

## VisionTek: A HISTORY OF MEMORY

Coming full circle, VisionTek is returning to the product that established its name. You may know us for our graphics cards and innovative peripherals but we started out as a memory company. We lead the industry in manufacturing high quality, high performance PC memory and we are back to take our rightful place with the introduction of the new VisionTek Xtreme Gaming memory line.

### Xtreme Gaming Memory

- DDR3 240 Pin DIMM -2133Mhz
- Available 2GB and 4GB, Single Channel or Dual Channel
- Voltages TBD - CL8 and CL9, possibly CL7
- Heat Spreader in Performance Gaming and Very Low Profile available

### Low- Profile Memory

- DDR3 240 Pin DIMM -1600Mhz
- Available 2GB and 4GB, Single Channel or Dual Channel
- .65V - CL8 and CL9
- Heat Spreader in Performance Gaming and Very Low Profile available

### Standard Memory

- DDR3 240 Pin DIMM -1333Mhz
- Available 2GB and 4GB, Single Channel or Dual Channel
- 1.5V - CL8 and CL9
- Heat Spreader with VisionTek Logo optional

## Benefits of VisionTek Memory

VisionTek uses Micron Memory exclusively and sources from PCB CM with quality manufacturing and industry leading patented testing and verification. VisionTek memory products are rigorously tested at the factory and at final assembly and are built to last under the most demanding environments.
