Chapter 2: Installing Your Phone

Before You Begin
Installing Your Cisco SPA 301 IP Phone
Connecting the Handset
Connecting the Power
Connecting Your Cisco SPA 301 to the Network
(Optional) Connecting Your Cisco SPA 301 to the Wireless Network
Installing Your Cisco SPA 303 IP Phone
Connecting the Handset
Connecting the Power
Connecting Your Cisco SPA 303 to the Network
(Optional) Connecting Your Cisco SPA 303 to the Wireless Network
(Optional) Installing the Cisco SPA 303 Stand
(Optional) Connecting a PC to Your Cisco SPA 303
(Optional) Connecting Wired and Wireless Headsets
(Optional) Mounting Your Cisco SPA 30X Phone to the Wall
Reversing the Handset Retention Tab
Verifying Phone Startup
Upgrading Your Phone’s Firmware
Determining Your Current Firmware Version
Download the Firmware
Chapter 3: Using Basic Phone Functions

Using Phone Hardware and Accessories (Cisco SPA 303)
- Using the Speakerphone
- Using the Headset with Your IP Phone
- Switching Between the Handset/Headset/Speakerphone During a Call
- Sending Audio to the Phone Speaker
- Choosing Your Preferred Audio Device

Adjusting Call Volume and Muting
- Adjusting Call Volume
- Adjusting the Ringer Volume
- Using Mute (Cisco SPA 303)

Placing or Answering a Call
- Using Dial Assistance (Cisco SPA 303)

Using Hold and Resume
- Switching Between Multiple Calls on Hold on a Single Line (Cisco SPA 303)

Ending a Call

Transferring Calls (Cisco SPA 303)
- Performing an Attended Transfer
- Performing an Unattended (Blind) Transfer
- Transferring a Held Call to an Active Call

Redialing a Number

Viewing and Returning Missed Calls (Cisco SPA 303)
- Turning the Missed Calls Shortcut On and Off

Forwarding Calls
- Forwarding All Calls
- Forwarding Calls When Your Phone is Busy
- Forwarding Calls When You Don’t Answer the Phone
- Delaying Call Forwarding When You Don’t Answer the Phone (Cisco SPA 303)
46
Stopping Call Forwarding 46
Setting Do Not Disturb 47
   Activating Do Not Disturb 47
   Deactivating Do Not Disturb 48
Turning Call Waiting On and Off 48
Picking Up a Call from Another Extension (Cisco SPA 303) 49
Parking a Call (Cisco SPA 303) 50
Placing a Three-Way Conference Call 51
   Conferencing a Held Call with an Active Call (Cisco SPA 303) 52
Using the Phone Directories (Cisco SPA 303) 52
   Using Your Personal Directory 52
   Using the Corporate Directory 53
Using the Call History Lists 54
   Viewing the Call History Lists 54
   Calling from the Call History Lists 55
   Deleting a Number from the Call History Lists 55
   Saving a Call History List Number to Your Directory 55
Setting or Changing a Phone Password 55
Accessing Voicemail 56

Chapter 4: Using Advanced Phone Features 57
Configuring Privacy and Security Features 58
   Blocking Caller ID 58
   Blocking Anonymous Calls 58
   Using Secure Call 59
Enabling Dial Assistance (Cisco SPA 303) 60
Adding and Using Speed Dials 60
   Creating Speed Dials on Unused Line Buttons (Cisco SPA 303) 61
   Creating Numerical Speed Dials 61
   Using Speed Dials 62
Using the Paging Feature 62
  Paging Another Phone 62
  Paging a Group of Phones 63
  Configuring Auto Answer (Cisco SPA 303) 63
Monitoring/Accessing Another Phone from Your Phone (Cisco SPA 303) 63
Customizing Your LCD Screen (Cisco SPA 303) 64
  Changing the LCD Screen Contrast 64
  Configuring the Phone Screen Saver 64
  Turning on the Screen Saver 66
Using Ring Tones (Cisco SPA 303) 66
  Changing Your Ring Tone 66
Configuring Date and Time Parameters on Your Phone (Cisco SPA 303) 66
  Setting Your Phone’s Date and Time 66
Using Star Codes 67
Using the Interactive Voice Response Menu on the Cisco SPA 301 69
Advanced Procedures for Technical Support Personnel (Cisco SPA 303) 70
  Rebooting Your Phone 71

Chapter 5: Using the Web Interface 73
  Logging in to the Web Interface 74
  Setting Do Not Disturb 75
  Configuring Call Forwarding 75
  Configuring Call Waiting 76
  Blocking Caller ID 76
  Blocking Anonymous Calls 77
  Using Your Personal Directory (Cisco SPA 303) 77
  Viewing Call History Lists 78
  Creating Speed Dials 78
  Accepting Text Messages (Cisco SPA 303) 78
  Adjusting Audio Volume 79
Appendix A: Where to Go From Here
Getting Started

This chapter provides an overview of this document and basic information about your Cisco Small Business IP phone. It contains the following sections:

- About This Document, page 6
- Overview of the Cisco Small Business 300 Series IP Phones, page 8
- Getting to Know the Cisco SPA 301, page 9
- Getting to Know the Cisco SPA 303, page 11

About This Document

This guide describes the concepts and tasks necessary to use and configure your Cisco Small Business IP Phone.

NOTE The Cisco Small Business IP Phone features vary, depending on the type of call control system that you are using. This document describes using the Cisco Small Business IP Phones with a SIP phone system, such as the Cisco SPA 9000 Voice System or a BroadSoft or Asterisk system. If you are using your Cisco Small Business IP Phone with a Cisco Unified Communications 500 Series, see the Cisco Unified Communications Manager Express for Cisco Small Business IP Phone SPA 30X (SPCP) User Guide.

Overview of the Cisco Small Business 300 Series IP Phones

The Cisco Small Business 300 Series IP Phones are full-featured VoIP (Voice over Internet Protocol) phones that provide voice communication over an IP network. The phones provide traditional features, such as call forwarding, redialing, speed dialing, transferring calls, conference calling and accessing voice mail. Calls can be made or received with a handset, headset or over a speaker.

IP phones also have special features not available in traditional phones. The Cisco Small Business 300 Series IP phones contain Ethernet ports, or ports that allow them to be linked to the computer network. They also have additional Ethernet ports that allow a computer to be connected to the network through the IP phone. Unlike traditional phones, Cisco Small Business IP phones require a separate power source. Power the phones by connecting them to the included power adapter.

The following table shows the Cisco Small Business 300 Series IP Phones covered in this document and their respective features:

<table>
<thead>
<tr>

Caring for Your Phone

The Cisco Small Business IP phones are electronic devices that should not be exposed to excessive heat, sun, cold or water. To clean the equipment, use a slightly moistened paper or cloth towel. Do not spray or pour cleaning solution directly onto the hardware unit.

### Message Waiting/Status Indicator

The LED color and action indicates the phone or message status:

- **Red (solid)**—You have a new voice mail message.
- **Red (fast blinking)**—You have an incoming call.
- **Red (slow blinking)**—You have a call on hold.
- **Red (series of two fast blinks)**—Your phone has temporarily lost its Ethernet connection.
- **Orange (solid)**—Your phone is not registered to the call control system. This occurs when the phone is rebooting and has not yet registered.
- **Orange (fast blinking)**—Your phone’s firmware is upgrading.
- **Orange (slow blinking)**—Your phone is downloading firmware.
- **Orange (series of two fast blinks)**—Your phone has permanently lost its Ethernet connection. When the phone is reconnected, it will reboot.
- **Green (slow blinking)**—Call forwarding or Do Not Disturb is turned on. (You will also hear an interrupted dial tone.)

</table>
Softkey Buttons

The softkey buttons on your phone display may vary depending on your phone model and the phone system setup. (Softkey buttons are not available on the Cisco SPA 301.) Press the Right Arrow or Left Arrow keys on the navigation button to view additional softkey buttons.

Below is a partial listing of softkey buttons that may be available on your phone. You may not have all of these softkey buttons on your phone, and you may have additional buttons that are not listed here. For example, your phone administrator may also provide custom softkey buttons on your phone, such as buttons that provide a speed dial to a company number, or that access a specialized program that runs on your phone. Contact your phone administrator for more information.

</table>
Screen Icons

The LCD screen displays various icons that tell you the status of your phone, or calls on the phone. The following screens show some of the icons used:

In the figure above, the double arrow on the right of the screen indicates that a call is in progress. The offhook phone icon next to “SPA 303” indicates the handset is in use.

In the figure above, the speaker icon next to “SPA 303” indicates the speaker is in use.

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>y/n</td>
<td>Enters a submenu and when pressed, toggles between Yes or No to enable or disable an option.</td>
</tr>
</tbody>
</table>
In the figure above, the headset icon next to “SPA 303” indicates that the headset is being used.

In the figure above, the right arrow on the right of the screen indicates that a call is on hold.

**Using Keypad Shortcuts**

When using the phone menus, you can use the keypad to enter the number shown next to the menu or sub-menu item on the LCD screen. (Not applicable to the Cisco SPA 301.)
For example, to obtain your IP address on the Cisco SPA 303, press the **Setup** button and dial **9**.

![Setup menu](image)

The IP address is displayed on the Network screen.

![Network menu](image)

**NOTE**  Menus and options may vary.
Installing Your Phone

This chapter describes how to install your Cisco Small Business IP Phone and connect it to your network. It contains the following sections:

- Before You Begin, page 18
- Installing Your Cisco SPA 301 IP Phone, page 19
- Installing Your Cisco SPA 303 IP Phone, page 21
- (Optional) Mounting Your Cisco SPA 30X Phone to the Wall, page 24
- Verifying Phone Startup, page 31
- Upgrading Your Phone’s Firmware, page 32

Before You Begin

Before you install and connect your phone, verify with your phone administrator (if applicable) that the network is ready for the phone, read the safety notices, and make sure you have all the phone parts and documentation available.
Installing Your Cisco SPA 301 IP Phone

Connecting the Handset

**STEP 1** Turn the phone body over to expose the ports on the back of the unit.

**STEP 2** Insert the long end of the phone cord into the handset port on the phone body that is marked with a phone symbol. (labeled 2 in Figure 1).

**STEP 3** Insert the other end of the phone cord into the port at the bottom of the handset (not shown).

Connecting the Power

Insert one end of the power cord into an outlet and insert the other end of the power cord into the power port on the phone body (labeled 1 in Figure 1).

**NOTE** To power the phone through the Ethernet connection, use the optional Cisco POES5 5-Volt Power Over Ethernet Splitter accessory. See the Cisco POES5 documentation on Cisco.com for more information.

Figure 1  Cisco SPA 301 Phone Power and Handset Connections
Connecting Your Cisco SPA 301 to the Network

If you are using an Ethernet connection:

**STEP 1** Insert one end of the Ethernet cable into the network port on the phone body marked “WAN” (labeled 3 in Figure 2).

**STEP 2** Insert the other end of the Ethernet cable into the appropriate device, such as a network switch, on your network.

(Optional) Connecting Your Cisco SPA 301 to the Wireless Network

You can use the Cisco WBP54G Wireless-G Bridge for Phone Adapters to connect the IP phone to a Wireless-G network instead of the wired local network. To connect your phone to the Cisco WBP54G:

**STEP 1** Configure the Cisco WBP54G using the Setup Wizard. See the instructions in the Wireless-G Bridge for Phone Adapters Quick Installation Guide, available on cisco.com. See Appendix A, “Where to Go From Here,” for a list of documents and locations.

**STEP 2** During the Setup Wizard process, connect the Ethernet network cable of the WBP54G to the back of the IP phone base station into the slot marked “WAN.”

**STEP 3** Connect the power cable of the WBP54G to the power port on the IP phone base.

**STEP 4** Plug the IP phone power adapter into the power port of the WBP54G.
STEP 5 Plug the other end of the IP phone power adapter into an electrical outlet.

Installing Your Cisco SPA 303 IP Phone

Connecting the Handset

STEP 1 Turn the phone body over to expose the ports on the back of the unit.

STEP 2 Insert the long end of the phone cord into the handset port on the phone body that is marked with a phone symbol. (labeled 5 in Figure 3).

STEP 3 (Optional) Route the phone cord through the cable slot (labeled 4 in Figure 3).

STEP 4 Insert the other end of the phone cord into the port at the bottom of the handset (not shown).
Installing Your Phone
Installing Your Cisco SPA 303 IP Phone

Connecting the Power

Insert one end of the power cord into an outlet and insert the other end of the power cord into the power port on the phone body (labeled 6 in Figure 3).

**NOTE** To power the phone through the Ethernet connection, use the optional Cisco POES5 5-Volt Power Over Ethernet Splitter accessory. See the Cisco POES5 documentation on Cisco.com for more information.

Connecting Your Cisco SPA 303 to the Network

**STEP 1** Insert one end of the Ethernet cable into the network port on the phone body marked “SW” (labeled 3 in Figure 3).

**STEP 2** Insert the other end of the Ethernet cable into the appropriate device, such as a network switch, on your network.

(Optional) Connecting Your Cisco SPA 303 to the Wireless Network

You can use the Cisco WBP54G Wireless-G Bridge for Phone Adapters to connect the IP phone to a Wireless-G network instead of the wired local network.

**NOTE** Cisco does not recommend connecting a PC to the phone when it is operating wirelessly.

To connect your phone to the Cisco WBP54G:

**STEP 1** Configure the Cisco WBP54G using the Setup Wizard. See the instructions in the Wireless-G Bridge for Phone Adapters Quick Installation Guide, available on cisco.com. See Appendix A, “Where to Go From Here,” for a list of documents and locations.

**STEP 2** During the Setup Wizard process, connect the Ethernet network cable of the WBP54G to the back of the IP phone base station into the slot marked “SW.”

**STEP 3** Connect the power cable of the WBP54G to the power port on the IP phone base.

**STEP 4** Plug the IP phone power adapter into the power port of the WBP54G.

**STEP 5** Plug the other end of the IP phone power adapter into an electrical outlet.
(Optional) Installing the Cisco SPA 303 Stand

**NOTE** Do not attach the desk stand if you want to mount the phone to the wall.

**STEP 1** Connect the phone stand by lining up the tabs on the stand with the slots on the phone body.

**STEP 2** Slide the bottom tabs into the lower slots on the phone body (labeled 1 in Figure 3) and lightly press down on the stand. It should easily slide into the upper stand slots. Do not force.

---

(Optional) Connecting a PC to Your Cisco SPA 303

To connect a PC to your phone (optional):

**NOTE** Cisco does not recommend connecting a PC to the phone when it is operating wirelessly.

**STEP 1** To provide network access to a PC, connect one end of an additional Ethernet cable (not provided) to the PC port on the back of the phone body (labeled 2 in Figure 3.)

**STEP 2** Connect the other end of the Ethernet cable to the network port on your PC.

---

(Optional) Connecting Wired and Wireless Headsets

The Cisco SPA 303 supports headsets from different manufacturers. For the latest supported models, contact your reseller. Additional information can be found at the manufacturer’s websites:

http://www.plantronics.com

http://www.jabra.com

Each brand and type of headset may require different steps for connection. Consult the documentation for your particular headset for more information.
In general, to connect a headset, connect the 2.5mm connector from the headset into the headset port on the right side of the IP phone as shown in the following graphic:

(Optional) Mounting Your Cisco SPA 30X Phone to the Wall

To mount the phone to the wall, you must purchase the MB100 wall mount bracket kit.
Installing Your Phone
(Optional) Mounting Your Cisco SPA 30X Phone to the Wall

Figure 4 MB100 Wall Mount Kit
STEP 1 To attach the Mounting Bracket (MB), align the two cleats on the MB with the holes in the phone's base.

STEP 2 Orient the MB such that the phone's Ethernet and handset ports are accessible after installation.

STEP 3 Push the MB onto the phone's base. Slide the MB upwards to lock it in place.
STEP 4  (Optional) If a Wi-Fi or PoE dongle is installed, place in the tray.
Plug in the Ethernet and power cables.
STEP 5 Hang onto screws mounted in the wall.
Reversing the Handset Retention Tab

If you mount the phone to a vertical surface, you must reverse the handset retention tab on the phone body so that the handset does not fall off the phone when it is placed on the cradle.

***Figure 5  Handset Retention Tab (Default Position)***

**STEP 1** Insert a coin or object of similar width into the slot.

**STEP 2** Rotate the tab 180°. (See **Figure 6**.) The tab now catches the slot in the handset when the handset is placed onto the cradle.
Verifying Phone Startup

After receiving power and network connectivity, the phone executes a boot-up sequence. During this sequence, phones with screens display the Cisco logo and then “Initializing Network.” All of the lights on the phone will flash.

After your phone is successfully connected to the network and receives a basic configuration, the extension number appears on the display screen (on models with a display screen) and the phone has a dial tone.

On models with screens, the phone displays the standard menu for the phone. The date, name and number of the phone display on the top line of the LCD screen. At the bottom of the LCD screen, softkeys are displayed over their associated soft buttons.

On models with no screen, such as the Cisco SPA 301, you should hear a dial tone when picking up the handset or pressing the speakerphone button.
If the phone does not start, confirm your installation and connections. If these are correct, try unplugging the phone and plugging it back in again. If you still don’t see the display, then contact your phone administrator or Internet Telephony Service Provider (ITSP).

Upgrading Your Phone’s Firmware

Your phone ships with pre-installed firmware. However, later firmware versions may be available that add features and fix problems with your phone. You may need to upgrade your phone to the latest firmware for ideal performance.

CAUTION

If you are using your phone with an Internet Telephony Service Provider’s system, do not upgrade your phone’s firmware without consulting your service provider. Your provider may automatically upgrade your phones without any action on your part necessary.

To upgrade your phone’s firmware, download the firmware from the Cisco website and install it from your PC. See the following section for instructions.

Determining Your Current Firmware Version

Cisco SPA 303

STEP 1  Press the Setup button.

STEP 2  Scroll to Product Info and press select.

STEP 3  Scroll to Software Version. The firmware version number is displayed

Cisco SPA 501

STEP 1  Press ****.

STEP 2  Enter 150, then press #. The firmware version is recited.
Download the Firmware

Go to www.tools.cisco.com/support/downloads, and enter the model number in the Software Search box. Save the firmware to your desktop.

Get Your Phone’s IP Address

Before you upgrade, you’ll need the IP address of the phone you are upgrading. To get your IP address:

---

**Cisco SPA 303**

**STEP 1** Press the Setup button.
**STEP 2** Scroll to Network and press select.
**STEP 3** Scroll to view Current IP. This is the IP address of your phone.

**SPA 301**

**STEP 1** Press ****.
**STEP 2** Enter 110, then press #. The IP address is recited.

Install the Firmware

**STEP 1** Extract the firmware onto your PC.

**NOTE** If you are in a VPN connection, you may need to disconnect before proceeding so that your PC can communicate directly with your phone for the upgrade.

**STEP 2** Run the executable file for the firmware upgrade (for example, double click upg-spa303-7-4-5.exe).

**STEP 3** Click Continue after reading the message regarding upgrading and your service provider.

**STEP 4** Enter the IP address of your phone and verify the address of your PC.
STEP 5  Click OK. The system displays information about your phone’s current software and hardware.

STEP 6  Click Upgrade to begin the upgrade.

NOTE  Do not disconnect your phone’s power until the upgrade is complete (the lights on your phone are no longer blinking).

STEP 7  Click OK to dismiss the status message of the upgrade.
Using Basic Phone Functions

This chapter provides instructions on using your phone's basic functions. It includes the following sections:

- Using Phone Hardware and Accessories (Cisco SPA 303), page 36
- Adjusting Call Volume and Muting, page 37
- Placing or Answering a Call, page 38
- Using Hold and Resume, page 39
- Ending a Call, page 40
- Transferring Calls (Cisco SPA 303), page 41
- Redialing a Number, page 42
- Viewing and Returning Missed Calls (Cisco SPA 303), page 42
- Forwarding Calls, page 44
- Setting Do Not Disturb, page 47
- Turning Call Waiting On and Off, page 48
- Picking Up a Call from Another Extension (Cisco SPA 303), page 49
- Parking a Call (Cisco SPA 303), page 50
- Placing a Three-Way Conference Call, page 51
- Using the Phone Directories (Cisco SPA 303), page 52
- Using the Call History Lists, page 54
- Setting or Changing a Phone Password, page 55
- Accessing Voicemail, page 56
Using the Speakerphone

To use the speakerphone, press the Speaker button (the handset can be either on or off hook).

Using the Headset with Your IP Phone

Install the headset as described in the “(Optional) Connecting Wired and Wireless Headsets” section on page 23.

NOTE
Steps to use your headset with the IP phone may vary. Consult the user documentation for your headset for more information.

Press the Headset button on your phone and dial the number to place a call, or press the headset button to answer a ringing call.

Switching Between the Handset/Headset/Speakerphone During a Call

Any of these audio devices can be used during a call. Only one device at a time can be used.

The handset can be on the hook when using the speakerphone or headset function. If switching from the handset to the speakerphone, make sure the speakerphone or headset light is illuminated before placing the handset back on the hook. (If you are switching from the handset to a wireless headset, however, do not replace the handset or you will disconnect the call.)

Sending Audio to the Phone Speaker

Choosing this option sends audio to the speaker when the handset is lifted.

**STEP 1**
Press the Setup button.

**STEP 2**
Scroll to Preferences and press the select softkey.

**STEP 3**
Scroll to Send Audio to Speaker and press the edit softkey.

**STEP 4**
Press y/n to enable or disable the feature.
Adjusting Call Volume and Muting

You can also change call volume settings from your PC using the IP Phone Web Interface. See “Adjusting Audio Volume” section on page 79.

Adjusting Call Volume

Cisco SPA 301

With the headset off the phone, press the Vol. button repeatedly to increase the volume. When the volume reaches the maximum, the next button press reduces the volume to the minimum.

Cisco SPA 303

To adjust the volume of the handset or speaker, lift the handset or press the Speaker button. Press + on the Volume button to increase the volume, or press - to decrease the volume. Press save.
Adjusting the Ringer Volume

**Cisco SPA 301**

To adjust the ringer volume, press the Vol. button when the handset is on the phone. When the ringer volume reaches the maximum, the next button press reduces the volume to the minimum.

**Cisco SPA 303**

To adjust the ringer volume, press the Volume button when the handset is on the phone and the speaker button is off. Press save.

Using Mute (Cisco SPA 303)

To mute the phone microphone, speaker, or headset microphone, press the Mute button on the phone. The button glows red. Press the Mute button again to unmute.

If no audio device is on, pressing the Mute key has no effect. When switching from the speaker phone to the handset, mute is turned off automatically.

Placing or Answering a Call

**NOTE** You may have to dial a number or numbers to reach an outside line. Ask your phone administrator.

Basic techniques to answer a call:

- Pick up the handset.
- Press the Speaker button (Cisco SPA 303).
- Press the Headset button (Cisco SPA 303).
- Press a green line button to place a call or a red flashing line button to answer a call (Cisco SPA 303).

**Techniques to place a call without dialing a number (Cisco SPA 303):**

- Press the redial softkey, then the dial softkey to dial the last number.
- If you have configured speed dials, press the assigned speed dial code and then press the dial softkey.
To answer a call that is ringing on another phone in the phone system, press the **pickup** softkey. Then enter the extension number of the ringing phone.

**NOTE** You also can place a call by choosing a number from a directory or from the Call History. See the “Using the Phone Directories (Cisco SPA 303)” section on page 52 and the “Using the Call History Lists” section on page 54.

### Using Dial Assistance (Cisco SPA 303)

If dial assistance is enabled, when placing calls, you’ll see a list of matching recently dialed or received phone numbers on the screen after you begin dialing.

If you want to choose one of these numbers:

1. **STEP 1** Use the navigation button to scroll down and highlight a phone number on the LCD screen.

2. **STEP 2** Press the **dial** softkey to complete the call.

See “Enabling Dial Assistance (Cisco SPA 303),” on page 60 for more information on enabling this feature.

### Using Hold and Resume

To put a call on hold, press the **Flash** button (Cisco SPA 301) or the **Hold** button/ **Hold** softkey (Cisco SPA 303). A series of beeps or music on hold (depending on the system configuration) plays for the caller to indicate that the call is on hold. On the Cisco SPA 303, the phone LCD shows a flashing right arrow indicating the line is on hold, as shown in the figure below.
To resume a call:

Cisco SPA 301—Press the Flash button.

Cisco SPA 303—Press the flashing red line button for the call or the Hold button or the Resume softkey. If you have multiple calls, all calls are put on hold except the active call.

If you are on a call and another call comes in:

Cisco SPA 301—Press the Flash button. To resume the first call, press the Flash button again.

Cisco SPA 303—Do one of the following:

- Press the Answer or Ignore softkey.
- Press the Hold button/Hold softkey to place the call on hold and press the flashing red line button to answer the incoming call.

To resume the first call, press the flashing red line button or the Hold button or the Resume softkey.

**Switching Between Multiple Calls on Hold on a Single Line (Cisco SPA 303)**

You can have up to two calls on each phone line. If one or more calls on a line is on hold, the black bar at the top of the screen shows the call that is on hold (indicated by the right arrow). The call information at the bottom of the screen shows the active call.

To switch between two calls on a single line, press the flashing line button. If multiple calls are on hold on multiple lines, use the navigation button to scroll up or down and press the flashing line button for the call you have selected.

**Ending a Call**

To end a call:

- If you are using the handset, hang up.
- If you are using the speakerphone, press the Speaker button (Cisco SPA 303).
- If you are using the headset, either press the Headset button (wired) or replace the receiver (when using certain wireless models) - Cisco SPA 303.
Transferring Calls (Cisco SPA 303)

You can perform the following types of transfers:

- Attended Transfer—You call the person to whom you are transferring the call and either:
  - transfer the call while the phone is ringing.
  - wait for the person to answer before transferring the call.
- Blind Transfer—You transfer the call without speaking to the other party to which you are transferring the call.

Performing an Attended Transfer

**STEP 1** During an active call, press xfer. The call is placed on hold and a new line is opened to dial the number.

**STEP 2** Either:

- Enter the number to which you want to transfer the call, then press the dial softkey or wait a few seconds.
- Press the dir softkey and either choose a number from the personal directory or select the Corporate Directory, then press the dial softkey.

  If you hang up before the second call rings, the transfer fails and the first call is disconnected. If you misdial, use the delChar, clear, or cancel softkey to make your changes before the call is transferred.

**STEP 3** Press the xfer softkey after the phone begins to ring, or at any time after the phone is answered.

Performing an Unattended (Blind) Transfer

**STEP 1** During an active call, press the bXfer softkey.

**STEP 2** Enter the number to which you want to transfer the call and press the dial softkey. The call is transferred with no further action required on your part.
Transferring a Held Call to an Active Call

If you have a call on hold and an active call, you can transfer one of these calls to the other call, connecting the two callers. (This differs from a conference call because you no longer remain part of the call after the transfer.)

With an active call and one or more calls on hold, press the xferLx softkey.

- If you have only one call on hold, the call is transferred to the active party and you are disconnected.
- If you have more than one call on hold, choose the held call you want to transfer by pressing the line button of the call on hold.

Redialing a Number

Cisco SPA 303

To redial the last number called, press the redial softkey twice.

To redial another number:

STEP 1  Press the redial softkey and select the desired number.

STEP 2  (Optional) Press the edit softkey to select a number and modify it (for example, to add an area code). When you’re done, press the ok softkey.

STEP 3  Lift the handset or press the dial softkey to automatically dial the selected number.

Cisco SPA 301

To redial the last number, press the Redial button.

Viewing and Returning Missed Calls (Cisco SPA 303)

The LCD screen on your IP phone notifies you if a call came in that was unanswered.
To return a missed call:

- If the LCD screen shows a missed call, press the lcr softkey to return the last missed call. Press the miss softkey to view a list of missed calls, select a call, and press dial.

- If the LCD screen does not show the lcr or miss softkeys, you can return a call from the Missed Call list:
  a. Press the Setup button.
  b. Scroll to Call History and press the select softkey.
  c. Scroll to Missed Calls and press the select softkey.
  d. Choose the call you want to return and press the dial softkey.

**NOTE**

If the call was from a long distance number, you may have to edit the call before returning it. Press the edit softkey to edit the call and use the softkey buttons and keypad to edit the number.

To view a list of all missed calls:

- If the LCD screen shows a missed call, press the miss softkey to view a list of missed calls.

- If the LCD screen does not show the lcr or miss softkeys:
  a. Press the Setup button.
  b. Scroll to Call History and press the select softkey.
  c. Scroll to Missed Calls and press the select softkey.

**Turning the Missed Calls Shortcut On and Off**

This option removes the lcr and miss softkeys that appear on the IP phone screen when you miss a call.

To access this option:

**STEP 1** Press the Setup button.

**STEP 2** Scroll to Preferences and press the select softkey.

**STEP 3** Scroll to Miss Call Shortcut and press the edit softkey.

**STEP 4** Press the y/n softkey to enable or disable the feature.
**Using Basic Phone Functions**

**Forwarding Calls**

You can forward all calls, forward calls when the phone is busy or forward calls when there is no answer.

You can also set call forwarding options from your PC using the IP Phone Web Interface; see the “Configuring Call Forwarding” section on page 75.

**NOTE**
For the Cisco SPA 301, you can only use the IP Phone Web Interface or star codes to set call forwarding. See the instructions below for the appropriate star codes.

### Forwarding All Calls

**Using the cfwd softkey (Cisco SPA 303):**

**STEP 1**
Press the cfwd softkey.

**STEP 2**
Enter a number to which to forward all calls; for example, your voice mailbox, another extension, or an outside line. If forwarding calls to an outside line, be sure to use any access and area codes required.

**STEP 3**
Press the dial softkey. The LCD screen displays Calls Forwarded.

**Using the star code:**
Press *72 and enter the number to which to forward all calls.

**Using the Setup button:**

**STEP 1**
Press the Setup button.

**STEP 2**
Scroll to Call Forward and press the select softkey.

**STEP 3**
Scroll to CFWD All Number and press the edit softkey.
**Using Basic Phone Functions**

**Forwarding Calls**

**STEP 4** Enter a number to which to forward all calls; for example, your voice mailbox, another extension, or an outside line. If forwarding calls to an outside line, be sure to use any access and area codes required.

**STEP 5** Press the **ok** softkey.

**STEP 6** Press the **save** softkey.

---

**Forwarding Calls When Your Phone is Busy**

**Using the star code:**

Press *90 and enter the number to which to forward calls.

**Using the Setup button (Cisco SPA 303):**

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Call Forward** and press the **select** softkey.

**STEP 3** Scroll to **CFWD Busy Number** and press the **edit** softkey.

**STEP 4** Enter a number to which to forward all calls (for example, another extension, or an outside line.) If forwarding calls to an outside line, be sure to use any access and area codes required.

To enter "vm" (will connect to voice mail if this feature has been set up by your phone administrator), press the **Right** navigation button, press the **alpha** softkey, and enter letters using the keypad. Press the **Left** navigation button.

**STEP 5** Press the **ok** softkey.

**STEP 6** Press the **save** softkey.

---

**Forwarding Calls When You Don’t Answer the Phone**

**Using the star code:**

Press *92 and enter the number to which to forward calls.
Using the Setup button (Cisco SPA 303):

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Call Forward** and press the **select** softkey.

**STEP 3** Scroll to **CFWD No Ans Number** and press the **edit** softkey.

**STEP 4** Enter “vm” for voice mail, or a number to which to forward all calls; for example, another extension, or an outside line. If forwarding calls to an outside line, be sure to use any access and area codes required.

**STEP 5** Press the **ok** softkey.

**STEP 6** Press the **save** softkey.

Delaying Call Forwarding When You Don’t Answer the Phone (Cisco SPA 303)

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Call Forward** and press the **select** softkey.

**STEP 3** Scroll to **CFWD No Ans Delay** and press the **edit** softkey.

**STEP 4** Enter the number of seconds to delay forwarding calls, if there is no answer at your phone.

**STEP 5** Press the **ok** softkey.

**STEP 6** Press the **save** softkey.

Stopping Call Forwarding

To stop forwarding calls, press the **-cfwd** softkey.

You can also stop call forwarding by doing the following:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Call Forward** and press the **edit** softkey.
Using Basic Phone Functions

Setting Do Not Disturb

**STEP 3** Press the **clear** softkey, then press the **ok** softkey.

**STEP 4** Press the **save** softkey.

Using star codes:

- Enter *73 to deactivate call forwarding.
- Enter *91 to deactivate call forward busy.
- Enter *93 to deactivate call forward no answer.

---

**Setting Do Not Disturb**

Use the Do Not Disturb feature to prevent incoming calls from ringing your phone. If you have voice mail configured, incoming callers immediately reach voice mail. If voice mail is not configured, callers hear a busy signal or message.

You can also set Do Not Disturb from your PC using the IP Phone Web Interface; see the “Setting Do Not Disturb” section on page 75.

**NOTE** For the Cisco SPA 301, you can only set Do Not Disturb in the IP Phone Web Interface or by using the star code.

**Activating Do Not Disturb**

**Using the dnd softkey:**

To activate Do Not Disturb, press the **dnd** softkey. The LCD screen indicates that Do Not Disturb is turned on for your phone.

**Using the Setup button:**

You can also access Do Not Disturb by performing the following steps:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Preferences** and press the **select** softkey.

**STEP 3** Scroll to **Do Not Disturb** and press the **edit** softkey.

**STEP 4** Press the **y/n** softkey to choose **y**, then press the **ok** softkey.
Using Basic Phone Functions

Turning Call Waiting On and Off

Using the star code:
Enter *78 to activate Do Not Disturb.

Deactivating Do Not Disturb

Using the -dnd softkey:
To deactivate Do Not Disturb, press the -dnd softkey.

Using the Setup button:
You can also deactivate Do Not Disturb by doing the following:

STEP 1 Press the Setup button.
STEP 2 Scroll to Preferences and press the select softkey.
STEP 3 Scroll to Do Not Disturb and press the edit softkey.
STEP 4 Press the y/n softkey to change to yes.
STEP 5 Press the ok softkey.
STEP 6 Press the save softkey.

Using the star code:
Enter *79 to deactivate Do Not Disturb.

Turning Call Waiting On and Off

Call waiting alerts you when you are on a call by ringing your phone and displaying a status message that another call is ringing. If you turn call waiting off, incoming calls do not ring your phone if you are on another call, and the caller hears a busy signal or message.

You can also turn call waiting on and off from your PC using the IP Phone Web Interface. See the “Configuring Call Waiting” section on page 76.
NOTE  For the Cisco SPA 301, you can only configure Call Waiting in the IP Phone Web Interface or by using the star code.

**Using the Setup button:**

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Preferences** and press the **select** softkey.

**STEP 3** Scroll to **Call Waiting** and press the **edit** softkey.

**STEP 4** Press the **y/n** softkey to turn call waiting on or off.

**STEP 5** Press the **ok** softkey.

**STEP 6** Press the **save** softkey.

**Using the star code:**

- Enter *56 to activate call waiting.
- Enter *71 before dialing a number to activate call waiting for that call.
- Enter *57 to deactivate call waiting.
- Enter *72 before dialing a number to deactivate call waiting for that call.

**Picking Up a Call from Another Extension (Cisco SPA 303)**

You can pick up a call that is ringing at another extension. Depending on the way your phone network is configured, you can pick up a call in the following ways:

- Pick up a call that is ringing at an extension in your group using the **grPick** softkey.
- Pick up a call that is ringing at specific extension using the **pickup** softkey.
- Pick up a call ringing at an extension that is configured on one of the line buttons on your phone. Requires configuration by your phone administrator.

To pick up a call ringing at an extension in your group:
STEP 1 Press the grPick softkey. The phone displays any stations in the group that have ringing calls. Press the dial softkey to see a list of calls.

STEP 2 Choose the call you want to pick up and press the dial softkey.

To pick up a call ringing at a specific extension:

STEP 1 Press the pickup softkey.

STEP 2 Enter the extension number of the phone from which you are picking up the call and press dial.

STEP 3 Press dial again.

To pick up a call ringing at an extension that is configured on one of the line buttons on your phone, press the flashing line button.

Parking a Call (Cisco SPA 303)

You can “park” a call on a designated line so that another person in your company can pick up the call. The call is active until it is “unparked” or the caller hangs up.

To park a call:

STEP 1 While on an active call, press the park softkey.

STEP 2 Enter a number to identify the park line and press dial. The “park line number” does not correspond with an actual phone extension number, and you can pick any easily-remembered number (for example, 100). The call is then parked on that line, and the caller hears “on hold” music or messages.

STEP 3 You or another person must then “unpark” the call.

To unpark a call, you can either use the unpark softkey (if you know the park line number), or view a list of parked calls and unpark it from the list.
To unpark if you know the park line number:

**STEP 1** Press the **unpark** softkey.

**STEP 2** Enter the number of the park line (for example, the number that was entered in Step 2 of “parking a call.”)

**STEP 3** Press **dial**. The call is picked up on your phone.

To view a list of parked calls (and unpark from the list):

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Call Park Status** and press the **select** softkey.

**STEP 3** Choose the parked call you want to retrieve and press **unpark**.

---

### Placing a Three-Way Conference Call

**Cisco SPA 301**

To initiate a conference call:

**STEP 1** During an active call, press the **Flash** button. The first call is placed on hold, a second line is opened, and you hear a dial tone.

**STEP 2** Dial the second person’s telephone number.

**STEP 3** Press the **Flash** button again. All three parties are connected in the conference call.

**NOTE** When you hang up, the other two parties are disconnected.

**Cisco SPA 303**

To initiate a conference call:

**STEP 1** Press the **conf** softkey during an active call. The first call is placed on hold, a second line is opened, and you hear a dial tone.

**STEP 2** Dial the second person’s telephone number.
STEP 3 Press the **conf** softkey again. All three parties are connected in the conference call.

When you hang up, the other two parties are disconnected.

---

**Conferencing a Held Call with an Active Call (Cisco SPA 303)**

If you have a call on hold and an active call, you can create a conference call between the active call, the call on hold, and you.

With an active call and one or more calls on hold, press the **conf** softkey.

- If you have only one call on hold, the conference call is created between the three of you.
- If you have more than one call on hold, choose the held call you want to conference in by pressing the line button of the call on hold.

---

**Using the Phone Directories (Cisco SPA 303)**

Your IP phones provide several different types of phone directories, depending on the phone model and what the system administrator has set up for the company.

In general, the phones provide the following types of directories:

- **Personal Directory**—The personal directory provides a place for you to store and view frequently dialed numbers. You can also dial numbers from the directory.
- **Corporate Directory**—The corporate directory lists the phones and extension numbers in your company. Depending on your phone network configuration, you may have the following directories available:
  - Corporate Directory
  - Directory using Lightweight Directory Access Protocol (LDAP)

**Using Your Personal Directory**

To access the Phone Directory, press the **dir** softkey, or press the **Setup** button and select **Directory**.
You can also view and edit the directory from your PC using the IP Phone Web Interface. See the “Using Your Personal Directory (Cisco SPA 303)” section on page 77.

To add a new entry to the directory:

**STEP 1** In the Directory screen, when New Entry is selected, press the **add** softkey.

**STEP 2** Use the keypad to enter the name of the directory entry. Press the number key multiple times to move to a different letter under that number. (For example, to enter “Mary,” you would press 6 and then pause (for M); press 2 and then pause (for A), press 7 three times rapidly (for R), then press 9 three times rapidly (for Y). Use the **delChr** softkey to delete letters, the <<< and >>> softkeys to move one character to the left or the right, or the clear softkey to clear the entire name. When finished with the name, use the navigation button to go down to the Number field.

**STEP 3** Enter the phone number, including any digits you must dial to access an outside line and the appropriate area code, if necessary.

**STEP 4** (Optional) To change the ring type for the caller:
   a. Press the **option** softkey.
   b. Scroll through the available ring types.
   c. Press the **play** softkey to play the selected ring tone or the **select** softkey to assign that ringtone to the person whose number you are adding to the directory.

**STEP 5** Press the **save** softkey to save the entry.

---

**Using the Corporate Directory**

**NOTE** Depending on your Internet Telephony Service Provider or corporate network setup, you may not have a corporate directory available to you.

To use the corporate directory:

**STEP 1** Press the dir softkey, or press the Setup button and select **Directory**.

**STEP 2** Scroll to **Corporate Directory** and press the **select** softkey.

**STEP 3** Choose an entry and press the **dial** softkey. Press **cancel** to exit.
To use the Lightweight Directory Access Protocol (LDAP) directory:

**STEP 1** Press the **dir** softkey, or press the **Setup** button and select **Directory**.

**STEP 2** Scroll to the **LDAP Directory Name** and press the **select** softkey.

**NOTE** The name of the LDAP directory is configured by the phone administrator and can differ.

**STEP 3** Enter information in the fields and press **search**.

**STEP 4** In the results, press the **dial** softkey to dial the contact, or choose one of the other options.

---

**Using the Call History Lists**

You can also view the Call History Lists from your PC using the IP Phone Web Interface. See the “**Viewing Call History Lists**” section on page 78.

**NOTE** You can only view call history lists for the Cisco SPA 301 using the IP Phone Web Interface.

**Viewing the Call History Lists**

To view the Call History lists:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Call History** and press the **select** softkey.

**STEP 3** Scroll to the Call History list you want to view and press the **select** softkey. Available Call History lists are:

- **Redial List**—Shows the last 60 numbers dialed from your phone.
- **Answered Calls**—Shows the caller ID of the last 60 answered calls.
- **Missed Calls**—Shows the last 60 missed calls.
Calling from the Call History Lists

To dial a number from one of the Call History lists:

**STEP 1** Scroll to the call you want to select.

**STEP 2** Press the **dial** softkey.

*NOTE* If the call was from an outside line or long distance number, you may have to edit the call before dialing it. Press the **edit** softkey to edit the call and use the softkey buttons and keypad to edit the number.

Deleting a Number from the Call History Lists

**STEP 1** In the Redial, Answered Calls, or Missed Calls list, scroll to the call you want to select.

**STEP 2** Press the **delete** softkey.

**STEP 3** Press **ok**.

Saving a Call History List Number to Your Directory

**STEP 1** In the Redial, Answered Calls, or Missed Calls list, scroll to the call you want to select.

**STEP 2** Use the navigation button to scroll to the right to access more softkey button options, and press the **save** softkey.

**STEP 3** Edit the information (if desired) and press the **save** softkey again. The entry is added to your directory.

Setting or Changing a Phone Password

You can set or change the password for your phone to prevent unauthorized use. To set a password for your phone:
## Using Basic Phone Functions

### Accessing Voicemail

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Set Password** and press the **select** softkey.

**STEP 3** Enter a numeric password. Enter the same password twice.

**STEP 4** Press the **save** softkey.

---

### Accessing Voicemail

To access voicemail, press the **Messages** button on your phone. Your system administrator should configure your phone with the correct voicemail number so that pressing the **Messages** button automatically dials your voicemail system.

If you need to change the number that is dialed to access your voicemail, perform the following steps:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Voice Mail** and press the **select** softkey.

**STEP 3** Enter the number to dial for voicemail. Enter the phone number, including any digits you must dial to reach an outside line.

To clear the field of a previous entry, press the **clear** softkey. To enter letters, press the **Right** navigation button to scroll, then press the **alpha** softkey.

**STEP 4** Press the **save** softkey.
This chapter describes how to configure advanced features on your IP Phone. It contains the following sections:

- Configuring Privacy and Security Features, page 58
- Adding and Using Speed Dials, page 60
- Using the Paging Feature, page 62
- Monitoring/Accessing Another Phone from Your Phone (Cisco SPA 303), page 63
- Customizing Your LCD Screen (Cisco SPA 303), page 64
- Using Ring Tones (Cisco SPA 303), page 66
- Configuring Date and Time Parameters on Your Phone (Cisco SPA 303), page 66
- Using Star Codes, page 67
- Using the Interactive Voice Response Menu on the Cisco SPA 301, page 69
- Advanced Procedures for Technical Support Personnel (Cisco SPA 303), page 70
Configuring Privacy and Security Features

You can also configure these features using your PC and the IP Phone Web Interface. See “Blocking Caller ID,” on page 76 and the “Blocking Anonymous Calls,” on page 77.

NOTE For the Cisco SPA 301, configure these features using the IP Phone Web Interface or use the star codes (described below).

Blocking Caller ID

You can block Caller ID from your phone so that your phone number will not appear to the person you call.

Using the Setup button (Cisco SPA 303):

STEP 1 Press the Setup button.
STEP 2 Scroll to Preferences and press the select softkey.
STEP 3 Scroll to Block Caller ID and press the edit softkey.
STEP 4 Press the y/n softkey to choose yes.
STEP 5 Press the ok softkey.
STEP 6 Press the save softkey.

Using the star code:

Press *67 before dialing the number. (Caller ID blocking will remain enabled until you enter *68.)

Blocking Anonymous Calls

Blocking anonymous calls prevents calls with unknown Caller ID from ringing your phone. (For example, if a caller set his phone to not display Caller ID, the call is considered anonymous.) These callers receive a busy signal or message.
Using Advanced Phone Features
Configuring Privacy and Security Features

Using the Setup button (Cisco SPA 303):

**STEP 1** Press the **Setup** button.
**STEP 2** Scroll to **Preferences** and press the **select** softkey.
**STEP 3** Scroll to **Block Anonymous Call** and press the **edit** softkey.
**STEP 4** Press the **y/n** softkey to choose **yes**.
**STEP 5** Press the **ok** softkey.
**STEP 6** Press the **save** softkey.

Using the star code:

Press *77. Anonymous call rejection will be enabled until you enter *87.

Using Secure Call

With the secure call feature, the active call is encrypted so that others cannot eavesdrop. Before enabling Secure Call, ask your service provider if Secure Call is available.

Using the Setup button (Cisco SPA 303):

**STEP 1** Press the **Setup** button.
**STEP 2** Scroll to **Preferences** and press the **select** softkey.
**STEP 3** Scroll to **Secure Call** and press the **edit** softkey.
**STEP 4** Press the **y/n** softkey to choose **yes**.
**STEP 5** Press the **ok** softkey.
**STEP 6** Press the **save** softkey. When you dial, you will hear a tone before the call.

Using star codes:

- *16—Activate Secure Call feature for all calls.
- *18—Activate Secure Call feature for a single call.
To deactivate secure call:

- *17—Deactivate Secure Call feature for all calls.
- *19—Deactivate Secure Call feature for a single call.

Enabling Dial Assistance (Cisco SPA 303)

If you enable dial assistance, when you place calls, the LCD will display phone numbers based on the best matched entries in the Directory and Call History lists.

To enable dial assistance:

STEP 1  Press the Setup button.
STEP 2  Scroll to Preferences and press the select softkey.
STEP 3  Scroll to Dial Assistance and press the edit softkey.
STEP 4  Press the y/n softkey to choose yes.
STEP 5  Press the ok softkey.
STEP 6  Press the save softkey.

If dial assistance is enabled, when placing calls, use the navigation button to scroll down, highlight a phone number on the LCD screen, and press the dial softkey to complete the call.

Adding and Using Speed Dials

You can configure different types of speed dials:

- You can assigned unused line buttons on your phone to act as a speed dial.
- Depending on how your extensions are configured and how many line buttons are on your phone, you can have up to 2 speed dials on the line buttons.
- You can create speed dials assigned to a number, that, when pressed on the keypad, dials the number assigned to it. You can have up to 8 of these speed dials. Each speed dial can be a phone number, IP address or URL.
You can create and edit speed dials using your PC and the IP Phone Web Interface. See “Creating Speed Dials,” on page 78.

NOTE For the Cisco SPA 301, create speed dials using the IP Phone Web Interface.

Creating Speed Dials on Unused Line Buttons (Cisco SPA 303)

NOTE This feature must be enabled by your phone administrator.

STEP 1 Press the unused line button and hold down for three seconds. The Define Speed Dial window displays.

STEP 2 Enter the name for the speed dial.

STEP 3 Press the Down Arrow key to reach the phone number field. Enter the phone number and press Save.

STEP 4 After creating the speed dial, it displays next to the line button and is marked with a special icon. In the figure below, “Mary” is the configured speed dial.

STEP 5 Press the line button to use the speed dial.

Creating Numerical Speed Dials

STEP 1 Press the Setup button.

STEP 2 Scroll to Speed Dial and press the select softkey.
STEP 3 For a new speed dial, scroll to select an unused speed dial (marked with Not Assigned). To edit a previously existing speed dial, select it.

STEP 4 Press the edit softkey.

STEP 5 Enter the number to assign to the speed dial and press the ok softkey

Using Speed Dials

Cisco SPA 301
Press the number on the phone keypad for the speed dial and wait a few seconds.

Cisco SPA 303
To call one of your configured speed dial numbers, do one of the following:

- Open a phone line and press the number on the phone keypad for the speed dial, then press the dial softkey.
- Press the Setup button, scroll to Speed Dial and press the select softkey, choose the number, and press the dial softkey.
- Press the unused line button you have configured for a speed dial.

Using the Paging Feature

Your IP phone can automatically answer pages from other Cisco IP phones in the office, if your phone administrator has enabled this feature. When your phone is paged, the phone emits a series of beeps, and a two-way audio is established between your phone and the phone that called you. You do not have to accept the page.

Paging Another Phone

To page another phone, dial *96 plus the extension of the phone you are paging. If the phone you are paging is not set up to auto answer pages, the call will ring as a normal voice call.
Paging a Group of Phones

A phone can be configured to be part of a paging group. Each paging group has a number associated with it. Your administrator must give you the number of the groups that are configured. To page this group just dial the number of the paging group.

Configuring Auto Answer (Cisco SPA 303)

To configure your phone to auto answer pages:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Preferences** and press the **select** softkey.

**STEP 3** Scroll to **Auto Answer Page** and press the **edit** softkey.

**STEP 4** Press the **y/n** softkey to choose **yes**.

**STEP 5** Press the **ok** softkey.

**STEP 6** Press the **save** softkey.

Monitoring/Accessing Another Phone from Your Phone (Cisco SPA 303)

Your phone administrator may configure your phone so that you can monitor other user’s phones from your phone. If this feature is configured, some line buttons on your phone are assigned to display the status of another user’s phone. For example, if your line 3 is configured to display Bob’s phone line, the LED color shows you the status of his phone line:

- **Green**: Line is idle.
- **Red** (steady): Line is active or in use.
- **Red** (blinking): Line is ringing.
- **Orange** (solid): Line status cannot be monitored.
- **Orange** (blinking): The phone is subscribing to monitor the line status.
In addition, if your system administrator has configured it, you can press the same line button (3) to speed dial Bob's extension, or to pick up a ringing call at his extension.

Customizing Your LCD Screen (Cisco SPA 303)

You can customize your LCD screen in several ways.

Changing the LCD Screen Contrast

You can also change your LCD screen contrast from your PC using the IP Phone Web Interface. See “Changing the LCD Contrast (Cisco SPA 303),” on page 80.

To adjust the contrast of the LCD screen:

**STEP 1** Press the Setup button, scroll to highlight **LCD Contrast**, and press the **select** softkey.

**STEP 2** Use the navigation button to adjust the screen contrast. Pressing the **Left** navigation button decreases the contrast. Pressing the **Right** navigation button increases the contrast.

**STEP 3** Press the **save** softkey.

Configuring the Phone Screen Saver

You can enable your phone's screen saver and specify its appearance and the amount of time for the phone to be idle before it begins. Some of these options can be configured from your PC using the IP Phone Web Interface. See “Configuring the Phone Screen Saver (Cisco SPA 303),” on page 80.

To configure your screen saver:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Screen Saver Mode** and press the **select** softkey.
To enable your screen saver:

**STEP 1**  
In the **Screen Saver Mode** screen, choose **Enable Screen Saver** and press the **edit** softkey.

**STEP 2**  
Press the **y/n** softkey to choose **yes**.

**STEP 3**  
Press the **ok** softkey.

**STEP 4**  
Press the **save** softkey.

To specify the amount of time before the screen saver turns on if your phone is idle:

**STEP 1**  
In the **Screen Saver Mode** screen, choose **Screen Saver Wait Time** and press the **edit** softkey.

**STEP 2**  
Enter the time, in minutes, to wait before the screen saver starts.

**STEP 3**  
Press the **ok** softkey.

**STEP 4**  
Press the **save** softkey.

To change your screen saver picture:

**STEP 1**  
In the **Screen Saver Mode** screen, choose **Screen Saver Icon** and press **edit**.

**STEP 2**  
Press **option** multiple times to display the choices available until the one you want is displayed. Options are:

- **Background Picture**—Displays your phone's background picture.
- **Station Time**—Overlays the phone's station ID and time onto the picture.
- **Lock**—Overlays a lock graphic onto the picture.
- **Phone**—Overlays a phone graphic onto the picture.
- **Date/Time**—Overlays the date and time onto the picture.

**STEP 3**  
Press the **ok** softkey.

**STEP 4**  
Press the **save** softkey.
Turning on the Screen Saver

To immediately turn on your phone’s screen saver:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Screen Saver Mode** and press **activ**. (The screen saver must be enabled in order to immediately activate it.)

Using Ring Tones (Cisco SPA 303)

Each extension of your phone can have a different ring tone. You can also create your own ring tones.

Changing Your Ring Tone

To change a ring tone:

**STEP 1** Press the **Setup** button.

**STEP 2** Scroll to **Ring Tone** and press the **select** softkey.

**STEP 3** Choose the extension for which to choose a ring tone and press **change**.

**STEP 4** Scroll through the ring tones and press **play** to play the highlighted ring tone. Press **select** to choose the highlighted ringtone for that extension.

Configuring Date and Time Parameters on Your Phone (Cisco SPA 303)

Setting Your Phone’s Date and Time

The date and time for your phone normally come from the SIP proxy server or NTP server. However, if you need to change some date and time parameters, you can follow these steps:
Using Advanced Phone Features

Using Star Codes

STEP 1 Press the Setup button.

STEP 2 Scroll to Time/Date and press the select softkey.

STEP 3 Enter the date in the following format: mm*dd*yy (this will display as m/d).

STEP 4 Enter the time in the following format: hh*mm*ss (this will display as (h:mm).

STEP 5 If the time does not display a.m. (a) or p.m. (p) correctly, adjust with Offset. To change from a.m. to p.m., enter *12*00*00, to change from p.m. to a.m., enter #12*00*00.

STEP 6 Press the save softkey.

You can set just one of these choices, if necessary.

Using Star Codes

Your IP phone can support numerous “star codes” to access phone supplementary services. These codes, which start with *, are entered before dialing a telephone number and provide services. For example, to block caller ID (star code 67), you would dial *67, followed by the telephone number you are calling. Following is a list of commonly-used star codes.

NOTE Some star codes may not be available to you; consult your phone administrator for more information.
### Using Star Codes

Using the Interactive Voice Response Menu on the Cisco SPA 301

The Cisco SPA 301 provides an interactive voice response menu. You can enter options and receive information about the phone and its operation.

To access the IVR, pick up the handset and enter ****.

You can either press 9 for help, or directly enter the number of the menu option you want. Pressing 9 helps you through a menu of commonly used tasks. After pressing 9, you enter the number of the settings you want to change and follow the voice instructions.

You can also enter the IVR option by pressing the numbers of the option, then press #. Some menus require entering of further information or numbers. Typical options you might use are listed in the following table:

<table>
<thead>
<tr>
<th>Code</th>
<th>Definition</th>

<tr>
<td>732668</td>
<td>Reboot the phone. After entering #, hang up to begin rebooting.</td>
</tr>
</tbody>
</table>
STEP 2  Choose from the following options:

- Network: This setting is to configure and troubleshoot the network. You should not change this setting unless directed to by your Administrator as this can seriously alter your phone's functions.

- Product Info: This setting displays the product name, serial number, software version, hardware version, MAC address and Client Certificate.

- Status: This setting displays the status of the phone, extension and line buttons.

- Reboot: See Rebooting Your Phone, page 71.

- Restart: Restarts your phone.

- Factory Reset: Resets your phone to the factory default settings.

CAUTION

If you choose factory reset, you will return the phone to the original factory settings and will erase all current settings, including the directory and call logs. It is also possible that your phone extension will change.

- Custom Reset: Resets your phone to the latest customization profiles.

- Language: Changes the language on your phone (subject to availability and configuration by your system administrator).

Rebooting Your Phone

This setting is to configure and troubleshoot the network. You should not change this setting unless directed to by your phone administrator as this can negatively affect your phone's function.

To reboot your phone:

Cisco SPA 301

STEP 1  Press ****.

STEP 2  Enter 732668, then press #.
### Using Advanced Phone Features
Advanced Procedures for Technical Support Personnel (Cisco SPA 303)

---

**STEP 3** Hang up to begin the reboot.

---

**Cisco SPA 303**

**STEP 1** Press the Setup button.

**STEP 2** Scroll to Reboot and press select.

**STEP 3** Press ok.
Using the Web Interface

Your Cisco IP Phone provides a web interface to the phone that allows you to configure some features of your phone using a web browser. This chapter contains the following sections:

- Logging in to the Web Interface, page 74
- Setting Do Not Disturb, page 75
- Configuring Call Forwarding, page 75
- Configuring Call Waiting, page 76
- Blocking Caller ID, page 76
- Blocking Anonymous Calls, page 77
- Using Your Personal Directory (Cisco SPA 303), page 77
- Viewing Call History Lists, page 78
- Creating Speed Dials, page 78
- Accepting Text Messages (Cisco SPA 303), page 78
- Adjusting Audio Volume, page 79
- Changing the LCD Contrast (Cisco SPA 303), page 80
- Configuring the Phone Screen Saver (Cisco SPA 303), page 80
Logging in to the Web Interface

**STEP 1** Get the IP address of your phone:

**Cisco SPA 301**

a. Press ****.

b. Enter 110, then press #. The IP address is recited.

**Cisco SPA 303**

a. Press the **Setup** button.

b. Scroll to **network** and press the **select** softkey.

c. Scroll to view **Current IP**. This is the IP address of your phone.

**STEP 2** On your PC, open Internet Explorer.

**STEP 3** Enter the IP address in the browser’s toolbar.

The web interface has three main tabs:

- **Voice**—Contains information about your phone, including the following sub-tabs:
  - **Info**—Contains system and phone information (read only).
  - **System**—Allows you to configure a password and network settings.
  - **Phone**—Allows you to enable the screen saver (Cisco SPA 303).
  - **User**—Contains settings for call forwarding, speed dials, call waiting, privacy settings, and audio settings.

- **Call History**—Displays calls received and made from your phone.

- **Personal Directory**—Contains your personal address book.
Setting Do Not Disturb

Use the Do Not Disturb feature to prevent incoming calls from ringing your phone. If you have voice mail configured, incoming callers immediately reach voice mail. If voice mail is not configured, callers hear a busy signal or message.

To set Do Not Disturb:

**STEP 1** Log in to the web interface.

**STEP 2** In the **Voice** tab, click the **User** tab.

**STEP 3** Under **Supplementary Services**, locate the **DND Setting** field.

**STEP 4** Choose **Yes** to turn on **Do Not Disturb**.

**STEP 5** At the bottom of the page, click **Submit All Changes**.

**NOTE** You can turn off Do Not Disturb from your phone or from the web interface.

Configuring Call Forwarding

**STEP 1** Log in to the web interface.

**STEP 2** In the **Voice** tab, click the **User** tab.

**STEP 3** Under **Call Forward**, you can configure the following fields:

- **CFWD All Dest**—Forwards all calls to a single number that you enter.
- **CFWD Busy Dest**—Forwards all calls to another number when the phone is busy. Enter the number to which to forward calls.
- **CFWD No Ans Dest**—Forwards calls to another number if there's no answer at your phone. Enter the number to which to forward calls.
- **CFWD No Ans Delay**—Number of seconds to delay forwarding calls, if there is no answer at your phone. Enter the number of seconds to delay.

**STEP 4** At the bottom of the page, click **Submit All Changes**.
Configuring Call Waiting

Call waiting alerts you when you are on a call by ringing and displaying a status message that you have another incoming call. If you turn call waiting off, incoming calls do not ring your phone if you are on another call, and the caller hears a busy signal or message.

To turn call waiting on or off:

**STEP 1** Log in to the web interface.

**STEP 2** In the Voice tab, click the User tab.

**STEP 3** Under Supplementary Services, locate the CW Setting field.

**STEP 4** Choose yes or no to enable or disable.

**STEP 5** At the bottom of the page, click Submit All Changes.

Blocking Caller ID

You can block Caller ID from your phone so that your phone number will not appear to the person you call.

To block Caller ID:

**STEP 1** Log in to the web interface.

**STEP 2** In the Voice tab, click the User tab.

**STEP 3** Under Supplementary Services, locate the Block CID Setting field.

**STEP 4** Choose yes or no to enable or disable.

**STEP 5** At the bottom of the page, click Submit All Changes.
Blocking Anonymous Calls

Blocking anonymous calls prevents calls with unknown Caller ID from ringing your phone. (For example, if a caller set his phone to not display Caller ID, the call is considered anonymous.) These callers receive a busy signal or message.

To block anonymous calls:

STEP 1 Log in to the web interface.
STEP 2 In the Voice tab, click the User tab.
STEP 3 Under Supplementary Services, locate the Block ANC Setting field.
STEP 4 Choose yes or no to enable or disable.
STEP 5 At the bottom of the page, click Submit All Changes.

Using Your Personal Directory (Cisco SPA 303)

Your IP phone provides a phone directory for you to store and view frequently dialed numbers. This directory appears on your phone, and you can dial numbers from the directory.

To view and edit your personal directory:

STEP 1 Log in to the web interface.
STEP 2 Click the Personal Directory tab. A window appears with the Personal Directory listings for your phone.

To enter a new item into the directory:

STEP 1 select the line and enter the information in the following format:

\[ n=Marketing;p=5045551212 \]

where “n=” indicates the name for the entry and “p=” indicates the phone number (including area code).

STEP 2 At the bottom of the page, click Submit Changes.
Viewing Call History Lists

To view Call History Lists:

**STEP 1** Log in to the web interface.

**STEP 2** Click the **Call History** tab. A window appears with the call history lists for your phone. These include:

- **Placed**—Shows the last 60 numbers dialed from your phone.
- **Answered**—Shows the caller ID of the last 60 answered calls.
- **Missed**—Shows the last 60 missed calls.

Click the tab for each list to view it.

Creating Speed Dials

You can configure up to 8 speed dials for the number keys. Each speed dial can be a phone number, IP address or URL.

To create or edit a numerical speed dial:

**STEP 1** Log in to the web interface.

**STEP 2** In the **Voice** tab, click the **User** tab.

**STEP 3** Under **Speed Dial**, enter the speed dial numbers you want to create or edit.

**STEP 4** Click **Submit All Changes**.

Accepting Text Messages (Cisco SPA 303)

Your phone can accept text messages from some IP phones or services.
To accept text messages from other IP phones:

STEP 1 Log in to the web interface.
STEP 2 In the Voice tab, click the User tab.
STEP 3 Under Supplementary Services, in the Text Message field, choose yes.
STEP 4 Click Submit All Changes.

To accept text messages from a third party:

STEP 1 Log in to the web interface.
STEP 2 In the Voice tab, click the User tab.
STEP 3 Under Supplementary Services, in the Text Message from 3d Party field, choose yes.
STEP 4 Click Submit All Changes.

## Adjusting Audio Volume

STEP 1 Log in to the web interface.
STEP 2 In the Voice tab, click the User tab.

Under Audio Volume, you can adjust the following settings:

- Ringer Volume
- Speaker Volume (Not applicable to Cisco SPA 301)
- Handset Volume
- Headset Volume (Not applicable to Cisco SPA 301)

Enter a volume between 1 and 10, with 1 being the lowest.
Using the Web Interface
Changing the LCD Contrast (Cisco SPA 303)

- Deep Bass—Enable to enhance low frequency audio.

**STEP 3** Click **Submit All Changes**.

---

**Changing the LCD Contrast (Cisco SPA 303)**

**STEP 1** Log in to the web interface.

**STEP 2** In the **Voice** tab, click the **User** tab.

**STEP 3** Under **LCD**, you can adjust the LCD contrast by entering a number between 1 and 10, with 1 being low contrast.

**STEP 4** Click **Submit All Changes**.

---

**Configuring the Phone Screen Saver (Cisco SPA 303)**

To configure the phone screen saver:

**STEP 1** Log in to the web interface.

**STEP 2** In the **Voice** tab, click the **Phone** tab.

Under **General**, you can configure the following:

- **Screen Saver Enable**: Turns the screen saver on and off.
- **Screen Saver Wait**: The number of minutes that the phone is idle before the screen saver starts.
- **Screen Saver Icon**: The display type:
  - A background picture.
  - The station time in the middle of the screen.
  - A moving padlock icon. When the phone is locked, the status line displays a scrolling message “Press any key to unlock your phone.”
- A moving phone icon.
- The station date and time in the middle of the screen.

**STEP 3** Click **Submit All Changes**.
Cisco provides a wide range of resources to help you obtain the full benefits of the Cisco Small Business SPA 300 Series IP Phones.
