Product Description

Logitech Zone Wireless leverages decades of Logitech audio expertise to deliver superior sound quality in a contemporary headset that's comfortable enough to wear all day long. With a simple interface and downloadable companion app, Logi Tune, you can easily manage your phone or video calls, listen to music or block out ambient noise using the active noise cancellation feature. Zone Wireless connects to your phone and computer through Bluetooth® or Unifying Receiver and works seamlessly with leading business software solutions. Zone Wireless is also the first UC certified headset to offer Qi wireless charging capabilities.

Key Features

- Designed for Open Office Environments: With the push of a button, Zone Wireless activates the noise cancellation feature, which removes most background noise for concentration and clear conversations. While in use on a phone or video call, the sleek and retractable microphone uses a software algorithm to remove background noise.
- Superior Sound Quality: Zone Wireless features an optimized driver for bass performance and acoustic isolation, all of which can be equalized and adjusted through the companion app.
- Contemporary Industrial Design: The sleek, foldable design, leatherette ear pad materials and headband silicone padding make Zone Wireless comfortable to wear for extended periods of time.
- Easy-To-Use, Simple Interface: Zone Wireless has an intuitive interface which includes five buttons - volume up, volume down, mute, activate noise cancellation and one button on the side that acts as play/pause and answer call/decline - minimizing the room for error.
- Designed for the Mobile Worker: Zone Wireless connects to your phone and computer simultaneously through *Bluetooth*, and has a downloadable companion app that provides more controls for your headset like EQ settings for music, sidetone adjustment and call management.
- Wireless Charging: Just place Zone Wireless on a Qi wireless charger for quick and seamless charging - no cords needed.

Product Specifications
