Product Overview

Front View
1. Enclosure Door
2. Release switch
3. Mounting holes

Rear View
1. SATA Power Port
2. SATA Data Port

Tooleless Enclosure Assembly

WARNING! Hard drives and storage enclosures require careful handling, especially when being transported. If you are not careful with your hard disk, lost data may result. Always handle your hard drive and storage device with caution. Be sure that you are properly grounded by wearing an anti-static strap when handling computer components or discharge yourself of any static electricity build-up by touching a large grounded metal surface (such as the computer case) for several seconds.

1. Open the enclosure door by sliding the release switch.
2. Slide the 2.5” SATA hard drive into the enclosure with the label facing upward into the 2.5” Hard drive slot.

3. Press the enclosure door closed so that the release switch clicks back into place.

4. Enclosure Assembly is now complete.
