MODEL NUMBER: PS5F15

5-outlet power strip distributes electricity to home and office electronics, including computers, power tools and appliances.

### Features

#### 34 cm Power Strip Delivers Electricity to 5 Devices at the Same Time

Compatible with standard electrical equipment, this Protect It!® power strip features five French Type E outlets and a durable white plastic housing. It is ideal for powering almost anything with a compatible plug, including computers and mobile devices to appliances and power tools.

#### Designed to Give You Flexibility in Placing the Power Strip Where It's Most Needed

The power strip features a space-saving right-angle Type E plug that helps you connect to a wall outlet located behind furniture that is placed flush against the wall. The plug is attached to a 1.5-meter power cord, which gives you more choices in placing the power strip away from the connected AC outlet.

#### Vertical or Horizontal Mounting for Desks and Workbenches

Keyhole-shaped mounting slots on the back of the power strip allow you to permanently install it on any flat surface, including walls, with user-supplied hardware.

#### Premium Safety Features Designed for Protecting Your Valuable Equipment

The PS5F15 features an on/off switch that provides one-touch control over all connected devices. In the event of an overload, a 16-amp circuit breaker immediately shuts down the power strip to prevent equipment damage.
