Charging the battery

Before using the Galaxy Watch3 for the first time, you must charge the battery.

To charge, place the Galaxy Watch3 on the wireless charger.

Connect

Visit Galaxy Apps, Google Play Store or the App Store to install the Galaxy Wearable app to connect your watch and smartphone.

Activate

The Galaxy Watch3 (R845 and R855) are 4G LTE-enabled. Get texts, alerts, make and receive calls, even when you leave your phone behind.

Consult your service provider for more information about activation.

Navigate

Swipe the screen to:

- View notifications and widgets
- View the Quick Panel
- Navigate screens
- View additional apps
- Drag the touch bezel around the edge of the display to scroll

Calls

Tap to make a call

Swipe to answer

Swipe to reject the call and send the call to voicemail

Swipe up to open **Send messages** to send the call to voicemail and respond with a preloaded or customized message

4G LTE standalone connectivity is only available on Samsung Galaxy Watch LTE versions. Standalone voice calling on LTE version requires initial pairing with eligible smartphone and separate qualifying wireless plan. Your carrier may not support standalone voice calling, or support may be available in certain areas. Please check with your carrier for more information. Standalone functionality limited if paired phone is not powered on or connected to a wireless network. If connected to a network and in Stand-alone mode, the signal strength will display.

Customize

Touch and hold the watch face and select a preloaded watch face or download a new one.

Tap **Customize** to create custom watch face or download additional watch faces by swiping to the last screen and tapping Galaxy Store.
