НОМЕР МОДЕЛИ: **P137-06N-VGA**

Описание

Tripp Lite's P137-06N-VGA Mini-DisplayPort to VGA Adapter allows you to connect a Mac or PC with a Mini-DisplayPort or Thunderbolt™ output to a VGA monitor.

Ideal for Thunderbolt™ /Mini DisplayPort equipped laptops, Chromebooks, MacBooks and Microsoft Surface. Mac 10.11, Windows 10 Compatible.

Supports computer video resolutions up to 1920 x 1200, and HD resolutions up to 1080p. Fully-molded ends ensure long life enjoyment. It features a simple plug and play design with an integrated chip that converts the digital Mini-DisplayPort signal to analog VGA; no drivers or setup needed. Simply plug the adapter into your Mini-DisplayPort source and connect your VGA cable between it and your monitor.

Unlike passive adapters, Active adapters convert both Single-Mode and Dual Mode (DP++) DisplayPort output. It is ideal for use with graphics cards, such as AMD Eyefinity, that do not output Dual Mode (DP++) signals.
