

Multi-material.

One of a kind.

Precise cuts in a wide variety of materials.

Easy

Universal

Expert

Make it your home with the PKS 16 Multi. This versatile mini hand-held circular saw enables you to put your plans into practice in tile, wood and multi material. Precise cuts always ensure a perfect result – with maximum safety.

BOSCH

Invented for life

As versatile as your projects.

Cutting laminate and plastic or copper profiles to length, cutting tiles, parquet or perspex, sawing recesses in aluminium, particle board or plasterboard – you'll always be on the safe side with the mini hand-held circular saw from Bosch. Its compact design enables safe and comfortable handling in every situation. It comes complete with three saw blades for tile, wood and multi material, which enable many applications to be done in a wide variety of materials and makes the PKS 16 Multi a multi-talented tool.

Under control.

Soft Grip

For easy operation and handling.

400 W motor

For powerful sawing.

Metal base plate

For optimum and stable guidance of the saw.

Locking by switch

For optimum safety – at any time!

Cutting depth

Conveniently set the cutting depth.

Vacuum cleaner

Dust-free working thanks to the attachable vacuum cleaner adapter.

Cover hood

For optimum protection.

Cut Control

For easy and precise cutting line guidance.

Spindle lock

For quick and easy changing of the saw blade.

Setting the cutting depth.

Conveniently select the desired cutting depth. To do so, simply release the lock, select the desired cutting depth and then turn the lock again to activate it.

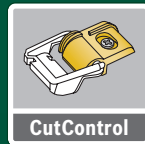

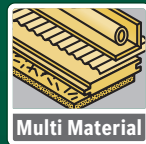

Safely achieve the perfect result.

Cut Control ensures that you always have a view of your marks. This makes it easy for you to achieve clean, straight cuts.

No-load speed	6400 rpm
Maximum cutting depth	16 mm
Saw blade diameter	65 mm
Cutting line guidance	✓
Cutting depth setting	✓
Cable length	2.5 m
Weight	1.9 kg

Comes complete with

- 1 x saw blade for wood
- 1 x saw blade for multi material
- 1 x diamond cutting disc
- Dust extraction

Diamond cutting disc.

Tiles, ceramics, terracotta – the diamond cutting disc is the right choice for tough applications and delivers chip-free cuts.

Multi material saw blade.

Perspex, plasterboard, plastic, aluminium or copper profiles – this saw blade is unstoppable in nearly any material.

Wood saw blade.

Moulded boards, skirting boards, wooden panels, laminate and chipboard – you will achieve clean, straight cuts with the wood saw blade.

The right blade for every material.

The PKS 16 Multi comes complete with three saw blades for tile, wood and multi material, making almost every one of your projects possible. Simply insert the right saw blade and start working straightaway. From small corrections through to complicated recesses in wood, metal or plastic, from cutting laminate to length through to cutting tiles exactly to size – the PKS 16 Multi ensures that you have every project safely under control at all times.

Plunge cuts easier than ever.

Sawing a clean recess is a challenge. The lowerable saw blade enables especially easy and safe completion of precise plunge cuts. Be it cable ducts or recesses for plug sockets and other installations – the PKS 16 Multi enables you to plunge-cut at precisely the right position instead of overshooting the mark.

Changing on the fly

Are you working on a project with various different materials? Thanks to the practical spindle lock you can change the saw blades in no time.

Extracting dust

Do you want to work dust-free in the house? No problem. Simply fix the vacuum cleaner to the supplied adapter and start working.

Clean cuts even in hard materials.

Exact cuts are a must in hard materials such as tiles. The PKS 16 Multi and the diamond cutting disc make it really easy to achieve precise, straight and chip-free cuts in hard materials. The practical dust extraction device enables dust-free work.

**Sits comfortably in the hand
even in tight spaces.**

Thanks to its compact design and the practical bow-shaped handle, you can operate the PKS 16 Multi effortlessly – even with only one hand. Tricky situations such as sawing close to edges are no problem due to the special design of the base plate and the outer position of the saw blade.
