BRG1350AVRLCD User’s Manual

To store the UPS for an extended period, cover it and store with the battery fully charged. While in storage, recharge the battery every three months.

6. To maintain optimal battery charge, leave the UPS plugged into an AC outlet at all times.

1. Power Switch
2. Power On Indicator
3. LCD module display
4. Down/Display Button

5. Up/More Button
6. Enter/Setup Button
7. Battery and Surge Protected Outputs
8. USB Charging Ports
9. USB Cable/DSL Surge Protection
10. Output Meter
11. Circuit Breaker
12. Communication Protection Ports
13. Serial/USB Ports to PC
14. Coax/Cable/DSS Surge Protection

**REPLACING THE BATTERY**

- Battery replacement procedure:
  - Turn off and unplug all connected equipment.
  - Turn the UPS off and unplug it from the AC power source.
  - Remove the batteries from the compartment.
  - Replace the batteries with new ones.
  - Reassemble the UPS.

CAUTION: To avoid electric shock, turn off the unit and unplug it from the AC power source before servicing the battery.

**INSTALLING YOUR UPS SYSTEM**

**POWER PANEL® PERSONAL EDITION SOFTWARE**

- To reduce the risk of fire or electric shock, do not use the unit on any transportation equipment.
- To reduce the risk of fire or electric shock, do not use the unit near any aquarium.
- To reduce the risk of fire or electric shock, do not use the unit with or near an aquarium.
- To reduce the risk of fire or electric shock, do not use the unit with or near an aquarium.

**HARDWARE INSTALLATION GUIDE**

- The LED indicator will illuminate to warn the user that a wiring problem exists, such as bad ground, missing ground or reversed wiring. If this is illuminated, disconnect all electrical equipment from the outlet and have an electrician verify the outlet is properly wired. The UPS will not provide surge protection without being plugged into a grounded and properly wired outlet.

- To reduce the risk of fire or electric shock, do not use the unit near any aquarium.
- To reduce the risk of fire or electric shock, do not use the unit with or near an aquarium.

**AVR automatically increases low utility power or decreases high utility power to a consistent and safe 110/120 volt.**

**FUNCTION SETUP GUIDE**

- The USB Charging ports provide 5V 2.1A power output.
- The USB port allows connection and communication between the USB port on the computer and the UPS unit.
- The USB Charging ports provide 5V 2.1A power output.
- The USB port allows connection and communication between the USB port on the computer and the UPS unit.
- The USB Charging ports provide 5V 2.1A power output.
- The USB port allows connection and communication between the USB port on the computer and the UPS unit.
Who is Providing this Warranty?

The warranty only covers the original purchaser. Coverage ends if you sell or otherwise transfer the product.

How Do You Get Warranty Service?

1. Before contacting CyberPower, identify your Product model number, the Purchase Date, and each item of Connected Equipment (E.G. Computer tower, Computer Monitor, Ink Jet Printer, Cable Modem, etc).
2. Use the web site at http://www.c /power.com/support/ or Call us at (877) 297-6367.
3. If your product requires warranty service you must provide a copy of your dated purchase receipt or invoice.

How Do You Open a Connected Equipment Claim?

1. Call us at (877) 297-6367 or write to us at Cyber Power Systems (USA), Inc., 4241 12th Ave. E, STE 400, Shakopee, MN 55379, or send us an e-mail message at customers@cyberpower.com, within 10 days of the occurrence.
2. When you contact CyberPower, identify the Product, the Purchase Date, and the item(s) of Connected Equipment. Have information on any applicable insurance or other resources of recompensation that are available to the Initial Customer and Request a Claim Number.
3. You also need to provide a description of the damage to your connected equipment.
4. CyberPower will provide you in the product, you must repay all shipping costs, you are responsible for packaging and shipment, and you must pay the cost of the repair estimate.

Who Is Covered?

All claims must be made within ten days of the occurrence.

What Will We Do To Correct Problems?

1. CyberPower will replace or repair or refund you at its discretion, within a reasonable time, if it determines that your Product is defective in material or workmanship. If the Product is defective in material or workmanship, CyberPower will replace or repair or refund you at its discretion. CyberPower will refund you the full purchase price plus any shipping expense.
2. If it appears that our Product failed to protect any equipment plugged into it, we will also send you forms for making your claim for the connected equipment. We will mail you a claim form that was damaged because of your failure to install the warranty. If there is no fair market value (FULL REPLACEMENT COST) of the equipment at the time of the damage. We will use Orion Blue Book, or another price list for the evaluation of the products.

How Long Do I Have To Make A Claim?

CyberPower excludes any liability for personal injury under the Limited Warranty and Connected Equipment Guarantee. CyberPower excludes any liability for damage to any connected equipment or property, or for any loss arising from the failure of the Product to protect the connected equipment. CyberPower does not authorize use of any Product in any High Risk Activities or with aquariums. CyberPower does not authorize use of any Product in any High Risk Activities or with aquariums.

Where Can I Get More Information?

The application of the United States Convention of Contracts for the International Sale of Goods is expressly excluded. CyberPower is the warrantor under this Limited Warranty.

For further information please feel to contact CyberPower at CyberPower Systems (USA), Inc., 4241 12th Ave. E, STE 400, Shakopee, MN 55379; call us at (877) 297-6367; or send us an e-mail message at claims@cyberpowersystems.com.

Cable Modems: Adapters do not provide protection to the connected equipment. PowerSave! 

Interactive Modems: The service is connected to a device in a High Risk Activity, or with aquariums. CyberPower does not authorize use of any Product in any High Risk Activities or with aquariums.

Net/Modems: Any such use is improper and is a misuse of the Product

Advanced Energy-Saving Patented Bypass Technology

CyberPower’s patented GreenPower UPS™ Bypass Technology reduces UPS energy costs by up to 75% compared to conventional UPS models. Even when utility power is normal, conventional UPS models constantly pass power through a transformer. By contrast, under normal conditions the advanced circuitry of the GreenPower UPS™ bypasses the transformer. As a result, the GreenPower UPS™ efficiency is significantly increased while decreasing waste heat, using less energy, and reducing energy costs.

When an alternate power condition occurs, the GreenPower UPS™ automatically runs power through its transformer to regulate voltage and provide "safe" power. Since utility power is normal over 88% of the time, the GreenPower UPS™ operates primarily in its efficient bypass mode.

The GreenPower UPS™ is also manufactured in accordance with the Restriction on Hazardous Substances (RoHS) directive making it one of the most environmentally friendly on the market today.

FCC Compliance Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference, including interference that may cause unintended operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Reorient the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
