divide the enlarged data into several pages to be printed. You can also glue together these sheets of paper to create large printed matter, such as a poster.

Specify...
Opens the **Tiling/Poster Printing** dialog box.
Click this button to set details on tiling/poster printing.

Booklet
The booklet printing function allows you to print data for a booklet. Data is printed on both sides of the paper. This type of printing ensures that pages can be collated properly, in page number order, when the printed sheets are folded and stapled at the center.

Specify...
Opens the **Booklet Printing** dialog box.
Click this button to set details on booklet printing.

Duplex Printing (Manual)
Select whether to print the document to both sides of the paper manually or to one side of the paper. Check this check box to print the document on both sides.
This function can be used only when Plain Paper is selected for Media Type and one of Normal-size, Fit-to-Page, Scaled, or Page Layout is selected.

Stapling Side
Selects the stapling margin position.
The printer analyzes the Orientation and Page Layout settings, and automatically selects the best stapling margin position. Check Stapling Side, and select from the list to change it.

Specify Margin...
Opens the **Specify Margin** dialog box.
You can specify the width of the margin.

Copies
Specifies the number of copies you want to print. You can specify a value from 1 to 999.

--- Important ---
- If the application used to create your document has a similar function, specify the number of copies with the application without specifying it here.

Print from Last Page
Check this check box when you want to print from the last page in order. If you do this, you do not need to sort the pages into their correct order after printing.
Uncheck this check box to print your document in normal order, starting from the first page.

Collate
Check this check box to group together the pages of each copy when you want to print multiple copies.
Uncheck this check box when you want to print with all pages of the same page number grouped together.

--- Important ---
- When the application software that you used to create the document has the same function, give priority to the printer driver settings. However, if the print results are not acceptable, specify the function settings on the application software. When you specify the number of copies and the printing order with both the application and this printer driver, the number of copies may be multiplied numbers of the two settings or the specified printing order may not be enabled.
Print Options...
Opens the Print Options dialog box.
Changes detailed printer driver settings for print data that is sent from applications.

Stamp/Background... (Stamp...)
Opens the Stamp/Background dialog box.
The Stamp function allows you to print a stamp text or a bitmap over or behind document data. It also allows you to print date, time and user name. The Background function allows you to print a light illustration behind the document data.

Note
- With the XPS printer driver, the Stamp/Background button has become the Stamp button and only the stamp function can be used.

Depending on the type of printer driver you are using and the environment, Stamp and Background may not be available.

Custom Paper Size dialog box
This dialog box allows you to specify the size (width and height) of the custom paper.

Units
Select the unit for entering a user-defined paper size.

Paper Size
Specifies the Width and the Height of the custom paper. Measurement is shown according to the units specified in Units.

Page Layout Printing dialog box
This dialog box allows you to select the number of document pages to be placed on one sheet of paper, the page order, and whether a page border line is to be printed around each document page.
The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

Preview Icon
Shows the settings made on the Page Layout Printing dialog box.
You can check what the print result will look like before you actually print the data.

Pages
Specifies the number of document pages to fit on one sheet.

Page Order
Specifies the document orientation to be printed on a sheet of paper.

Page Border
Prints a page border line around each document page.
Check this check box to print the page border line.

Tiling/Poster Printing dialog box
This dialog box allows you to select the size of the image to be printed. You can also make settings for cut lines and paste markers which are convenient for pasting together the pages into a poster.
The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.
Preview Icon

Shows the settings of the Tiling/Poster Printing dialog box.
You can check what the print result will look like.

Image Divisions

Select the number of divisions (vertical x horizontal).
As the number of divisions increases, the number of sheets used for printing increases. If you are pasting pages together to create a poster, increasing the number of divisions allows you to create a larger poster.

Print "Cut/Paste" in margins

Specifies whether to print the words "Cut" and "Paste" in the margins. These words serve as guidelines for pasting together the pages into a poster.
Check this check box to print the words.

Note

- Depending on the type of printer driver you are using and the environment, this function may not be available.

Print "Cut/Paste" lines in margins

Specifies whether to print cut lines that serve as guidelines for pasting together the pages into a poster.
Check this check box to print the cut lines.

Print page range

Specifies the printing range. Select All under normal circumstances.
Select Pages to specify a specific page or range.

Note

- If some of the pages have not been printed well, specify the pages that do not need to be printed by clicking them in the settings preview of the Page Setup tab. Only the pages shown on the screen will be printed this time.

Booklet Printing dialog box

This dialog box allows you to set how to bind the document as a booklet. Printing only on one side and printing a page border, can also be set in this dialog box.
The settings specified in this dialog box can be confirmed in the settings preview on the printer driver.

Preview Icon

Shows the settings made on the Booklet Printing dialog box.
You can check what the document will look like when printed as a booklet.

Margin for stapling

Specifies which side of the booklet is to be stapled.

Insert blank page

Selects whether to print the document on one side or both sides of the booklet.
Check this check box to print the document on one side of the booklet and select the side to be left blank from the list.

Margin

Specifies the width of the stapling margin.
The specified width becomes the stapling margin from the center of the sheet.
Page Border
Prints a page border line around each document page.
Check this check box to print the page border line.

Specify Margin dialog box
This dialog box allows you to specify the margin width for the side to be stapled. If a document does not fit on one page, the document is reduced when printed.

Margin
Specifies the width of the stapling margin.
The width of the side specified by **Stapling Side** becomes the stapling margin.

Print Options dialog box
Makes changes to print data that is sent to the printer.
Depending on the type of printer driver you are using and the environment, this function may not be available.

Disable ICM required from the application software
Disables the ICM function required from the application software.
When an application software uses Windows ICM to print data, unexpected colors may be produced or the printing speed may decrease. If these problems occur, checking this check box may resolve the problems.

**Important**
- Uncheck this check box under normal circumstances.
- This function does not work when **ICM** is selected for **Color Correction** on the **Matching** tab of the **Manual Color Adjustment** dialog box.

**Note**
- **Disable ICM required from the application software** tab cannot be used with the XPS printer driver.

Disable the color profile setting of the application software
Checking this check box disables information in the color profile that was set on the application software.
When the information in the color profile set on the application software is output to the printer driver, the print result may contain unexpected colors. If this happens, checking this check box may resolve the problem.

**Important**
- Even when this check box is checked, only some of the information in the color profile is disabled, and the color profile can still be used for printing.
- Uncheck this check box under normal circumstances.

Ungroup Papers
Sets the display method of **Media Type**, **Page Size**, and **Printer Paper Size**.
To display the items separately, select the check box.
To display the items as a group, clear the check box.
Do not allow application software to compress print data

Compression of the application software print data is prohibited.
If the print result has missing image data or unintended colors, selecting this check box may improve the condition.

**Important**

- Uncheck this check box under normal circumstances.

**Note**

- Do not allow application software to compress print data tab cannot be used with the XPS printer driver.

Print after creating print data by page

The print data is created in page units, and printing starts after the processing of one page of print data is complete.
If a printed document contains unintended results such as streaks, selecting this check box may improve the results.

**Important**

- Uncheck this check box under normal circumstances.

Scale images using nearest-neighbor interpolation

When an image is to be enlarged or reduced when printed, the printer uses a simple interpolation process to enlarge or reduce the image.
If the image data in a printed document is not printed clearly, selecting this check box may improve the results.

**Important**

- Uncheck this check box under normal circumstances.

**Note**

- Scale images using nearest-neighbor interpolation can be used only with the XPS printer driver.

Prevention of Print Data Loss

You can reduce the size of the print data that was created with the application software and then print the data.
Depending on the application software being used, the image data may be cut off or may not be printed properly. In such cases, select **On**. If you will not be using this function, select **Off**.

**Important**

- When using this function, the print quality may drop depending on the print data.

Unit of Print Data Processing

Selects the processing unit of the print data to be sent to the printer.
Select **Recommended** under normal circumstances.

**Important**

- A large amount of memory may be used for certain settings.
  Do not change the setting if your computer has a small amount of memory.

**Note**

- Unit of Print Data Processing tab cannot be used with the XPS printer driver.
Stamp/Background (Stamp...) dialog box

The Stamp/Background (Stamp...) dialog box allows you to print a stamp and/or background over or behind the document pages. In addition to the pre-registered ones, you can register and use your original stamp or background.

Note

- With the XPS printer driver, the Stamp/Background... button has become the Stamp... button and only the stamp function can be used.

Stamp

Stamp printing is a function that prints a stamp over a document. Check this check box and select a title from the list to print a stamp.

Define Stamp...

Opens the Stamp Settings dialog box. You can check the details of a selected stamp or save a new stamp.

Place stamp over text

Sets how the stamp is to be printed over the document. Check the Stamp check box to enable this.

- Check this check box to print a stamp over the printed document page. The printed data may be hidden behind the stamp.
- Uncheck this check box to print the document data over the stamp. The printed data will not be hidden behind the stamp. However, the sections of the stamp that are overlapped by the document may be hidden.

Print semitransparent stamp

Sets how the stamp is to be printed over the document. Check the Stamp check box to enable this.

- Check this check box to print a semi-transparent stamp over the printed document page.
- Uncheck this check box to print the stamp over the document data. The printed data may be hidden behind the stamp.

Note

- You can use Print semitransparent stamp only with the XPS printer driver.

Stamp first page only

Selects whether the stamp is to be printed on the first page only or on all pages when the document has two or more pages. Check the Stamp check box to enable this.

Background

Background printing is a function that allows you to print an illustration or a similar object (bitmap) behind the document. Check this check box to print a background and select a title from the list.

Select Background...

Opens the Background Settings dialog box. You can register a bitmap as a background, and change layout method and intensity of the selected background.
Background first page only
Selects whether to print the background on the first page only or print on all pages when the document has two or more pages.
Check the **Background** check box to enable this.
Check this check box to print a background on the first page only.

Stamp Tab
The Stamp tab allows you to set the text and bitmap file (.bmp) to be used for a stamp.

Preview Window
Shows the status of the stamp configured in each tab.

Stamp Type
Specifies the stamp type.
Select **Text** to create a stamp with characters. Select **Bitmap** to create with a bitmap file. Select **Date/Time/User Name** to display the creation date/time and user name of the printed document.
The setting items in the **Stamp** tab change depending on the selected type.

When **Stamp Type** is **Text** or **Date/Time/User Name**

Stamp Text
Specifies the stamp text string.
Up to 64 characters can be entered.
For **Date/Time/User Name**, the creation date/time and user name of the printed object are displayed in **Stamp Text**.

> **Important**

- **Stamp Text** appears grayed out and is unavailable if **Date/Time/User Name** is selected.

TrueType Font
Selects the font for the stamp text string.

Style
Selects the font style for the stamp text string.

Size
Selects the font size for the stamp text string.

Outline
Selects a frame that encloses the stamp text string.
If a large font size is selected for **Size**, characters may extend outside of the stamp border.

Color/Select Color...
Shows the current color for the stamp.
To select a different color, click **Select Color...** to open the **Color** dialog box, and select or create a color you wish to use as a stamp.

When **Stamp Type** is **Bitmap**

File
Specifies the name of the bitmap file to be used as the stamp.

Select File...
Opens the dialog box to open a file.
Click this button to select a bitmap file to be used as a stamp.
Size
Adjusts the size of the bitmap file to be used as a stamp. Moving the slider to the right increases the size, moving the slider to the left decreases the size.

Transparent white area
Specifies whether to make white-filled areas of the bitmap transparent. Check this check box to make white-filled areas of the bitmap transparent.

Note
- Click **Defaults** to set **Stamp Type** to text, **Stamp Text** to blank, **TrueType Font** to Arial, **Style** to Regular, **Size** to 36 points, **Outline** unchecked, and **Color** to gray with the RGB values (192, 192, 192).

Placement Tab
The Placement tab allows you to set the position where the stamp is to be printed.

Preview Window
Shows the status of the stamp configured in each tab.

Position
Specifies the stamp position on the page. Selecting **Custom** from the list allows you to enter values for the **X-Position** and **Y-Position** coordinates directly.

Orientation
Specifies the angle of rotation for the stamp. The angle can be set by entering the number of degrees. Negative values rotate the stamp clockwise.

Note
- **Orientation** is enabled only when **Text** or **Date/Time/User Name** is selected for **Stamp Type** on the **Stamp** tab.

Note
- Click **Defaults** to set the stamp position to **Center** and the orientation to 0.

Save settings Tab
The **Save settings** tab allows you to register a new stamp or delete an unnecessary stamp.

Title
Enter the title to save the stamp you created. Up to 64 characters can be entered.

Note
- Spaces, tabs, and returns cannot be entered at the beginning or end of a title.

Stamps
Shows a list of saved stamp titles. Specify a title to display the corresponding stamp in **Title**.

Save/Save overwrite
Saves the stamp. Enter a title in **Title**, and then click this button.
Delete
- Deletes an unnecessary stamp.
  Specify the title of an unnecessary stamp from the Stamps list, and click this button.

Background Tab
- The Background tab allows you to select a bitmap file (.bmp) to be used as a background or determine how to print the selected background.

Preview Window
- Shows the status of the bitmap set on the Background tab.

File
- Specifies the name of the bitmap file to be used as the background.

Select File...
- Opens the dialog box to open a file.
  Click this button to select a bitmap file (.bmp) to be used as the background.

Layout Method
- Specifies how the background image is to be placed on the paper.
  When Custom is selected, you can set coordinates for X-Position and Y-Position.

Intensity
- Adjusts the intensity of the bitmap to be used as a background.
  Moving the slider to the right increases the intensity, and moving the slider to the left decreases the intensity. To print the background at the original bitmap intensity, move the slider to the rightmost position.

Note
- Depending on the type of printer driver you are using and the environment, this function may not be available.
- Click Defaults to set File to blank, Layout Method to Fill page, and the Intensity slider to the middle.

Save settings Tab
- The Save settings tab allows you to register a new background or delete an unnecessary background.

Title
- Enter the title to save the background image you specified.
  Up to 64 characters can be entered.

Note
- Spaces, tabs, and returns cannot be entered at the beginning or end of a title.

Backgrounds
- Shows a list of registered background titles.
  Specify a title to display the corresponding background in Title.

Save/Save overwrite
- Saves the image data as a background.
  After inserting the Title, click this button.
**Delete**

Deletes an unnecessary background.
Specify the title of an unnecessary background from the **Backgrounds** list, and then click this button.
The Maintenance tab allows you to perform printer maintenance or change the settings of the printer.

**Cleaning**
Performs print head cleaning.
Print head cleaning removes any blockage in the print head nozzles.
Perform cleaning when printing becomes faint, or a specific color fails to print, even though all ink levels are sufficiently high.

**Deep Cleaning**
Performs deep cleaning.
Perform deep cleaning when two cleaning attempts do not resolve the print head problem.

**Note**
- Deep Cleaning consumes a larger amount of ink than Cleaning.
Cleaning the print heads frequently will rapidly deplete your printer's ink supply. Therefore, perform cleaning only when necessary.

**Ink Group**
When you click Cleaning or Deep Cleaning, the Ink Group window is displayed.
Selects the ink group that you want to clean the print head for.
Click Initial Check Items to display the items that you need to check before you execute cleaning or deep cleaning.

**System Cleaning**
Performs system cleaning.
Execute this function if the status does not improve even after deep cleaning is performed.
System Cleaning consumes an extremely large amount of ink.
Executing system cleaning frequently will rapidly deplete your printer's ink supply. Therefore execute system cleaning only when necessary.

**Important**

- If **System Cleaning** is run when the remaining ink level is insufficient, it may cause a failure. Be sure to check the remaining ink level before running **System Cleaning**.

<table>
<thead>
<tr>
<th>Ink Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>When you click <strong>System Cleaning</strong>, the <strong>Ink Group</strong> window is displayed. Selects the ink group that you want to clean the print head for. </tbody>
</table>
**Remaining Ink Notification Settings**
Displays the Remaining Ink Notification Settings dialog box.
Run this function to switch the remaining ink level notification setting and to reset the remaining ink level count.

**Bottom Plate Cleaning**
Performs cleaning of the bottom plate of the printer.
To prevent smudges on the back side of a sheet of paper, perform Bottom Plate Cleaning before you perform duplex printing.
Also perform Bottom Plate Cleaning if ink smudges caused by something other than print data appear on the printed page.

**Roller Cleaning**
Cleans the paper feed rollers.
Paper feeding may fail if paper dust has stuck to the printer's paper feed rollers. In this case, clean the paper feed rollers to improve the print result.

**Power Off**
Turns off the printer from the printer driver.
Perform this function to turn off the printer when you cannot press the ON button (POWER button) on the printer because the printer is out of your reach.
You must press the ON button (POWER button) on the printer to turn the printer on again after clicking this button. When you use this function, you will not be able to turn the printer on from the printer driver.

**Auto Power**
Opens the Auto Power Settings dialog box.
Specify settings for operating the printer power automatically. Perform this function if you want to change the auto power settings.

**Note**
- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.
  If this happens, click OK to display the most recent settings specified on your computer.

**Quiet Settings**
Opens the Quiet Settings dialog box.
Quiet Settings dialog box allows you to specify a setting that reduces the operating noise of the printer.
This mode comes in handy when the operating noise of the printer becomes a concern, such when printing at night. Perform this operation when you want to change the quiet mode setting.

**Note**
- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.
Custom Settings
Opens the Custom Settings dialog box.
Perform this function to change the settings of this printer.

Note
• If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.
If this happens, click OK to display the most recent settings specified on your computer.

View Print History
This function starts the Canon IJ XPS preview, and displays the print history.

Note
• You can use this function only with the XPS printer driver.

View Printer Status
Starts the Canon IJ Status Monitor.
Perform this function when you want to check the printer status and how a print job is proceeding.

Note
• If you are using the XPS printer driver, the "Canon IJ Status Monitor" becomes the "Canon IJ XPS Status Monitor".

About
Opens the About dialog box.
The version of the printer driver, plus a copyright notice, can be checked.
In addition, the language to be used can be switched.

Initial Check Items (Cleaning / Deep Cleaning)
Before running Cleaning or Deep Cleaning, check that the printer power is on.
Then check the following item:

• Is there ink remaining?

Initial Check Items (System Cleaning)
Before running System Cleaning, check that the printer power is on.
Then check the following items:

• When you ran Nozzle Check, were there areas where the print was smeared or unprinted areas?
• Did the condition not improve even after Deep Cleaning was run?
• Are the remaining ink levels insufficient?
  ◦ Visually check whether the remaining ink levels are insufficient.
  ◦ If System Cleaning is run when the remaining ink levels are insufficient, it may trigger a failure.
  ◦ If you selected All Colors or Black for Ink Group, check that all remaining ink levels are at least at the single dot position indicated on the ink tanks. (The color inks are consumed even if Black was selected.)
  ◦ If you selected Color, check that the remaining ink levels for all color inks are at least at the single dot position indicated on the ink tanks.
If any remaining ink level is below the single dot position, replenish the ink to at least the single dot position. However, if Remaining Ink Notification Settings is enabled, replenish all remaining ink levels to the upper limit line indicated on the ink tanks, regardless of the Ink Group setting.

Start Print Head Alignment dialog box
This dialog box allows you to adjust the attachment position for the print head, or to print the current setting value for the print head position.

Note
• For a detailed procedure on head position adjustment, see "Aligning the Print Head Position from Your Computer."

Align Print Head
Aligns the print head.
Print head alignment corrects the installation positions of the print head and improves deviated colors and lines.
Align the print head immediately after installing the print head.

Print Alignment Value
Click this button to check the current setting value of the print head position.
Prints the current setting value for the print head position.

Print Head Alignment dialog box
To adjust the print head position, click Align Print Head in the Start Print Head Alignment dialog box, and perform the operations instructed in the messages. The Print Head Alignment dialog box is then displayed.
This dialog box allows you to check the printed pattern and adjust the print head position.

Preview Window
Displays the pattern of Print Head Alignment, and checks the position of the selected pattern.
You can also change the setting by clicking the pattern on the screen directly.

Select the Pattern Number
Compare the printed adjustment patterns, and enter the pattern number of the pattern with the least visible streaks or horizontal stripes into the corresponding box.

Note
• If you do not know how to analyze the printed pattern, see Aligning the Print Head Position.

Initial Check Items (Nozzle Check)
Before running Nozzle Check, check that the printer power is on.
Then check the following item:
• Is there ink remaining?

Remaining Ink Notification Settings dialog box
When you click Remaining Ink Notification Settings, the Remaining Ink Notification Settings dialog box appears.
Then from the print driver, you can switch the remaining ink level notification setting and reset the remaining ink level count.

**Function for Notifying the Remaining Ink Level**
Select the setting for the remaining ink level notification function.
Select **Enable** to display an error message when the remaining ink level runs low.
Select **Disable** to prevent the error message from being displayed.
Then click **Set** to enable the selected setting.

**Important**
- Before enabling **Function for Notifying the Remaining Ink Level**, **replenish** all inks to the upper limit line and reset the remaining ink level count by running **Resets the Remaining Ink Level Count**. However, if you reset the count by operating the operation panel of the printer, the setting in the printer driver is unnecessary.
- If you disable **Function for Notifying the Remaining Ink Level**, you must visually check the remaining ink level. Replenish the ink before the ink level falls below the lower limit line.

**Resets the Remaining Ink Level Count**
Click **Reset** to reset the remaining ink level count.

**Important**
- When you reset the remaining ink level count, you must replenish all inks to the upper limit line.

**Auto Power Settings dialog box**
When you click **Auto Power**, the **Auto Power Settings** dialog box is displayed.
This dialog box allows you to manage the printer power from the printer driver.

**Auto Power On**
Selects the auto power-on setting.
Specify **Disable** to prevent the printer from turning on automatically when print data is sent to it.
Make sure the printer is on and then click **OK** to change the printer settings.
Specify **Enable** to turn the printer on automatically when print data is sent to it.

**Auto Power Off**
Selects the auto power-off setting.
If a printer driver operation or a printer operation is not performed within the specified time, the printer turns off.

**Important**
- If you connect this printer to a network and use it, you can set **Auto Power Off** but the power will not be turned off automatically.

**Quiet Settings dialog box**
When you click **Quiet Settings**, the **Quiet Settings** dialog box is displayed.
**Quiet Settings** dialog box allows you to specify a setting that reduces the operating noise of the printer.
Select when you wish to reduce the operating noise of the printer at night, etc.
Using this function may lower the print speed.

**Do not use quiet mode**
Select this option when you wish to use the printer with volume of normal operating noise.
Always use quiet mode
Select this option when you wish to reduce the operating noise of the printer.

Use quiet mode during specified hours
Select this option when you wish to reduce the operating noise of the printer during a specified period of time.
Set the Start time and the End time of the quiet mode you wish to be activated. If both are set to the same time, the quiet mode will not function.

Important
• You can set the quiet mode from the printer or the printer driver.
  No matter how you use to set the quiet mode, the mode is applied when you perform operations from the printer or printing from the computer.
• If you specify a time for Use quiet mode during specified hours, quiet mode is not applied to operations (direct print, etc.) performed directly from the printer.

Custom Settings dialog box
When you click Custom Settings, the Custom Settings dialog box is displayed.
If necessary, switch between various modes of printer operation.

Prevent paper abrasion
The printer can increase the gap between the print head and the paper during high-density printing to prevent paper abrasion.
Check this check box to enable this function.

Rotate 90 degrees left when orientation is [Landscape]
On the Page Setup tab, you can change the rotation direction of the Landscape in the Orientation.
To rotate the document 90 degrees to the left when printing, select the check box.

Ink Drying Wait Time
The printer can pause before printing a subsequent page. Moving the slider to the right increases the pause time, and moving the slider to the left decreases the time.
If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.
Reducing the ink drying wait time speeds up printing.

About dialog box
When you click About, the About dialog box is displayed.
This dialog box displays the version, copyright, and module list of the printer driver. You can select the language to be used and switch the language displayed in the setup window.

Modules
Lists the printer driver modules.

Language
Specifies the language you wish to use in the printer driver setup window.

Important
• If the font for displaying the language of your choice is not installed in your system, the characters will be garbled.

Canon IJ Preview Description

Canon IJ Preview is an application software that displays what the print result will look like before a document is actually printed. The preview reflects the information that is set within the printer driver and allows you to check the document layout, print order, and number of pages. You can also change the media type and paper source settings.

When you want to display a preview before printing, open the printer driver setup window, and check the Preview before printing check box on the Main tab.

File Menu

Selects the print operation.

Start Printing

Ends the Canon IJ Preview and then starts printing the document that is displayed on the preview screen.

This command has the same function as the Start Printing on the toolbar.

Cancel Printing

Ends the Canon IJ Preview and cancels the printing of the document that is displayed on the preview screen.

This command has the same function as the Cancel Printing on the toolbar.

Exit

Ends the Canon IJ Preview.

Page Menu

This menu includes the following commands to select page to be displayed.

All of these commands except Page Selection... can also be selected from the toolbar.

---

Note

- If the pages are being spooled, the last spooled page becomes the last page.
- If the Page Layout setting on the Page Setup tab is specified to Page Layout, Tiling/Poster, or Booklet, the number of pages is the number of sheets to be used for printing, and not the number of pages in the original document created with the application software.
• If duplex printing manually has been set, the front pages which will be printed first are all displayed together, and then the back pages are displayed.

First Page
Displays the first page of the document.
If the currently displayed page is the first page, this command is grayed out and cannot be selected.

Previous Page
Displays the page located before the currently displayed page.
If the currently displayed page is the first page, this command is grayed out and cannot be selected.

Next Page
Displays the page located after the currently displayed page.
If the currently displayed page is the last page, this command is grayed out and cannot be selected.

Last Page
Displays the last page of the document.
If the currently displayed page is the last page, this command is grayed out and cannot be selected.

Page Selection...
Displays the Page Selection dialog box.
This command allows you to specify the page number of the page to be displayed.

Zoom Menu
Selects the ratio of the actual size printed on the paper to the preview display size.
You can also select the ratio from the drop-down list box located on the toolbar.
Whole
Displays the entire page of data as one page.

50%
Reduces the displayed data to 50% of the actual size to be printed.

100%
Displays the data at the actual size to be printed.

200%
Enlarges the displayed data to 200% of the actual size to be printed.

400%
Enlarges the displayed data to 400% of the actual size to be printed.

Option Menu
This menu includes the following command:
Displays Print Page Information
Displays print setup information (including printer paper size, media type, and page layout) for each page at the left side of the preview screen.
This screen also allows you to change the media type and paper source settings.

Help Menu
When you select this menu item, the Help window for Canon IJ Preview is displayed, and you can check the version and copyright information.
Start Printing button
Prints the documents selected in the document list.
The printed documents are deleted from the list, and when all documents are printed, the Canon IJ XPS Preview closes.

Cancel Printing button
Ends the Canon IJ Preview, and cancels the printing of the document that is displayed on the preview screen.
You can click this button while spooling.

Print Page Information Screen
Displays print setup information for each page at the left side of the preview screen.
This screen also allows you to change the media type and paper source settings.

**Important**
- If the media type and paper source are set from the application software, those settings have priority and the changed settings may become ineffective.

Printer Paper Size
Displays the paper size of the document to be printed.

Media Type
You can select the media type of the document to be printed.

Paper Source
You can select the paper source of the document to be printed.

Page Layout
Displays the page layout of the document to be printed.
Canon IJ XPS Preview Description

Canon IJ XPS Preview is an application software that displays what the print result will look like before a document is actually printed. The preview reflects the information which is set within the printer driver and allows you to check the document layout, print order, and number of pages. The preview also allows you to edit the print document, edit the print pages, change the print settings, and perform other functions.

When you want to display a preview before printing, open the printer driver setup window, and check the **Preview before printing** check box on the **Main** tab.

---

**Important**

- To use the Canon IJ XPS Preview, you must have Microsoft .NET Framework 4 Client Profile installed on your computer.

---

**File Menu**

Selects print operation and print history settings:

**Print**

Prints the documents selected in the document list.

The printed documents are deleted from the list, and when all documents are printed, the Canon IJ XPS Preview closes.

This command has the same function as (Print) on the toolbar and the **Print** in the print settings area.

**Print All Documents**

Prints all documents in the document list and closes the Canon IJ XPS Preview.

**Save Print History**

Switches whether the documents printed from the Canon IJ XPS Preview are to be saved as print history entries.

**History Entry Limit**

Switches the maximum number of print history registrations.

Select **10 Entries**, **30 Entries**, or **100 Entries**.
Important

- If the limit on the number of registration is exceeded, the print history registrations are deleted starting from the oldest one.

Add documents from history to the list

Adds the document saved in the print history to the document list.

Exit

Ends the Canon IJ XPS Preview. The documents remaining in the document list will be deleted from the list.
This command has the same function as the Exit in the print settings area.

Edit Menu

Selects the method for editing multiple documents or pages.

Undo

Reverses the previous change.
If the change cannot be reversed, this function is grayed out and cannot be selected.
This command has the same function as the (Undo) on the toolbar.

Documents

Selects the method for editing print documents.

Combine Documents

Combines the documents selected in the document list into one document.
If only one document is selected, this command is grayed out and cannot be selected.
This command has the same function as the (Combine Documents) on the toolbar.

Reset Documents

Returns the document selected in the document list to their status before they were added to the Canon IJ XPS Preview.
The combined documents are separated, and the original documents are restored.
This command has the same function as the (Reset Documents) on the toolbar.

Move Document

Use the following command to change the order of the documents selected in the document list.

Move to First

Moves the selected print document to the beginning of the document list.
If the currently selected document is the first document, this command is grayed out and cannot be selected.

Move Up One

Moves the selected print document one up from its current position.
If the currently selected document is the first document, this command is grayed out and cannot be selected.

Move Down One

Moves the selected print document one down from its current position.
If the currently selected document is the last document, this command is grayed out and cannot be selected.

Move to Last

Moves the selected print document to the end of the document list.
If the currently selected document is the last document, this command is grayed out and cannot be selected.
Delete Document
Deletes the selected document from the document list.
If the document list contains only one document, the document is grayed out and cannot be selected.
This command has the same function as the (Delete Document) on the toolbar.

Grayscale Printing
Allows you to change the monochrome print settings.
This command has the same functionality as the Grayscale Printing check box in the print settings area.

Page Layout Printing...
Opens the Page Layout Printing dialog box.
This dialog box allows you to set Page Layout Printing, Pages, Page Order, and Page Border.

Duplex Printing...
Opens the Duplex Printing dialog box.
This dialog box allows you to set Duplex Printing (Manual), Stapling Side, and Margin.

Copies...
Opens the Copies dialog box.
This dialog box allows you to set Copies, Collate, and Print from Last Page.

Pages
Selects the method for editing print pages.

Delete Page
Deletes the currently selected page.
If page layout printing is set, the pages enclosed with red frame will be deleted.
This command has the same function as the (Delete Page) on the toolbar.

Restore Page
Restores pages that were deleted with the Delete Page function.
To restore pages, you must select the View Deleted Pages check box on the Option menu and display the deleted pages as thumbnails.

Move Page
Use the following command to change the order of the currently selected pages.

Move to First
Moves the currently selected page to the beginning of the document.
If the currently selected page is the first page, this command is grayed out and cannot be selected.

Move Forward One
Moves the currently selected page one position in front of its current position.
If the currently selected page is the first page, this command is grayed out and cannot be selected.

Move Backward One
Moves the currently selected page one position after its current position.
If the currently selected page is the last page, this command is grayed out and cannot be selected.
Move to Last
Moves the currently selected page to the end of the document.
If the currently selected page is the last page, this command is grayed out and cannot be selected.

View Menu
Selects the documents and pages to be displayed.

Documents
Use the following command to select the document to display.

First Document
Displays the first document in the document list.
If the currently selected document is the first document, this command is grayed out and cannot be selected.

Previous Document
Displays the document located before the currently displayed document.
If the currently selected document is the first document, this command is grayed out and cannot be selected.

Next Document
Displays the document located after the currently displayed document.
If the currently selected document is the last document, this command is grayed out and cannot be selected.

Last Document
Displays the last document in the document list.
If the currently selected document is the last document, this command is grayed out and cannot be selected.

Pages
Use the following command to select the page to be displayed.

Note
- If the Page Layout setting in the printer driver is specified to Tiling/Poster, or Booklet, the number of pages is the number of sheets to be used for printing, and not the number of pages in the original document created with the application software.

First Page
Displays the first page of the document.
If the currently displayed page is the first page, this command is grayed out and cannot be selected.

Previous Page
Displays the page located before the currently displayed page.
If the currently displayed page is the first page, this command is grayed out and cannot be selected.

Next Page
Displays the page located after the currently displayed page.
If the currently displayed page is the last page, this command is grayed out and cannot be selected.

Last Page
Displays the last page of the document.
If the currently displayed page is the last page, this command is grayed out and cannot be selected.
Page Selection...
Displays the Page Selection dialog box.
This command allows you to specify the page number of the page to be displayed.

Zoom Menu
Selects the ratio of the actual size printed on the paper to the preview display size.
You can also select the ratio from the drop-down list box located on the toolbar.
Whole
Displays the entire page of data as one page.
50%
Reduces the displayed data to 50% of the actual size to be printed.
100%
Displays the data at the actual size to be printed.
200%
Enlarges the displayed data to 200% of the actual size to be printed.
400%
Enlarges the displayed data to 400% of the actual size to be printed.

Option Menu
Toggles the show / hide status of the following information.
View Thumbnails
Reduces all pages in the document selected in the document list and displays them at the bottom
of the preview window.
This command has the same function as the (View Thumbnails) on the toolbar.
View Document List
Displays the print document list at the top of the preview window.

View Print Settings Area
Displays the print settings area at the right side of the preview window.

View Deleted Pages
When the thumbnails are displayed, this function displays pages that were deleted with the Delete
Page function.
To check deleted pages, you must first select the View Thumbnails check box.

Keep printed documents on the list
Leaves the printed document in the document list.

Print Settings Displayed at Startup
Switches the tab of the print settings area to be displayed when the Canon IJ XPS Preview is
started.
Select Page Information, Layout, or Manual Color Adjustment.

Help Menu
When you select this menu item, the Help window for Canon IJ XPS Preview is displayed, and you can
check the version and copyright information.

(Print)
Prints the documents selected in the document list.
The printed documents are deleted from the list, and when all documents are printed, the Canon IJ XPS
Preview closes.
(Combine Documents)
Combines the documents selected in the document list into one document.
If only one document is selected, this command is grayed out and cannot be selected.

(Delete Document)
Deletes the selected document from the document list.
If the document list contains only one document, the document is grayed out and cannot be selected.

(Reset Documents)
Returns the document selected in the document list to their status before they were added to the Canon IJ XPS Preview.
The combined documents are separated, and the original documents are restored.

(View Thumbnails)
Reduces all pages in the document selected in the document list and displays them at the bottom of the preview window.
To hide the print pages, click View Thumbnails again.

(Move to First)
Moves the selected print document to the beginning of the document list.
If the currently selected document is the first document, this command is grayed out and cannot be selected.

(Move Up One)
Moves the selected print document one up from its current position.
If the currently selected document is the first document, this command is grayed out and cannot be selected.

(Move Down One)
Moves the selected print document one down from its current position.
If the currently selected document is the last document, this command is grayed out and cannot be selected.

(Move to Last)
Moves the selected print document to the end of the document list.
If the currently selected document is the last document, this command is grayed out and cannot be selected.

(Undo)
Reverses the previous change.
If the change cannot be reversed, this function is grayed out and cannot be selected.

(Delete Page)
Deletes the currently selected page.
If page layout printing is set, the pages enclosed with red frame will be deleted.

Document list
Displays the list of the print documents.
The document selected in the document list becomes the target for preview display and editing.

Document Name
Displays the name of the print document.
If you click the name of the selected print document, a text box is displayed, and you can rename the document to any name.
Pages
Displays the number of pages in the print document.

Important
• The number displayed in Pages and the output page count are different.
• To check the output page count, check the status bar at the bottom of the preview window.

Status
Displays the status of the print documents.
Documents that are undergoing data processing are displayed as Processing data.

Important
• Documents showing Processing data cannot be printed or edited.
  Wait until the data processing ends.

Print Settings Area Screen
Allows you to check and change the print settings of the documents selected in the document list.
Print Settings Area is displayed on the right side of the preview window.

Page Information tab
The print settings are displayed for each page.
You can change the media type and paper source settings.

Printer Paper Size
Displays the paper size of the document to be printed.

Media Type
Allows you to select the media type of the document to be printed.

Paper Source
Allows you to select the paper source of the document to be printed.

Page Layout
Displays the page layout of the document to be printed.

Layout tab
You can specify settings for page layout printing.
To apply the specified settings, click Apply.
If the page layout print settings cannot be changed for the print document, the individual items are grayed out and cannot be selected.

Manual Color Adjustment tab
This tab allows you to adjust the color balance by changing the settings of the Cyan, Magenta, Yellow, Brightness, Intensity, and Contrast options.

Cyan/Magenta/Yellow
Adjusts the strengths of Cyan, Magenta, and Yellow.
Moving the slider to the right makes a color stronger, and moving the slider to the left makes a color weaker.
You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.
This adjustment changes the relative amount of ink of each color used, which alters the total color balance of the document.
Use your application software if you want to change the total color balance significantly. Use the printer driver only if you want to adjust the color balance slightly.
Important

- When **Grayscale Printing** is checked, **Cyan**, **Magenta**, and **Yellow** appear grayed out and are unavailable.

**Brightness**
Selects the brightness of your print.
Pure white and black will not change, but colors between white and black will change.

**Intensity**
Adjusts the overall intensity of your print.
Moving the slider to the right increases the intensity, and moving the slider to the left decreases the intensity.
You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

**Contrast**
Adjusts the contrast between light and dark in the image to be printed.
Moving the slider to the right increases the contrast, moving the slider to the left decreases the contrast.
You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

**Defaults**
Restores all the settings you have changed to their default values.
Clicking this button restores all the settings on this tab to their default values (factory settings).

**Grayscale Printing**
Allows you to change the monochrome print settings.

**Duplex Printing (Manual)**
Select whether to print the document to both sides of the paper manually or to one side of the paper.
If the duplex print settings cannot be changed for the print document, this item is grayed out and is unavailable.

Important

- When you select **Booklet** for **Page Layout**, **Duplex Printing (Manual)** of the print settings area will be set automatically. In this case, **Duplex Printing (Manual)** is grayed out and is unavailable.

**Copies**
Specifies the number of copies you want to print. You can specify a value from 1 to 999.
If the numbers of copies cannot be changed for the print document, this item is grayed out and is unavailable.

**Exit**
Ends the Canon IJ XPS Preview.
The documents remaining in the document list will be deleted from the list.

**Print**
Prints the documents selected in the document list.
The printed documents are deleted from the list, and when all documents are printed, the Canon IJ XPS Preview closes.
Canon IJ Status Monitor Description

The Canon IJ Status Monitor displays the status of the printer and the printing progress. The monitor uses graphics, icons, and messages to let you know the printer status.

Canon IJ Status Monitor Features

The Canon IJ Status Monitor offers the following advantages:

- **You can check the status of the printer on the screen.**
  The status of the printer is shown on the screen in real time. You can check the printing progress of each printing document (print job).

- **Error types and solutions are shown on the screen.**
  Shown when a printer error occurs. You can immediately check how to respond.

Canon IJ Status Monitor Overview

Canon IJ Status Monitor allows you to check the status of the printer and ink with graphics and messages. You can check the information on the printing document and the printing progress during printing. When a printer error occurs, it shows the cause and solution. Follow the instruction in the message.

- **Printer**
  Canon IJ Status Monitor shows an icon when a warning or error occurs to the printer.
  - !: Indicates that a warning (operator call error) has occurred or the printer is working.
  - ✗: There has been an error which requires a service.

- **Document Name**
  Shows the name of the document to be printed.

- **Owner**
  Shows the owner's name of the document to be printed.

- **Printing Page**
  Shows the number of printing page and total printing pages.

- **Display Print Queue**
  Shows the print window used to manage the print job that is being printed or being in the print queue.

- **Cancel Printing**
  Cancels the current print job.

---

**Important**

- The **Cancel Printing** button is enabled only while print data is being sent to the printer. Once the print data has been sent, the button is grayed out and becomes unavailable.
**Option Menu**
If you select **Enable Status Monitor**, when a printer related message is generated the Canon IJ Status Monitor starts.
When **Enable Status Monitor** is selected, following commands are available.

**Always Display Current Job**
Displays the Canon IJ Status Monitor during printing.

**Always Display on Top**
Displays the Canon IJ Status Monitor in front of other windows.

**Start when Windows is Started**
Starts the Canon IJ Status Monitor automatically when you start Windows.

**Ink Details Menu**
Select this menu to check information such as the ink tank types for your printer.

**Help Menu**
When you select this menu item, the Help window for Canon IJ Status Monitor is displayed, and you can check the version and copyright information.
Updating the Printer Driver

- Obtaining the Latest Printer Driver
- Deleting the Unnecessary Printer Driver
- Before Installing the Printer Driver
- Installing the Printer Driver
Obtaining the Latest Printer Driver

By updating the printer driver to the latest version of the printer driver, unresolved problems may be solved.

You can check the version of the printer driver by clicking the About button on the Maintenance tab.

You can access our website and download the latest printer driver for your model.

>>> Important

• You can download the printer driver for free, but any Internet access charges incurred are your responsibility.
• Before installing the latest printer driver, delete the previously installed version.

Related Topics

➢ Installing the Printer Driver
Deleting the Unnecessary Printer Driver

The printer driver which you no longer use can be deleted.
When deleting the printer driver, first exit all programs that are running.
The procedure to delete the unnecessary printer driver is as follows:

1. Start the uninstaller
   - If you are using Windows 8.1 or Windows 8, from the Desktop charms, select Settings -> Control Panel -> Programs -> Programs and Features.
     From the program list, select "XXX Printer Driver" (where "XXX" is your model name) and then click Uninstall.
   - If you are using Windows 7 or Windows Vista, select Start menu -> Control Panel -> Programs -> Programs and Features.
     From the program list, select "XXX Printer Driver" (where "XXX" is your model name) and then click Uninstall.
   - If you are using Windows XP, select Start menu -> Control Panel -> Add or Remove Programs.
     From the program list, select "XXX Printer Driver" (where "XXX" is your model name) and then click Remove.

The confirmation window for uninstalling the model appears.

Importantly:
- In Windows 8.1, Windows 8, Windows 7, or Windows Vista, a confirmation/warning dialog box may appear when starting, installing or uninstalling software.
  This dialog box appears when administrative rights are required to perform a task.
  When you are logged on to an administrator account, click Yes (or Continue, Allow) to continue.
  Some applications require an administrator account to continue. In such cases, switch to an administrator account, and restart the operation from the beginning.

2. Execute the uninstaller
   Click Execute. When the confirmation message appears, click Yes.
   When all the files have been deleted, click Complete.

The deletion of the printer driver is complete.

Importantly:
- Printer driver and XPS printer driver will be deleted when you uninstall the Printer Driver.
Before Installing the Printer Driver

This section describes the items that you should check before installing the printer driver. You should also refer to this section if the printer driver cannot be installed.

Checking the Printer Status

- Confirm that the USB port of this printer and the computer are firmly connected with the USB cable.
- Turn off the printer.

Checking the Personal Computer Settings

- Terminate all running applications.
- Log on as a user who has the administrator account.

Important

- Before installing the latest printer driver, delete the previously installed version.

Related Topics

- Obtaining the Latest Printer Driver
- Installing the Printer Driver
Installing the Printer Driver

You can access our web site through the Internet and download the latest printer driver and XPS printer driver for your model.

The procedure for installing the downloaded printer driver is as follows:

1. Turn off the printer

2. Start the installer

   Double-click the icon of the downloaded file.
   The installation program starts.

   **Important**
   - In Windows 8.1, Windows 8, Windows 7, or Windows Vista, a confirmation/warning dialog box may appear when starting, installing or uninstalling software.
   - This dialog box appears when administrative rights are required to perform a task.
   - When you are logged on to an administrator account, click Yes (or Continue, Allow) to continue.
   - Some applications require an administrator account to continue. In such cases, switch to an administrator account, and restart the operation from the beginning.

3. Install the printer driver

   Take the appropriate action as described on the screen.

   **Note**
   - To use this printer on a network, you must manually select the connection destination from the client.
   - To manually select a connection destination, click Cancel in the Connect Cable window. When the confirmation message appears, click Yes.
   - In the Installation Incomplete window, select the Select printer port check box, click Manual Selection, and then select the appropriate port.

4. Complete the installation

   Click Complete.

   Depending on the environment you are using, a message prompting you to restart the computer may be displayed. To complete the installation properly, restart the computer.

   **Important**
   - You can install the XPS printer driver with the same procedure for installing the printer driver. However, when installing the XPS printer driver, first complete installation of the printer driver.
   - You can download the printer driver and XPS printer driver for free, but any Internet access charges incurred are your responsibility.
   - Before installing the latest printer driver, delete the previously installed version.

Sharing the Printer on a Network

When multiple computers are being used in the network environment, you can share the printer connected to one computer with the other computers. The Windows versions of the computers connected to the network do not necessarily have to be the same.

- **Settings on Print Server**
  This section describes the procedure for setting a computer that connects with this printer directly through a USB cable.

- **Settings on Client PC**
  This section describes the procedure for setting a computer that uses this printer though a network. When you execute print, the data is sent to the printer through the print server system.

---

**Important**

- In case an error occurred when a document is printed by the client system to a shared printer, the error message of Canon IJ Status Monitor will be displayed both on the client system and the print server system. For regular printing, Canon IJ Status Monitor will be displayed only on the client system.

---

**Note**

- You must install a print driver in the print server and in each client.

---

**Related Topic**

- [Restrictions on Printer Sharing](#)
Settings on Print Server

When you use the printer on a network, set up the printer driver for sharing on the print server system.

The procedure for setting up the print server systems is as follows:

1. **Install the printer driver** on the print server system

2. Select as described below:
   - If you are using Windows 8.1 or Windows 8, from the Desktop charms, select **Settings -> Control Panel -> Hardware and Sound -> Devices and Printers.**
   - If you are using Windows 7, select the **Start menu -> Devices and Printers.**
   - If you are using Windows Vista select the **Start menu -> Control Panel -> Hardware and Sound -> Printers.**
   - If you are using Windows XP, select the **start menu -> Control Panel -> Printers and Other Hardware -> Printers and Faxes.**

   The **Devices and Printers** window (Windows 8.1, Windows 8, Windows 7), **Printers** window (Windows Vista) or **Printers and Faxes** window (Windows XP) is displayed.

3. Click the icon for the model name of printer to be shared
   - If you are using Windows 8.1, Windows 8, or Windows 7, press the Alt key on your keyboard and then select **Printer properties -> Sharing** tab from the displayed **File** menu.
   - If you are using Windows Vista, press the Alt key on your keyboard and then select **Run as administrator -> Sharing...** from the displayed **File** menu.
   - If you are using Windows XP, select **Sharing...** from the **File** menu.

   **Important**
   - In Windows 8.1, Windows 8, Windows 7, or Windows Vista, a confirmation/warning dialog box may appear when starting, installing or uninstalling software. This dialog box appears when administrative rights are required to perform a task. When you are logged on to an administrator account, click **Yes** (or **Continue, Allow**) to continue. Some applications require an administrator account to continue. In such cases, switch to an administrator account, and restart the operation from the beginning.

   **Note**
   - Windows XP may display a message recommending the user to use the Network Setup Wizard to set up sharing. When this message appears, choose not to use the wizard and then set up sharing.

4. Set sharing
   - Select **Share this printer** on the **Sharing** tab to set a shared name if necessary, and click **OK.**

The setup on the print server system is complete. Next, set up the client systems.
Settings on Client PC

After setting up the print server system, set up the client system.

The procedure for setting up the client systems is as follows:

If you are using Windows 8.1, Windows 8, Windows 7, or Windows Vista

1. **Install the printer driver** on the client systems

   **Note**
   
   - You must manually select the connection destination on the client computer.
   - During installation, click **Cancel** in the **Connect Cable** window. When the confirmation message appears, click **Yes**.
   - In the **Installation Incomplete** window, select the **Select printer port** check box, click **Manual Selection**, and then select the appropriate port.

2. **Start the wizard**

   - If you are using Windows 8.1 or Windows 8, from the Desktop charms, select **Settings** -> **Control Panel** -> **Hardware and Sound** -> **Devices and Printers** -> **Add a printer**.
   - If you are using Windows 7, select the **Start** menu -> **Devices and Printers** -> **Add a printer**.
   - If you are using Windows Vista, select the **Start** menu -> **Network** -> **Add Printer**.

   The **Add Printer** window appears.

3. **Add a printer**

   - If you are using Windows 8.1 or Windows 8, click the icon for the printer that you have configured on the print server system to be shared, and then click **Next**.
   - If you are using Windows 7 or Windows Vista, select **Add a network, wireless or Bluetooth printer**, and click the icon for the printer that you have configured on the print server system to be shared, and then click **Next**.

   **Note**
   
   - If the icon for the printer is not displayed, check that the printer is actually connected to the print server.
   - It may take some time for the icon for the printer to appear.

4. **Complete the setup**

   Take the appropriate action as described on the screen and then click **Finish**.

   - If you are using Windows 8.1, Windows 8 or Windows 7, the icon for the shared printer will be created in the **Devices and Printers** window.
   - If you are using Windows Vista, the icon for the shared printer will be created in the **Printers** window.

   The setup on the client systems is complete. You can now share the printer in the network.
If you are using Windows XP

1. Install the printer driver on the client systems

   For installation instructions, see "Installing the Printer Driver."

   > Note
   
   • You must manually select the connection destination on the client computer.
     During installation, click Cancel in the Connect Cable window. When the confirmation message appears, click Yes.
     In the Installation Incomplete window, select the Select printer port check box, click Manual Selection, and then select the appropriate port.

2. Start the wizard

   Select the start menu -> Control Panel -> Printers and Other Hardware -> Printers and Faxes -> Add a printer.

   When Welcome to the Add Printer Wizard screen appears, click Next.

3. Add a printer

   Select A network printer, or a printer attached to another computer, then click Next.

   On the Specify a Printer window, click Next and then search for the print server system.

   Click the icon for the printer that you have configured on the print server system to be shared, and then click Next.

   > Note
   
   • If the icon for the printer is not displayed, check that the printer is actually connected to the print server.

4. Complete the setup

   Take the appropriate action as described on the screen and then click Finish.

   The icon for the shared printer will be created in the Printers and Faxes window.

   The setup on the client systems is complete. You can now share the printer in the network.
Restrictions on Printer Sharing

If you are using the XPS printer driver, replace "Canon IJ Preview" with "Canon IJ XPS Preview" when reading this information.

These are restrictions that apply when you are using a printer in a network environment. Check the restrictions for the environment you are using.

When You Are Sharing a Printer in a Network

• A print completion message may be displayed. To disable the message from being displayed, follow the procedure below.
  ◦ If you are using Windows 8.1 or Windows 8:
    In the Devices and Printers window of the client, select the printer from Printers, and click Print server properties on the command bar.
    Uncheck Show informational notifications for network printers on the Advanced tab, and then restart the computer.
  ◦ If you are using Windows 7:
    In the Devices and Printers window of the client, select the printer from Printers and Faxes, and click Print server properties on the command bar.
    Uncheck Show informational notifications for network printers on the Advanced tab, and then restart the computer.
  ◦ If you are using Windows Vista:
    Press the Alt key from the Printers window on the client system. Open Run as administrator -> Server Properties... from the displayed File menu.
    Uncheck Show informational notifications for network printers on the Advanced tab, and then restart the computer.
  ◦ If you are using Windows XP:
    Open Server Properties from the File menu of the Printers and Faxes window on the print server system.
    Uncheck Notify when remote documents are printed on the Advanced tab, and then restart the computer.

• The bi-directional communication function is disabled and the correct printer status may not be recognized.
  If a client user opens the printer driver properties and then clicks OK with the Enable bidirectional support check box cleared on the Ports tab, the bidirectional communication function of the print server may also be disabled.
  In this case, check Enable bidirectional support check box on both the print server system and the client system.

• When you print from a client system, you cannot use Canon IJ Preview.

• When the functions on the Maintenance tab cannot be set properly from a client system, they may be grayed out. In this case, change the settings from the print server.
  When you change the settings of the print server, you should delete the icon of the shared printer from the client system, and then specify the shared settings again in the client system.

When the Same Printer Driver is Installed in the Print Server System and the Client System as the Local Printer

• The net crawl function may automatically create a network printer icon on the client system.

Printing Problems

- Printing Does Not Start
- Paper Jams
- Print Results Are Unsatisfactory
- No Ink Comes Out
- Paper Does Not Feed Properly/"No Paper" Error
- Printing Stops
Printing Does Not Start

A

Check1  Make sure printer is securely plugged in and press ON button to turn it on.

The POWER lamp flashes while the printer is initializing. Wait until the POWER lamp stops flashing and remains lit.

Note
- If you are printing large data such as photos or other graphics, printing may take longer to start. The POWER lamp flashes while the computer is processing data and sending it to the printer. Wait until printing starts.

Check2  Make sure printer is properly connected to computer.

When the printer is connected to your computer with a USB cable, check the following:
- If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and retry the printing. If printing starts normally, there is a problem with the relay device. Contact the vendor of the relay device.
- There could also be a problem with the USB cable. Replace the USB cable and retry the printing.

Check3  If printing from a computer, delete unnecessary print jobs.

- For Windows:
  - Deleting the Undesired Print Job
- For Mac OS:
  - Deleting the Undesired Print Job

Check4  Is your printer's printer driver is selected when printing?

The printer will not print properly if you are using a printer driver for a different printer.

- For Windows:
  Make sure "Canon XXX series" (where "XXX" is your printer’s name) is selected in the Print dialog box.

  Note
  - To make the printer the one selected by default, select Set as Default Printer.

- For Mac OS:
  Make sure your printer's name is selected in Printer in the Print dialog.

  Note
  - To make the printer the one selected by default, select the printer for Default printer.

Check5  Set correct printer port. (Windows)

Make sure the correct printer port is set.
1. Log in using an account with administrator privileges.

2. Make the following settings.
   - In Windows 8.1 or Windows 8, select **Control Panel** from **Settings** charm on **Desktop > Hardware and Sound > Devices and Printers**.
   - In Windows 7, select **Devices and Printers** from **Start** menu.
   - In Windows Vista, select **Start** menu > **Control Panel > Hardware and Sound > Printers**.
   - In Windows XP, select **Start** menu > **Control Panel > Printers and Other Hardware > Printers and Faxes**.

3. Open printer driver properties.
   - In Windows 8.1, Windows 8, or Windows 7, right-click "Canon XXX series" icon (where "XXX" is your printer's name), and then select **Printer properties**.
   - In Windows Vista or Windows XP, right-click "Canon XXX series" icon (where "XXX" is your printer's name), and then select **Properties**.

4. Click **Ports** tab to check port settings.
   - Make sure a port named "USBnnn" (where "n" is a number) with "Canon XXX series" appearing in **Printer column is selected for Print to the following port(s)**.
     - If setting is incorrect:
       - Reinstall the printer driver from the Setup CD-ROM or the Canon website.
       - If printing does not start even though the printer is connected to the computer using a USB cable and the port named "USBnnn" is selected:
         - In Windows 8.1 or Windows 8, select **My Printer** on **Start** screen to start **My Printer**. If **My Printer** is not displayed on **Start** screen, select **Search** charm, and then search for "My Printer".
         - Set the correct printer port on **Diagnose and Repair Printer**. Follow the on-screen instructions to set the correct printer port, and then select your printer's name.
         - In Windows 7, Windows Vista, or Windows XP, click **Start** and select **All programs, Canon Utilities, Canon My Printer, Canon My Printer**, and then select **Diagnose and Repair Printer**. Follow the on-screen instructions to set the correct printer port, and then select your printer's name.
         - If the problem is not resolved, reinstall the printer driver from the Setup CD-ROM or the Canon website.

**Check6** Is print data extremely large? (Windows)

Click **Print Options** on **Page Setup** sheet of the printer driver. Then set **Prevention of Print Data Loss** to **On** in the dialog that appears.

* This may reduce print quality.

**Check7** If printing from your computer, restart computer.
When paper is jammed, the **Alarm** lamp flashes and a troubleshooting message is displayed on the computer screen automatically. Take the appropriate action described in the message.

- For Windows:

  ![Image of Windows troubleshooting message]

- For Mac OS:

  ![Image of Mac OS troubleshooting message]

  * The screen differs depending on the OS you are using.

To remove the jammed paper, see [List of Support Code for Error (Paper Jams)](#).

**Note**

- You can also search for details on resolving the errors indicated by the support code shown.

  ![Search icon]
Print Results Are Unsatisfactory

If the print results are unsatisfactory due to white streaks, misaligned lines, or uneven colors, check the paper and print quality settings first.

Check1  Do page size and media type settings match size and type of loaded paper?

If these settings do not match, it is not possible to obtain the proper result.

If you are printing a photograph or an illustration, an incorrect paper type setting may reduce the quality of the printout color.

Also, if you print with an incorrect paper type setting, the printed surface may be scratched.

In borderless printing, uneven coloring may occur depending on the combination of the paper type setting and the loaded paper.

The method for checking the paper and print quality settings differs depending on what you are using your printer for.

Check the page size and media type settings using the printer driver.

- For Windows:
  - Printing with Easy Setup
- For Mac OS:
  - Printing with Easy Setup

Check2  Make sure appropriate print quality is selected using printer driver.

Select a print quality suited to the paper and to what you are printing. If you notice blurs or uneven colors, increase the print quality setting and retry the printing.

You can check the print quality setting using the printer driver.

- For Windows:
  - Changing the Print Quality and Correcting Image Data
- For Mac OS:
  - Changing the Print Quality and Correcting Image Data

Check3  If problem is not resolved, check other causes.

See also the sections below:

- Cannot Complete Printing
- Paper Is Blank/Printing Is Blurry/Colors Are Wrong/White Streaks Appear
- Colors Are Unclear
- Lines Are Misaligned
- Lines Incomplete or Missing (Windows)
- Images Incomplete or Missing (Windows)
- Ink Blots / Paper Curl
- Paper Is Smudged / Printed Surface Is Scratched
- Back of Paper Is Smudged
- Vertical Line Next to Image
- Uneven or Streaked Colors
Cannot Complete Printing

Select setting not to compress printing data. (Windows)

If you select the setting not to compress the printing data with an application software you are using, the printing result may be improved.

Click Print Options on Page Setup sheet of the printer driver. Select Do not allow application software to compress print data check box and click OK.

* Clear the check box once printing is complete.

Is print data extremely large? (Windows)

Click Print Options on Page Setup sheet of the printer driver. Then set Prevention of Print Data Loss to On in the dialog that appears.

* This may reduce print quality.

Your hard disk may not have sufficient free space to store job.

Delete unnecessary files to free up disk space.
Paper Is Blank

Printing Is Blurry

Colors Are Wrong
White Streaks Appear

Check1 Check paper and print quality settings.

⇒ Print Results Are Unsatisfactory

Check2 Print nozzle check pattern and perform any necessary maintenance operations such as print head cleaning.

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzles.

For details on printing the nozzle check pattern, print head cleaning, and print head deep cleaning, see If Printing Is Faint or Uneven.

• If nozzle check pattern is not printed correctly:
  After performing the print head cleaning, print the nozzle check pattern and examine the pattern.

• If problem is not resolved after performing print head cleaning twice:
  Perform print head deep cleaning.

• If problem is not resolved after performing print head deep cleaning:
  Perform system cleaning.
  ◦ For Windows:
    ⇒ Cleaning the Print Heads
  ◦ For Mac OS:
    ⇒ Cleaning the Print Heads

If the problem is not resolved yet, the print head may be damaged. Contact your nearest Canon service center to request a repair.

⇒⇒ Important

• Do not tilt the printer when moving it since the ink may leak out.

• When transporting the printer for repairing it, see Repairing Your Printer.

Check3 When an ink tank runs out of ink, refill the ink tank.

If the remaining ink level is below the lower limit line (A), refill the ink tank with the corresponding color of ink.
After refilling the ink tank, perform system cleaning.

- For Windows:
  - [Cleaning the Print Heads](#)

- For Mac OS:
  - [Cleaning the Print Heads](#)

**Check4** When using paper with one printable surface, make sure paper is loaded with printable side facing up.

Printing on the wrong side of such paper may cause unclear prints or prints with reduced quality.

Load paper with the printable side facing up.

Refer to the instruction manual supplied with the paper for detailed information on the printable side.
Colors Are Unclear

Check1  Is nozzle check pattern printed properly?

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzles.

For details on printing the nozzle check pattern, print head cleaning, and print head deep cleaning, see If Printing Is Faint or Uneven.

- If nozzle check pattern is not printed correctly:
  
  After performing the print head cleaning, print the nozzle check pattern and examine the pattern.

- If problem is not resolved after performing print head cleaning twice:
  
  Perform print head deep cleaning.

- If problem is not resolved after performing print head deep cleaning:
  
  Perform system cleaning.

  ◦ For Windows:
    
    ➤ Cleaning the Print Heads

  ◦ For Mac OS:
    
    ➤ Cleaning the Print Heads

If the problem is not resolved yet, the print head may be damaged. Contact your nearest Canon service center to request a repair.

Important

- Do not tilt the printer when moving it since the ink may leak out.

- When transporting the printer for repairing it, see Repairing Your Printer.

Check2  When an ink tank runs out of ink, refill the ink tank.

If the remaining ink level is below the lower limit line (A), refill the ink tank with the corresponding color of ink.

After refilling the ink tank, perform system cleaning.

- For Windows:
  
  ➤ Cleaning the Print Heads

- For Mac OS:
  
  ➤ Cleaning the Print Heads
• Printed colors may not match screen colors due to basic differences in the methods used to produce colors. Color control settings and environmental differences can also affect how colors appear on the screen. Therefore, colors of printing results may be different from those on the screen.
Lines Are Misaligned

Check1  Check paper and print quality settings.

Print Results Are Unsatisfactory

Check2  Perform print head alignment.

If printed lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

• For Windows:
  Aligning the Print Head Position
• For Mac OS:
  Aligning the Print Head Position

Check3  Increase print quality and try printing again.

Increasing the print quality using the printer driver may improve the print result.
Lines Incomplete or Missing (Windows)

Are you using Page Layout Printing or Binding Margin function?
When the Page Layout Printing or Binding margin function is in use, thin lines may not be printed. Try thickening the lines in the document.

Is print data extremely large?
Click Print Options on Page Setup sheet of the printer driver. Then set Prevention of Print Data Loss to On in the dialog that appears.
* This may reduce print quality.
Images Incomplete or Missing (Windows)

Check1  Select setting not to compress printing data.

If you select the setting not to compress the printing data with an application software you are using, the printing result may be improved.

Click Print Options on Page Setup sheet of the printer driver. Select Do not allow application software to compress print data check box and click OK.

* Clear the check box once printing is complete.

Check2  Is print data extremely large?

Click Print Options on Page Setup sheet of the printer driver. Then set Prevention of Print Data Loss to On in the dialog that appears.

* This may reduce print quality.
Ink Blots / Paper Curl

- Ink Blots

- Paper Curl

Check1
Check paper and print quality settings.

- Print Results Are Unsatisfactory

Check2
If intensity is set high, reduce intensity setting and try printing again.

If you are printing with a high intensity setting on plain paper, the paper may absorb too much ink and become wavy, causing paper abrasion.

Check the intensity setting in the printer driver.

  - For Windows:
    - Adjusting Intensity
  - For Mac OS:
    - Adjusting Intensity

Check3
Use Photo Paper to print photos.

To print data with high color saturation such as photographs or images with dark colors, we recommend that you use Photo Paper Plus Glossy II or other Canon specialty paper.

- Media Types You Can Use
Paper Is Smudged / Printed Surface Is Scratched

Paper Is Smudged

Smudged Edges  Smudged Surface

Printed Surface Is Scratched

Check1 Check paper and print quality settings.

Print Results Are Unsatisfactory

Check2 Check paper type.

- Make sure you are using the right paper for what you are printing.

Media Types You Can Use

- For borderless printing, use a paper suitable for borderless printing.

If the paper you are using is not suitable for borderless printing, the print quality may be reduced at the top and bottom edges of the paper.

Printing Area

Check3 Correct curl before loading paper.

When using Photo Paper Plus Semi-gloss, even if the sheet is curled, load one sheet at a time as it is. Rolling this paper in the opposite direction to flatten it may crack the paper surface and reduce the print quality.

We recommend putting unused paper back into the package and storing it flat.

- Plain Paper

Turn the paper over and reload it to print on the other side.

Leaving the paper loaded on the rear tray for a long time may cause the paper to curl. In this case, load the paper with the other side facing up. It may resolve the problem.
• Other Paper

If the paper corners curl more than 0.1 inch / 3 mm (A) in height, the paper may smudge or may not feed properly. Follow the instructions below to correct the paper curl.

1. Roll up paper in opposite direction to paper curl as shown below.

2. Check that paper is now flat.
   We recommend printing curl-corrected paper one sheet at a time.

---

**Note**

- Depending on paper type, the paper may smudge or may not feed properly even if it is not curled inward. Follow the instructions below to curl the paper outward up to 0.1 inch / 3 mm (B) in height before printing. This may improve the print result.

(C) Print side
   We recommend feeding paper that has been curled outward one sheet at a time.

---

**Check4** Set printer to prevent paper abrasion.

Adjusting the setting to prevent paper abrasion will widen the clearance between the print head and the paper. If you notice abrasion even with the media type set correctly to match the paper, set the printer to prevent paper abrasion on the computer.

This may reduce the print speed.

* Once you have finished printing, undo this setting. Otherwise, it will apply to subsequent print jobs.

- **For Windows:**
  Open the printer driver setup window, select **Custom Settings** in **Maintenance** sheet, select **Prevent paper abrasion** check box, and then click **OK**.
  To open the printer driver setup window, see **How to Open the Printer Driver Setup Window**.

- **For Mac OS:**
  In the Canon IJ Printer Utility, select **Custom Settings** in the pop-up menu, select **Prevent paper abrasion** check box, and then click **Apply**.
  To open the Canon IJ Printer Utility, see Opening the Canon IJ Printer Utility.
Check 5  If intensity is set high, reduce intensity setting and try printing again.

If you are printing with a high intensity setting on plain paper, the paper may absorb too much ink and become wavy, causing paper abrasion.

Check the intensity setting in the printer driver.

- For Windows:
  ➤ Adjusting Intensity
- For Mac OS:
  ➤ Adjusting Intensity

Check 6  Do not print outside recommended printing area.

If you print outside the recommended printing area of your paper, ink may stain the lower edge of the paper.

Resize the document using application software.

➤ Printing Area

Check 7  Is paper feed roller dirty?

Clean the paper feed roller.

- For Windows:
  ➤ Cleaning the Paper Feed Rollers
- For Mac OS:
  ➤ Cleaning the Paper Feed Rollers

➤ Note

- Cleaning the paper feed roller abrades it, so do this only when necessary.

Check 8  Is inside of printer dirty?

During duplex printing, ink may stain the inside of the printer, smudging the printout.

Perform the bottom plate cleaning to clean the inside of the printer.

➤ Cleaning the Inside of the Printer (Bottom Plate Cleaning)

➤ Note

- To prevent staining inside the printer, be sure to set the correct paper size.

Check 9  Set longer ink drying time.

This allows the printed surface to dry, preventing smudges and scratches.

- For Windows:
  1. Make sure printer is turned on.
  2. Open printer driver setup window.
     ➤ How to Open the Printer Driver Setup Window
  3. Click Maintenance tab and Custom Settings.
  4. Drag Ink Drying Wait Time slide bar to set wait time and click OK.
  5. Check message and click OK.
- For Mac OS:
1. Make sure printer is turned on.
2. Open Canon IJ Printer Utility.
   ➤ Opening the Canon IJ Printer Utility
3. Select Custom Settings in pop-up menu.
4. Drag Ink Drying Wait Time: slide bar to set wait time and click Apply.
5. Check message and click OK.
Back of Paper Is Smudged

Check paper and print quality settings.

Print Results Are Unsatisfactory

Perform bottom plate cleaning to clean inside of printer.

Cleaning the Inside of the Printer (Bottom Plate Cleaning)

Note

- During duplex printing or too much printing, ink may stain the inside of the printer.
Vertical Line Next to Image

Check

Is loaded paper size correct?

If the loaded paper is larger than the size you specified, a vertical line may appear in the margin. A small amount of ink is ejected for cleaning.

Set the paper size to match the loaded paper.

Print Results Are Unsatisfactory

Note

- The direction of the vertical line pattern may vary depending on the image data or the print setting.
- This printer performs automatic cleaning when necessary to keep printouts clean.

Although the ink is normally ejected onto the ink absorber at the outer edge of the paper, it may get onto the paper if the loaded paper is larger than the set size.
Uneven or Streaked Colors

Uneven Colors

![Uneven Colors Image]

Streaked Colors

![Streaked Colors Image]

Check 1: Check paper and print quality settings.

**Print Results Are Unsatisfactory**

Check 2: Print nozzle check pattern and perform any necessary maintenance operations such as print head cleaning.

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzles.

For details on printing the nozzle check pattern, print head cleaning, and print head deep cleaning, see If Printing Is Faint or Uneven.

- If nozzle check pattern is not printed correctly:
  After performing the print head cleaning, print the nozzle check pattern and examine the pattern.

- If problem is not resolved after performing print head cleaning twice:
  Perform print head deep cleaning.

- If problem is not resolved after performing print head deep cleaning:
Perform system cleaning.
  ◦ For Windows:
    ➤ Cleaning the Print Heads
  ◦ For Mac OS:
    ➤ Cleaning the Print Heads

If the problem is not resolved yet, the print head may be damaged. Contact your nearest Canon service center to request a repair.

>>> Important

- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see Repairing Your Printer.

Check3 Perform print head alignment.

- For Windows:
  ➤ Aligning the Print Head Position
- For Mac OS:
  ➤ Aligning the Print Head Position
No Ink Comes Out

Check1  Check the remaining ink level.
⇒ Checking Ink Status

Check2  Are print head nozzles clogged?

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzles.

For details on printing the nozzle check pattern, print head cleaning, and print head deep cleaning, see If Printing Is Faint or Uneven.

- If nozzle check pattern is not printed correctly:
  After performing the print head cleaning, print the nozzle check pattern and examine the pattern.

- If problem is not resolved after performing print head cleaning twice:
  Perform print head deep cleaning.

- If problem is not resolved after performing print head deep cleaning:
  Perform system cleaning.
    ◦ For Windows:
      ⇒ Cleaning the Print Heads
    ◦ For Mac OS:
      ⇒ Cleaning the Print Heads

If the problem is not resolved yet, the print head may be damaged. Contact your nearest Canon service center to request a repair.

For Windows:
• Do not tilt the printer when moving it since the ink may leak out.
• When transporting the printer for repairing it, see Reparing Your Printer.
Paper Does Not Feed Properly/"No Paper" Error

Check1 Make sure paper is loaded.

⇒ Loading Paper

Check2 When loading paper, consider the following.

• When loading two or more sheets of paper, align the edges of the sheets before loading the paper.
• When loading two or more sheets of paper, make sure the paper stack does not exceed the paper load limit.

However, paper may not feed correctly at the maximum capacity, depending on the type of paper or environmental conditions (very high or low temperature and humidity). In such cases, reduce the amount of paper you load at a time to less than half of the paper load limit.

• Always load the paper in portrait orientation, regardless of the printing orientation.
• When you load the paper, place the print side facing UP and slide the paper guides to align with both sides of the paper.

⇒ Loading Paper

Check3 Is paper too thick or curled?

⇒ Media Types You Cannot Use

Check4 When loading envelopes, consider the following:

When printing on envelopes, see Loading Paper, and prepare the envelopes before printing.

Once you have prepared the envelopes, load them in portrait orientation. If the envelopes are placed in landscape orientation, they will not feed properly.

Check5 Make sure media type and paper size settings match with loaded paper.

Check6 Make sure there are not any foreign objects in rear tray.

If the paper tears in the rear tray, see Paper Jams to remove it.
If there are any foreign objects in the rear tray, be sure to turn off the printer, unplug it and remove the foreign object.

**Important**

- Do not tilt the printer or do not it upside down. Doing so may cause the ink to leak.

**Check7** Clean paper feed roller.

- For Windows:
  - [Cleaning the Paper Feed Rollers](#)
- For Mac OS:
  - [Cleaning the Paper Feed Rollers](#)

**Note**

- Cleaning the paper feed roller abrades it, so do this only when necessary.

If the measures above do not solve the problem, contact your nearest Canon service center to request a repair.

**Important**

- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see [Repairing Your Printer](#).
Printing Stops

Check 1  Is paper loaded?
Make sure paper is loaded.
If necessary, load paper.

Check 2  Do documents to be printed have many photographs or illustrations?
It takes time for the printer and the computer to process large data such as photos or other graphics, so it may seem that the printer is not working.
Also, if you are printing data that requires a lot of ink on successive sheets of plain paper, the printer may pause temporarily. In either case, wait until the process is complete.

Note
- If you are printing a document with a large printing area or printing several copies, printing may pause to allow the ink to dry.

Check 3  Has printer been printing continuously for a long period?
If the printer has been printing continuously for a long time, the print head or other parts around it may overheat. The printer may stop printing at a line break for a period of time and then resume printing.
In this case, wait a while without doing anything. If the printing does not resume, interrupt your print session and turn the printer off for at least 15 minutes.

Caution
- Print head and surrounding area can become extremely hot. Never touch print head or nearby components.
Mechanical Problems

- Power Does Not Come On
- Power Shuts Off By Itself
- Cannot Connect to Computer Properly
- Printer Status Monitor Not Displayed (Windows)
Power Does Not Come On

Check1 Press ON button.

Check2 Make sure power plug is securely connected to printer, and then turn it back on.

Check3 Unplug printer, leave it for at least 2 minutes, and then plug it back in and turn it on again.

If this does not solve the problem, contact your nearest Canon service center to request a repair.

Important

- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see Repairing Your Printer.
Power Shuts Off By Itself

Check If printer is set to turn off automatically after a certain time, disable this setting.

If you have set the printer to turn off automatically after a specified time, the power will shut off by itself once that time has elapsed.

- If you are using a Windows and if you do not want the printer to turn off automatically:
  Open the printer driver setup window and in Auto Power in Maintenance sheet, select Disable for Auto Power Off.

- If you are using a Mac OS and if you do not want the printer to turn off automatically:
  Open Canon IJ Printer Utility, select Power Settings in the pop-up menu, and then select Disable for Auto Power Off on Auto Power.
Cannot Connect to Computer Properly

**Q** Printing Is Slow/Hi-Speed USB Connection Does Not Work/"This device can perform faster" Message Appears (Windows)

**A**

If your system environment does not support Hi-Speed USB, the printer operates at the slower speed of USB 1.1. In this case, the printer works properly but printing speed may slow down due to the communication speed.

**Check** Check following to make sure your system environment supports Hi-Speed USB connection.

- Does the USB port on your computer support Hi-Speed USB connection?
- Does the USB cable or the USB hub support Hi-Speed USB connection?
  
  Be sure to use a certified Hi-Speed USB cable. We recommend that the USB cable be no longer than 10 feet / 3 meters or so.
- Does the operating system of your computer support Hi-Speed USB connection?
  
  Install the latest update for your computer.
- Is the Hi-Speed USB driver working properly?
  
  If necessary, obtain and install the latest version of the Hi-Speed USB driver for your computer.

**Important**

- For more information, contact the manufacturer of your computer, USB cable, or USB hub.
Printer Status Monitor Not Displayed (Windows)

Is printer status monitor enabled?

Make sure Enable Status Monitor is selected on the Option menu of the printer status monitor.

1. Open printer driver setup window.  
   ➤How to Open the Printer Driver Setup Window
2. On Maintenance sheet, click View Printer Status.
3. Select Enable Status Monitor on Option menu if it is not selected.
Installation and Download Problems

- Cannot Install Printer Driver
- Easy-WebPrint EX Does Not Start or Easy-WebPrint EX Menu Does Not Appear (Windows)
Cannot Install Printer Driver

**For Windows:**

- If installation does not start when you insert Setup CD-ROM:

  Follow the instructions below to start the installation.

  1. Make the following settings.
     - In Windows 8.1 or Windows 8, select the **Explorer** icon in **Taskbar** on **Desktop**, and then select **Computer** from list on left.
     - In Windows 7 or Windows Vista, click **Start**, and then click **Computer**.
     - In Windows XP, click **Start**, and then click **My Computer**.

  2. Double-click **CD-ROM** icon in the window that appears.

     If the contents of the CD-ROM appear, double-click **MSETUP4.EXE**.

     If you cannot install the printer driver with the Setup CD-ROM, install them from the Canon website.

**Note**

- If the CD-ROM icon does not appear, try the following:
  - Remove the CD-ROM from your computer and reinser it.
  - Restart your computer.

If the icon still does not appear, try a different disc and see if it appears. If it does, there is a problem with the Setup CD-ROM. Contact your nearest Canon service center to request a repair.
• If you cannot get past the Printer Connection screen:

Cannot Proceed beyond Printer Connection Screen

• Other cases:

  Reinstall the printer driver.

  If the printer driver were not installed correctly, uninstall the printer driver, restart your computer, and then reinstall the printer driver.

  Deleting the Unnecessary Printer Driver

  Reinstall the printer driver with the Setup CD-ROM or install them from the Canon website.

  Note

  • If the installer was stopped due to a Windows error, Windows operation may be unstable, and you may not be able to install the drivers. Restart your computer and then reinstall the drivers.

For Mac OS:

Download the driver from the support page of Canon website and reinstall it.
Easy-WebPrint EX Does Not Start or Easy-WebPrint EX Menu Does Not Appear (Windows)

If Easy-WebPrint EX does not start or its menu does not appear on Internet Explorer, check the following.

**Check1** Is Canon Easy-WebPrint EX displayed on Toolbars menu in Internet Explorer’s View menu?

If Canon Easy-WebPrint EX is not displayed, Easy-WebPrint EX is not installed on your computer. Install the latest version of Easy-WebPrint EX from the Canon website.

**Note**

- If Easy-WebPrint EX is not installed, a message asking you to install it may appear in the notification area on the desktop. Click the message and follow the instructions to install Easy-WebPrint EX.
- Internet access is required to install or download Easy-WebPrint EX.

**Check2** Is Canon Easy-WebPrint EX selected on Toolbars menu in Internet Explorer’s View menu?

If Canon Easy-WebPrint EX is not selected, Easy-WebPrint EX is disabled. Select Canon Easy-WebPrint EX to enable it.

**Check3** Check the following to make sure your system environment supports Easy-WebPrint EX.

- Is it installed on the computer with proper system requirements?
- Did you start it using a compatible version of Internet Explorer?

Visit Canon website for more information of the system requirements of Easy-WebPrint EX.
Errors and Messages

- An Error Occurs
- Message Appears
An Error Occurs

If an error occurs in printing, for example if the paper runs out or jams, a troubleshooting message appears automatically. Take the appropriate action described in the message.

When an error occurs, the Alarm lamp flashes and a support code (error number) appears on the computer screen. For some errors, the POWER lamp and the Alarm lamp flashes alternately. Check the status of the lamps and the message, and take the appropriate action.

Support Code Corresponding to Number of Flashes of Alarm Lamp

Example of 2 times flashing:

![Lamp Flashes Diagram]

When a Support Code and a Message Are Displayed on Computer Screen:

• For Windows:

• For Mac OS:
* The screen differs depending on the OS you are using.

---

**Note**

• You can also search for details on resolving the errors indicated by the support code shown.

➡️ **Search**

To resolve errors that do not have support codes, see [Message Appears](#).
Message Appears

This section describes some of the errors and messages that may appear.

Note

- A support code (error number) is displayed on the computer for some errors. For details on errors that have support code, see List of Support Code for Error.

Error Regarding Power Cord Being Unplugged Is Displayed (Windows)

Writing Error/Output Error/Communication Error (Windows)

Other Error Messages (Windows)

Inkjet Printer/Scanner/Fax Extended Survey Program Screen Is Displayed (Windows)

Inkjet Printer/Scanner/Fax Extended Survey Program Icon Appears (Mac OS)

Error Regarding Power Cord Being Unplugged Is Displayed (Windows)

The printer may have been unplugged while it was on.
Check the error message that appears on the computer and click OK.
The printer starts printing.
See Notice for Unplugging the Power Cord for unplugging the power cord.

Writing Error/Output Error/Communication Error (Windows)

Check1 If POWER lamp is off, make sure printer is plugged in and turn it on.
The POWER lamp flashes while the printer is initializing. Wait until the POWER lamp stops flashing and remains lit.

Check2 Make sure correct printer port is set in printer driver.

* In the following instructions, "XXX" signifies your printer's name.
1. Log in using an account with administrator privileges.
2. Make the following settings.
   - In Windows 8.1 or Windows 8, select Control Panel from Settings charm on Desktop > Hardware and Sound > Devices and Printers.
   - In Windows 7, select Devices and Printers from Start menu.
   - In Windows Vista, select Start menu > Control Panel > Hardware and Sound > Printers.
   - In Windows XP, select Start menu > Control Panel > Printers and Other Hardware > Printers and Faxes.
3. Open printer driver properties.
   - In Windows 8.1, Windows 8, or Windows 7, right-click "Canon XXX series" icon (where "XXX" is your printer's name), and then select **Printer properties**.
   - In Windows Vista or Windows XP, right-click "Canon XXX series" icon (where "XXX" is your printer's name), and then select **Properties**.

4. Click **Ports** tab to check port settings.

Make sure a port named "USBnnn" (where "n" is a number) with "Canon XXX series" appearing in **Printer** column is selected for **Print to the following port(s)**.

   - If setting is incorrect:
     Reinstall the printer driver from the Setup CD-ROM or the Canon website.
   - If printing does not start even though the printer is connected to the computer using a USB cable and the port named "USBnnn" is selected:
     In Windows 8.1 or Windows 8, select **My Printer** on **Start** screen to start **My Printer**. If **My Printer** is not displayed on **Start** screen, select **Search** charm, and then search for "My Printer".
     Set the correct printer port on **Diagnose and Repair Printer**. Follow the on-screen instructions to set the correct printer port, and then select your printer's name.
     In Windows 7, Windows Vista, or Windows XP, click **Start** and select **All programs**, **Canon Utilities**, **Canon My Printer**, **Canon My Printer**, and then select **Diagnose and Repair Printer**. Follow the on-screen instructions to set the correct printer port, and then select your printer's name.
     If the problem is not resolved, reinstall the printer driver from the Setup CD-ROM or the Canon website.

**Check3** Make sure USB cable is securely plugged in to printer and computer.

When the printer is connected to your computer with a USB cable, check the following:

   - If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and retry the printing. If printing starts normally, there is a problem with the relay device. Contact the vendor of the relay device.
   - There could also be a problem with the USB cable. Replace the USB cable and retry the printing.

**Check4** Make sure printer driver are installed correctly.

Uninstall the printer driver following the procedure described in Deleting the Unnecessary Printer Driver and reinstall them from the Setup CD-ROM or the Canon website.

**Check5** When printer is connected to your computer with a USB cable, check device status from your computer.

Follow the procedure below to check the device status.

1. Open the Device Manager on your computer as shown below.
   If the **User Account Control** screen appears, follow the on-screen instructions.
   - In Windows 8.1 or Windows 8, select **Control Panel** from **Settings** charm on **Desktop > Hardware and Sound > Device Manager**.
   - In Windows 7 or Windows Vista, click **Control Panel**, **Hardware and Sound**, and **Device Manager**.
   - In Windows XP, click **Control Panel**, **Performance and Maintenance**, **System**, and **Device Manager** on **Hardware** sheet.
2. Double-click **Universal Serial Bus controllers** and **USB Printing Support**.
If the **USB Printing Support Properties** screen does not appear, make sure the printer is correctly connected to the computer.

3. **Check** Make sure USB cable is securely plugged in to printer and computer.

3. Click **General** tab and check for a device problem.

If a device error is shown, see Windows Help to resolve it.

### Other Error Messages (Windows)

If an error message appears outside printer status monitor, check the following:

- **"Could not spool successfully due to insufficient disk space"**
  
  Delete any unnecessary files to increase the amount of free space on the disk.

- **"Could not spool successfully due to insufficient memory"**
  
  Close other applications to increase the available memory.

  If you still cannot print, restart your computer and retry the printing.

- **"Printer driver could not be found"**
  
  Uninstall the printer driver following the procedure described in Deleting the Unnecessary Printer Driver and reinstall them from the Setup CD-ROM or the Canon website.

- **"Could not print Application name - File name"**
  
  Try printing again once the current job is complete.

### Inkjet Printer/Scanner/Fax Extended Survey Program Screen Is Displayed (Windows)

If the Inkjet Printer/Scanner/Fax Extended Survey Program is installed, a screen appears asking for permission to send the printer and application usage information every month for about ten years.

Read the information on the screen and follow the instructions below.
• If you agree to participate in survey program:

Click **Agree** and follow the on-screen instructions. The printer usage information is sent via the Internet. Once you have completed the procedure, the information is subsequently sent automatically and the confirmation screen does not reappear.

**Note**

- When the information is being sent, a warning such as an Internet security message may appear. Make sure the program name is "IJPLMUI.exe" and allow it.
- If you clear **Send automatically from the next time** check box, the information will not be sent automatically from next time and a confirmation screen will appear at the time of the next survey. To send the information automatically, see Changing confirmation screen setting.

• If you do not agree to participate in survey program:

Click **Do not agree**. The confirmation screen closes and the survey is skipped. The confirmation screen will reappear one month later.

• To uninstall Inkjet Printer/Scanner/Fax Extended Survey Program:

To uninstall the Inkjet Printer/Scanner/Fax Extended Survey Program, click **Uninstall** and follow the on-screen instructions.

• Changing confirmation screen setting:

1. Make the following settings.

   - In Windows 8.1 or Windows 8, select **Control Panel** from **Settings** charm on **Desktop > Programs > Programs and Features**.
   - In Windows 7, or Windows Vista, select **Start menu > Control Panel > Programs > Programs and Features**.
   - In Windows XP, select **Start menu > Control Panel > Add or Remove Programs**.
2. Select **Canon Inkjet Printer/Scanner/Fax Extended Survey Program**.
3. Select **Change**.
   
   If you select **Yes** after you have followed the on-screen instructions, the confirmation screen will appear at the time of the next survey.
   
   If you select **No**, the information will be sent automatically.

**Note**

- If you select **Uninstall** (or **Remove** in Windows XP), the Inkjet Printer/Scanner/Fax Extended Survey Program is uninstalled. Follow the on-screen instructions.

---

**Q** **Inkjet Printer/Scanner/Fax Extended Survey Program Icon Appears (Mac OS)**

**A**

If the Inkjet Printer/Scanner/Fax Extended Survey Program is installed, the printer and application software usage information is sent every month for about ten years. The **Inkjet Printer/Scanner/Fax Extended Survey Program** icon appears in the Dock when it is time to send the printer usage information.

Click the icon, read the information that appears, and then follow the instructions below.
• If you agree to participate in survey program:

Click **Agree** and follow the on-screen instructions. The printer usage information is sent via the Internet. Once you have completed the procedure, the information is subsequently sent automatically and the confirmation screen does not reappear.

**Note**

- If you clear **Send automatically from the next time** check box, the information will not be sent automatically the next time and the **Inkjet Printer/Scanner/Fax Extended Survey Program** icon will appear in the dock at the time of the next survey.

• If you do not agree to participate in survey program:

Click **Do not agree**. The confirmation screen closes and the survey is skipped. The confirmation screen will reappear one month later.

• To stop sending information:

Click **Turn off**. This stops the Inkjet Printer/Scanner/Fax Extended Survey Program, and information is not sent. To resume the survey, see **Changing setting**.

• To uninstall Inkjet Printer/Scanner/Fax Extended Survey Program:

1. Stop Inkjet Printer/Scanner/Fax Extended Survey Program.
   
   **Changing setting**:

2. Select **Applications** from **Go** menu of Finder, double-click **Canon Utilities** folder and **Inkjet Extended Survey Program** folder.

3. Move **Canon Inkjet Printer/Scanner/Fax Extended Survey Program.app** file to **Trash**.
4. Restart computer.
   Empty Trash and restart your computer.

• Changing setting:
  To display the confirmation screen every time the printer usage information is sent or to resume surveying, follow the procedure below.
  1. Select Applications from Go menu of Finder, double-click Canon Utilities folder and Inkjet Extended Survey Program folder.
  2. Double-click Canon Inkjet Printer/Scanner/Fax Extended Survey Program icon.

  ◦ Do not display the confirmation screen when information is sent:
    If the check box is selected, the information will be sent automatically.
    If the check box is not selected, Inkjet Printer/Scanner/Fax Extended Survey Program icon will appear in the Dock at the time of the next survey. Click the icon and follow the on-screen instructions.
  
  ◦ Turn off/Turn on button:
    Click the Turn off button to stop the Inkjet Printer/Scanner/Fax Extended Survey Program.
    Click the Turn on button to restart the Inkjet Printer/Scanner/Fax Extended Survey Program.
If You Cannot Solve a Problem

If there is a problem that you cannot solve following the instructions in this chapter, contact Canon through the Support page of the Canon website or contact your nearest Canon service center.

Canon support staff are trained to be able to provide technical support to satisfy customers.

⚠️ Caution

- If the printer emits any unusual sound, smoke, or odor, turn it off immediately. Unplug the printer and contact the seller you bought it from or your nearest Canon service center. Never attempt to repair or disassemble the printer yourself.
- If you attempt to repair or take apart the printer, your warranty will be invalidated even if it has not expired.

Before contacting the service center, note the following:

- Product name
  (Your printer’s name is written on the front cover of the setup manual.)
- Serial number (see setup manual)
- Details of problem
- What you tried to solve the problem, and what happened
Repairing Your Printer

When transporting the printer for repairing it, follow the procedure below to prepare.

**Important**

- When transporting the printer, make sure to avoid the followings.
  - You cannot take ink out of ink tanks.
  - Do not tilt the printer. Ink may leak.
  - Please handle with care and ensure the box remains flat and NOT turned upside down or on its side, as the printer may be damaged and ink in the printer may leak.
  - Pack the printer in a sturdy box so that it is placed with its bottom facing down, using sufficient protective material to ensure safe transport.
  - Do not remove the cartridge. Ink may leak.
  - When transporting the printer, we recommend packing the printer in a plastic bag so that ink does not leak.
  - When a shipping agent is handling transport of the printer, have its box marked "THIS SIDE UP" to keep the printer with its bottom facing down. Mark also with "FRAGILE" or "HANDLE WITH CARE".

1. **Make sure printer is turned on.**
   - If the printer cannot be turned on, unplug it and go to step 4.

2. If an error has occurred, press printer's **RESUME/CANCEL** button.
   - After the **Alarm** lamp is turned off, go to step 3.
   - If the error is not cleared, press **ON** button to turn the printer off, and then unplug it. If the printer cannot be turned off, unplug it. Go to step 4.

3. Set printer to transporting mode.
   - Press and hold **RESUME/CANCEL** button, and then release button when **POWER** lamp flashes 8 times. The printer is set to transporting mode and turned off. Unplug the printer.

4. Make sure that cartridge holder has moved to far right.
   - If the cartridge holder is not to the right, move it to far right.
5. Make sure that tank caps are properly closed.

6. Retract the paper output tray and output tray extension, and then close the paper support.

7. Unplug the printer cable from the computer and from the printer, then unplug the power cord from the printer.

8. Use adhesive tape to secure all the covers on the printer to keep them from opening during transportation. Then pack the printer in the plastic bag.

9. Attach the protective material to the printer when packing the printer in the box.
List of Support Code for Error

Support code appears on your computer screen when errors occur.

A "support code" is an error number, and appears along with an error message.

When an error occurs, check the support code displayed on the computer screen and take the appropriate action in response.

Support Code Appears on Computer Screen

- **1000 to 1ZZZ**
  - 1000  1200  1300  1403  1470  1471
  - 1472  1473  1474  1475  1476  1640
  - 1700  1701  1890

- **5000 to 5ZZZ**
  - 5100  5200  5400  5700  5B00  5B01

- **6000 to 6ZZZ**
  - 6000  6800  6801  6930  6931  6932
  - 6933  6936  6937  6938  6940  6941
  - 6942  6943  6944  6945  6946

- **A000 to ZZZZ**
  - B202  B203  B204  B205

For paper jam support codes, see also List of Support Code for Error (Paper Jams).
List of Support Code for Error (Paper Jams)

If paper jams, remove it following the appropriate procedure as shown below.

• If you can see the jammed paper at the paper output slot or the rear tray:
  ➡️ 1300

• If the paper tears and you cannot remove it from the paper output slot or from the rear tray:
  ➡️ Paper Is Jammed inside Printer

• Cases other than above:
  ➡️ Other Cases
Cause

Paper is jammed in paper output slot or in rear tray.

What to Do

Remove the jammed paper following the procedure below.

1. Slowly pull out paper, either from paper output slot or from rear tray, whichever is easier.
   
   Hold the paper with both hands, and pull it out slowly so as not to tear it.

   ![Paper removal illustration]

   **Note**

   • If you cannot pull out the paper, turn the printer back on. The paper may be ejected automatically.
   
   • If paper becomes jammed during printing and you need to turn off the printer to remove it, press the RESUME/CANCEL button to stop the printing before you turn off the printer.
   
   • If the paper tears and you cannot remove the jammed paper from the paper output slot or the rear tray, remove the paper from inside the printer.

   ![Paper is jammed inside Printer]

2. Reload paper and press printer's RESUME/CANCEL button.

   The printer resumes printing. Reprint the page you were printing if it was not printed properly due to the paper jam.

   If you turned off the printer in step 1, the print data that was sent to the printer is erased. Redo the printing.

   **Note**

   • When reloading the paper, make sure you are using suitable paper and loading it correctly.
   
   • We recommend using paper sizes other than A5 to print documents with photos or graphics. A5 paper may curl and jam as it leaves the printer.
Paper Is Jammed inside Printer

If the jammed paper tears and you cannot remove the paper either from the paper output slot or from the rear tray, or if the jammed paper remains inside the printer, remove the paper following the instructions below.

Note

• If paper becomes jammed during printing and you need to turn off the printer to remove it, press the RESUME/CANCEL button to stop the printing before you turn off the printer.

1. Turn off printer and unplug it.

2. Open top cover.

Important

• Do not touch clear film (A), white belt (B), or tubes (C).

3. Check if jammed paper is under cartridge holder.

If the jammed paper is under the cartridge holder, move the cartridge holder to the far right or left, whichever makes it easier to remove the paper.

When moving the cartridge holder, hold the top of the cartridge holder and slide it slowly to the far right or left.
4. Hold jammed paper firmly in both hands.

If the paper is rolled up, pull it out.

5. Slowly pull out paper, so as not to tear it.
6. Make sure all jammed paper is removed.

If the paper tears when you pull it out, a bit of paper may remain in the printer. Check the following and remove any remaining paper.

- Any paper left under the cartridge holder?
- Any small bits of paper left in the printer?
- Any paper left in the left and right empty spaces (D) in the printer?

7. Close top cover.

All jobs in the print queue are canceled. Redo the printing.

**Note**

- When reloading the paper, make sure you are using suitable paper and loading it correctly. If a paper jam message appears on your computer screen when you resume printing after removing all the jammed paper, there may be some paper still inside the printer. Check the printer again for any remaining bits of paper.

If the measures above do not solve the problem, contact your nearest Canon service center to request a repair.
Important

- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see Repairing Your Printer.
Other Cases

Check the following:

**Check1**  Is anything blocking paper output slot?

**Check2**  Are there any foreign objects in rear tray?

If there are any foreign objects in the rear tray, be sure to turn off the printer, unplug it, and then remove the foreign object.

**Important**

- Do not tilt the printer or do not it upside down. Doing so may cause the ink to leak.

**Check3**  Is paper curled?

Correct curl before loading paper.
1000

Cause
Possible causes include the following.

• There is no paper in the rear tray.
• Paper is not loaded properly.

What to Do
Take the corresponding actions below.

• Load paper in the rear tray.
  • Align the paper guides with both edges of the paper when you load paper.
After carrying out the above measures, press the printer’s RESUME/CANCEL button.
1200

Cause
Top cover is open.

What to Do
Close the top cover and wait for a while.

Do not close it while you are refilling an ink tank.
1403

Cause
Print head may be damaged.

What to Do
Contact your nearest Canon service center to request a repair.

➤➤ Important

• Do not tilt the printer when moving it since the ink may leak out.
• When transporting the printer for repairing it, see Repairing Your Printer.
1470

Cause
Cartridge is not installed properly.

What to Do
Open the top cover, and then push the cartridge locking cover to make sure the cartridges are installed properly.
Alternatively, push the joint button.

Important
- Remove the labels of the cartridge to install it.

After that, close the top cover.
1471

**Cause**
Cartridge cannot be recognized.

**What to Do**
Printing cannot be executed because the cartridge may not be installed properly or may not be compatible with this printer.

Install the appropriate cartridge.

If you want to cancel printing, press the printer's **RESUME/CANCEL** button.
1472

**Cause**

Cartridge cannot be recognized.

**What to Do**

Printing cannot be executed because the cartridge may not be installed properly or may not be compatible with this printer.

Install the appropriate cartridge.

If you want to cancel printing, press the printer’s RESUME/CANCEL button.
1473

Cause
Cartridge cannot be recognized.

What to Do
Printing cannot be executed because the cartridge may not be installed properly or may not be compatible with this printer.
Install the appropriate cartridge.
If you want to cancel printing, press the printer's RESUME/CANCEL button.
1474

Cause
Cartridge is not installed in correct position.

What to Do
Make sure each cartridge is installed in the correct position.
If printing is in progress, press the printer's RESUME/CANCEL button to cancel printing, and then install the cartridge.
1475

Cause
More than one cartridge of the same color is installed.

What to Do
Install the cartridge in the correct position.
1476

Cause
Appropriate cartridge is not installed.

What to Do
Printing cannot be executed because the cartridge is not compatible with this printer.
Install the appropriate cartridge.
If you want to cancel printing, press the printer's RESUME/CANCEL button.
Cause

The remaining ink level in one of the ink tanks may have reached the lower limit line shown on the ink tank.

What to Do

To check the remaining ink level, visually inspect the remaining ink in the ink tank. If the remaining ink level is below the lower limit line, refill the ink tank with the corresponding color of ink.

➡️ Refilling Ink Tanks

If printing is continued when the remaining ink level is below the lower limit line, the printer may consume a certain amount of ink to return to printable status and may also become damaged.

To continue printing, press the printer's RESUME button. After this operation, the remaining ink level notification function will not operate.

To reuse this function, refill each color of ink to the upper limit line shown on the ink tank and press the printer's RESUME button for at least 5 seconds. If any ink tank is not refilled to the upper limit line, a significant error may occur in the accuracy of the remaining ink level notification function.
1700

Cause
Ink absorber is almost full.

What to Do
Press the printer's RESUME/CANCEL button to continue printing. Contact your nearest Canon service center to request a repair.

Important
• Do not tilt the printer when moving it since the ink may leak out.
• When transporting the printer for repairing it, see Repairing Your Printer.
1701

Cause
Ink absorber is almost full.

What to Do
Press the printer's RESUME/CANCEL button to continue printing. Contact your nearest Canon service center to request a repair.

Important
- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see Repairing Your Printer.
1890

Cause
Protective material or tape may still be attached to cartridge holder.

What to Do
Open the top cover and make sure the protective material and tape have been removed from the cartridge holder.

If the protective material or tape is still there, remove it and close the top cover.

If this does not solve the problem, contact your nearest Canon service center to request a repair.

>>> Important

- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see Repairing Your Printer.
5100

Cause
Printer error has occurred.

What to Do
Cancel printing and turn off the printer.

Check the following:

• Make sure cartridge holder motion is not impeded by stabilizer, jammed paper, etc.
  Remove any impediment.

• Make sure the cartridges are properly installed.

Turn the printer back on.

If this does not solve the problem, contact your nearest Canon service center to request a repair.

Important

• When clearing an impediment to cartridge holder motion, be careful not to touch clear film (A), white belt (B), or tubes (C).

• Do not tilt the printer when moving it since the ink may leak out.

• When transporting the printer for repairing it, see Repairing Your Printer.
5200

**Cause**

Printer error has occurred.

**What to Do**

Check the remaining ink level, and then refill the ink tank if necessary.

Turn off the printer and unplug it.

Wait about 10 minutes.

Plug in the printer again and turn it back on.

If the ink tank is refilled because it runs out of ink, perform system cleaning.

- For Windows:
  
  ➤ [Cleaning the Print Heads](#)

- For Mac OS:
  
  ➤ Cleaning the Print Heads

If this does not solve the problem, contact your nearest Canon service center to request a repair.

**Important**

- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see Repairing Your Printer.
5400

Cause
Printer error has occurred.

What to Do
Turn off the printer and unplug it.
Plug in the printer again and turn it back on.
If this does not solve the problem, contact your nearest Canon service center to request a repair.

Important
- Do not tilt the printer when moving it since the ink may leak out.
- When transporting the printer for repairing it, see Repairing Your Printer.
