

BAMBOO™ Ink

A smart stylus for writing, note-taking and annotating, for Windows Ink.

Need an intuitive tool to get words on screen? Bamboo Ink is the natural choice. This digital pen is the hassle-free way to capture your thoughts, take notes and mark up documents on the go. It works with apps on a broad range of pen-enabled devices, so you can be more productive on your terms.

Write naturally

Immersed in a project, or getting a to-do list together, Bamboo Ink feels as natural to use as putting pen to paper. Its sensitive fine tip combines up to 4096 pressure levels, so everything you write down will be precise. Just tap on the Windows Ink Workspace icon or your favorite apps on the screen to start writing – no pairing needed. And the long-lasting battery means you can stay focused on your projects.

Customize your pen

With Bamboo Ink you can choose to add an accessory kit of 3 nibs – soft, medium and firm – to best suit your way of working. They make for a really authentic on-screen feel.

One pen for many devices

Bamboo Ink is optimized for Windows Ink and works with both the Wacom Active ES protocol and Microsoft Pen Protocol (MPP) devices, giving you the flexibility to work however you like.

App to take you further

You can keep your ideas alive by editing and enhancing them, using your stylus in the Bamboo Paper app, which gives the feeling of a paper notebook.

Optimized for Windows Ink on touch devices with Wacom Active ES or Microsoft Pen Protocol (MPP) technology; check wacom.com/comp for list of tested devices.

Optimized for Windows Ink

BAMBOO™ Ink

Product specifications

Color	Grey
