

TSP847II AirPrint®

Print from Any Apple Device – Wirelessly

Print from Any Apple Device – Wirelessly

High Speed, High Quality Report & Label Printer

The Star Micronics TSP847II AirPrint is the second Apple AirPrint certified Star Micronics printer, following the release of the TSP654II AirPrint – the industry's first AirPrint certified label printer. The first of its kind, the TSP847II AirPrint provides wide-scale printing from any Apple device and is capable of compact web printing, mobile transportation printing, and wide, high quality POS label printing.

AirPrint allows POS systems to easily integrate with any iOS device. Eliminating driver installation, AirPrint users simply follow the familiar iOS print routine, printing from the label printer just as they would from a standard inkjet or laser printer. AirPrint also enables mobile control of the Star Micronics' cash drawer and ticket alarm.

With the ability to print up to 37 labels per minute, the TSP847II AirPrint is ultra-fast and capable of printing labels, tickets, forms, barcodes, and graphics on 3" to 4.4" wide paper. In addition to indoor use, the TSP847II AirPrint can be used inside vehicles for food delivery, field service, law enforcement, and more.

Product Highlights

- Print from any Apple Device
- Wide Paper Format (4.4in)
- High Speed 37RPM* (180mm/s)
- Prints Labels, Tickets, Forms, Barcodes and Graphics
- Compact Footprint
