# Highlights

## Unique variety of drinks

The Saeco GranBaristo offers an unparalleled variety of drinks to suit any occasion thanks to the patented VariPresso brewing chamber. The secret is in the adjustable brewing pressure; set it on high for an intense, rich espresso, or lower the pressure for a long, classic coffee.

## One-touch Cappuccino and Latte

Every coffee you prepare will be topped with a silky, milk layer that beckons the taste buds. The milk carafe froths the milk twice, then pours a splash free creamy layer into your cup at just the right temperature. The carafe can also be stored conveniently in the fridge and it is incredibly hygienic.

## A hot coffee in no time

Enjoy perfectly hot, coffee without the wait, thanks to the powerful boiler with Saeco Thermospeed technology. The Thermospeed technology will flash-heat the coffee circuit when the machine is turned on and prevents the loss of heat ensuring perfect, hot coffee from the very first cup.

## 100% Ceramic grinders

The robust 100% ceramic grinders guarantee a moment of pure coffee indulgence for years to come. The ceramic material creates the ideal grind, which allows the water to flow through steadily, extracting the purest essence of the beans. And unlike other 'regular' grinders, the ceramic material prevents the coffee from overheating and tasting burnt.

## One-touch carafe quick clean

The unique one-touch carafe quick clean allows you to thoroughly rinse the carafe after each use, at the touch of a button.

## Brew a strong coffee to go

Saeco invented the brewing group and revolutionised it further with the VariPresso brewing chamber. From 4 grams to 16 grams, you can select the precise amount of coffee required for your perfect brew. The 16 gram capacity even allows you to make a large cup of energy coffee, or two strong cups of classic coffee in one brew.

## Effortless clean with 1 finger

The Saeco GranBaristo is the only fully automatic espresso machine to offer a brewing group that can be removed using just one finger for an effortless cleaning.

# Specifications

## Accessories

- Included: Measuring scoop

## Sustainability

- Power consumption brewing: 1900 W
