

ListenPoint® Microphone/Media Interface Quick Reference

Power On: To turn microphone on, push any button for one (1) second.

LED: Green - Mic on
Green Blinking - Mic muted
Red - Low battery
Red Blinking - Charging
Amber - Programming functions

Soft Button: Typically mutes the aux inputs. See customization guide for advanced programming options.

Volume Up: Increases the microphone volume, if mic is muted, button increases aux input level.

Mute/Power Off: Push to mute microphone. Hold down for four (4) seconds to turn mic off.

Volume Down: Decreases the microphone volume, if mic is muted, button decreases aux input level.

Place microphone facing forward in charging/storage station after each use.

The user is cautioned that any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
