Swann Communications warrants this product against defects in workmanship and material for a period of one (1) year from its original purchase date. You must present your receipt as proof of purchase for warranty validation. Any unit which proves defective during the stated period will be repaired without charge for parts or labour or replaced at the sole discretion of Swann. The end user is responsible for all freight charges incurred to return the product to Swann’s repair centre. The end user is responsible for all shipping costs incurred when shipping from and to any country other than the country of origin.

The warranty does not cover any incidental, accidental or consequential damages arising from the use of or the inability to use this product. Any costs associated with the fitting or removal of this product by a tradesman or other person or any other costs associated with the use of this product are the responsibility of the end user. This warranty applies to the original purchaser of the product and is not transferable to any third party. Unauthorized end user or third party modifications to any component will render all warranties void. By law some countries do not allow limitations on certain exclusions in this warranty. Where applicable by local laws, regulations and legal rights will take precedence.

For Australia:

Our goods come with guarantees which cannot be excluded under Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality.

5 Limited Warranty - Terms & Conditions

6 FCC Verification

This equipment has been tested and found to comply with the limits for Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and the receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

These devices comply with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. These devices may not cause harmful interference.
2. These devices must accept any interference received, including interference that may cause undesired operation.

Extra Security Camera

With Sensor Warning Light
Connecting the Camera

Mounting the Camera

1. Position the camera in the location you want to mount it, and mark the screw holes on the surface to be used.
2. Secure the camera with screws (a mounting template has been included). Then, using the appropriate screws for the surface you're fixing the camera to, secure the camera in place.
3. Connect the supplied power splitter to the power input connection on the camera. Twist the power splitter to lock it in place.
4. Connect the supplied power splitter to the power input connection on your DVR. Twist the power splitter to lock it in place.

Aiming the camera

1. From the camera's orientation, this enables you to rotate the camera so no matter what direction it is facing, your images will be the right way up.
2. Loosen the screw to tilt the camera up or down.
3. To pan the camera left or right, loosen the screw and position the camera as required.
4. Tighten each screw to secure in place.

Camera Location Tips

1. Although the sky looks nice when you look at the picture, it has minimal sky in it as the light in daylight can make it hard for an offender to approach. Make sure your camera has minimal sky in it as this will make it hard for them to make a clear view of what is going on.
2. Place your camera as close to the area of interest as practicable. The best position is from about 10ft above looking slightly down, keeping in mind the camera's orientation.
3. Although the sky looks nice when you look at the picture, it has minimal sky in it as the light in daylight can make it hard for an offender to approach. Make sure your camera has minimal sky in it as this will make it hard for them to make a clear view of what is going on.
4. Mount the camera at an elevated position. The best position is from about 13ft/4m above looking slightly down, keeping in mind the camera's orientation.

5. To keep the camera out of harm's way. It's recommended to mount your camera at an elevated position. This enables you to rotate the camera so no matter what direction it is facing, your images will be the right way up. Take into consideration what you want to monitor and where you'll get the best view of it.
6. Aiming the camera can be mounted onto a flat surface using the supplied camera mount and provided screws. The power outlet is the video & power input on the video & power cable. ・Connect the camera video output and power output connectors to the corresponding connections on the camera input on your DVR. Connect the supplied power splitter to the power input on the video & power cable. ・Connect the video output and power output connectors to the corresponding connections on the camera input on your DVR. Twist the camera to be locked in place.
7. The camera's casing is resistant to different weather conditions such as sunlight or excessive moisture, which may eventually damage the internal components of your camera and adversely affect its performance.
8. Run cables inside a wall cavity or other protected enclosure, and ensure that all wiring and connectors are well sealed to prevent water ingress.
9. Always use your camera in a metal enclosure, and ensure that all wiring and connectors are well sealed to prevent water ingress.
10. Do not allow your camera near electrical and/or lightning activity. "Lightning" or anything which can interfere with the signal from your camera.
