**Introduction**

Solid State Drives (SSDs) are fast becoming a real force with respect to storage in the computer industry. With no moving parts, storage is no longer bound by mechanical barriers to higher performance. HP SSDs for workstations offer overall performance significantly beyond that of SAS 15k rpm HDDs (Hard Disk Drives).

SSDs should be considered for most workstations since the number of processor cores and overall processing power can be limited by the I/O performance of the storage subsystem. For applications where 15k rpm HDDs deliver a performance improvement over standard SATA HDDs, an HP SSD will likely deliver even better performance.

Solid State Drives measure Access Time in microseconds (65 to 85) as opposed to the best HDDs (15k rpm) being measured in milliseconds (~6ms); the SSD is about 70 times faster. In addition, the extremely high average sustained read performance (up to 540MB/s) is considerably higher than the average sustained read performance of 15k rpm HDDs available today (150MB/s to 205MB/s*). The result is a much higher performance potential. Random IOPs (I/O OPerations per second) are in a class of their own, up to 20X faster than 15k rpm HDDs. This obviously helps with database operations but it also helps with OS and application performance. Users experience faster boot and data load times, faster application loading and snappier system response. This is especially true where the workflow has a large percentage of random reads and writes.

SSDs help lower the acoustical emissions of the workstation. No moving parts means SSDs inherently have no acoustical emissions. Furthermore, they consume much less power than Workstation class HDDs so less air is needed for cooling. The result is lower system fan speeds and therefore, lower acoustics.

SSDs tend to be more rugged than hard drives with respect to shock and vibration because SSDs have no moving parts.

* Based on HP and third party tests.

---

**Performance**

**HHP 128GB SATA 6Gb/s SSD:**
(includes 2.5” and mSATA form factors)
Up to 500MB/s sustained reads and up to 175MB/s sustained writes.
Power Consumption (typical):
Active: 150mW
Idle: <85mW
Endurance (TBW): 72TB

**HP 256GB SATA 6Gb/s SSD:** (SED and non-SED version)
(includes 2.5” and mSATA form factors)
Up to 500MB/s sustained reads and up to 260MB/s sustained writes.
Power Consumption (typical):
Active: 160mW
Idle: <85mW
Endurance (TBW): 144TB

The 256GB Self-Encrypting Drive (SED) version has similar performance to the standard 256GB SSD.

**HP 512GB SATA 6Gb/s SSD:**
Up to 500MB/s sustained reads and up to 260MB/s sustained writes.
Power Consumption (typical):
Active: 280mW
Overview

Idle: <100mW
Endurance (TBW): 288TB

**Seagate 600 Pro 120GB SATA SSD:**
High Performance & High Write Endurance
Enterprise Class SSD
Sustained 128KB Sequential Read/Write data transfer rates (MB/s max): 520/300
Peak 4KB Random Read/Write command rates (KIOPs): 80/20
Average LBA access time (us typ) ~158 us read / ~125 us write.

**Power Consumption for Peak Operating Mode:**
Random Read (typical): 1.74W
Random Write (typical): 2.43W
Sequential Read (typical): 2.48W
Sequential Write (typical): 2.61W

Endurance (TBW): 127TB
Flash Memory Type: NAND MLC
Power Loss Protection
End-to-End Data Protection

**Seagate 600 Pro 240GB & 480GB SATA SSD:**
High Performance & High Write Endurance
Enterprise Class SSD
Sustained 128KB Sequential Read/Write data transfer rates (MB/s max): 520/450
Peak 4KB Random Read/Write command rates (KIOPs): 85/30
Average LBA access time (us typ) ~158 us read / ~125 us write.

**Power Consumption for Peak Operating Mode:**
Random Read (typical): 1.75W
Random Write (typical): 2.06W
Sequential Read (typical): 2.20W
Sequential Write (typical): 2.92W

Endurance (TBW): 290TB
Flash Memory Type: NAND MLC
Power Loss Protection
End-to-End Data Protection

**Samsung SM843T 240GB & 480GB SATA SSD**
High Performance & Extreme Write Endurance
Enterprise Class SSD
Sustained Sequential Read/Write data transfer rates (MB/s max): 500/370
Peak 4KB Random Read/Write command rates (KIOPs): 98/15
Average LBA access time (us typ) ~170 us read / <3ms write.

**Power Consumption (Active):** 3.4W
Power Consumption (Idle): 300 mW

**Endurance (TBW-Terabytes Written):**
Random Writes: 1,730 TBW
Sequential Writes: 10,000 TBW
QuickSpecs

Intel Pro 1500 Series 180GB SATA SSD

Performance for Compressible Data
Sustained Sequential Read/Write data transfer rates (MB/s max): 540/490
Peak 4KB Random Read/Write command rates (KIOPs): 41/80

Performance for Incompressible Data
Sustained Sequential Read/Write data transfer rates (MB/s max): 510/230
Peak 4KB Random Read/Write command rates (KIOPs): 37/23

Power (Active): 195mW (BAPCo MobileMark* 2007 Workload)
Power (Idle): 125 mW

Endurance (TBW): 36.5TB
Flash Memory Type: NAND MLC

Note: The numbers above represent raw system performance. Actual performance in applications will typically be lower. The recommended benchmark to assess SSD performance for specific market segment applications is SPECwpc, found at www.spec.org.

Form Factor
These SSDs are SFF (Small Form Factor, 2.5") drives, which are mounted in a removable 3.5" Frame. The SSD can be mounted in either a standard 3.5" bay or in a SFF, 2.5" bay by removing the 3.5" frame.

Intelligent System Maintenance
SSDs emulate HDDs such that the operating system thinks it is talking to a hard drive. However the physical data mapping is quite different. In fact the SSD intelligently manages the physical location of data on the drive in the background via wear leveling algorithms that maximize the life of the SSD. The extremely fast access times of SSDs permit the SSD to move the data around as needed for wear leveling without impacting the performance. The net result is that defragmenting is not needed and defragmenting will not improve the performance. In fact, defragmentation should be turned off.

SSDs use the TRIM function to improve endurance. The TRIM command is focused on maintaining MLC SSD write performance by erasing no longer used (released) logical blocks (aka files deleted from the Windows recycle bin) from the SSD automatically in the background. Most configurations with Win7 and Win8, including single SSD, RAID 0, and RAID 1, will provide support for TRIM. Optional controllers, including the SAS controllers supported on Workstations, do not provide support for TRIM when used in a RAID configuration, but do enable TRIM in non-RAID configurations. For additional information regarding TRIM support, please contact HP technical support.
Overview

Models

- HP 128GB SATA 6Gb/s SSD A3D25AA
- HP 128GB mSATA 6Gb/s SSD E5Z78AA
- HP 256GB SATA 6Gb/s SSD A3D26AA
- HP 256GB SATA 6Gb/s SED SSD D8N28AA
- HP 256GB mSATA 6Gb/s SSD E5Z79AA
- HP 512GB SATA 6Gb/s SSD D8F30AA
- Seagate 600 Pro 120GB SATA SSD E9Q50AA
- Seagate 600 Pro 240GB SATA SSD E9Q51AA
- Seagate 600 Pro 480GB SATA SSD E9Q52AA
- Samsung SM843T 240GB SATA SSD F0W94AA
- Samsung SM843T 480GB SATA SSD TBD
- Intel Pro 1500 180GB SATA SSD F5Z70AA

Benefits

- Higher overall performance than 15k HDDs based on random IOPs, sustained reads and sustained writes.
- Lower systems level acoustical emissions than systems with HDDs, especially 15k rpm HDDs.
- More rugged than HDDs with respect to shock and vibration.
- Typical wall power savings relative to a 15k drive is ~10W/drive (based on drive idle power and power supply at 85% efficiency. Active drive power deltas are slightly larger.)
- Lower system maintenance because there is no need to defragment the drive.

NOTE: Some operating systems such as Microsoft Vista automatically schedule defragmenting sessions. Shutting off automatic defragmenting for the SDD will save both time and energy.

Compatibility

SSDs are supported on all Z-Workstations. Check individual workstation platform Quickspecs for confirmation.

If an HP Solid State Drive is purchased as an After Market Option, the kit will include a mounting bracket for use in the standard 3.5" HDD Bays. If it is for use in an Optical Bay, one of the following mounting brackets will be needed.

- HP Optical Bay HDD Mounting Bracket-BLK-for WKS, HP Part Number NQ099AA
- HP 2.5in HDD 2-in-1 Optical Bay Bracket, HP Part Number FX615AA
- HP 4-in-1 SFF HDD Carrier with External access (Option kit only for Z620 and Z820, B8K60AA), fits into ODD bay.

Service and Support

HP SSD drives have a one-year limited warranty or the remainder of the warranty of the HP Workstation (up to 3 years, whichever is longer). Technical support is available seven days a week, 24 hours a day by phone, as well as in online support forums. Certain restrictions and exclusions apply.
