Dell Display Manager User's Guide

Overview

Dell Display Manager is a Windows application used to manage a monitor or a group of monitors. It allows manual adjustment of the displayed image, assignment of automatic settings, energy management, image rotation and other features on select Dell models. Once installed, Dell Display Manager will run each time the system starts and will place its icon in the notification tray. Information about monitors connected to the system is always available when hovering over the notification tray icon.

Using the Quick Settings Dialog

Clicking Dell Display Manager’s notification tray icon opens the Quick Settings dialog box. When more than one supported Dell model is connected to the system, a specific target monitor can be selected using the menu provided. The Quick Settings dialog box allows convenient adjustment of the monitor’s Brightness and Contrast levels, Preset Modes can be manually selected or set to Auto Mode, and the screen resolution can be changed.

- **Manual Mode**

- Brightness: 75%
- Contrast: 75%

Open Dell Display Manager
The Quick Settings dialog box also provides access to Dell Display Manager’s advanced user interface which is used to adjust Basic functions, configure Auto Mode and access other features.

Setting Basic Display Functions

A Preset Mode for the selected monitor can be manually applied using the menu on the Basic tab. Alternatively, Auto Mode can be enabled. Auto Mode causes your preferred Preset Mode to be applied automatically when specific applications are active. An onscreen message momentarily displays the current Preset Mode whenever it changes.

The selected monitor’s Brightness and Contrast can also be directly adjusted from the Basic tab.

Assigning Preset Modes to Applications

The Auto Mode tab allows you to associate a specific Preset Mode with a specific application, and apply it automatically. When Auto Mode is enabled, Dell Display Manager will automatically switch to the corresponding Preset Mode whenever the associated application is activated. The Preset Mode assigned to a particular application may be the same on each connected monitor, or it can vary from one monitor to the next.
Dell Display Manager is pre-configured for many popular applications. To add a new application to the assignment list, simply drag the application from the desktop, Windows Start Menu or elsewhere, and drop it onto the current list.

**NOTE:** Preset Mode assignments targeting batch files, scripts, and loaders, as well as non-executable files such as zip archives or packed files, are not supported and will be ineffective.
Applying Energy-Conservation Features

On supported Dell models, the PowerNap tab will be available to provide energy conservation options. When the screensaver activates, the monitor’s Brightness can automatically be set to minimum level or the monitor can be put to sleep in order to save additional power.

# About Your Monitor

## Package Contents

Your monitor ships with all the components shown below. Ensure that you have received all the components and [Contact Dell](mailto:ContactDell) if anything is missing.

**NOTE:** Some items may be optional and may not ship with your monitor. Some features or media may not be available in certain countries.

Product Features

The Dell E2214H / E2314H flat-panel display has an active matrix, Thin-Film Transistor, Liquid Crystal Display. The monitor’s features include:

- **E2214H**: 54.6cm (21.5 inches) diagonal viewable image size, 1920 x 1080 resolution, plus full-screen support for lower resolutions.
- **E2314H**: 58.4 cm (23.0 inches) diagonal viewable image size, 1920 x 1080 resolution, plus full-screen support for lower resolutions.
- LED backlit.
- Tilt adjustment capability.
- Removable pedestal and Video Electronics Standards Association (VESA) 100 mm mounting holes for flexible mounting solutions.
- Plug and play capability if supported by your system.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Software and documentation media which includes an information file (INF), Image Color Matching File (ICM), and product documentation.
- Dell Display Manager Software
- ENERGY STAR-compliant.
- Security lock slot.
- Asset Management Capability.
- EPEAT Gold compliant.
- CECP (for China).
- RoHS compliant.
- TCO Certified Displays.

About Your Monitor

**Label** | **Description** | **Use**
--- | --- | ---
1 | AC power connector | To connect the monitor power cable.
2 | DVI connector | To connect your computer to the monitor using a DVI cable.
3 | VGA connector | To connect your computer to the monitor using a VGA cable.

**Monitor Specifications**

The following sections give you information about the various power management modes and pin assignments for the various connectors of your monitor.

**Power Management Modes**

If you have VESA’s DPM compliance display card or software installed in your PC, the monitor automatically reduces its power consumption when not in use. This is referred to as Power Save Mode. If the computer detects input from keyboard, mouse, or other input devices, the monitor...
automatically resumes functioning. The following table shows the power consumption and signaling of this automatic power-saving feature:

### E2214H

<table>
<thead>
<tr>

</table>

The OSD will only function in the normal operation mode. When any button except power button is pressed in Active-off mode, the following messages will be displayed:

**Dell E2214H / E2314H**

There is no signal coming from your computer. Press any key on the keyboard or move the mouse to wake it up. If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.

Activate the computer and monitor to gain access to the OSD.

**NOTE:** The Dell E2214H / E2314H monitor is ENERGY STAR®-compliant.
* Zero-power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.
** Maximum power consumption with max luminance and contrast.

Plug and Play Capability

You can install the monitor in any Plug and Play compatible system. The monitor automatically provides the computer with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so that the system can configure itself and optimize the monitor settings. Most monitor installations are automatic. You can select different settings if required.

### LCD Monitor Quality & Pixel Policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state. The visible result is a fixed pixel that appears as an extremely tiny dark or bright discolored spot. When the pixel remains permanently lit, it is known as a “bright dot.” When the pixel remains black, it is known as a “dark dot.”

In almost every case, these fixed pixels are hard to see and do not detract from display quality or usability. A display with 1 to 5 fixed pixels is considered normal and within competitive standards. For more
Maintenance Guidelines

Caring for Your Monitor

⚠️ CAUTION: Read and follow the safety instructions before cleaning the monitor.

⚠️ CAUTION: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below while unpacking, cleaning, or handling your monitor:

- To clean your antistatic screen, slightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the antistatic coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a slightly dampened, warm cloth to clean the plastics. Avoid using detergent of any kind as some detergents leave a milky film on the plastics.
- If you notice a white powder when you unpack your monitor, wipe it off with a cloth. This white powder occurs during the shipping of the monitor.
- Handle your monitor with care as a darker-colored monitor may scratch and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and power off your monitor when not in use.
Setting Up the Monitor

Attaching the Stand

NOTE: The stand base is detached when the monitor is shipped from the factory.

1. Assemble the stand riser to stand base.
   
   a. Place the monitor stand base on a stable table top.
   b. Slide the monitor stand body in the correct direction down onto the stand base until it clicks into place.

2. Attach the stand assembly to the monitor:
   
   a. Place the monitor on a soft cloth or cushion near the edge of desk.
   b. Align the stand assembly bracket to the monitor groove.
   c. Insert the bracket towards monitor until it locks in place.
Connecting Your Monitor

⚠️ WARNING: Before you begin any of the procedures in this section, follow the Safety Instructions.

To connect your monitor to the computer:

1. Turn off your computer and disconnect the power cable.
2. Connect either the white (digital DVI-D) or the blue (analog VGA) display connector cable to the corresponding video port on the back of your computer. Do not use both cables at the same time. Use both the cables only when they are connected to two different computers with appropriate video systems.

Connecting the blue VGA Cable

Connecting the white DVI cable

Note: The graphics are used for the purpose of illustration only. Appearance on the computer may vary.
Organizing Your Cables

After attaching all necessary cables to your monitor and computer, (See Connecting Your Monitor for cable attachment), organize all cables as shown above.

Removing the Monitor Stand

After placing the monitor panel on a soft cloth or cushion, complete the following steps to remove the base:

1. Use a long screwdriver to push the release latch located in a hole just above the stand.
2. Once the latch is released, remove the base away from the monitor.
Wall Mounting (Optional)

(Screw dimension: M4 x 10 mm).
Refer to the instructions that come with the VESA-compatible base mounting kit.

1. Place the monitor panel on a soft cloth or cushion on a stable flat table.
2. Remove the stand.
3. Remove the VESA Screw Cover (figure 1)
4. Use a screwdriver to remove the four screws securing the plastic cover. (figure 2)
5. Attach the mounting bracket from the wall mounting kit to the LCD.
6. Mount the LCD on the wall by following the instructions that came with the base mounting kit.
**NOTE:** For use only with UL-listed wall-mount bracket with minimum weight/load bearing capacity of 5.53 kg.
Operating the Monitor

Power On the Monitor

Press the button to turn on the monitor.

Using the Front-Panel Controls

Use the keys on the front of the monitor to adjust the image settings.

<table>
<thead>
<tr>

</tbody>
</table>
Using the On-Screen Display (OSD) Menu

Accessing the Menu System

NOTE: If you change the settings and then either proceed to another menu or exit the OSD menu, the monitor automatically saves those changes. The changes are also saved if you change the settings and then wait for the OSD menu to disappear.

1. Press the button to open the OSD menu and display the main menu.

Main Menu

NOTE: Auto Adjust is only available when you use the analog (VGA) connector.

2. Press the ▲ and ▼ buttons to toggle between options in the Menu. As you move from one icon to another, the option name is highlighted.

3. To select the highlighted item on the menu press the button again.

4. Press the ▲ and ▼ buttons to select the desired parameter.

5. Press the button to enter the slide bar and then use the ▲ or ▼ buttons, according to the indicators on the menu, to make your changes.

6. Select the X to return to previous menu without accepting current settings or □ to accept and return to previous menu.

The table below provides a list of all the OSD menu options and their functions.
<table>
<thead>
<tr>
<th>Icon</th>
<th>Menu and Submenus</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Energy Use Icon]</td>
<td><strong>Energy Use</strong></td>
<td>This meter shows the energy level being consumed by the monitor in real time.</td>
</tr>
<tr>
<td>![Brightness/Contrast Icon]</td>
<td><strong>Brightness/Contrast</strong></td>
<td>Use the <strong>Brightness</strong> and <strong>Contrast</strong> menu to adjust the Brightness/Contrast.</td>
</tr>
</tbody>
</table>

**Brightness**

Allows you to adjust the brightness or luminance of the backlight.
Press the ![Increase Brightness] key to increase brightness and press the ![Decrease Brightness] key to decrease brightness (min 0 ~ max 100).

**Contrast**

Allows you to adjust the contrast or the degree of difference between darkness and lightness on the monitor screen. Adjust brightness first, and adjust contrast only if you need further adjustment.
Press the ![Increase Contrast] key to increase contrast and press the ![Decrease Contrast] key to decrease contrast (min 0 ~ max 100).
Auto Adjust

Use this key to activate automatic setup and adjust menu.

The following dialog appears on a black screen as the monitor self-adjusts to the current input:

Auto Adjustment in Progress...

Auto Adjustment allows the monitor to self-adjust to the incoming video signal. After using Auto Adjustment, you can further tune your monitor by using the Pixel Clock (Coarse) and Phase (Fine) controls under Display Settings.

**NOTE:** Auto Adjust does not occur if you press the button while there are no active video input signals or attached cables.

This option is only available when you are using the analog (VGA) connector.
### Input Source

Use the **Input Source** menu to select between different video signals that may be connected to your monitor.

#### Auto Select
Select **Auto Select** to scan for available input signals.

#### VGA
Select **VGA** input when you are using the analog (VGA) connector. Push ➔ to select the VGA input source.

#### DVI-D
Select **DVI-D** input when you are using the Digital (DVI) connector. Push ➔ to select the DVI input source.

### Color Settings

Use the **Color Settings** menu to adjust the monitor’s color settings.

#### Input Color Format
Allows you to set the video input mode to:
- **RGB**: Select this option if your monitor is connected to a computer or DVD player using the HDMI to DVI adapter.
- **YPbPr**: Select this option if your DVD player supports only YPbPr output.
### Preset Modes

Allows you to choose from a list of preset color modes.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Standard</strong></td>
<td>Loads the monitor’s default color settings. This is the default preset mode.</td>

</thead>
<tbody>
<tr>
<td>Reset Energy Settings</td>
<td>Select this option to restore default Energy Settings.</td>
</tr>
</tbody>
</table>
Menu Settings

Select this option to adjust the settings of the OSD such as, the languages of the OSD, the amount of time the menu remains on screen, and so on.

| **Language** | Allows you to set the OSD display to one of eight languages: English, Spanish, French, German, Brazilian Portuguese, Russian, Simplified Chinese, or Japanese. |
| **Transparency** | Allows you to adjust the OSD background from opaque to transparent. |
| **Timer** | Allows you to set the time for which the OSD remains active after you press a key on the monitor. Use the ‹ and › keys to adjust the slider in 1 second increments, from 5 to 60 seconds. |
| **Lock** | Controls user access to adjustments. When Lock is selected, no user adjustments are allowed. All keys are locked except key. 

⚠️ NOTE: When the OSD is locked, pressing the menu key takes you directly to the OSD settings menu, with 'OSD Lock' pre-selected on entry. Press and hold key for 10 seconds to unlock and allow user access to all applicable settings. |

| **Reset Menu Settings** | Select this option to restore default menu settings. |
### Other Settings
Select this option to adjust the settings of the OSD, such as, the languages of the OSD, the amount of time the menu remains on screen, and so on.

![OSD Settings Menu](image)

### DDC/CI
DDC/CI (Display Data Channel/Command Interface) allows a software on your computer to adjust the monitor display settings like the brightness, color balance, etc.

Enable (Default): Optimizes the performance of your monitor and provides a better customer experience.

Disable: Disables the DDC/CI option and the following message appears on the screen.

![DDC/CI Message](image)

The function of adjusting display setting using PC application will be disabled.

Do you wish to disable DDC/CI function?

- No
- Yes
<table>
<thead>
<tr>
<th><strong>LCD Conditioning</strong></th>
<th>This feature will help reduce minor cases of image retention. If an image appears to be stuck on the monitor, select <strong>LCD Conditioning</strong> to help eliminate any image retention. Using the LCD Conditioning feature may take some time. LCD Conditioning feature cannot remove severe cases of image retention or burn-in. <strong>NOTE</strong>: Use LCD Conditioning only when you experience a problem with image retention. The below warning message appears once user selects “Enable” LCD Conditioning.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Reset Other Settings</strong></td>
<td>Select this option to restore default other settings, such as DDC/CI.</td>
</tr>
<tr>
<td><strong>Factory Reset</strong></td>
<td>Resets all OSD settings to the factory preset values.</td>
</tr>
</tbody>
</table>
Personalize

Selecting this option allows you to set two shortcut keys.

Shortcut Key 1

User can select from "Preset Modes", "Brightness/Contrast", "Auto Adjust", "Input Source", "Aspect Ratio" and set as shortcut key.

Shortcut Key 2

User can select from "Preset Modes", "Brightness/Contrast", "Auto Adjust", "Input Source", "Aspect Ratio" and set as shortcut key.

Reset Personalization

Allows you to restore shortcut key to the default setting.
OSD Messages

When the monitor does not support a particular resolution mode you will see the following message:

```
Dell E2214H / E2314H

The current input timing is not supported by the monitor display. Please change your input timing to 1920 x 1080, 60Hz or any other monitor listed timing as per the monitor specifications.
```

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See Monitor Specifications for the horizontal and vertical frequency ranges addressable by this monitor. Recommended mode is 1920 x 1080.

You will see the following message before the DDC/CI function is disabled.

```
Dell E2214H / E2314H

The function of adjusting display setting using PC application will be disabled.

Do you wish to disable DDC/CI function?

No
Yes
```
When the monitor enters the **Power Save** mode, the following message appears:

<table>
<thead>
<tr>
<th>Dell E2214H / E2314H</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entering Power Save Mode.</td>
</tr>
</tbody>
</table>

Activate the computer and wake up the monitor to gain access to the **OSD**.

If you press any button other than the power button, the following messages will appear depending on the selected input:

<table>
<thead>
<tr>
<th>Dell E2214H / E2314H</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is no signal coming from your computer. Press any key on the keyboard or move the mouse to wake it up. If there is no display, press the monitor button now to select the correct input source on the On-Screen-Display menu.</td>
</tr>
</tbody>
</table>

If VGA or DVI cable is not connected, a floating dialog box as shown below appears. The monitor will enter **Power Save Mode after 5 minutes** if left at this state.

<table>
<thead>
<tr>
<th>Dell E2214H / E2314H</th>
</tr>
</thead>
<tbody>
<tr>
<td>No VGA Cable</td>
</tr>
<tr>
<td>The display will go into Power Save Mode in 5 minutes.</td>
</tr>
<tr>
<td><a href="http://www.dell.com/support/monitors">www.dell.com/support/monitors</a></td>
</tr>
</tbody>
</table>
See **Solving Problems** for more information.

### Setting the Maximum Resolution

**Windows Vista®, Windows® 7, Windows® 8:**

1. For Windows® 8 only, select the Desktop tile to switch to classic desktop.
2. Right-click on the desktop and click **Screen Resolution**.
3. Click the dropdown list of the screen resolution and select 1920 x 1080.
4. Click OK.

If you do not see 1920 x 1080 as an option, you may need to update your graphics driver. Depending on your computer, complete one of the following procedures:

- **If you have a Dell desktop or portable computer:**
  - Go to [www.dell.com/support](http://www.dell.com/support), enter your service tag, and download the latest driver for your graphics card.

- **If you are using a non-Dell computer (portable or desktop):**
  - Go to the support site for your computer and download the latest graphic drivers.
  - Go to your graphics card website and download the latest graphic drivers.
Using the Tilt

Tilt

With the stand assembly, you can tilt the monitor for the most comfortable viewing angle.

21° typical (maximum 22°)  5° typical (maximum 5.5°)

NOTE: The stand base is detached when the monitor is shipped from the factory.
Troubleshooting

⚠️ WARNING: Before you begin any of the procedures in this section, follow the Safety Instruction

Self-Test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn off both your computer and the monitor.
2. Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove both Digital (white connector) and the Analog (blue connector) cables from the back of computer.
3. Turn on the monitor.

The floating dialog box should appear on-screen (against a black background) if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

4. This box also appears during normal system operation, if the video cable becomes disconnected or damaged. The monitor will enter Power Save Mode after 5 minutes if left at this state.
5. Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

⚠️ NOTE: Self-test feature check is not available for S-Video, Composite, and Component video modes.
**Built-in Diagnostics**

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

![Monitor Front Panel with Buttons](image)

**NOTE:** You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in self-test mode.

To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).
2. Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.
3. Press and hold the **Button 1** and **Button 4** on the front panel simultaneously for 2 seconds. A gray screen appears.
4. Carefully inspect the screen for abnormalities.
5. Press the **Button 4** on the front panel again. The color of the screen changes to red.
6. Inspect the display for any abnormalities.
7. Repeat steps 5 and 6 to inspect the display in green, blue, black, white screens.

The test is complete when the white screen appears. To exit, press the **Button 4** again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.
## Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions.

<table>
<thead>
<tr>
<th>Common Symptoms</th>
<th>What You Experience</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| No Video/Power LED off | No picture | • Ensure that the video cable connecting the monitor and the computer is properly connected and secure.  
• Verify that the power outlet is functioning properly using any other electrical equipment.  
• Ensure that the power button is depressed fully.  
• Ensure that the correct input source is selected via the **Input Source** Select button.  
• Check the “Power LED Button” option under Energy Settings in **OSD Menu**. |
| No Video/Power LED on | No picture or no brightness | • Increase brightness & contrast controls via **OSD**.  
• Perform monitor self-test feature check.  
• Check for bent or broken pins in the video cable connector.  
• Ensure that the correct input source is selected via the **Input Source** Select menu.  
• Run the built-in diagnostics. |
| Poor Focus | Picture is fuzzy, blurry, or ghosting | • Perform Auto Adjust via **OSD**.  
• Adjust the Phase and Pixel Clock controls via **OSD**.  
• Eliminate video extension cables.  
• Reset the monitor to **Factory Settings**.  
• Change the video resolution to the correct aspect ratio (16:9). |
| Shaky/Jittery Video | Wavy picture or fine movement | • Perform Auto Adjust via **OSD**.  
• Adjust the Phase and Pixel Clock controls via **OSD**.  
• Reset the monitor to **Factory Settings**.  
• Check environmental factors.  
• Relocate the monitor and test in another room. |

• Test the Soundbar using another audio source (For example: portable CD player, MP3 player). |
|---|---|---|
| Low Volume | Volume is too low | • Clear any obstructions between the Soundbar and the user.  
• Turn the Power/Volume knob on the Soundbar clockwise to the maximum volume setting.  
• Set all Windows volume controls to their maximum.  
• Increase the volume of the audio application.  
• Test the Soundbar using another audio source (For example: portable CD player, MP3 player). |
Appendix

⚠️ WARNING: Safety Instructions

⚠️ WARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.

For information on safety instructions, see the Product Information Guide.

FCC Notices (U.S. Only) and Other Regulatory Information

For FCC notices and other regulatory information, see the regulatory compliance website located at www.dell.com\regulatory_compliance.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference
2. this device must accept any interference received including interference that may cause undesired operation

Contact Dell

For customers in the United States, call 800-WWW-DELL (800-999-3355).

⚠️ NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area.

To get online monitor support content:
1. Visit www.dell.com/support/monitors

To contact Dell for sales, technical support, or customer service issues:
2. Verify your country or region in the Choose A Country/Region drop-down menu at the top left of the page.
3. Click Contact Us on the top left side of the page.
4. Select the appropriate service or support link based on your need.
5. Choose the method of contacting Dell that is convenient for you.
Setting Up Your Monitor

Setting the display resolution to 1920 x 1080 (Maximum)

For optimal display performance while using the Microsoft Windows operating systems, set the display resolution to 1920 x 1080 pixels by performing the following steps:

In Windows Vista®, Windows® 7, Windows® 8:

1. For Windows® 8 only, select the Desktop tile to switch to classic desktop.
2. Right-click on the desktop and click Screen Resolution.
3. Click the dropdown list of the screen resolution and select 1920 x 1080.
4. Click OK.

If you do not see 1920 x 1080 as an option, you may need to update your graphics driver. Please choose the scenario below that best describes the computer system you are using, and follow the provided steps:

1: If you have a Dell desktop or a Dell portable computer with Internet access
2: If you have a non Dell desktop, portable computer, or graphics card
If you have a Dell desktop or a Dell portable computer with Internet access

1. Go to http://www.dell.com/support, enter your service tag, and download the latest driver for your graphics
2. After installing the drivers for your graphics adapter, attempt to set the resolution to 1920 x 1080 again.

   📘 NOTE: If you are unable to set the resolution to 1920 x 1080, please contact Dell to inquire about a graphics adapter that supports these resolutions.

If you have a non Dell desktop, portable computer, or graphics card

In Windows Vista®, Windows® 7, Windows® 8:

1. For Windows® 8 only, select the Desktop tile to switch to classic desktop.
2. Right-click on the desktop and click Personalization.
3. Click Change Display Settings.
4. Click Advanced Settings.
5. Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).
7. After installing the drivers for your graphics adapter, attempt to set the resolution to 1920 x 1080 again.

   📘 NOTE: If you are unable to set the resolution to 1920 x 1080, please contact the manufacturer of your computer or consider purchasing a graphics adapter that will support the video resolution of 1920 x 1080.
Procedures for setting up dual monitors in Windows Vista®, Windows® 7 or Windows® 8

For Windows Vista®

Connect the external monitor(s) to your laptop or desktop using a video cable (VGA, DVI, DP, HDMI etc.) and follow any of the below setup method.

Method 1: Using keyboard shortcut “Win+P”

1. Press the Windows logo key + P on your keyboard. 
2. While holding down the Windows logo key, press P to toggle between the display selections.

Method 2: Using the “Personalize” menu

1. Right-click on the desktop and click Personalize.
2. Click **Display Settings**.

3. Click **Identify Monitors**.
   - You may need to restart your system and repeat steps 1 to 3 if the system does not detect the added monitor.
For Windows® 7

Connect the external monitor(s) to your laptop or desktop using a video cable (VGA, DVI, DP, HDMI etc.) and follow any of the below setup method.

**Method 1: Using keyboard shortcut “Win+P”**

1. Press the **Windows logo key** + P on your keyboard.
2. While holding down the **Windows logo key**, press P to toggle between the display selections.

![Method 1 Diagram]

**Method 2: Using the “Screen Resolution” menu**

1. Right-click on the desktop and click **Screen resolution**.

![Method 2 Diagram]
2. Click **Multiple displays** to choose a display selection. If you do not see the additional monitor listed, click **Detect**.
- You may need to restart your system and repeat steps 1 to 3 if the system does not detect the added monitor.
**For Windows® 8**

Connect the external monitor(s) to your laptop or desktop using a video cable (VGA, DVI, DP, HDMI etc.) and follow any of the below setup method.

**Method 1: Using keyboard shortcut “Win+P”**

1. Press the **Windows logo key + P** on your keyboard.
2. While holding down the **Windows logo key**, press **P** to toggle between the display selections.

**Method 2: Using the “Screen Resolution” menu**

1. From the Start screen, select **Desktop** tile to switch to the Classic Windows desktop.
2. Right-click on the desktop and click **Screen resolution**.

3. Click **Multiple displays** to choose a display selection. If you do not see the additional monitor listed, click Detect.
   - You may need to restart your system and repeat steps 1 to 3 if the system does not detect the added monitor.
Setting Display Styles For Multiple Monitor

After the external monitor(s) have been set up, users can select the desired display style from Multiple displays menu: Duplicate, Extend, Show Desktop On.

- **Duplicate these displays**: Duplicate the same screen on two monitors with the same resolution, chosen based on the monitor with a lower resolution.

**For Windows Vista®**

[DUPLICATE NOT AVAILABLE]

**For Windows® 7**

Change the appearance of your displays

![Display settings interface]

- **Display**: 1. Mobile PC Display
- **Resolution**: 1024 x 768
- **Orientation**: Landscape
- **Multiple displays**: Extend these displays
  - Duplicate these displays
  - Show desktop only on 1
  - Show desktop only on 2

Additional settings:
- **Connect to a projector**
- **Make text and other items larger or smaller**
- **What display settings should I choose?**

[Controls: OK, Cancel, Apply]
For Windows® 8
• **Extend these displays:** This option is recommended when an external monitor is connected to a laptop, and each monitor can display different screen independently to improve user convenience. The relative position of the screens can be set up here, for example monitor 1 may be set up to be to the left of monitor 2 or vice versa. This depends on the physical position of the LCD monitor in relation to the laptop. The horizontal line displayed on both monitors can be based on the laptop or external monitor. These are all adjustable options, and all a user need do is drag the monitor of the main screen to the extended monitor.

**For Windows Vista®**

![Display Settings](image)

- Drag the icons to match your monitors.
- **This is my main monitor**
- **Extend the desktop onto this monitor**
- Resolution: Low — High
  - 1024 by 768 pixels
- Colors: Highest (32 bit)

For Windows® 8

Change the appearance of your displays

Display: 2. DELL U2312HM
Resolution: 1366 × 768
Orientation: Landscape

Multiple displays:
- Extend these displays

You must select Apply before making additional changes.

Project to a second screen (or press the Windows logo key + P)
Make text and other items larger or smaller
What display settings should I choose?

OK Cancel Apply
• **Show desktop only on...**: Display the status of a particular monitor. This option is typically chosen when the laptop is used as a PC so the user can enjoy a large external monitor. Most current laptops support mainstream resolutions. As shown in the figure above, the resolution of the laptop monitor is only 1280 x 800, but after connecting a 27” external LCD monitor, users can immediately improve their visual enjoyment to 1920 x 1080 Full HD quality.
