A truly quiet experience users will love

Decibel sensitive users will appreciate the addition of the new **KMW-400** to the brand's line up: a mouse that delivers the same precision, durability and "click" performance virtually noise-free. This quiet mouse lives up to its name, by providing an operation which is 90% more silent than traditional input devices. Its frictionless base smoothly glides across any desktop. Quiet, inconspicuous and curiously practical, this ergonomic mouse is the best choice for the busy office, public spaces, and late night projects.

Highlights

- Wireless 3D-3button optical mouse, ergonomically designed for greater comfort and productivity
- 2.4GHz technology offers wireless freedom with an effective range up to 33ft
- Invisible optical sensor light is no longer a distraction in dark environments
- Left and right buttons along with its rubber wheel ensure silent browsing and scrolling
- Made of quality materials, the mouse features a rubberized top and side grips, for an enhanced feel and smarter control
- Adjustable settings of 1000/1200/1600dpi to match your resolution needs
- On-board storage compartment protects the USB receiver from loss and damage
