Hewlett Packard Enterprise

Free storage efficiency assessment from HPE

Do you know how much of your available storage capacity is being efficiently utilized? Would you like to cut your existing storage capacity requirements in half? Get the answers you need by allowing HPE to perform a non-invasive assessment of your storage environment.

Insight

According to Evaluator Group, "Many organizations waste as much as 70 percent of their budgets on capacity that is not actually storing data"[1]

[1] Based on research data from Evaluator Group, indicating that on average companies are only using 30 percent of their physical disk capacity for applications.

[2] The above is intended to highlight certain aspects of our HPE 3PAR Get Thinner Guarantee and does not contain the full terms, conditions, limitations, definitions, and other provisions ("Terms") of the HPE 3PAR Get Thinner Guarantee. The Terms shall be contained in a written HPE 3PAR Get Thinner Guarantee Terms and Conditions which shall take precedence over the above.

Qualification for the HPE 3PAR Get Thinner Guarantee is subject to your acceptance of and compliance with the HPE 3PAR Get Thinner Guarantee terms and conditions. See the full version of the HPE 3PAR Get Thinner Guarantee Terms and Conditions, which will be provided to you by your HPE Sales or Channel Partner representative.

Need a storage checkup?

How efficiently is your storage running today? Find out with a free storage efficiency assessment from HPE. Your assessment will provide a detailed report with the following information:

- Efficiency audit of your current storage

- Storage utilization ratios and stranded capacity

- Array sizing requirements needed to meet service-level agreements (SLAs)

- Determine qualification for the **HPE 3PAR Get Thinner Guarantee Program**—reduce storage capacity requirements by 75 percent.[2]

Low risk, high reward

HPE and its Channel Partners run thousands of assessments each month. Assessments are non-invasive, and don't access any confidential data or impact performance.

No strings attached—you walk away with a valuable report that pinpoints inefficiencies and ways to better utilize your current infrastructure, regardless of what equipment you're using today.

Use this information to get the most out of your storage and avoid scenarios that could impact your business.

Assessment report

The assessment report displays your data in viewer-friendly charts, graphs and tables that you can review and share within your organization. Here are just a few examples:

Qualify for the assessment

Answer "yes" to the following questions and you can be pre-qualified for a free storage efficiency assessment:

1. Are you planning to expand your current Open Systems or Windows® SAN storage environment?

2. Are you looking to increase the efficiency of your database, email, virtual server, media and file services environments?

3. Would you like to reduce your storage capacity requirements by 75 percent?

4. Are you considering implementing thin technology in your storage environment?

5. Are you considering the purchase of a storage array with SSD's and thin deduplication?

Learn about the HPE 3PAR Get Thinner Guarantee Program

Choose HPE 3PAR StoreServ All-Flash Storage as part of your next technology refresh and reduce the amount of capacity required to store your data by 75 percent—guaranteed[3] or HPE will make up the difference by providing up to 30 TiB of additional raw capacity, related software and associated support.
