

Quick Start Guide

1

Connect the USB cable to the DL3/DL3FE device and to your computer's USB port.

2

The DL3/DL3FE will power on, once powered on enter the default password (seven zero's): 0000000 and touch the return key.

3

After entering the password, Select "SETUP" on the touch screen.

4

Select "Change Password" and follow the on screen instructions. You must change the default password after the first connection.

After setting up the password, the DL3/DL3FE is now ready for use.

Warning: Please save password in a secure location as we are not able to recover your password for you. **A lost or forgotten password cannot be reset or recovered without losing all of the stored data.**
